Bridger-Teton National Forest
U.S. Department of Agriculture

Weiner Creek Prescribed Burn

Scheduled:	**Mid September- Late October 2011**
Location:	**Approximately 10 miles south of Alpine, WY**
Burn Unit:	**Approximately 1800 acres**
Fuel Type:	**Aspen, Mountain Shrub, Sagebrush and Grasslands**

Objectives:

• Improve the forage conditions for wildlife by restoring the health and function of mountain shrub, sagebrush, grassland and aspen stands in the project area.

• Fuels Reduction: Prescribed fire allows the use of fire as a natural method for treating fuels and promoting desired and historical fire regimes.

Cooperators:

This fire is a cooperative project supported by the Wyoming Game and Fish Department and the Bridger-Teton National Forest

Weiner Creek 2007

Project Details:

Actual ignition (2-5 days) will be dependent on meeting strict parameters for weather and fire behavior conditions. Both hand ignition and/or aerial ignitions with a helicopter will be utilized. Forest users may experience temporary smoky conditions in the vicinity of the burn unit, along with the possibility of occasional, short-term trail or road closures. Interagency fire managers will attempt to minimize any adverse impacts as the burn proceeds. Thank you for your cooperation.
