GREAT BASIN DATA ENTRY STANDARD FOR SUPPLIES

The following guide and examples have been developed to assist you in ordering and filling the Supply catalog in ROSS in a Great Basin dispatch offices. Please take a few minutes to glance through this guide. We know how hectic the first hours of a fire can be, but a few minutes of your time now will save all of us headaches later. If you have any questions or suggestions we are more than happy to hear and consider them. We hope you find this guide user-friendly and informative. Feel free to share our information with your home unit.

Our goal is to create a **complete** document (like that produced on card stock), from order to audit in the ROSS system. At this time this means *forcing* some of the information we require into printable fields. Also by standardizing our order and fill information we can use ROSS to generate any number of reports for various individuals. REMEMBER this is still a work in progress. If you find areas that need correction or clarification please bring them to our attention.

If you are an occasional ROSS user and need more in-depth explanation see the appendices in this manual for entering, placing and filling orders or refer to the ROSS home page (http://ross.nwcg.gov/) under Module Descriptions.

When entering a new request: Select the desired Category/Catalog Item. The Great Basin does not use "!Service Not in Catalog" at any time. If you desire a service that is not among the selections available you will enter the request as NON-NFES Supplies, !Not in Catalog Supplies. This gives us the "Item Description" field to enter the desired service or supply information. Enter the information in clear and concise text, keep it brief and generic. Use the Special Needs field for more detail or description. (See Service/Repairman for an example.) When ordering a Service item that is not currently among those supplied by ROSS please enter the word "SERVICE" in all caps as the first part to the Item Description. This will allow us to inform ROSS of additional services not in their current catalog. You will see other examples of this sort of entry, look for the all upper-case bold text examples. Entering the word "Supply" on a NON-NFES Supplies item is optional. Remember: you get one chance to enter the information in the "Item Description" field. ROSS does not allow you to edit the information after the resource number has been created.

Special Needs: The Great Basin uses the "Special Needs" field for a <u>brief</u> description/documentation area. Pertinent information such as model numbers, part numbers etc... should be entered in clear and concise language. Do not repeat information already supplied in the Resource Request or Deliver To fields. See examples throughout this guide. NOTE: Information entered in this area will also print out on the "Print Request List" report.

The Great Basin tracks the usual service type items (Porta Potties, Refers, Computers, Phones, Radios etc.) as well as sensitive, non consumable/high cost items and items that may need to be returned to a supplier. "Tracking" SERVICE items: Usually when a "Service" Category item is ordered, ROSS will only allow you to use "Fill with Agreement" option (see When Filling a Resource later in this guide), this will in most cases, automatically track the resource by mobing the resource to the Incident Resources screen. Please check the Incident Resources screen on a regular basis to check for items you might need to Demob. See the Tracking Options Appendix for a listing of ROSS's preset tracking.

"Tracking" SUPPLY items: When you order a NFES or NON-NFES Supply Item ROSS gives you the option to "Track" the resource. You get 2 chances to "Track" an item. The first is by selecting the "Track Item" button in the New Request screen. Remember to UNCHECK this option as ROSS does not clear the box after you create the resource order. The second chance is when you enter the fill information using the "Fill with Local Purchase" option. You do not get a third chance to track an item after it has been filled. If the "Track" option is not desired and/or selected the order will be "Filled/Closed" after the fill information has been entered. This is the method you will use for consumable items.

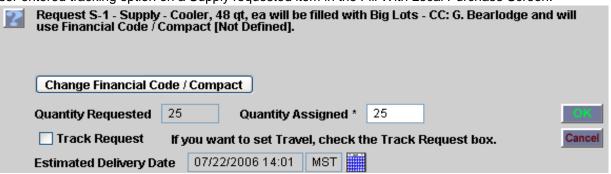

ROSS's preset tracking option on a Service requested item in the New Request Screen.

ı	Select Item	to Request	_	┌Enter Request	for Service	- C	ellular Telep	hone (NON-NF	ES)	
	Catalog Pre	orders		Quantity *	1 Block	[1	- 999999] (SG)	Default Block 🦠		
	Catalog	Supply		Next Number	1		View Is	ssued #'s		1
	Category Item Name	Service - Communications		Need Date/Time *	07/22/2006 13	3:21	1 MST	✓ Track Reques	t	

ROSS's user entered tracking option on a Supply requested item in the New Request Screen.

ROSS's user entered tracking option on a Supply requested item in the Fill With Local Purchase Screen.

National Standard for Data Entry: Great Basin will follow the National Standards for Data Entry when filling a request **when we consider it viable**. The standard guideline shows: ITEM "-" Vendor Name "-" Unique Identifier. Since the "Item" already is printing on the left side of the resource order we enter an Item only if we feel it needs additional clarification. You will see a few examples of this throughout this guide, MEALS is one of them.

GBC Standard for Data Entry: Primarily Great Basin requests that the following information be entered into the "Resource Name*" field:

Vendor Name "-" Unique ID(if applicable) "-" Payment Method - Cost (if appropriate)

Since only the information in the "Resource Name*" field prints on the resource order we want pertinent information in this field. Remember the field length is limited to 50 characters. Separate fields using dashes. Spaces must be include between the fields or the text will run over into the M/D Ind box. You can cut (Control C) and

Paste (Control V) any existing data from this field into the "Description" field.

When filling a request: Great Basin only uses the "Fill with Agreement" and "Fill with Local Purchase" selections. While working at GBC and Great Basin dispatch offices you will never "Quick Fill" a resource. See examples later in this guide for examples of the information to be entered in "Resource Assigned" field.

Using "Fill with Agreement" will usually mob the Resource Assigned to the Incident Resources screen after fill information is entered. Release the resource if it was ordered for a short duration/one time use (Do NOT use "Quick Release).

Using "Fill with Local Purchase" allows two options. "Tracking" a resource will mob the Resource Assigned to the Incident Resource screen. If the "Track" option is not desired/selected the order will be "Filled/Closed" after the fill information has been entered. This is the preferred fill method for many NFES or NON-NFES Supply items as we don't want to accidentally track rubber gloves and airline tickets.

NFES ITEMS: For local resources will always be filled: Cache ID "-" Issue number "-" (Substitution if applicable, see below). Remember to "Track" the item if necessary.

Substituting a NFES & NON-NFES item: If a Substitution has been made on NFES Supply request, add the substituted item number to the Resource Name" field on the "Fill with Local Purchase" screen (see example below). If a **substitution is made on a NON-NFES Supply** document the substitution in the "Description" field on the "Fill with Local Purchase" screen if necessary. ROSS will not let you edit the information in the "Item Description" field.

Example of NFES Supply Substitution:

For Replacement Requisitions and non local resource NFES items see examples in this guide under NFES-Items.

Placing NFES Orders to the GACC Caches: Generally with Type 1, 2, or 3 team orders, or when the local caches order replacements for their cache, the orders need to go to the Great Basin Cache in Boise. This system uses a ROSS/ICBS (Interagency Cache Business System) interface. Because of this, there are some very important things to remember when creating and placing the order. Always follow up with a phone call to the cache to verify receipt of the order. You must call the cache and have them UTF the order before you can do anything with that order. You cannot just cancel the order in ROSS nor can you use the "Retrieve" function.

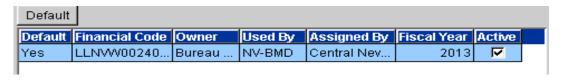

ALL RADIO KITS, 500 PERSON MEDICAL KITS, SMOKE PARTICULATE MONITORING KITS, P-RAWS AND I-RAWS ORDERS ARE PLACED UP TO GREAT BASIN COORDINATION CENTER (GACC) AND NOT DIRECTLY TO THE GREAT BASIN CACHE.

Cache Fill Information: When the Great Basin Cache fills a request there are several ways they can fill them:

- "Backorder" all or a portion of a request. When the item is re-stocked the cache completes the fill.
- "UTF" all or a portion of a request.
- "Forward" all or a portion of a request to another cache to fill.

A request is considered filled when *any* portion of the requested quantity is filled. When any portion of an un-tracked item is filled, the request is set as Fill/Close. However, if a request is partially filled and partially forwarded or back ordered, ROSS continues to receive fill information until the total requested items is complete (or UTFd). Even when you see Fill/Close you need to check to see whether or not the order is completely filled.

Financial Code: You must indicate that one of the financial codes assigned to this incident is the default code or you will get an error in this section. Even if there is only one code assigned, it must be marked as the Default. On the Incident Screen in ROSS, under the Financial Codes tab, highlight a fire code and then click on the Default button.

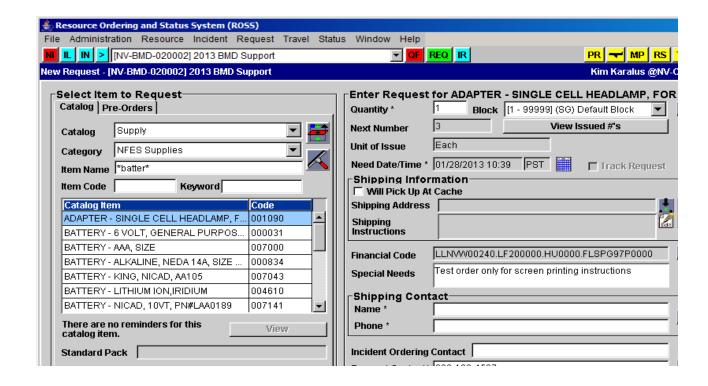

Special Needs: If you need to add something to the Special Needs box, just remember that if you type a space, a dash, and another space (" - ") it will show up in ICBS as an upside down question mark. Whenever that happens, the cache cannot view the order. Example:

TO APACHE PASS ROAD - ENTRANCE TO FORT
Appears like this in ICBS:
TO APACHE PASS ROAD ; ENTRANCE TO FORT

Standard Pack / Unit of Issue: The first thing to look for is Standard Pack and Unit of Issue. Standard Pack is how the cache generally has the item in stock (EA, 24/PG, 10 PG/BX, etc.). Unit of Issue is how you need to order. Example: The fire orders 100 AA Batteries. Standard Pack is 24 each per package (24/PG). Unit of issue is Package, so you need to order 4 Packages. If the unit of Issue was EACH, you would order 100 even though the Standard Pack was 24/PG.

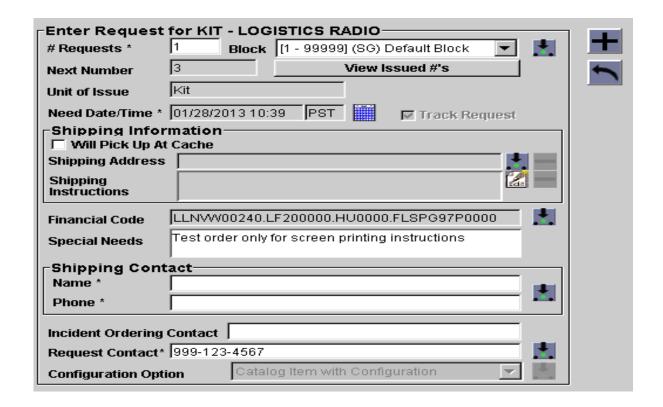

Note also: The "Track Request" box is grayed out. It will automatically put a check mark in if it is a trackable item (Radio Kits, etc.)

Shipping Information: THIS IS CRITICAL - you must select one method of shipping.

There are 3 options to choose from:

- a. Pick Up At Cache
- b. Shipping Address OR
- c. Shipping Instructions

Pick Up at the Cache: If this is chosen, the other options will disappear. You will then need to signify who will be picking the items up and when. THIS IS ONLY FOR GREAT BASIN CACHE not local caches.

Shipping Address / Shipping Instructions: If you enter a Shipping Address it will show up in the field. If you enter Shipping Instructions, the Shipping Address is replaced with See Shipping Instructions. You can enter an address in the Shipping Instructions but you must make sure you have the City, 2 letter State identified AND the Zip Code.

Shipping Contact / Incident Ordering Contact: You can use the pick icon to pick a name and phone number or you can just type in the boxes. This is a mandatory field and should be the name of the dispatcher and the appropriate phone number. DO NOT PUT PERSONAL CELL NUMBERS IN HERE AS THEY WILL CARRY OVER FOR ALL THE OTHER ORDERS AND BECOME PART OF THE ROSS CONTACT INFORMATION.

The following format will be used when entering data for both "Fill with Agreement" and "Fill with Local Purchase".

The "Resource Name" field will be entered as follows: ITEM "-" Vendor Name "-" Unique ID(if applicable) "-" Payment Method

~				
See	а	nn	VP.	

Description can be cut/pasted from the Resource Name field. Enter any special info such as Make, Model, S/N. etc..

Agreement numbers can be Agreements, BPA's, EERA's or Credit Card Users. Agreement #'s don't have to contain spaces or dashes if your limited in space.

Provider is the agency that established the agreement. OR Provider is the agency that issued the credit card. Vendor and Location

Examples of proper fill information:	Resource
Resource Name entered as: Cornel & Maria Isfan - BPA 12-40 (ID-EIC is generated automatically and is not part of your 50 character limit.).	Assigned Cornel & Maria Isfan - BPA 12-40 (ID-EIC)
Resource Name entered as: Tiny's Restaurant Payson - D - CC: J. Billings (ID-EIC is generated automatically and	Resource Assigned Tiny's Restaurant
is not part of your 50 character limit). NOTE: Due to field length we have eliminated some spaces.	Payson - D - J. Billings CC (ID- EIC)
	Assigned
Resource Name entered as: CopyCo - S/N 8763209 - Ag# 6524SF2F21F (ID-EIC is generated automatically and is not part of your 50 character limit). Description will contain: IBM ColorMaster 400, S/N 8763209	CopyCo, S/N 8763209, Ag# 6524SF2F21F (ID- EIC)

There is a fill information grid located in the Filling a Request appendix.

Examples of desirable and non desirable request and fills:

In this example the copier is ordered incorrectly, and special needs are not indicated to the BUYT. In the Fill information we already know we are getting a copy machine so we are wasting 12 characters of the 50 allowed. The unique identifier is not clear is it the model or serial number. Finally there is no indication as to the payment method.
