

### % of Median Snow Water Equivalent

### Dixie National Forest-Median Snow Water Equivalent

Date Created: 1/2/2024

The % OF MEDIAN CUMULATIVE PRECIPITATION and % OF MEDIAN SNOW WATER EQUIVALENCE represents current cumulative precipitation and snow water equivalence values for those selected SNOTEL sites compared to their respective median value for data recorded from 1991 - 2020 for those sites on this day of the water year. If this map is created on Jan 26 then it represents statistics for end of day on Jan 25. If NA is displayed it indicates that either the current or median snowpack for that site is melted off by this day.
