VIPR Equipment/Overhead/Supply/Service Items Ordering Guide, 8-4-2013 Version

RI = Res RI = Resource Item. The resource is entered in ROSS as separate items (Can and should be statused in ROSS)

SI = Service Item. Only the contract is entered in ROSS and will need to be “filled with agreement” option. (These items cannot be statused in ROSS.)

If, when ordering contracted resources, they are not listed in ROSS by type (1, 2, etc), you must enter the information in Special Needs to ensure the incident gets what it needs.

Listed on Contract	Cataloged in ROSS	T1	T2	T3	T4	T5	T6	Other

*None in Rocky Mountain Area

The contract types for Service Items are listed as Purchase Agreements (PA) to give them a different look than the Call When Needed (CWN) Resource Items.

Rocky Mountain Area

VIPR Equipment/Overhead/Supply/Service Items Ordering Guide, 8-4-2013 Version

All **contacts** and **actions** need to be **documented** in the appropriate system of record (CAD, ROSS or log). **Key** items to document include **point-of-hire**, **driver's name** and **contact info**; last 5 digits of the **VIN #**, any vehicle/equipment information **not included** in the ROSS resource item. (Rocky Mountain Area Mobilization Guide 2013, page 67).

There are instances when two pieces of equipment (i.e., Mobile Laundry T1 and T2, Water Tender/Engine, Communications Trailer/HOS Trailer, etc) will have the same VIN #. This equipment will be entered as two separate resource items and will have documentation stating "when one item is on assignment, the other must be made unavailable."
