

2015 Wildfire Fires and Acres (by Protecting Agency) - YTD by Unit

Source: Interagency Situation Report (SIT-209) as reported by NW dispatch offices (on 12/31/2015)

NW SIT reporting captures all of Oregon and Washington, in addition to small portions of neighboring states (ID, NV, CA). Reported statistics are for state and federally-protected wildlands (except DOD and DOE). For County and Local (C and L) fires, no formal reporting structure exists in Oregon (OR-OFS, Oregon Fire Service). In Washington (WA-WFS, Washington State Fire Marshal's Office), reporting is limited, and, generally, captures only fires greater than 300 acres in size.

In some instances, reporting responsibility for a unit is covered by two dispatch offices. In these cases, two entries result with the respective reporting dispatch office listed in parenthesis following the unit name. Added together, both entries account for the unit's total activity.
