

Fire and Incident Support Informational Bulletin

Every year the High Desert District (HDD), which encompasses a large portion of the southern third of the state of Wyoming, has fires that go beyond the local Fire Managements' capabilities to support. When this happens, the High Desert District looks to the surrounding businesses for additional help. The common areas that the HDD looks for help in are:

- Meals
- Towing/Mechanical work
- Heavy & Light equipment
- Hardware and small parts
- Land use
- Sanitation
- Fuel

The High Desert District is looking to get a list of interested individuals that are willing to assist with logistical support to the fires. The frequency of utilization will depend on the current years' fire season and the areas that have fires. The Rawlins Interagency Dispatch Center (RWC) which is a part of the HDD usually does all the logistical support ordering for the fires. When additional support is needed the RWC will contact you directly to see if you have any resources that we can utilize for support.

The HDD is putting together a Service & Supply Plan that can be utilized for quick reference. This plan will help us be efficient with the businesses we use and also help us maintain a better working relationship with the local communities. We hope to acquire information such as:

- The name of the business
- Location of the business (if you have multiple locations, where they are located)
- Contact Person and contact number(s)
- General pricing for particular items (ex: Port-a-potties, how much per day per unit)
- What areas do you service (ex: Do not provide dumpster services outside of city limits)
- Anything that you may offer that we might need (ex: specialized equipment such as a spray bar on a water tender)

Additional information/questions about Meals:

- Early morning pick-ups (4 or 5am)
- 30-90+ meals
- IF capable, we may ask you to make breakfast and sack lunches (both to be picked up at the same time)
- Specific calorie and quantity requires (See Attached document)

Additional information/questions about Towing/Mechanical work:

- Towing weight limits
- Towing retrieval ranges
- Do you have trailers?
- Do you service diesels?
- Do you do field servicing?

Additional information/questions about Heavy & Light equipment:

- What types of equipment do you rent?
- Does rental include trailer?

Additional information/questions about Hardware & Small Parts:

- Do you carry chainsaw parts and what brand?

Additional information/questions about Land Use:

- Does your building have office equipment?
- Does your building have internet?
- Does your building have sleeping accommodations?
- Does your building have bathroom/shower accommodations?

Additional information/questions about Sanitation:

- What is your servicing area?

Additional information/questions about Fuel:

- Do you have split tank trucks?
- What is the minimum gallons you will deliver?
- What size of tanks do you have?

If anyone would like to be added to our service and supply plan or if you have any further questions, please contact myself or Rawlins Interagency Dispatch Center. We can send you more detailed information for your area of interest.

Thank you,
