48 hours:								
72 hours:								
Anticipated after 72 hours:								
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:								
1) critical resource needs identified above,								
2) the Incident Action Plan and management objectives and targets,								
3) anticipated results.								
41. Planned Actions for Next Operational Period:								
<b>If critical resources are received, a mission to try to protect Evaro will be initiated. Also crews will be assessing current situation after fire made a run toward Evaro this afternoon and evening.</b>								
42. Projected Final Incident Size/Area:								
43. Anticipated Incident Containment or Completion Date:								
44. Projected Significant Resource Demobilization Start Date:								
45. Estimated Incident Costs to Date: <b>\$3,900,000.00</b>								
46. Projected Final Incident Cost Estimate:								
47. Remarks (or continuation of any blocks above – list block number in notation):								
Structure damaged was a mobile home. The following critical resources are needed for a critical misson lasting 4 days: 4 T1 Crews (can substitute 1 T2 IA); 3 DOZB; 4 T1 Helo; 1 T2 Helo; 2 T3 Helo; 1 DECK; 2 ABRO; 1 SOF2; and 6 HECM. The objective of this mission is to build 3 miles of line from Highway 93 northwest utilizing open ridge firing and holding towards west facing slope to steer fire away from the community (surrounding population 200) of Evaro. Fire is under Unified Command between T1 IC Kim Martin and Frenchtown FD Chief Scott Waldron. If fire jumps Highway 93, no natural or man made breaks are available to slow fire spread. A high value railroad trestle as well as the NWS radar installation would be at a very high risk of being damaged/destroyed.
