

FIRE INFORMATION

Black Hills National Forest

South Dakota

Incident Name: Flynn Creek Fire

Date: Today

Time: 12:00 p.m. (1200)

Size of Fire: 5000 acres

Location: 3-5 miles SE of Custer, SD on the Black Hills NF and Custer State Park.

Summary: Crews successfully held the north line, finished lines on the northeast side, secured the Bluebell lodge are in Custer State Park, and made good progress on lining the unsecured south side. Last shift, the fire is about 25% lined. Helicopters helped with mop-up and spot fires. The fire expanded significantly to the south, approaching the Wind Cave National Park. Winds have been moderate, allowing some strong runs. Forest Supervisor Darrel Barber describes the overall situation as stable now, but there's a long way to go.

Air operations yesterday included three airtankers that dropped 22 loads of fire retardant on the hotter south end of the fire and several hot spots. A total of 55,000 gallons of retardant was dropped yesterday. More drops will be made this afternoon if necessary.

The Type 3 Incident Commander and the Agency Administrator are considering ordering a Complex Incident Management Team due to the complexity and scope of the situation.

Structures and evacuations: Custer State Park officials have confirmed nine cabins have burned, four state-owned cabins and five privately owned. The cabins are in the Hazelrod and Bluebell areas of the park. About 20 structures that were seriously threatened in the Bluebell area were protected.

People were evacuated early yesterday from the Hazelrod area along lower French Creek in the Black Hills National Forest, along with the Bluebell Lodge and Youth Forestry Camp complexes in Custer State Park. A decision has been made to not let people return to their homes yet, because conditions are not entirely secure at this time. In lower French Creek, residents are allowed to return for a short time to inspect their property but cannot stay. This afternoon, fire officials will meet again to assess the possibility of letting people return to their homes.

Outlook: High temperatures forecast for today are 74-77, RH 15-25, winds 15-20 mph from the North with higher gusts. Slight chance of moisture within a couple days.

Resources: There will be 750 people involved in firefighting and support by tonight. Fire agencies include the Forest Service, National Park Service, Bureau of Land Management, Custer State Park, Wyoming and South Dakota Forestry, Custer County and about 20 local fire departments.
