The Dispatcher View

1. **Portal Banner** – Provides application information
2. **Quick Search** - Search IROC to quickly find information
3. **Content Selectors** - Filter incident, dispatch and catalog records by setting a user context for each
4. **Action Tiles** – Access or create incidents, requests, and resources
5. **Main Work Area** – View or take action on incidents, requests, or resources

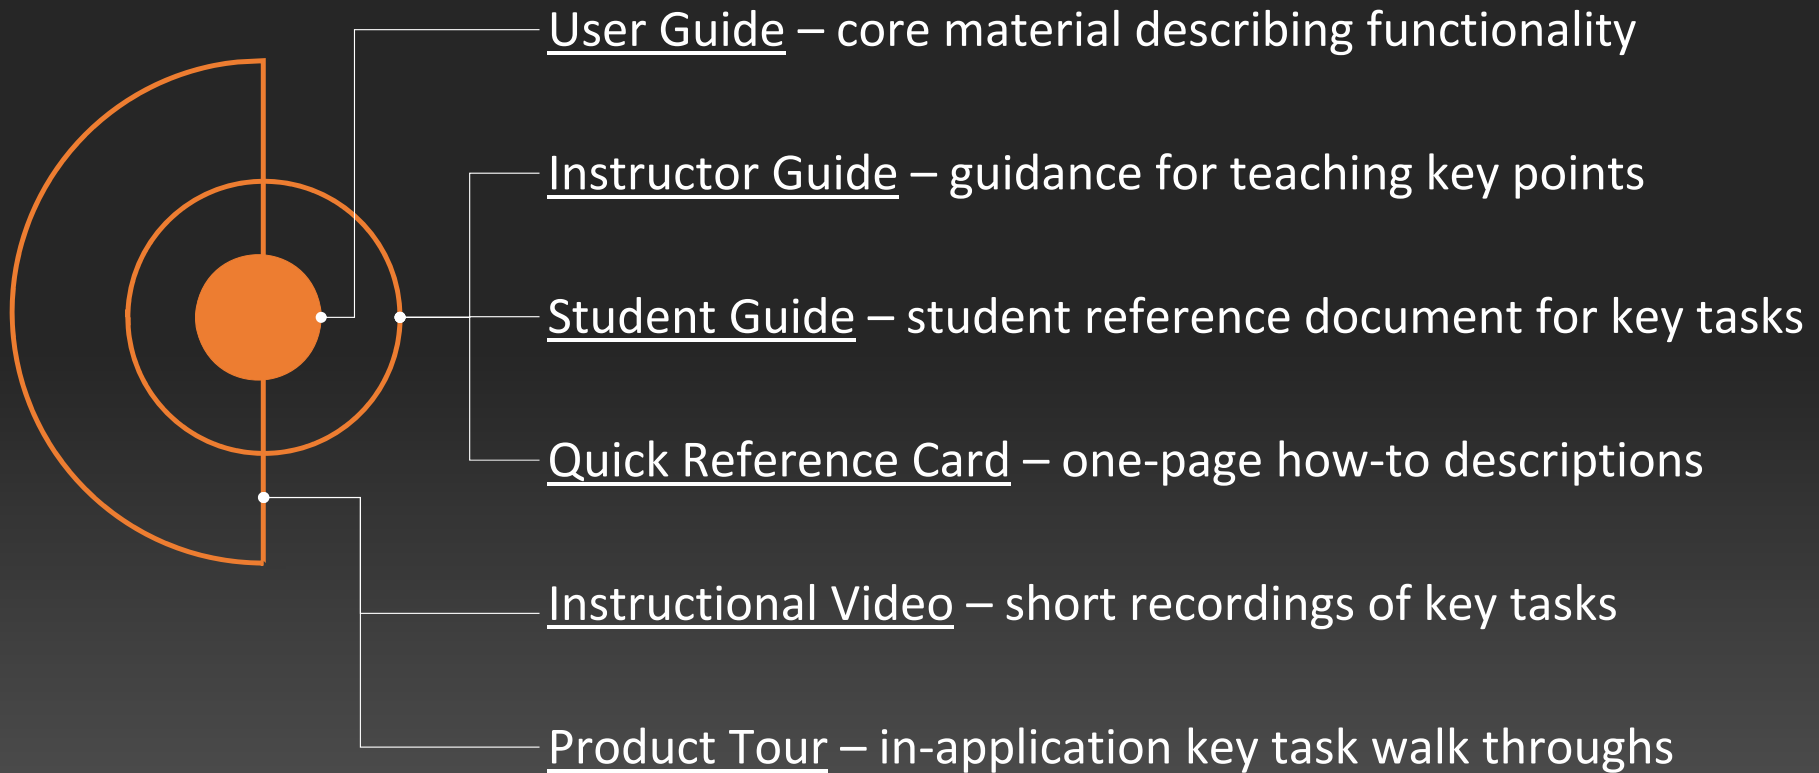

The screenshot shows the IROC Dispatcher View interface. At the top, there is a banner with the text "Central Washington Interagency Communication Center" and a search bar containing "How can we help?". Below the banner, there are three content selectors: "Watched Incident: All", "Dispatch: WA-CWC", and "Catalog: Aircraft". The main area is divided into four action tiles: "Incidents" (LOCAL), "Pending" (ALL), "Requests" (ALL), and "Resources" (ALL). The "Incidents" tile shows 0 New and 0 Open incidents. The "Pending" tile shows 0 Pending and 0 Past Needed By. The "Requests" tile shows 0 Need Travel Set. The "Resources" tile shows 81 Available, 0 Return From Assignment, 0 Reserved, 0 At Incident, and 0 Mob/Demob. Below the tiles, there is a section for "Incidents" with filters (All, Watch, Can Close) and actions (Close, Reopen, Watch, Unwatch). A table of incident records is displayed below, with one record for "JUNGLE CREEK" (Incident Number: 2018-WAOWF-000658, Incident Created On: 10-03-2018 09:15:39, Incident Type: Fire - Wildfire, Status: Open).

The Dispatch Manager View

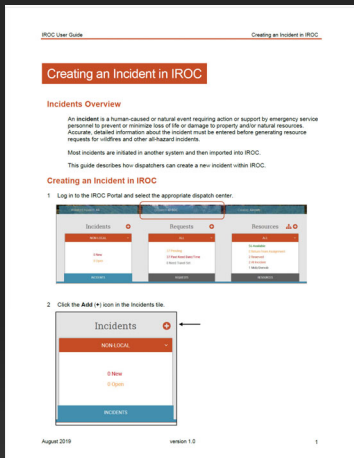

1. **Banner** – Runs across the top of every page and contains the IROC logo and global navigation controls
2. **Application Navigator** – Defaults to the File tab, which provides access to all applications and modules
3. **Main Content Frame** – Displays information such as lists, forms, and homepages. This view changes depending on the application or module you select

Videos by Increment

Nov '19

Data Management Tool

- Navigating the DMT
- Incident conflicts
- Create resources
- Contracts
- Selection Areas

Dec '19

Resource and Incident Life Cycle

- Navigating the homepage
- Navigating the action tiles
- Navigating the work area
- Create and maintain incident
- Set availability
- Web status self service
- Web status user maintenance
- Master rosters

Jan '20

Request Life Cycle

- Create and place request
- Fill - 1
- UTF/Retrieve/Place request
- Reassign resource
- Edit request/assignment
- Manage request
 - Unfill
 - Cancel
 - Retrieve
 - Restore
 - Convert
 - Set ETD/ETA
 - Release and reassign
- Fill – 2
- Place – 2
- Release – 2
- Reassign - 2
- Cache requests
- Assignment rosters
- Travel

Feb '20

Tactical Resources

- Assign
- Divert
- Ferry

Final dates TBD

Training front-to-back

- **Normal course to develop trainers**
 - Virtual TtT sessions as releases drop
 - Assess learning progress after release 1 and 2
- **We need to start everyone off on a level playing field**
 - Do a virtual session for the train-the-trainer group
- **Training attendees get access to a practice instance (limited to subject areas presented)**
- **Web Status and IMT are online only training (Learning Portal)**

IROC Enhancements

- **Easier Rostering Function**

- Eliminates jumping between screens and reduces the number of clicks it takes to create a new roster

- **Import from Excel into IROC**

- Allows easy import of requests from buying teams
- Provides better coordination between expanded and buying teams

IROC Enhancements

- **Ability To Create Batch Requests For NFES Items**

- Decreases work time to enter requests for cache items

- **Catalog Improvements**

- IROC will allow for the GACC-specific catalog items, incident type-specific catalog items, and agency-specific catalog items

- **ICBS Interface**

- Working to reduce the pain points you currently experience with the ICBS/ROSS interface

IROC Enhancements

- **Increased Integration with IRWIN**
 - IROC will not only read information from IRWIN, but it will also push information back to IRWIN
 - IROC will transfer assignment history back to IQS/IQCS
- **Improved Support Request Functionality**
 - Easier to create and track a support request
 - Business rules still apply
- **Email the Resource Order Form and Operational Reports Directly from IROC**
 - Easily and quickly share information with anyone who needs it
- **Attach Supplemental Documents to Requests**
 - Lowers the need for follow up fax or emails
 - Allows all the information related to a request to stay in the system
