

209 PROGRAM

User's Guide

February 2011

Incident

3: Initial	Update	Final
	XX	

7: Start Date Time
10/28/2010 1254

8: Cause
Human

9: Incident Commander
Ardoin

13: Latitude and Longitude
Lat: 34° 38' 32" Long: 120° 34' 29"
Ownership: CA-AFV

14: Short Location Description (in reference to nearest town):
10 Miles West of Lompoc on Vandenberg AFB

16: Line to Build
400 Chains

17: Expected Containment Date: 10/30/2010

19: Estimated Costs to Date
\$0

20: Declared Controlled

21: # Damaged

22: # Threatened

23: Fatalities
0

24: Structure Information
Type of Structure
Residence
Commercial Property
Outbuilding/Other

25: % Contained or MMA
15 Percent

22: Injuries to Date: 0

26: Communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
direction towards critical mission support facilities

27: Communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
direction towards critical mission support facilities

28: Communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
on support facilities, archeological sites and power distribution systems

29: Communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
on support facilities, archeological sites and power distribution systems

30: Needs (amount, type, kind and number of operational periods ()) in priority order in 12, 24, 48, and 72 hour time frames:

31: Fuels/Materials Involved: 4 Chaparral (6 Feet)
Chaparral and old growth manzanita

32: (Flare-ups in the interior of the fire area.

Current Operational Period
50

Attachment #10, Block 43. Committed Resources:	
Resources for a Structure Fire Incident.....	105
Attachment #11, Block 43. Committed Resources:	
Resources for an Urban Search and Rescue Incident.....	106

INTRODUCTION

This document is to be used as a User Guide for the ICS-209 Program located on the National Fire and Aviation Management Web Applications site (FAMWEB). The 209 Program is a web-based application that allows for more efficient processing of the Incident Status Summary, Form ICS-209.

BACKGROUND

The Incident Status Summary, also known as a “209”, is used for reporting information on incidents of significance. Accurate and timely completion of the ICS-209 is necessary to determine appropriate resource allocation during multiple incident occurrences. The information included on the form often determines the priority of a given incident, and thus its share of available resources.

Nationwide implementation of online ICS-209 data entry was effective May 19, 2002. In order to ensure that the information submitted is as complete as possible, please follow the guidelines in this User's Guide when completing or reviewing ICS-209s for submission into this database.

SYSTEM FUNCTION

The intent of this program is for ICS-209 information to be entered at the incident or the dispatch level closest to the incident. Once the incident information has been submitted it can be accessed and utilized at the local, geographic, and national levels.

ICS-209s should be completed according to each Geographic Area's Mobilization Guide. Please refer to Chapter 20 of your Geographic Area's Mobilization Guide and the National Interagency Mobilization Guide for more specifics on reporting requirements for ICS-209s.

SYSTEM USERS

Users of this system primarily will include local Dispatch Personnel and Incident Management Teams who will generate ICS-209s, and agency managers, information officers, and decision makers will access completed ICS-209s and reports. Agency managers include staff from the Bureau of Land Management (BLM), Bureau of Indian Affairs (BIA), Fish and Wildlife Service (FWS), USDA Forest Service (USFS), National Park Service, and State agencies.

USER SUPPORT

Technical support for the 209 Program can be found through the National Fire and Aviation Management Web Applications site (FAMWEB) or at the Fire Applications Help Desk. Contact the Help Desk at 1-800-253-5559 or (208) 387-5290 or via e-mail at: fire_help@dms.nwcg.gov. Calls to the Help Desk are handled 24 hours a day. After normal business hours (07:30am – 5:00pm Mountain Time) leave a message and the on-call duty officer will return your call.

If you have questions on data entry, what to report, program access, etc., contact your local dispatch center or your Geographic Area Intelligence Coordinator/Officer.
