

Great Basin Coordinating Group Conference Call Notes

Date: 09/03/2016 **Time:** 0800 Mountain / 0900 Pacific

Facilitator: Derrek Hartman

Agenda Items:

Predictive Services Update: High risk for Wind/Low RH for parts of eastern Utah today. Much cooler temperatures and showers to Idaho, western Wyoming and northern Nevada today. High Risk for Winds/Low RH continues through today, however the winds will be mainly limited to eastern Utah. Holdover fires could pop up from yesterday's lightning activity across the eastern Great Basin as southwest winds pick up. Maximum temperatures are already on a downward trend and will become quite cool on Sunday/Monday as the main low swings into the Region. Wetting rains are likely over much of Idaho and western Wyoming and even the northern fringe of Nevada today. High elevation snow is also possible in these areas above 7500'. The southern half of the Great Basin will see the cooler temperatures but remain on the drier side, especially by the first part of next week as westerly flow returns.

GB Coordinating Center Update:
