The availability of engines for off-unit assignment is set by the District FMO's with final say being at Unit FMO level. The availability will be based upon the draw-down plan and unit conditions. District Duty Officers will determine which engine(s) and personnel will be available for dispatch from their stations.

When an order is received, PIDC will call the district FDO for the station that is "up" in the rotation and request the Available engine.

- If the FDO accepts the order then dispatch fills it and moves the station to the bottom of the list.
- If the FDO declines the order, for whatever reason, they forfeit their opportunity and moves to the bottom of the list.
- If an Agency ONLY resource order is received, it will be honored and filled ONLY if engine(s) are available for off unit assignment. If it's filled the station will be moved to the bottom of the rotation list.
Name Request orders for specific engine(s) will only be honored if agreed to in advance by all 6 DFMO's and FFDO.

If any unit has not filled an order and the list has been completely cycled through, the unit(s) not having sent out an engine get first chance.
