

**GREAT BASIN COORDINATING GROUP
INTERAGENCY INCIDENT BUSINESS MGMT HANDBOOK
SUPPLEMENT**

This document provides direction for the Great Basin and supplements the Interagency Incident Business Management Handbook, PMS-902.

CHAPTER 10 – PERSONNEL

Supplement No.: GBCG-10-2015

Effective Date: March 20, 2015

Duration: Effective until superseded or removed

**Approved: /s/ MIKE MORCOM
Chair, Great Basin Coordinating Group**

Digest:

- Replaces version issued April 3, 2014
- Clarifies that casuals will be provided transportation under the Great Basin Rental Car program.
- Adds direction for lend/lease policy.
- Adds direction on Travel Cost Comparison and Federal Travel Regulations.
- Provides a link to the Great Basin Cost Comparison worksheet.
- Clarifies resources working away from their duty station must have an OF-288 and/or OF-289 completed by the host agency.

Casuals

Agency Administrators must designate, in writing, delegated "hiring official" duties. Hiring Officials should have Staff or Line authority. The individuals should be familiar with the emergency hiring authorities and fire qualifications.

Hiring Units will only sponsor casuals within their respective dispatch zone of influence. There may be situations which an agency may determine a need to sponsor an AD from out of zone of their zone of influence (for example, the ADs obvious hiring unit does not sponsor casuals). The casual must make every effort to seek sponsorship from a unit in which they are physically located. If the casual is unable to obtain sponsorship, the hiring unit may make a request to the appropriate State/Regional Office for approval.

Rates for positions not identified in Department of Interior and Department of Agriculture Pay Plans may only be approved at the Regional and State Level.

For Interior use: To hire personnel for prescribed fire projects authorized by Congressional funding within the wildland fire operations account, use Interior AD Pay Plan, Section D.

Casuals will be provided transportation to the incident or at the incident within the Great Basin using the Great Basin Rental Car program.

Length of Assignment

Provisions in the parent text concerning length of assignment apply to contractor personnel and not their equipment. Extensions must be coordinated with the contractor. It is the discretion of the Incident Management Team when resources are released.

Lodging

Incident agencies should provide lodging at no cost to those individuals (i.e., casuals) who do not possess a government issued charge card whenever possible. This can be accomplished through local acquisition methods or via buying team personnel.

Meals

Whenever the incident does not provide meals, incident agencies should provide meals at no cost to those individuals (i.e., casuals) who do not possess a government issued charge card whenever possible. This can be accomplished through local acquisition methods or via buying team personnel. Meal costs, plus gratuity should not exceed the allowed meal rate amount.

Rental Cars

Use of rental cars while assigned to an incident must be authorized by the incident agency administrator or their designee, and documented on a resource order.

The incident agency should provide rental cars at no personal cost to those personnel who do not possess a government issued charge card and are 1) authorized to use a rental car on the incident and 2) are qualified to drive the assigned vehicle type. This can be accomplished through local procurement

methods (i.e., Blanket Purchase Agreement, purchase order, or contract). The procurement tool used should cover the vehicle if it is driven off publicly-maintained roads.

Privately-Owned Vehicle (POV)

Employees may request to use their privately-owned vehicle (POV) for official business when such use is advantageous to the government. Incident agency administrators, or their designee, must authorize the use of POVs and such authorization will be documented on a resource order. Prior to authorization of POVs incident agency administrators, or their designees, must complete a cost comparison to document that the use of the POV is more cost effective than commercial transportation (i.e., airplane).

Reimbursement to the employee for approved POV use will only be for mileage. Fuel received at the incident must be paid for with an employee's personal credit card. Agency administrators should also take into consideration whether the POV will need to be used at the incident. It is not recommended that POVs be authorized for use by line personnel.

Approval of recreational vehicles (RVs) for transportation to and from an incident should be rare. A cost comparison should be performed prior to approval to show that the use and reimbursement of an RV is more cost effective than other modes of transportation (i.e., POV, rental car, airline). The cost comparison should take into consideration any additional personal time to travel to the incident and return, as well as available parking space at the incident. RVs should not be connected to any government-provided utility such as power or water while at the incident. RVs will be reimbursed mileage only. Cost comparison worksheet can be found at <http://gacc.nifc.gov/gbcc/business.php>

Hazard Pay/Environmental Differential Documentation

In order to ensure proper documentation is provided in the incident finance package for future audits, payment documentation and claim documentation, hazard pay and environmental differential entitlement will be documented on the Crew Time Report (or other local time recording documents) with the duty being performed. Reference the categories listed in the IIBMH on page 10-28 for General Schedule (GS) employees and page 10-30 for Federal Wage System (WG/WL/WS) employees for language that will suffice as adequate documentation. Documentation of "uncontrolled fireline" alone is not adequate documentation for the entitlement to hazard pay/environmental pay.

Lend/Lease

Refer to <http://gacc.nifc.gov/gbcc/business.php> for information on the Great Basin Lend/Lease Policy.

Travel Cost Comparison and Federal Travel Regulations

Refer to Federal Travel Regulations below:

§301-10.4 How does my agency select the method of transportation to be used?

Your agency must select the method most advantageous to the Government, when cost and other factors are considered. Under 5 U.S.C. 5733, travel must be by the most expeditious means of transportation practicable and commensurate with the nature and purpose of your duties. In addition, your agency must consider energy conservation, total cost to the Government (including costs of per diem, overtime, lost work time, and actual transportation costs), total distance traveled, number of points visited, and number of travelers.

§301-10.5 What are the presumptions as to the most advantageous method of transportation?

- (a) *Common carrier.* Travel by common carrier is presumed to be the most advantageous method of transportation and must be used when reasonably available.
- (b) *Government automobile.* When your agency determines that your travel must be performed by automobile, a Government automobile is presumed to be the most advantageous method of transportation

Refer to <http://gacc.nifc.gov/egbc/business.php> for the Cost Comparison travel worksheet and instruction worksheet.

Staging of Resources

As stated in the IIBMH, page 10-17, lines 9-22, "Time spent in a mobilization or demobilization center, or other general area, including incident base, where the individual can rest, eat, or, to a limited degree, pursue activities of a personal nature is not compensable as ordered standby.

Such time is compensable only to the extent needed to complete the guaranteed hours (8, 9, or 10) for that calendar day. No pay authority exists to guarantee individuals' more than their base."

Resources placed in staging areas or mobilization centers must have OF-288s or OF-289s completed when away from their duty station.

Hazard Pay/Environmental Differential Documentation

In order to ensure proper documentation is provided in the incident finance package for future audits, payment documentation and claim documentation, hazard pay and environmental differential entitlement will be documented on the Crew Time Report (or other local time recording documents) with the duty being performed. Refer to the IIBMH on page 10-28 for General Schedule (GS) employees and page 10-30 for Federal Wage System (WG/WL/WS) employees for language that will suffice as adequate documentation. Documentation of "uncontrolled fireline" alone is not adequate documentation for the entitlement to hazard pay/environmental pay.

**DOCUMENTATION OF HAZARD PAY FOR CREW TIME REPORTS
AND FIRE TIME SHEETS**

Hazard Description for CTR/Fire Time Sheet	GS	WG	Description	% Paid
Firefighting uncontrolled fire	X		Participating as a member of a firefighting crew in fighting forest and range fires on the fireline <i>before the fire is controlled</i> . This does not include personnel engaged in logistical support, service and non-suppression activities.	25%
Firefighting		X	High Degree – fighting forest and range fires on the fireline	25%
Flying – Limited Control Flt	X		Individuals, except pilots, who are participating in limited control flights. <input type="checkbox"/> Limited Control Flight – Flights undertaken <i>under unusual and adverse conditions</i> , e.g., extreme weather, maximum load or overload, limited visibility, extreme turbulence, or low level flights involving fixed or tactical patterns, <i>which threaten or severely limit control of the aircraft</i> . Hazard pay for flying activities is related to the use of the aircraft, not the work of the occupants. Hazard pay is not authorized for situations such as flying passengers from a work center to a location to fix equipment when there are no adverse conditions that threaten or severely limit the aircraft.	25%
Flying-Low Level Flight		X	Low-level flights in small aircraft including helicopters at altitude of 150 meters (500 feet) and under in daylight and 300 meters (1,000 feet) and under at night when the flights are over mountainous terrain, or in fixed-wing aircraft involving maneuvering at the heights and times specified above, or in helicopters maneuvering and hovering over water at altitudes of less than 150 meters (500 feet); Document Actual hours of exposure	100%
Hover Hookup	X		Participating in ground operations to attach an external load to a helicopter hovering just overhead. Wage System – document actual hours of exposure	15%
Hover Hookup		X	Ground work beneath hovering helicopter. Participating in operations to attach or detach external load to helicopter hovering just overhead. Document Actual hours of exposure	15%
Exposure to hazardous weather or terrain.		X	Exposure to dangerous conditions of terrain, temperature and/or wind velocity, while working or traveling when such exposure introduces risk of significant injury or death to employees; such as the following: - Working on cliffs, narrow ledges, or steep mountainous slopes, with or without mechanical work equipment, where a loss of footing would result in serious injury or death. - Working in areas where there is a danger of rockfalls or avalanches.	25%

Work in Rough and Remote Terrain	X		Working on cliffs, narrow ledges, or near vertical mountainous slopes where a loss of footing would result in serious injury or death, or when working in areas where there is danger of rock falls or avalanches.	25%
High Work	X		Working on any structure of at least 15 meters (50 feet) above the base level, ground, deck, floor, roof, etc., under open conditions, if the structure is unstable or if scaffolding guards or other suitable protective facilities are not used, or if performed under adverse conditions such as snow, sleet, ice on walking surfaces, darkness, lightning, steady rain, or high wind velocity.	25%
High Work		X	Working on any structure of at least 30 meters (100 feet) above the ground, deck, floor or roof, or from the bottom of a tank or pit. Working at a lesser height if the footing is unsure or the structure is unstable. Document Actual hours of exposure	25%
Burned Area Emergency	NA	NA	Does not meet the definition of firefighting for hazard pay eligibility; however, other hazard pay criteria listed above may apply.	
Response (BAER) – Assessment or Implementation			Does not meet the definition of firefighting for hazard pay eligibility; however, other hazard pay criteria listed above may apply.	
Prescribed Fire	NA	NA	Does not meet the definition of firefighting for hazard pay eligibility; however, other hazard pay criteria listed above may apply.	

Note: The hazard differentials listed above are not all-inclusive, refer to the CFR for additional criteria.
