FUELS TREATMENT INTERSECT							
Was the area previously treated?	□ Yes	□ No					
If so, what was the treatment methology and scatter, etc.)	od used? (Expl	ain: roller chop, slash,					
How did the treatment affect the fire flame length, etc.)	How did the treatment affect the fire behavior? (Explain: rate of spread, flame length, etc.)						
Did it help in the suppression efforts? ☐ Yes ☐ No							
(Explain: burn-out, water, hand-line, etc.)

RETARDANT DROPS						
If retardant was dropped, did it encroach into any drainages?	□ Yes	□ No				
If so, notify Dispatch as soon as possible, so a Resource Advisor can be notified to respond.						
Lat/Long:						

Incident Complexity Analysis (Type 3, 4, 5)		
CIRCLE COMPLEXITY LEVEL ABOVE	YES	NO
Fire Behavior		
1110 201101101		
Fuels extremely dry and susceptible to long-range spotting, or you are currently experiencing extreme fire behavior.		
Weather forecast indicating no significant relief or worsening conditions.		
Current or predicted fire behavior dictates indirect control strategy with large amounts of fuel within the planned control perimeter.		
Firefighter Safety		
Performance of firefighting resources affected by cumulative fatigue.		
Overhead overextended mentally and/or physically.		
Communication ineffective with tactical resources or dispatch.		
Organization		
Operations are at the limit of span of control.		
Incident action plans, briefings, etc., missing or poorly prepared.		
Variety of specialized operations, support personnel, or equipment.		
Unable to properly staff air operations.		
Limited local resources available for initial attack.		
Heavy commitment of local resources to logistical support.		
Existing resources worked 24 hours without success.		
Resources unfamiliar with local conditions and tactics.		
Values to be protected		
Urban interface, structures, developments, recreational facilities, or potential for evacuation.		
Fire burning in or threatening more than one jurisdiction and potential for unified command with different management objectives.		
Unique natural resources, special-designated areas, critical municipal watershed, T&E species habitat, or cultural values sites.		
Sensitive political concerns, media involvement, or controversial fire policy.

## **MEDICAL PLAN (ICS 206 WF)**

Controlled Unclassified Information//Basic

#### **Medical Incident Report**

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE

"MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communication situation to communications / dispatch:

- 1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

  Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
- 2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

D RED / PRIORITY 1 Life or limb threatening injury or illness.

Severity of Emergency / Transport Priority	Evacuation need is IMMEDIATE  Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.  D YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.  Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.  D GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport				
	Ex: Sprains, strains, minor heat-related illness.				
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)				
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other				
Patient Location	Descriptive Location & Lat. / Long. (WGS84)				
Incident Name	Geographic Name + "Medical" (Ex: Trout Meadow Medical)				
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)				
Patient Care	Name of Care Provider (Ex: EMT Smith)				
3. INITIAL PATIENT AS severe patient)	SESSMENT: Complete this section for each patient as applicable (start with the most				

Patient Assessment: (See IRPG page 106)

Treatment:

	Location ( <i>if different</i> ): A to Evacuation Loca		on (drop point,	intersection, etc.) or	Lat. / Long.)
