TNF ENGINE ROTATION PROTOCOL

- It is the responsibility of the Phoenix Dispatch Center to status all Engines in ROSS.
- It is the responsibility of the District Duty Officer's to notify the **Operations Floor Coordinator (Sandy Begay, or her acting in her absence)** or the Assistant Center Manager – Logistics (Christina McKerracher, or her acting in her absence) of any changes in Engine status.
- All TNF Engines will be statused "Available" "Local" making them available to IA incidents dispatched by Phoenix Dispatch, except for when they are "Available" "National", "At Incident" or "Unavailable".
- No District will be made an offer of Engine assignment (other than local) unless they are showing that Type Engine as "Available" "National", regardless of Rotation Ranking.
- When an Engine accepts assignment (other than local), that District will be moved to the bottom of the Engine Rotation Rank, regardless of it's ranking when the offer was made.
- Acceptance of Engine assignment to a local incident will have no effect on current rotation ranking.
- Any discrepancy or concerns relative to Engine status, assignment, or rotation will be made to the **Phoenix Dispatch Center Manager (Paul Womack, or his acting in his absence)**.
- This document is available via email upon request thru the **Operations Floor Coordinator (Sandy Begay, or her acting in her absence)**.
- This document will be posted on the PIFC website (when available) which should do away with the need to email as stated above.
