

Great Basin Incident Commander Conference Call Agenda 2016

Date: Sunday, September 04, 2016

Note taker: Gina Bald

GB MAC/GACC Coordinator:

Agenda/Incident Commander Discussion Points: **Summarize the following in 4 min or less:**

- Fire Size / % contained / # of people / Cost to date
- Significant changes since the last 209
- BRIEF fire synopsis /Critical Incident Information (use Directional vs DIVS's)
- Political Issues / Community Meetings
- Closures / Evacuations / Public Safety Issues
- Major Safety Concerns / Injuries / Accidents
- Critical Resource Needs
- Resources Available to Reassign/Share/Demob

Predictive Services:

Weather update:

Basil

Newmershycky

High risk for Wind/Low RH for parts of eastern Utah today. Much cooler temperatures and showers to Idaho, western Wyoming and northern Nevada today. High Risk for Winds/Low RH continues through today, however the winds will be mainly limited to eastern Utah. Holdover fires could pop up from yesterday's lightning activity across the eastern Great Basin as southwest winds pick up. Maximum temperatures are already on a downward trend and will become quite cool on Sunday/Monday as the main low swings into the Region. Wetting rains are likely over much of Idaho and western Wyoming and even the northern fringe of Nevada today. High elevation snow is also possible in these areas above 7500'. The southern half of the Great Basin will see the cooler temperatures but remain on the drier side, especially by the first part of next week as westerly flow returns.

GBCC Update:

Ray Crowe

- Light IA. 12 new fires for 3 acres
- Large Fire Growth: 2114 acres
- GB PL4, Nationally PL3
- MAFFs no longer available
- 7 ATs in the Great Basin

MAC / GBCC

Coordinator

Derrek Hartman

- Nothing to Report

1
