Group Obstruction (<= 500 FT AGL)
Group Obstruction Lighted (<= 500 FT AGL)
Possible Obstruction - unknown height
Disclaimer
Not for use as a sole source for aid used for navigation. The FAA should be contacted for current information. No warranty is made by the USDA Forest Service, as to the accuracy, reliability, or completeness of these data. This information is subject to change without notice. The USDA Forest Service reserves the right to update the information at any time, with no notification.
Obstructions were only placed on the map, if they were reported to be 500 ft of less Above Ground Level (AGL) except for one dataset from FCC (Federal Communications Commission) that included no height information. This data is the best available information, but it is missing many from the data, and it is likely there is additional information missing from the data.
USE AT OWN RISK.
Digital Obstruction Files were downloaded from FAA: March 18, 2022 FCC: Antenna Structure Registration: January 2022 FCC: Corrected to the service layer
Further information including eCFR/AIM (electronic chart update manual) and USPF (United States Flight Information Files) is required in order to be useful for navigation. There may be additional information such as temporary cranes, or other data, that is not reported to the FAA or the FCC (Notice to Airmen) issued by the FAA. All this information can greatly influence safety. It is likely there are a number of airsacks in the FAA data.
