

## NR Contracted Resources Quick Reference Guide

	Bus	Clerical Support	Comm Trailer	Faller Module	GIS Unit	Gray Water	Handwash Portapots	Mechanic Service Truck	Mobile Laundry	Potable Water	Refer Trucks	Rental Vehicles	Sack Lunches	Tents	Water Handling
Consider Incident Needs	For long distance travel or to the fireline? How many people are being transported? Coaches should be used for long distance travel.	Is internet required?		Do agency fallers meet the needs of the incident if available? If professional fallers are needed, is one faller or two fallers more appropriate?	How many workstations are needed, 2 or 5? Does the incident need a GIS Specialist with the unit? What level of GISS?	What gallon capacity is needed? Large (1000+ gallons) or small (500-999 gallons). What type of pump? (vacuum or pressure)	How many standard portable toilets are needed, how many handicap units? What configuration of sinks is available?	What will the mechanic be working on? Service Trucks are based on mechanic quals. What experience do you want the mechanic to have?	What type (size) is needed?	What gallon capacity is needed?	What length of refrigerated trailer is needed?	What type of vehicle is needed? What will it be used for?		Have all tents in the National Cache System been depleted? What size tent is required to meet the needs of the incident? Are side walls needed?	Have all agency and cooperators resources been depleted? What type of equipment is needed?
Determine Needed Type	<b>Crew Carrier:</b> 22-person, short distance <b>Coaches:</b> 40+, long distance <b>Shuttles:</b> 16+, short runs and transport	No types. All units are self-contained trailers with 24 hour office services and high-volume copy capability.	No types. All units are self-contained trailers with three work stations and programmable radio and telephone equipment.	<b>Type 1 Single Fallers</b> have over 3,000 hours as a commercial timber faller.
