PURPOSE OF CATALOG

The catalog provides users with a list of items available from the Billings Fire Cache. It is also a reference tool to help ensure safety and efficiency within the cache community. Listed within the Alphabetical, Numerical, and Kit Sections are items which are currently stocked at the Billings Fire Cache. **This catalog is not a complete list of items or support that can be obtained from the Cache.** The catalog includes items which are normally used in fire suppression activities. Individual kit components and Cache-use-only items are not listed in this catalog and are generally not available outside of kits. For a specific need, contact the Cache Manager.

To ensure rapid processing of your order use:

NFES CATALOG NUMBERS
PROPER DESCRIPTION
CORRECT UNIT OF ISSUE (from BFK catalog)

All Supply &/or Incident Replacement Requisitions are now processed using IROC – INTERAGENCY RESOURCE ORDERING CAPABILITY

Remember that the established, primary purpose of the Fire Cache is to support active incidents and is not a normal source of non-emergency replenishment.

Billings Fire Cache has developed this information for the guidance of its authorized customers and is not responsible for the interpretation or use of this information by anyone except its authorized customers. The use of trade, firm, or corporation names in this publication is for the information and convenience of the reader and does not constitute an endorsement by the cache of any product or service to the exclusion of others that may be suitable.

BILLINGS FIRE CACHE

The **Billings Fire Cache** (BFK) is a Type II National Interagency Support Cache operating in association with the Northern Rockies and the National Cache System. The Billings Fire Cache strives for excellence in quality of products and services.

The Cache is located in Billings, Montana. The Cache stores supplies and equipment for a force of 750 firefighters. Restocking is from resources within the National Cache System including DLA, GSA & local vendors. Normal complement includes six Mobile Cache support Vans, NFES 82069 & 08602, ready for shipment. Over the last 10 years the average support level has been for a force of 2,600 firefighters, therefore resources may be limited during high fire activity while being re-supplied through the National Cache System.

Our Mission is to provide logistical support in response to Wildland Fire and All Risk Emergency Incidents, for the East Zone Northern Rockies Region, with Interagency cooperation in the sharing of resources within the Zone, Region and on a National scale. The Zone that BFK is responsible for is an area nearly the size of Texas.

BFK is financed using normal funding procedures through the BIA Rocky Mountain Regional Office, BLM Montana State Office and Montana State DNRC. These Agencies also provide space, personnel, equipment and initial stocking with a cost share plan that is reviewed and signed annually, based on an operation plan and budget review. The Cache receives direction from the Interagency Board of Directors consisting of the Fire Management Officers from the Bureau of Land Management, the Bureau of Indian Affairs, Forest Service, and State of Montana Department of Natural Resources and Conservation.

Geographical zone directly served by the Billings Fire Cache

AGENCY	UNIT	OFFICE Name and Location	ZONE DISPATCH
BIA	MT-CRA	Crow Agency, MT	MT-BDC
	MT-FBA	FT. Belknap Agency, Harlem, MT	MT-GDC
	MT-FPA	FT. Peck Agency, Poplar, MT	MT-BDC
	MT-NCA	Northern Cheyenne Agency, Lame Deer, MT	MT-BDC
	MT-RBA	Rocky Boy's Agency, Box Elder, MT	MT-GDC
BLM	MT-BDC	Billings Field Office, MT	MT-BDC
	MT-LED	Lewistown Field Office, MT	MT-LEC
	MT-MCD	Miles City Field Office, MT	MT-MCC
	ND-DID	Dickinson Field Office, ND	ND-NDC
USFS	MT-CGF	Custer Gallatin National Forest, MT/SD	MT-BDC

	MT-SOS	Southern Land Office, Billings, MT	MT-BDC
FWS	MT- FWS	U.S. Department of Fish & Wildlife - Eastern MT	MT-LEC, MCC
	ND- FWS	U.S. Department of Fish & Wildlife - North Dakota	ND-NDC

Dispatch Centers in the East Zone Northern Rockies (Montana, North and South Dakota) order NFES Cache supplies directly from the Billings Fire Cache. In addition to serving the areas within the BFK geographic zone, BFK on a case-by-case basis directly supports the Cody Interagency Coordination Center (WY-CDC), the Bozeman Interagency Dispatch Center (MT-BZC) and Great Falls Interagency Dispatch Center (MT-GDC) under the *Neighborhood Policy.* The decision to support CDC, BZC and GDC will be made in coordination with the Northern Rockies Cache (NRK) & the Rocky Mountain Cache (RMK).

THE PRIMARY PURPOSE OF BFK IS THE SUPPORT OF ACTIVE INCIDENTS, usually Type III Incidents or larger. **Items are supplied only on a temporary loan basis.** Durable and accountable items are to be returned to the Cache at the close of the Incident. Initial Attack Caches maintain supply inventories at a level to handle normal operations; their usual inventory replenishment should be processed through normal channels (local purchases, DLA, GSA, I/A Incident Replacement Orders etc.). Direct shipment from vendors, such as DLA, is the most cost-effective way of doing business. BFK is not equipped or intended to fill non-emergency replenishment orders**.** We welcome your comments regarding changes that would be beneficial to the overall fire program within the area serviced by BFK.

OPERATING HOURS

This chart is only a guide; fire activity will determine when the Cache will switch to longer hours and/or 7-day coverage
On-call coverage period is generally June thru October; thus the Cache is available for emergencies 24-hours a day during these months

SEASON	FIRE DANGER/ACTIVITY	HOURS	DAYS	STAFF Availability
Pre-Season	January – May	0730-1600	Mon-Fri	Limited availability
Fire Season	Early Season	0730-1600	Mon-Fri	ON-CALL
	Low	0730-1600	Mon-Fri	ON-CALL
	Moderate	0700-1630	??	ON-CALL
	High	0700-1730	Sun-Sat	7 days, w/extended hrs.
	Extreme	0600-2300	Sun-Sat	7 days, w/extended hrs.
Post-Season	October – December	0730-1600	Mon-Fri	Limited availability

Keeping in mind the safety of Cache staff and drivers, BFK policy is to be Closed from 2300 -- 0600 hours, except for extreme circumstances.

BFK staffing level is minimal during the off-season; the Cache will not always be staffed and/or open on a daily basis. Off-season access and use of the Cache should be prearranged well in advance.

On-Call for current Fire Season

The BFK main phone number (406.896.2870) is forwarded to the on-call person evenings and weekends.

ACTIVE INCIDENT ORDERING

All NFES items are ordered as supply ('S') orders. All orders placed for equipment ('E') should be placed with the local or zone Dispatch Center. All supply orders should be limited to those items defined in the NWCG NFES or BFK catalogs. Nonstandard orders for all other equipment, supplies and services which are not available at the cache should be placed with the Dispatch Center.

All orders must be processed in IROC and processed through Zone Dispatch Centers. These include Incident replacement, Incident support, emergency replenishment, hazardous fuels reduction, pre-positioning, project, and training. Orders may be placed directly to BFK by approved Dispatch Centers. All orders to BFK should be placed through IROC, with confirmation of order by telephone call.

CACHE DEMOB SPECIALIST (CDSP)

The Billings Fire Cache has CDSP's available to support the demobilization of fire supplies from Incidents. The CDSP's will work in cooperation with the Incident Logistics Section and the Supply Unit Leader. The CDSP's will work for the Billings Fire Cache.

FILL OR KILL POLICY

When BFK "kills" (unable to fill-UTF) an order, BFK will check with the Incident to see if they want the order passed to the next level.

- If they do, the order will be forwarded on to MT-NRK (the Northern Rockies Cache in Missoula).
- If they do not, then the order is killed and finalized on that particular request number.

BFK will note any "UTF" or Partial fills in the comment lines on the Issue and Shipping Status Reports. If the Incident requires the remainder of a partially filled item, they will need to reorder (using a new S #). **There are no back orders** on emergency resource orders. Neither Billings nor the Missoula Cache process any back orders.

SHIPPING

BFK will call and provide shipping status immediately upon filling an order to the Incident/Dispatch office (via the fax, if requested, or E mail); this report will serve as notification/confirmation of resources assigned and shipping information. Any partial filled or killed orders will be noted in the comment lines of the ISSUE REPORT and followed up by a phone call (if possible) to appropriate areas.

BFK, in conjunction with Billings Logistics Dispatch, will make the necessary arrangements to transport supplies. Shipments will be scheduled throughout the day as soon after receiving the order as possible to ensure arrival at the Incident camp no later than 2300 hours. Drivers unable to deliver supplies and return to home base by 2300 hours will stay overnight at the Incident and return in the morning. Otherwise, the shipment will be transported the next morning.
DRIVERS ARE NOT TO BE UNNECESSARILY DETAINED.

SCHEDULED ORDERING TIMES

During the first 36 hours of an Incident, BFK will accommodate orders and adjust operating hours as necessary. **After** the first 36 hours, BFK will request that all Incidents place supply orders at a mutually agreed-upon designated time as determined/discussed with the Cache.

OTHER TYPES OF ORDERS

RESTOCK

Replacement/restock orders MUST be the direct result of Incident suppression activities and MUST be ordered through IROC.
Durable items will be supplied as a temporary loan only and, at the close of the Incident, will be returned to BFK.

INCIDENT REPLACEMENT REQUISITIONS

Prior to release from Incidents, firefighting resources will prepare and have approved by the Supply Unit Leader or Agency Fire Management Officer an Incident Replacement Requisition (NFES 1300 or 1286 – see Forms Section pg. 23) for items that have been lost, consumed, or worn out during the Incident; these resource orders should be processed at the Incident. If that is not possible, replacement orders must be processed within 30 days of control of the Incident and can be processed at the personnel's home unit, BFK, or the nearest National Geographic Area Cache. The Supply Unit must assign Incident to Cache S#'s (100,000-199,999).

ROUTINE

Non-emergency (routine) orders should be directed to the source of supply, e.g., DLA, GSA, or private vendors. Purchasing direct from the vendor is the most cost-effective way of doing business. BFK is not equipped or intended to fill **routine** replenishment orders but will assist with information such as vendor or other sources available. For your convenience, information regarding GSA/DLA is provided in the Introduction Section of the NWCG Catalog.

HINTS FOR REVIEWING ORDERS

If a Resource Order is incomplete or unclear, the order cannot be processed until all necessary information is received or verified. If all necessary/accurate information is on the order at the time it is placed, it will expedite the order and delivery time.

Understanding what the Incident is requesting:

- Aerial Ignition Devices vs. Ping Pong balls (not table-top)
- Pumpkin vs Tank, collapsible
- 3000 FT of 3-foot hose vs. 30 LG of 100-foot hose (LG is correct U/I)

ASK – If it sounds weird or you are not clear, please ask for clarification. See cross-reference table (pg. 21)

SUGGESTIONS TO THE ORDERING UNITS:

TAPE: It is a good idea to order extra tape for sealing boxes at the close of the Incident. Blue Painters tape (NFES 0763), shrink-wrap, rubber bands, etc. are preferred rather than filament tape on all items except fiberboard boxes.
SHRINKWRAP, PALLET COVER BANDS, PALLET COVERS: Added to the Mobile support Vans and available at all Caches.
PALLETS: May be available at BFK and other Caches to help facilitate returns.
HOSE ROLLERS: All hose should be rolled before returning to the Cache. Hose rollers (hand and motorized) are available at the Cache.
PROPANE: 0491 Tank, Propane must now be ordered separately when ordering the 0480 Coffee Kit: **Coffee kits do NOT come with propane**.

BATTERY RECYCLE KITS are now included on the Cache Vans issued by BFK

ARE YOU ORDERING BATTERIES?
All NFES items ordered through the National Cache System are classified with a "Unit of Issue" AKA "Unit of Measure"

All items are ordered by a Unit of Issue PG = package, EA = each, KT = kit, PR = pair

For instance, AA batteries have a U/I of PG – a Sleeping Bag has a U/I of EA – and so on…
If you want a package of batteries, you would order one PG
FYI – each PG has 24 individual AA batteries
The Cache system groups items into Standard Packs – this is for convenience when working with large quantities of like items
It is encouraged, but not required, to order in a Standard Pack. For instance, we group AA batteries, NFES 000030, in a box of 12 PG – So that would be 12 PG per box 12/BX
Therefore – to get a nice compact quantity of AA batteries you might order 12 PG & we would ship you a carton – one box - containing 12 PG

Not all items the Cache provides are grouped in Standard Packs – order what you need & we will send the item to you – what we may do is bump the quantity to fit a standard pack. We will notify you on the Issue report of any changes. Please call with any questions.

We are here to support our customers. If you have questions, we are available to help!

Billings Fire Cache

This page Intentionally Left Blank

INITIAL OVERHEAD PERSONNEL GEAR NEEDS

Red-carded individuals not affiliated with an initial attack cache may be outfitted with gear by BFK on the condition that each individual's agency provides a proper project code; these account codes must be obtained prior to filling the order. These offices are the BIA Billings Area Office, BLM Montana State Office / Billings Field Office, and the Custer Gallatin National Forest Supervisor's Office. Employees outside of these specific local offices should go through their local initial attack Cache for overhead personnel supply needs. In order to maintain better control of the Cache inventory, to reduce administrative tracking of individual personnel equipment, and to fulfill the true purpose of supporting incidents, the following procedures will be followed.

Once a year, **prior to May 15th**, the local agency Fire Management representative of these three offices is asked to submit a consolidated resource order for supplying individual overhead with gear necessary for supporting Incidents. The following management numbers will be established each year and maintained by BFK and the FMO.

For BLM/MSO:	MTBFK000025	other order – BLM support
For BIA/RMR:	MTBFK000013	other order – BIA support
For FS/CGF:	MTBFK000014	other order – CGF support

Under revised regulations, BFK can no longer use 9999's as a charge code for individual outfitting. It is the responsibility of each organization to either purchase the item through DLA/GSA or contact the respective FMO's to **obtain a project code or appropriate charge code**.

Individuals needing shirts, jeans, and gloves should make arrangements at the Cache to be fitted so that the proper NFES number item can be ordered. This is especially important for individuals that are attending training because exchanges may not always be possible at the training site. The following items are available from BFK. (Any additional needs should be provided by the agency through local procurement or DLA/GSA).

_____	Shirts	2 EA	NFES – varies depending on size
_____	Jeans, BDU	2 PR	NFES – varies depending on size
_____	Gloves	1 PR	NFES – varies depending on size
_____	Fire Shelter, Complete M2002	1 EA	NFES 0925 or 0975, large size
_____	Hard Hat w/chin strap	1 EA	NFES 7287
_____	Headlamp	1 EA	NFES 0718 (order AA batteries separately)
_____	Batteries, AA	1 PG	NFES 0030
_____	Goggles	1 PR	NFES 0318
_____	Earplugs	2 PG	NFES 1027
_____	First Aid Kit, 1 Person	1 KT	NFES 0067
_____	Pack, Personal Gear	1 EA	NFES 1855
_____	Pack, Fireline, Complete	1 EA	NFES 0674
_____	Bag, Sleeping	1 EA	NFES 0128
_____	Canteen w/o cover	2 EA	NFES 0037

Once the order is approved by the Agency FMO and received, the Cache will pull all the supplies and make them available at the Cache for the individual(s) to pick up. An ISSUE REPORT showing items, quantity, and costs will be given to the individual when they pick up their order and available to the respective agencies. This order should cover all the supply needs for red-carded individuals for each unit. **It will *NOT* be regular practice to outfit individual overhead or crews at the time of their incident assignments during fire season.**

Agency FMO Approval_____ **Date**_____

Cache Manager Receipt_____ **Date**_____

This Page Intentionally Left Blank

Equipment vs. Supplies – NFES vs. non-NFES – Local vs. Cache

All NFES items are to be considered supplies and ordered with "S" numbers; equipment orders, now ordered with "S" numbers, will continue to be ordered through dispatch coordination centers. ***See the Nat'l Mob Guide for standardization of the definitions of Equipment & Supplies.***

EQUIPMENT All equipment orders must be placed with Dispatch Centers. Equipment is tracked as an individual resource.

SUPPLIES

Supply items include all, but are not limited to, NFES items, Mobile Cache Vans, telecommunications equipment, ATMUs, RAWS, etc. All NIRSC radio equipment will be ordered as (S) requests in IROC. **It is important to note that established ordering channels for radios and RAWS have not changed and will continue to be ordered through the dispatch coordination offices**. BFK's involvement in these orders is providing a pick-up and delivery point. The Dispatch Center may coordinate with BFK/NIRSC to return the Starter System to NIRSC. Discuss the preferred shipping method with the NRCC Equipment Dispatcher.
Supply orders for multiple quantities of "like" items do not require individual S numbers. So, for instance, when ordering ten chain saw kits, do not assign ten S numbers; they can all be placed and filled on one S number.
NFES: BFK now receives supply orders through IROC. NFES supply orders are processed and filled and notification given through proper channels. Transportation is arranged through Billings Logistics Dispatch. Items can include tents, chain saw kits, logistics kits, medical kits, tools, Cache Vans, etc. If the item is a National Resource or National Critical Item, BFK will coordinate with dispatch per established procedures.
Non-NFES: Non-NFES supplies are handled by the dispatch center Equipment/Supply Dispatcher who works directly with the local agency purchasing department to fill, if possible. This includes the receiving of orders, purchasing, payment, mobilization, demobilization, paperwork, transportation, and notification process. When the need exceeds the dispatch center's purchasing capability, local personnel or National Buying teams are available to assist with purchasing and contracting needs for the Non-Cache items. Some of the items are Band-Aids, juice, bleach, motel rooms, supplemental food, personal hygiene items, etc.

Local vs. Cache

There are some items that have NFES numbers and are carried by the Cache but are stocked **only** for building kits and are generally not available outside of the kits. These include items such as medical supplies, coffee, pens, pencils, and photocopy paper. The Cache issues medical kits, logistics section kits, coffee heating kits, office supply kits, etc. but normally **does not** send out the individual kit content items. The best way to get these individual items is through the Dispatch Center and the local purchasing agent. If unsure on how to order an item, contact BFK for assistance.
Note: Items such as chain saws are normally not available from BFK outside of a kit; contact the Cache if special needs exist.

MOBILE CACHE SUPPORT VANS

The purpose for the Cache Van is to establish an Incident Base Camp and not to support two hundred fifty firefighters. The van contents meet or exceed the national standards with additional items per Northern Rockies standards. See the kit-packing list in the Kit Section of this catalog for the kit contents, NFES 82069 (R1) & 08602 (R2). **Cache Vans should be ordered separately**. BFK MAY issue the Van by component.

Cache Vans are ordered on an "S" number through the Billings Fire Cache. BFK maintains six Mobile Cache Vans. The Cache Vans are kept in Billings at BFK. BFK will authorize any assignment of a Van. BFK will process the issue of the Van to the incident.
The Cache Vans are pre-loaded and can be on the road within a short time during regular business hours. Ordering of the tractor will be coordinated with Logistics Support. BFK will issue a Cache Van for Type I & II Incidents and only when there is an established Incident Command Post (ICP). The trailer and tractor will not remain on the fire. The items need to be unloaded and the empty trailer brought back to BFK as soon as possible. This will enable the Cache to get another Van built and ready to dispatch. **NO EMPTY Cache Van trailers are available from BFK.** See Chapter 70 of the NRCC Mobilization Guide for a listing of other vans and base units within the geographic zone.

TYPE III TEAM PRE-ORDER

The Type III Team can submit their pre-order to Dispatch. The pre-order is generally designed to support about 50 personnel and helps to establish the team.

STARTER SYSTEM KIT

The 4390 Starter System ICS Command/Logistics Radio System Kit is ordered as needed. The System will be ordered as "Supply" through the Dispatch Equipment/Supply desk. BFK will be the delivery and pick-up point for the ordered System. The Cache is not involved in the mobilization/demobilization process.
Northern Rockies Coordination Center is the POC for the Radio System Kit – the order is placed upward through NRCC through Great Basin Radio Support Cache (NIRSC)

Continued next page

The ordering Incident (communications unit) is responsible for a complete inventory of the Starter Kit when returning it from the Incident. It is also the Incident's responsibility to disconnect any battery cables (such as in a repeater box) before shipping. Per NIRSC, the Starter System is sent as one unit, and not split up. To maintain quality and quantity for the field, each Starter System or kit will be returned directly to NIRSC for refurbishment immediately after each assignment. In conjunction with the Incident, Logistics Support, and the nearest Interagency Support Cache, arrangements may be made to coordinate delivery to NIRSC.

ACCOUNTABILITY

All items sent out of BFK are loans and will be processed in the IROC system. All items purchased with emergency funds by the Incident become property of the Fire Cache or purchasing agency and are to be marked and used for "Fire Use Only." An Issue Report will be sent with all cache orders and must be signed by the proper authorities at the Agency/Incident as received and returned to BFK; a copy will be provided for the Incident's records. When the items have been delivered to the correct destination, the items become the Incident's responsibility. Applicable agency property regulations and the Federal Property Management Regulations apply. The Issue Report will be treated as a formal issue of property, durable and non-durable goods to an Incident. **It is the responsibility of the receiving unit to see that ALL Accountable property, durable property, and any consumable goods remaining at the close of an Incident are returned to the issuing Cache.** It is the responsibility of the receiving unit to prepare reports of loss, or damage, for all durable and accountable property not returned to the Cache within 30 days of demobilization. The Incident Commander or Logistics Section Chief should review, sign, and take any follow-up action on these reports to the Incident close out; after that it becomes the responsibility of the jurisdiction agency. All reports of loss or damage must be submitted to the Incident Agency and the issuing cache. (See NFES 1139 NWCG HB2, Interagency Incident Business Management Handbook 35.5 & Form OF-289).

Accountable Property: (may be referred to as capital equipment) Items with a purchase price of $5,000 or greater. Accountable property also applies to items that the Incident Agency considers sensitive (e.g., cameras, radios etc.). Property is tagged with an agency identification number. These items MUST be returned to the supplying Cache. If the items are destroyed, burned over, etc. the remnants should be returned to the Cache accompanied by a report of loss/damaged items (pg. 35). The Cache property officer must verify and account for all loss/damaged Accountable property.

Pumps, chain saws, and radios are usually in short supply and **must** be returned to the issuing Cache as soon as the need is over. If this property is lost or destroyed, written notification must be provided to the issuing Cache. If the item does not operate in satisfactory manner, note the possible cause of the problem on a tag and attach it to the item.

BFK cannot credit an Incident for returns of out-of-date, condemned, or non-repairable items. If items are damaged or unserviceable, please tag the item as such.

Durable Property: Durable properties are those non-accountable items that have a useful life expectancy greater than one Incident (e.g., sleeping bags, water-handling accessories, tents, Nomex (PPE), headlamps, tools, etc.). These items should be returned to the supplying Cache, or a report of loss/damaged items should be sent to the Cache.

Using tape, secure box flaps in a closed position. Use filament tape (NFES 0222), blue painters tape (NFES 0763), shrink (stretch) wrap, hose rubber bands, etc. on cartons. Please do not use filament tape on tools as the residue is difficult to remove.

Consumable Goods: Consumable goods are items normally expected to be consumed on the Incident (e.g., batteries, Meals-Ready-to-Eat, plastic canteens).
Leftovers of these items can be returned to the Cache or given to the local hosting unit.

Some items are consumable and when used should not be returned; e.g., disposable mess-gear, canteens, cubies, etc. During demobilization of an Incident, partial cartons of excess consumables can be returned to the Cache for issuance. Documentation of disposal of large quantities of these items is required. Another source for utilizing partial boxes is the local district, forest, or agency responsible for the Incident. Used batteries may be thrown away, all alkaline batteries (AA, repeater, etc.) manufactured after 1989 can be safely disposed of in a landfill. BFK now includes a formal battery recycling kit on the Cache Vans - instructions are included.

FUEL, GAS ENGINES, PURGING & HAZARDOUS ITEMS: see the Hazardous Materials section of this catalog for how to handle these items.

Fire Loss/Use Tolerance: The goal of property management on Incidents is to prevent the loss of property and supplies. To accomplish this goal, Incident Management Teams (IMT) and Incident Agencies may develop Loss/Use tolerance guidelines. These guidelines are frequently a percentage of the durable property. BFK's Fire Loss/Use tolerance goal is 10%. BFK annually has less than 1.0% Loss/Use. If the loss of durable items exceeds loss tolerance guidelines, the IMT needs to provide documentation of the loss to the Incident Agency and issuing Cache.

RETURNS

All returns must be identified with the Incident name and Incident number to ensure proper accountability. The return documentation (e.g. Waybill) needs to contain a full inventory, including NFES catalog numbers, description of items, quantity, and unit of issue of each item being returned. This is important to ensure accurate crediting of the returns to the correct ordering agency and Incident. Upon request, BFK can supply Return Worksheets for specific Incidents. The Incident Waybill (NFES 1472) form or an equivalent may also be used. **It is the ordering agency's responsibility to return items using the proper procedure, not the Cache.**
Returns must be received at BFK within 30 days from close of the Incident and be accompanied with required documentation to accurately reflect Incident costs.
For fires, the "control date" is used as the close of an Incident. BFK may not be able to accurately credit returns after 30 days from the close of the Incident.

The lack of timely returns of fire supplies to the Cache impedes the ability to support Incidents or other Caches. Maximum support can be achieved by prompt returns of supplies to the Cache that issued them upon demobilization, or sooner if no longer needed. It is strongly recommended that a Cache Demobilization Specialist (CDSP) be ordered for all large Incidents and Incidents utilizing multiple sources of supply. BFK may be able to provide a CDSP depending on Cache Incident support activity and workload.

If items are taken from one Incident to another Incident (without returning to the Cache) it is both Incident's responsibility to inform the Cache of the items that are being transferred. It also must be confirmed which Incident should be credited for the returns when they are finally returned to the Cache. **This practice is highly discouraged because it makes tracking and accounting very difficult. If it does occur, make sure all items are carefully inventoried and transferred to the new Incident and that documentation is sent to BFK,** who will share info with any other affected Caches. This documentation becomes very important in the case of Trespass Fires. A Cache Demobilization Specialist should also be considered in these situations. **Request the BFK Incident Transfer Policy.**

Caches are NOT hazardous materials disposal facilities. All fueled equipment and fuel containers **must be emptied and mechanically purged BEFORE** shipping back to BFK. This is a DOT regulation subject to penalties. See the Hazmat Section of this catalog for more information, starting on page 35.

SPECIFICS ON HOW TO RETURN ITEMS

Extra effort by the Incident Supply Unit in sorting, marking, packing, and inventorying will greatly assist both the Incident Supply Unit and the receiving support Cache.

Please emphasize the use of protective attire, such as nitrile gloves, dust masks, long sleeve shirts, helmets, etc. when handling used equipment. This is especially important when rolling hose or handling used clothing and sleeping bags/mats.
Sort and Separate items:
- By NFES Number
- Used from Unused

Contaminated (poison ivy/oak, etc.) Serviceable from Unserviceable. The 'Fire Equipment Storage and Refurbishing Standards' NFES 2249 Guidelines are useful in determining the condition of an item. Coordinate with the issuing cache on disposal of unserviceable items.

If possible, all items should be returned in the original packaging by the standard pack; e.g., 10 shovels per box, 5 chairs per box. Boxes/items should be clearly marked or tagged with NFES number, description, quantity and status; used, unused, damaged, contaminated, not in working order, unserviceable, purged, etc. If an item is not working, please tag as such and try to describe the problem.

Absolutely no Red Bio-Hazard Disposal Bags will be accepted or returned to the cache. The Medical Unit at the Incident should handle all biohazards.

COMMUNICATIONS EQUIPMENT must be returned from the Incident or the local dispatch to the National Incident Radio Support Cache (NIRSC) at the National Interagency Fire Center in Boise, ID. This must be done as soon as the incident or the need is over. An inventoried way-bill **MUST** accompany the returned boxes. Please take a moment before sealing the kit box to ensure contents are inventoried and will not be damaged in transit. Accountable property reports are included in communications kits; use as necessary to report lost or damaged equipment. Make sure the battery cables are disconnected.

Do not hold radios on a local unit or reassign to another Incident. They must be returned to NIRSC for refurbishing.

Hose	Sort by NFES. Drain and roll all hose. Do not return hose that was not issued by the Cache. It should be returned to the unit that supplied it to the Incident. Hand and gas hose rollers are available for order from the Cache
Clothing/Sleeping Bags	Separate serviceable from unserviceable. If items are contaminated (poison oak/ivy), bag separately and mark bag that items have been contaminated. Always use gloves and long sleeve shirts when handling used clothing/sleeping bags
Sleeping Mats	Use original carton or bundle in groups of 50 with plastic wrap (NFES 0315/0316)
Tables/Chairs	Make sure the tables/chairs are Cache items and not a contractor's, such as the caterer. Remove all signs, tape, etc. added at the Incident. Plastic wrap chairs 5 to a bundle or re-pack in the original carton
Tools	Return ALL tools, regardless of condition. Use original cartons to help prevent injuries. If possible, replace sheaths. Bundle in groups of 5 with hose rubber bands (NFES 0727) or stretch plastic wrap (NFES 0315/0316). **DO NOT USE FIBER TAPE on tool handles**, this tends to ruin the handles
Water Handling	Sort by NFES and box them up

NFES NUMBER ASSIGNMENTS

The NFES number assignments provide a standard system of identification. Items are admitted to, changed within, or deleted from the NFES system per field input to the NFES Geographic Cache Managers. They in turn decide if the request is best handled within the geographic area or forwarded to the NFES Committee for national consideration. The NFES Representative is the focus for these recommendations. New items are agreed to and accepted by the NFES Committee and the NFES Geographic Area Caches. Changes and deletions follow the same procedure and are monitored by the NFES Committee Chair. See the NWCG Catalog for more information on the process of introduction of a new NFES item.

0001 – 6999: (except 4000-5999) Nationally stocked fire support items, including kits.

4000 – 4999: Communications and Electronic Kits. This series is assigned by the National Incident Radio Support Cache (NIRSC), NIFC and monitored by the NFES Committee Chair. Assignments and changes are reported using the same procedures as above.

7000 – 9999: Local Use Items. Are assigned locally by Caches. These item numbers are not the standardized national item.

- 7000 Are assigned to kit components or Cache-use-only items. These are not normally shipped out of the Cache as individual items.
- 8000 Are assigned to non-standard items that BFK carries and are available for Incident use, but are not covered in the national standard numbers (0001-6999)
- 9000 Northern Rockies Cache (NRK) uses these for individual medical items.

DOUBLE NFES NUMBERS- SAME ITEM

There are several NFES items that are assigned more than one NFES number. The reason for this is different sizes or units of issue or because the item is sent out by itself and in a kit as a component. Below are some examples. Not all NFES numbers are carried by BFK.

Description	NFES	U/I	# in U/I
Bag, Cotton, Lunch or Tool, 10” x 24”	0018 3318	BD EA	100/BD
Bag, Garbage Can Liner, Plastic, 30 GL, 39” x 33”	0021 3300	BX EA	125/BX
Cord, Cotton, Braided, 1/8” x 3000’ 1/8” x 100’	1285 0052	SL HK	30 HK/SL
Cord, Nylon Shroud	0533 3305	SL HK	 100 FT/HK
Rag, Wiping, 50 LB Bale 1 LB Bundle	0565 3309	BE LB	50 LB/BE
Sheeting, Plastic, Black, 20’ x 100’ 10’ x 20’	0144 1287	RO SH	10 SH/RO

NFES ITEM DELETIONS, ADDITIONS, CHANGES

DELETED ITEMS –

These items have been deleted nationally (2017) & are no longer available in the Cache system:
0651 Oil SAE 30 WT, 0671 CD-ROM Blank, 0770 Masking Tape, (2020) 0772 Mop-up Kits

ADDED ITEMS –

New in 2017: 0418 Reducer, 0568 Tank, 1138 Signal Mirror, 1175 Can, 1201/1207 Valves, 1274 Face Shroud, 1535 Fuel Container, 2113 Form
New in 2018: 1220 Hose, 1026 Road Sign Kit, 36” Length BDU- various,

CHANGES –

BFK has complied with all recommended changes from the National Kit Committee for 2020
BFK now carries:
000020 Container, 1 GL cubitainer w/ small mouth, w/ box
000880 Cover, pallet, clear
000634 Band, rubber, pallet cover
001880 Oil, bar & chain, 1 GL
007443 Container, 5 GL, plastic, collapsible, w/ overpack – EA
001220 Hose, booster
006031 Tank, collapsible – 6000 GL
006061 Tank, folding, 1000 GL w/ frame
000664 Tank, folding, 1500 GL w/ frame
000881 Wrap, structure protection, 54” x 300’
008653 Kit, sprinkler (NR specific)
ADDITIONAL ITEMS HAVE BEEN ADDED/DELETED IN THE CATALOG FOR 2020
All Kit changes for the current year will be reflected in the kit contents lists in this catalog.

ABBREVIATIONS

The abbreviations shown below are for the Unit of Issue (U/I). This is how Cache items are issued. This is also how items should be ordered from the Cache. Many of the items in the Cache system are stocked or packaged in **standard packs**. Standard packs may or may not be the same as the unit of issue. If possible, order quantities equivalent to the standard pack.

Example: NFES 0128 Sleeping Bags come in Unit of Issue of **EA**, if you want 10 boxes, you would order 50 EA, because Cache **Standard PK** = **5 EA per BX**. Unfortunately, AA Batteries have an ever-changing standard pack (currently 12PG/BX)- please call if you have any questions!

This Page Intentionally Left Blank

These directions have been created and distributed by the **National Interagency Fire Center (NIFC)**

The first step in the process is for an Incident Replacement Requisition (OF-315/NFES #001300) to be filled out and signed by an authorized Incident Management Team member or host unit agency official. IMT's may authorize replacement of NFES items, as can a unit's Fire Management Officer (FMO) for Incidents without an assigned IMT. Please see the National Interagency Mobilization Guide, the NWCG National Fire Equipment System Catalog, and the Interagency Incident Management Handbook excerpts in Attachment 1.

Incident Replacement Requisitions typically are initiated by Incident personnel for Type 1 and 2 Incidents and by dispatchers for Type 3 and 4 Incidents (or those Incidents for which there is not a fully functioning Supply Unit).

In almost all cases, Incident Support Caches only fill requests for NFES items. For this reason, requests for non-NFES items should be recorded on a separate Incident Replacement Requisition for processing by a home unit, and not placed with a Cache.

If Geographic Area policy allows direct ordering between Incidents and Caches, request numbers should be assigned to replacement requisitions by Incident personnel and the requisitions placed directly with the servicing Cache (i.e. the Cache with primary responsibility to support the Incident). Cache personnel generally prefer direct ordering so that they can straighten out any questions about items and quantities directly with the requesting party. A block of request numbers from S-100,000 to 199,999 is reserved for "Incident to Cache" ordering.

If Geographic Area policy is for Incident personnel to place all supply orders through a dispatch office, rather than directly with Caches, Incident Replacement Requisitions should be placed with a dispatch office. In this case, request numbers may be assigned by dispatch personnel, the request entered in IROC, and the requests placed with the Cache through the IROC-ICBS interface. This procedure will also typically be used for Type 3 and 4 incidents in which the requisition is initiated in the dispatch office. If necessary, the IROC user can usually determine the next unassigned request number by using the "Used Request Number" function in IROC.

There is currently not a specific "replacement" order type in IROC. In order to make sure that cache personnel know that an IROC order represents an Incident Replacement Requisition, the IROC user should enter the words "Incident Replacement Requisition" in the IROC "Special Needs" field of each replacement request.

If a dispatch office receives an Incident Replacement Requisition with pre-assigned request numbers within the "Incident to Cache" block (S-100,000 to 199,999), they should simply fax the requisition to the Cache for processing. It's important to note that for Cache personnel to enter any supply request in ICBS, the request number must fall within the range of "Incident-to-Cache" request numbers set aside for this purpose. Also, no request numbers in this range can be entered in IROC.

If a demobilized resource was unable to get an Incident Replacement Requisition signed or submitted prior to leaving an incident, the form should be filled out and sent to the Incident

CONTINUED NEXT PAGE

Incident Replacement Requisition Processing for NFES items continued

dispatch office for request number assignment, approval and placement with the servicing Cache. Home unit dispatchers can often help facilitate this process for demobilized personnel.
All Incident Replacement Requisitions for **non-NFES** items should be submitted by Incident personnel to the host dispatch office. A dispatcher will usually enter the requests in IROC and follow Incident host agency policy for obtaining approval of the replacement requisition. If approved for home unit replacement, the dispatcher will show the requests as “fill/close” with the remark “Filled by home unit” in IROC. If not approved by the Incident host agency, the dispatcher will show these requests as cancelled “Not approved” in IROC.

Date: April 2020

To: Incident Supply Unit Leader; Ordering

From: Josh King
Fire Cache Manager
Billings Category II National Interagency Support Cache

Subject: **Radio Incident Demobilization**

Our policy for the Demobilization of Radios and Communication Equipment is in accordance with the directions in the:

National Interagency Mobilization Guide, Page 44

"NIRSC radio systems and kits should be inventoried, sealed, and returned promptly to NIRSC/NIFC or the nearest National Fire Support Cache. Do not stockpile kits.
Spare seals are supplied in each box. Incidents are responsible for ensuring all radio systems or kits are returned or accounted for on a Property Loss Statement".

Billings 2020 Cache Annual Operating Plan, Page 12

All NIRSC radio equipment will be ordered as (S) Requests in IROC. It is important to note that established ordering channels for radios, ATMU's, REM's, and RAW's is through the local Dispatch Center. BFK's involvement with these orders is to provide a staging point for pick-up and delivery. The Dispatch Center may coordinate with BFK/NIRSC to return the Starter System to NIRSC. Discuss the preferred shipping method with the NRCC Equipment Dispatcher.

NIRSC Radio equipment is ordered in IROC through an Incident's supporting Dispatch Center. All Mobe/Demob must be arranged at the Local Dispatch Center supporting the Incident in order to track and maintain proper property accountability. The Billings Fire Cache is not the responsible party of accountability for this equipment - the Incident and Dispatch Centers are.

Josh King
Supervisory General Supply Specialist

SPECIFIC EXCERPTS

Per 49 CFR 171.8 (05/04), ***Hazardous Material*** *means a substance or material, that the Secretary of Transportation has determined is capable of posing an unreasonable risk to health, safety, and property when transported in commerce, and has been designated as hazardous under section 5103 of Federal hazardous materials transportation law (49 U.S.C. 5103). The term includes hazardous substances, hazardous wastes, marine pollutants, and elevated temperature materials, materials designated as hazardous in Hazardous Materials Table (see 49 CFR 172.101), and materials that meet the defining criteria for hazardous classes and divisions in part 173 of subchapter C of this chapter.*

Per 49 CFR 172.200, ***Shipping Papers*** *(03/05) (a) Description of hazardous materials required. Except as otherwise provided in this subpart, each person who offers a hazardous material for transportation shall describe the hazardous material on the shipping paper in the manner required by this subpart.*

Per 49 CFR 172.300, ***Marking*** *(03/05) (a) Each person who offers a hazardous material for transportation shall mark each package, freight container, and transport vehicle containing the hazardous material in the manner required by this subpart.*

Per 49 CFR 172.400, ***Labeling*** *(03/05) Each person who offers for transportation or transports a hazardous material in any package or container, shall label the package or container with labels specified for the materials in the 172.101 table in 49 CFR.*

Per 49 CFR 172.700, ***Training*** *(05/03) (b) Scope. Training as used in this subpart means a systematic program that ensures a HAZMAT employee has familiarity with the general provisions of this subchapter, is able to recognize and identify hazardous materials, has knowledge of emergency response information, self-protection measures and accident prevention methods.*

Per 29 CFR 1910.1200 (12/00), ***Hazard Communication*** *(a) Purpose. (1) The purpose of this section is to ensure that hazards of all chemicals produced or imported are evaluated, and that information concerning their hazards is transmitted to employers and employees. This transmittal of information is to be accomplished by means of comprehensive hazard communication programs, which are to include container labeling and other forms of warning, safety data sheets and employee training.*

BFK and other Caches are not hazardous materials disposal facilities

It is the responsibility of the Incident to properly dispose of **unused and waste fuel** as well as any other hazardous material, as prescribed by applicable laws, rules and regulations. Hazardous material shipments are regulated by the Department of Transportation. OSHA regulates the storage, usage and employer requirements. Special precautions and documentation requirements must be adhered to when shipping and handling hazardous materials. Anyone shipping or handling hazardous material that is not familiar with the requirements should contact the agency hazardous materials specialist for instructions. Non-compliance may result in civil penalties up to $27,500 being assessed to the individual shipping the hazardous material.

IT IS AGAINST THE LAW NOT TO NOTIFY THE CARRIER ABOUT HAZARDOUS MATERIAL BEING SHIPPED

Any such material received by the Cache will be disposed in accordance with applicable laws, rules and regulations; the cost of which will be charged to the responsible person/Incident.

When purchasing items, request the Safety Data Sheet (SDS) for any hazardous materials. It is best to mark the item with the date of purchase, especially for paints. If you do not know if the item is classified as a hazardous material, ask the vendor or check with your agency hazardous materials specialist.

When shipping hazardous materials, make sure to complete all required paperwork. This includes a description of the item including identification number, proper shipping name, hazard class, packing group and total quantity/weight of items.

The training requirements in 49 CFR 172 are applicable to Federal employees because the term employer is defined in the regulations to include United States Departments and Agencies when shipping in commerce.

Hazardous materials are very serious and should be treated as such, with the responsibility of any mishaps resting on the individual rather than that of the government. Important preventions to remember are: stay alert, know what you are handling, and ask for help from the recognized experts.

Remember, any fueled equipment and fuel containers (except propane) must be empty and mechanically purged BEFORE shipping. DO NOT use liquid purge. See steps for mechanically purging on page 45.

It is best to transport empty fuel containers in an open-air, non-enclosed vehicle. If this cannot be done, then here are the **Common Transport Rules to Remember:**

1. Only packaging described in CFR 49 is to be used
2. Secure supplies with packaging to prevent damage
3. Packaging is secured in transport vehicle to prevent movement
4. No sharp projections within the cargo hold area of the transport vehicle
5. Ensure no risk exists for puncture, damage, and/or ignition
6. Make sure multiple classes of materials may or may not be shipped together
7. Load hazardous materials in the rear of transport vehicle
8. Ensure the total weight/volume of all hazardous materials in transport vehicle does not exceed allowable limits for any one type

SAFETY IS EVERYONE'S RESPONSIBILITY

Safety First, Every Job, Every Time

There are many dangers in modern Incident camps, in addition to the expected first aid accidents. Below is a list of a few of these dangers more serious than first aid accidents:

- Hazardous Materials
- Bloodborne Pathogens from contact with Biohazards such as body fluids
- Hantavirus disease caused by exposure to rodent excreta

To help limit exposure, use protective attire, such as latex/nitrile gloves, leather gloves, dust masks, long sleeve shirts, and helmets when handling used equipment. This is especially important when handling potentially contaminated items.

Hazardous material management is a team effort required by law. Key points:

- Employer Knowledge of Chemical Hazards
- Training
- Chemical Inventory
- Labeling
- SDS (previously known as MSDS) Always request and read them
- Chemical information availability (read containers, etc.)
- Hazardous communication implementation plan (right-to-know)
- Emergency Planning

Four Methods of Employee Protection:

- Safe work practices
- Engineering control (remove, minimize hazards)
- Administrative control (conditions of employment, training, etc.)
- Personal protective equipment (PPE)

5 R's of Safety

- Recognize
- Retreat
- Report
- Record
- Restrict

Routes of Exposure

Inhalation
Ingestion
Injection
Absorption

NUMBER ONE CONTRIBUTOR TO ACCIDENTS IS FAILURE TO FOLLOW ESTABLISHED POLICIES AND PROCEDURES. REGULATIONS ARE IN PLACE TO PREVENT ACCIDENTS AND SAVE LIVES.

Contact your safety officer at the incident or local agency for more information.

HAZMAT ITEMS

Hazardous materials that may be encountered include: aerial ignition devices (Ping Pong balls), fuels, wet batteries, battery acid, aerosol paint, paint thinners, cleaning products, small engines that may contain fuel after use, propane, fusee's, and used fuel hoses. Below are examples of the most common hazardous material that Incidents and BFK ship:

Oxygen, compressed: NFES 001728 (Oxygen Therapy Unit), & 081728 (NRK, Oxygen Therapy Unit)

UN1072, OXYGEN, COMPRESSED, 2.2 (5.1)

Marking & Label: NON-FLAMMABLE GAS AND OXIDIZER LABEL, OR **OXYGEN LABEL ONLY**

Requires approved bottle with relief valve and packed in a strong shipping box

Suggested quantity limit per load: 12 Cylinders (CY) @ 8 Lbs. Each, (96 Lbs.)

Extinguisher, Fire: 20 A:120 BC NFES 000307

UN1044, FIRE EXTINGUISHER, 2.2

Marking & Label: UP ARROWS AND NONFLAMMABLE GAS LABEL

173.309 contain exceptions from labeling & placarding when shipping by ground and packed in a strong shipping box (Cardboard container is suitable).

Suggested quantity limit per load: 21 Cylinders (CY), 20 LB tank, @ 38 Lbs. Each, (798 Lbs.)

Fusee, signal device, hand: NFES 000105

NA1325, FUSEE, 4.1, PG II

Marking & Label: FLAMMABLE SOLID LABEL, KEEP FIRE AWAY

173.184 – must be packed in 4G UN POP fiberboard box

Commercial air restricted; additional requirements apply

Suggested quantity limit per load: 21 BX @ 38 Lbs. Each, (798 Lbs.)

Tank, Propane: NFES 000491

UN1075, PETROLEUM GASES, LIQUEFIED, 2.1

Marking & Label: FLAMMABLE GAS LABEL

Commercial air restricted; additional requirements

Quantity limit per load: 21 Cylinders (CY), 20 Lb. Tanks, @ 38 Lbs. Each, (798 Lbs.)

Can, Gasoline, 5-Gal, DOT style. NFES 000606 is HAZMAT if **NOT** in a carton or **NOT** drained and purged.

The CAN is **NOT HAZMAT** if it is drained and mechanically purged and in a carton.

Proper Declaration if it is not drained and purged: **UN1203, GASOLINE, 3, PG II**

Label required on can: FLAMMABLE LIQUID

Marking on can: GASOLINE, UN1203

Suggested quantity limit per load: 50 EA @ 5 Lbs. EA, gas must be < 1 oz. in each can, (250 Lbs.)

Aerial Ignition Device, Ping Pong ball: NFES 003411, (NOT Regulated by 49 CFR if labels are removed)

IF HAS LABELS -Proper Declaration: **UN1490, POTASSIUM PERMANGANATE, 5.1, PG II**

Marking and Labels: 173.4 for small Quantity Exception. NO labels required. The shipper must certify conformance with this section by marking the outside of each package with the statement: "This package conforms to 49 CFR 173.4". If labels are on each box and not removed, then certify as HAZMAT.

Quantity Limits: NO limit, if 173.4 applies. If shipped as HAZMAT, limit is 25 BX @ 8 LB/BX (200 LB.)

The above limits were set by Northern Rockies Haul-Back Policy at 80% of maximum allowable quantity to provide for a safe margin of error so the Placard exception in 49 CFR 172.504 (c) applies. By limiting the total HAZMAT gross weight to **less than 1,001 LB** (total aggregate gross weight), the exception applies and a CDL driver with HAZMAT endorsement or Placards are **not** required for transporting the lower limits of HAZMAT.

Refer to HAZMAT guide in the National NFES catalog for additional information and Waybill example.

EXAMPLE OF WAYBILL WITH HAZMAT ITEMS

Date: Sept. 1, 2013 Time: 1600 **INTERAGENCY INCIDENT WAYBILL** **Page 1 of 1**

Ship To: Billings Fire Cache, 551 Northview Dr., Billings, MT 59105	**Shipped From:** ROCK CREEK ICP, RED LODGE, MT	
Incident name: ROCK CREEK		
Incident number: MT-CNF-013472	**Carrier/Driver name:** Lonnie Hinz	
Acct. / Mgmt. Code: MT911000HU0000.LFSPxxxx0000	**Vehicle number:** I-123456	**Trailer number:** N/A
Contact name: Josh King	**Pieces:** 11	**Weight:** 718 LBS.

INTRUCTIONS FOR SHIPPING INTERNAL COMBUSTION POWERED ENGINE EQUIPMENT & FUEL CONTAINERS

All internal combustion engines must be operated until starved of fuel. All Engine fuel lines and fuel containers, **must be completely EMPTY** of all fuel and purged properly before shipping. **No fuel or flammable liquids are to be transported to the Cache** in any form, except propane. This includes gasoline, gasohol, kerosene, diesel, Avgas, Coleman fuel, etc.

- All fuel containers must be emptied and purged before shipping
- A container with punctures or ineffective seals is not to be returned to the cache

PREFERRED MEANS OF PURGING IS MECHANICAL: (Liquid purge is no longer recommended)

- Drain fuel tank or container into appropriate container for Incident/customer use or disposal
- Operate engine until starved of fuel
- Vent tank or container until dry if possible or as long as possible to eliminate most of the fumes. When dry, recap the tank or container. Tag all items that have been drained and purged
- **Purging fluid, NFES 0700, is not available by local purchase or from the Cache system**

When transporting an item with an internal combustion engine equipped with a battery, the battery cables must be disconnected and secured to prevent sparks. This also applies to radio battery cables.

Generator fuel lines must be turned off before moving, even when moving around fire camp. If this is not done, damage to the engine may occur. Generators should be serviced after 50 hours of running time.

Engines or fuel containers that have been used on the incident should be shipped in an open-air, non-enclosed vehicle if possible. It is okay but not recommended to transport in an enclosed van. Ensure all empty containers are shipped in a secure, upright position and all lids are tightly closed.

All hazardous materials being shipped must be correctly identified on a Waybill per 49 CFR. See Waybill Example for correct HAZMAT DECLARATION INFORMATION from an Incident, on page 44.

All internal combustion equipment and fuel containers must be drained and mechanically purged, declared on shipping papers and a copy provided to the driver. Drivers should be present when the vehicle is loaded. It is the driver's responsibility to ensure a vehicle is properly loaded.

These instructions are to be enclosed in all kits with internal combustion powered equipment where it can easily be referred to, such as on the inside of the box lid or flap.

By Request	CATALOG, Billings Fire Cache: Fire supplies, policies & procedures - CURRENT YEAR	**BK**	Call 406.896.2870

KITS

The Kit Section of this catalog includes packing lists for kits that are carried at Billings Fire Cache. For other kit lists, refer to the NWCG NFES Catalog. Kits are also listed in the Alphabetical and Numeric Sections of this catalog. **Individual kit components are generally not available outside of the kits.**

All kits containing hazardous materials will be appropriately labeled and identified. SDS's will be provided when required. All hazardous materials will be removed from kits that are shipped by commercial air freight.

All kits built at BFK follow National Fire Equipment Standards (NFES). The national standard kit packing lists have been developed with input from field user groups and have been identified as National Standard kits. This means that the kit is stocked by an NFES cache and is used on an interagency basis. All National standard kits will have a review year and change year indicated in the NWCG NFES catalog on the kit item page. Kits will not be changed for any reason except for safety reasons between the scheduled change years. Comments or suggestions for kits, including any ideas for new kits, should be forwarded to the closest geographical NFES Cache Manager. Comments for existing kits can include suggestions for additions or deletions. Use this link for the current NWCG Kit Committee NFES Kit Change/New Kit Proposal form: **https://www.nwcg.gov/sites/default/files/publications/Kit_Change_Request_form.pdf**

The Kit committee recommended changes for the 2020 fire season for some kits and components. Normally caches have two years to implement changes after the kit committee makes changes. The new items and other changes can cost a large amount of money and have storage implications so changes may not be implemented immediately.

Kit Changes for 2019:
0650 Evacuation, SKED Kit
3520 Helo Accessory Pack Kit
6051 Light Kit
08602 R2 Cache Van
82069 R1 Cache Van
0870 Pump Kit is now issued separate as 0148 Pump, 3870 Accessory Kit
6041 Volume Pump Kit is now issued separate as 1222 Pump, 1060 Accessory Kit

Kit Changes for 2020:
6051 Light Kit – carton update, bulb qty
0772 Mop-Up Kit DELETED NATIONALLY
81835 First Aid Field Station, 500 person NO LONGER AVAILABLE

KITS carried at Billings Fire Cache:

NFES 1040 – KIT, CRASH RESCUE

NFES	QTY	UI	DESCRIPTION
0049	1	EA	PLIERS, 12”, Adjustable joint, angle nose
1091	1	EA	AXE, Crash, smooth edge
1092	1	EA	AXE, Crash, serrated edge
1093	1	EA	KNIFE, Rescue, seat belt type
1094	1	EA	OPENER, Door w/ claw tool
1095	1	EA	FRAME, Hacksaw, w/ blade
1097	1	SE	CASE, Canvas, rescue kit
1113	1	EA	CUTTER, Bolt, 24”
1281	5	EA	BLADE, Hacksaw

NFES 1048 – KIT, SPRINKLER (2008)

NFES	QTY	UI	DESCRIPTION
0010	1	EA	REDUCER, 1½" NH-F to 1" NPSH-M
0136	1	EA	NOZZLE, Garden Hose, ¾" NH
0137	1	EA	NOZZLE, Plastic, 60 GPM, 1½" NH-F
0235	1	EA	WRENCH, Spanner, 11"
0321	1	EA	HAMMER, Claw, 16 oz
0394	12	EA	TIE WRAPS, One way, 15" to 17"
0402	4	EA	REGULATOR, Water Pressure, ¾" M/F-H Brass
0473	1	EA	WRENCH, Adjustable, 10"
0538	12	EA	PIN, Panel Hold Down, 8" long
0721	5	EA	GASKET, Garden Hose, ¾"
0729	1	EA	INSTRUCTIONS, Sprinkler Kit
0731	4	EA	TEE, Hoseline, 1½" NH-F x 1½" NH-M x 1" NPSH-M w/cap
0733	4	EA	REDUCER, 1" NPSH-F to ¾" NH-M
0744	1	EA	PACKSACK, Waterproof
0808	1	EA	CARTON
0824	2	EA	BLOCK, Wood, 2" x 4" x 6"
0835	4	EA	VALVE, Shut Off, ¾" NH
0882	1	LB	NAILS, Duplex, Double Head, 16D, 3"
0904	2	EA	VALVE, Wye, Gated, ¾" NH-F x ¾" NH-M x ¾" NH-M
0913	8	EA	STAKE, W/Clamp, Sprinkler, Metal, 18" x 1" x 1"
0937	1	EA	SAW, Pruning, 10"

NFES 1050 – KIT, BELT WEATHER

NFES	QTY	UI	DESCRIPTION
0448	1	PD	PAD, Writing, DI-5A or equal
1002	2	EA	PENCIL, Wooden, #2
1154	1	EA	CASE, Belt Weather Kit
1155	1	EA	ANEMOMETER, Hand, Wind Speed Indicator
1156	1	EA	PSYCHROMETER, Sling w/ Humidity Calculator
1157	1	EA	BOTTLE, Water, 1¼ oz. Plastic
1159	1	PD	FORM, OF-251, Mobile Fire Weather Observers Record (12/89)
1177	1	BD	FORM, Bundle B-0-6 (A-E) Humidity & Dew Point Tables
1814	1	EA	COMPASS, Smoke Chaser

NFES 1060 – KIT, ACCESSORY, VOLUME PUMP

NFES	QTY	UI	DESCRIPTION
0235	2	EA	WRENCH, Spanner
0247	1	EA	HANDLE, Sliding T, ½” drive
0251	2	EA	CLOTH, Oil sorbent
0290	1	EA	SCREWDRIVER, Flat tip, 6”
0291	1	EA	PLIERS, Slip joint, 6” long
0318	2	PR	GOOGLES, Clear lens, stealth model
0473	1	EA	WRENCH, Adjustable, 10”
0564	1	EA	FUNNEL, 1 QT
0606	1	EA	CAN, Gasoline, safety, 5 GL
0611	3	EA	GASKET, 3”, for kamlock
0613	1	LG	HOSE, Suction, 3” x 10’
0616	1	EA	STRAINER, 3”
0618	1	EA	VALVE, Wye gated, 1½” x 1½” x 2½” adapted to 3” kamlock
0621	1	LG	HOSE, Collapsible, 3” x 25’
0647	1	EA	ADAPTER, Quick, 3” male to 3” male thread
0649	1	EA	ADAPTER, Quick, 3” female to 3’ female thread
0681	1	EA	WRENCH, Socket, 13/16” deep, ½” drive
0685	1	EA	REDUCER, 3” F-NPSH to 2½” M-NH
0693	1	EA	BERM, Spill containment, portable pump
0744	1	EA	PACKSACK, Waterproof, w/ straps
0929	1	EA	CARTON, Fiberboard, 41” x 15½” x 25”
1027	20	PG	EARPLUGS, Foam, disposable
1067	1	EA	EXTENSION, 5” Socket, ½” drive
7613	2	QT	OIL, SAE 10-30 WT

NFES 1760 – KIT, MEDICAL SUPPORT

QTY	U/I	NFES	DESCRIPTION

KIT CONTENTS NOT AVAILABLE AS OF PRESS TIME

NFES 2990 – KIT, RECORD RETENTION

NFES	QTY	UI	DESCRIPTION
0500	1	EA	CARTON, Fiberboard
0826	4	SE	LABELS, IMT
0829	3	BX	FOLDER, File, standard, 1/5 cut
0832	4	EA	FOLDER, Hanging, file w/ 1/5 cut plastic tabs
0833	8	EA	BOX, Hanging file
0938	2	SE	INSTRUCTIONS IMT, w/ Guidance, Examples, Documentation & Feedback

NFES 3870 – KIT, ACCESSORY, PUMP, PORTABLE, HIGH PRESSURE

NFES	QTY	UI	DESCRIPTION
0006	2	EA	ADAPTER, 1½” NH-F to 1½” NPSH-M
0007	1	EA	ADAPTER, 1½” NPSH-F to 1½” NH-M
0010	2	EA	REDUCER, 1½” NH-F to 1” NPSH-M
0024	1	EA	NOZZLE, Twin Tip, Combination, 1” NPSH-F
0046	1	EA	CLAMP, Hose Shut-off, 1” to ½” Hoses
0052	1	HK	CORD, Cotton, Braided, 1/8” x 100”
0114	1	LG	HOSE, Cotton Synthetic Jacket, Rubber Lined, 1½” NH x 3’
0115	1	LG	HOSE, Suction, Rubber, 1½” NH x 10’
0137	1	EA	NOZZLE, Plastic, 60 GPM, 1½” NH-F x 4¾” Long
0138	1	EA	NOZZLE, Plastic, 35 GPM, 1” NPSH-F
0141	1	EA	PAIL, Collapsible, w/Carrying Handle
0145	1	EA	PRIMER, Hand, Mark III
0212	1	EA	VALVE, Foot, 1½” NH-F w/Strainer
0216	10	EA	TAG, Shipping (Blank)
0218	1	EA	TANK, Gasoline, 5 GL., Pump Adapted
0228	1	EA	VALVE, Automatic Check & Bleeder, 1½” NH-F
0229	1	EA	VALVE, Pressure Relief, 1½” NH-F
0231	1	EA	VALVE, Wye, Gated, 1½” NH-F x 1½” NH-M x 1½” NH-M
0235	1	EA	WRENCH, Spanner, 11”, fits 1½” to 2½” Hose
0251	4	EA	CLOTH, Oil Sorbent, 36” x 36” x 3/8"
0254	3	EA	GASKET, Hose, 1½”
0260	1	KT	KIT, Pump Tool Roll, Fire, Portable
0317	1	EA	FRAME, Alice Pack, w/Straps
0318	2	PR	GOGGLES, UVEX, Clear Lens
0341	1	QT	OIL, 2-cycle (Must be T2)
0417	1	EA	REDUCER, 2” NPSH-F to 1½” NH-M *(Usually attached to pump)*
0523	1	EA	CARTON, Fiberboard, 32” x 16” x 17” (MK III Kit Accessories)
0693	2	EA	BERM, Containment, Mark III
0743	3	EA	GASKET, Hose, 1”, Rubber
0744	1	EA	PACKSACK, Waterproof, w/Straps
0805	1	EA	TAG, 2 Stroke Mix, UN1203, Flammable Yellow
0856	1	EA	COUPLING, Double Male, 1½” NH-M
0857	1	EA	COUPLING, Double Female, 1½” NH-F
0871	1	EA	INSTRUCTIONS, PMS460, Mark III Pump
1027	20	PG	EARPLUGS, Foam, Disposable (1 PR/PG)
1287	1	SH	SHEETING, Plastic, Black, 10’ x 20’
3309	1	LB	RAG, Wiping

NFES 6051 – KIT, LIGHTING, MULTI-LIGHT CORD

NFES	QTY	U/I	DESCRIPTION
0248	1	EA	PLIERS, Slip Joint, 8"
0558	30	EA	BULB, LED, A19, 13-15W, Damp Rated
0560	3	EA	CORD, Extension, 50’ AWG, 12/3 Wire
0563	5	EA	CORD, Light 50’, w/ MultiSocket, AWG, 12/3 Wire
0610	25	EA	TIE, One-Way Self-Locking, 7” long
0645	1	EA	CARTON, Fiberboard, 41” x 15” x 19”
1136	1	EA	INSTRUCTIONS, Multi-Lighting Kit
3305	3	HK	CORD, Nylon, 1/8” x 100’
3309	1	LB	RAG, Wiping

NFES 08602 – KIT, MOBILE CACHE SUPPORT VAN, R2 - RMK SPECIFIC

NFES	QTY	U/I	DESCRIPTION
0010	60	EA	REDUCER – 1 ½” NH-F to 1” NPSH-M
0011	1	EA	PULLER – FENCE POST
0021	4	BX	BAG – GARBAGE CAN LINER
0022	50	EA	BAG – SLEEPING, COLD WEATHER 34” x 76”
0024	60	EA	NOZZLE – TWIN TIP, COMBINATION
0027	24	EA	BASIN – 4 QT WASH, POLYETHYLENE
0030	120	PG	BATTERY – SIZE AA
0033	48	PG	BATTERY – SIZE D
0037	200	EA	CANTEEN – 1 QT, W/O COVER
0048	2	BX	CONTAINER – 5 GL PLASTIC, COLLAPSIBLE
0060	48	EA	FILE – MILL, 10” BASTARD
0067	100	KT	KIT – FIRST AID, TYPE 1, POCKET
0070	4	EA	FLY – PLASTIC, 16’ x 24’ W/10 GUY ROPES

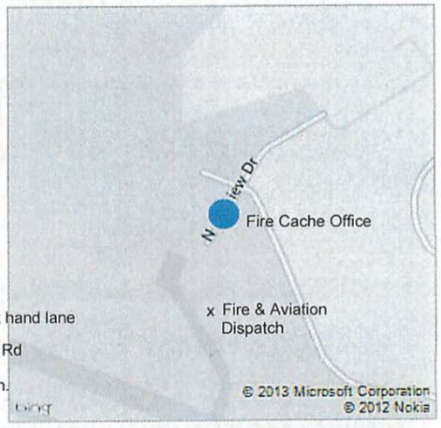
bing Maps

551 Northview Dr, Billings, MT 59105 896.2870

I90-27th St exit 450
Towards Airport
To Hwy 3 & right
To Rimtop Dr & left
Heights Main St
to Airport to Rimtop Dr & right

On the go? Use **m.bing.com** to find maps, directions, businesses, and more



Alternate route: From I 90 take exit 452 at Lockwood. Head towards town & stay in the right hand lane

Turn right going past the Fairgrounds. Get in the left lane and follow Main St to east Airport Rd

Turn left or west (by the Cenex) and follow road until you see the Airport Business Park sign.

Follow Rimtop for about 1 mile until you see the Fire Cache sign
