

CALIFORNIA WILDLAND FIRE COORDINATING GROUP

Date: May 29, 2014

TO: Agency Directors

Subject: Direct Protection Area, CWCG Approval

The California Wildland Fire Coordinating Group (CWCG) has reviewed and approved the recommended Direct Protection Areas (DPA) changes for 2014.

An annual review of the DPAs was conducted by the agencies to identify any changes that may be required or re-affirm existing boundaries and protection responsibilities per the California Master Cooperative Fire Management Agreement (CFMA). The proposed changes were submitted through involved agencies' channels for agency review and approval.

The CWCG has reviewed the consolidated changes; analyzed the results for any potential impacts; and found no issues. The review process has been completed for 2014.

New DPA maps are available by visiting the CWCG website at the link below:
