

# FireCode

**\*\*\*If you need a FireCode for a WildCAD incident, PLEASE use WildCAD and do not log directly in to FireCode.\*\*\***

**Create FireCode**

If you are using WildCad on this incident, DO NOT CREATE A FIRECODE HERE. If you do it will create duplicate incidents.

If you need a FireCode for an incident that is already in IRWIN, but cannot do it from WildCAD, please follow the steps below.

1. Login to FireCode and on the screen to create a new FireCode, click on the **BLUE** link below the “Create New FireCode” button.

Create New FireCode

(Optionally, if you would like to create a FireCode for an existing IRWIN incident that does **NOT** already have a FireCode, click [here](#))

2. Copy and paste the IrwinID from the incident in question and paste into the IRWIN ID box in FireCode. Click “Generate FireCode For IRWIN Incident”.

Create FireCode From IRWIN Incident

Enter the IRWIN ID below for the incident you wish to generate a FireCode for. This process will create a FireCode record and update the IRWIN incident with the FireCode. An IRWIN ID is a unique number that identifies each incident in IRWIN and it is formatted like this: 00000000-0000-0000-0000-000000000000

IRWIN ID:

Cancel Generate FireCode For IRWIN Incident

Note: If attempts to edit fields in FireCode are unsuccessful, edits may need to occur in WildCAD or 209, depending on the current ADS.

Example Scenario: If you do not have a CAD, and will need a FireCode for an Incident Complex parent record, follow the steps outlined above. The Incident Complex relationship must be created in 209.
