### Strategic Intent:

- Maintain flexibility in the geographic distribution of Initial Attack resources to efficiently and effectively respond to new starts in the geographic area by:**
  - reallocating resources for increased Initial Attack and new large fires, as needed;
  - maximizing opportunities to fully meet incident objectives through reallocation of critical resources;
  - planning for limited replacement or reallocation of shared resources from NMAC; and by
  - determining which resources are necessary to maintain the investments made on long-term incidents should the reallocation of resources become necessary.
- Manage IMTs to effectively respond to complex fires across the Geographic Area to safely meet objectives.**
