

## Morning Brief

Date/Time Stamp: Friday, Apr 05, 2024, 10:00

### Preparedness Levels

#### Northwest PL

Current	3-Day	10-Day
1 (10/13)	1 (10/10)	1 (10/10)

#### National PL

1 (10/12)
-----------

#### Northwest Historic PL

See [Preparedness Level](#) Product

#### Northwest IMT Rotation (3/26 – 4/9)

For additional IMT information refer to the [IMT Status/Rotation](#) page  
<https://gacc.nifc.gov/nwcc/content/products/intelligence/teams.pdf>

#### NW Area Complex Incident Management Teams (CIMT)

NW Team 2 - (Loomis)

NW Team 3 – (Click)

### Northwest Incident Activity

28 fires for 38 acres (3/29 – 4/4)

OR: 5 fires for 1 acre

WA: 23 fires for 37 acres

#### Large Fire Summary

New large incidents: 0

Reported incidents: 0 (OR: 0, WA: 0)

0 acres growth on existing incidents

#### Northwest IMT Activity

NIMOs committed: 0

Type 1 IMTs committed: 0

Type 2 IMTs committed: 0

Complex IMTs committed: 0

### National Fire Activity (IMSR 3/29 – 4/4)

Initial attack activity: Light (546 fires)

New large incidents: 21

Large fires contained: 26

Uncontained large fires: 3

#### National IMT Activity

Area Commands committed: 0

NIMOs committed: 0

Type 1 IMTs committed: 0

Type 2 IMTs committed: 0

Complex IMTs committed: 0

\*Nationally, there are zero fires being managed under a strategy other than full suppression

### Northwest Activity Summary

Cooler and wetter conditions over the past week slowed the implementation of prescribed fire projects. Much of the snowpack in Oregon continues to hover around normal. Snowpack in Washington continues to be below normal especially the northern portion of the state. Initial attack activity remained minimal.

### Northwest Current Incident Details

*Incidents listed below meet large fire criteria and/or incidents with a Type 1 or 2 IMT assigned. Large incidents are defined as fires which are 100+ acres in timber or 300+ acres in grass/brush. For additional information on incidents no longer listed below please refer to the [Northwest Large Incident Summary](#) or [Northwest Fires Utilizing Other than Full Suppression Strategies](#)*

Incidents not Previously Reported: 0

Incidents Previously Reported: 0

### Northwest Fire Weather Summary

Showers will diminish over much of the region tonight but a weak cold front will move into the coast on Saturday keeping skies cloudy with more rain mainly over the west side. Showers will linger on the east side during the weekend. A drying phase appears likely for much of next week. Temperature will be below normal through the weekend with some warming during the drying trend next week. Breezy northwest winds are expected in the Columbia River Gorge and many of the basins of eastern Oregon Friday and Saturday afternoons.

See your local NWS forecasts for details.

### Northwest Fire Potential Summary

The cool and moist weather expected this weekend will keep significant fire potential minimal for the time being. The drying trend expected next week will steadily drop fine dead fuel moisture next week.
