

**% of Total Precipitation**

**Dixie National Forest-Precipitation Report**

Date Created: 12/1/2023

The % OF MEDIAN CUMULATIVE PRECIPITATION and % OF MEDIAN SNOW WATER EQUIVALENCES represent current cumulative precipitation and snow water equivalence values for those selected SNOTEL sites compared to their respective median value for data recorded from 1991 - 2020 on one day prior to this day of the water year. For example, if this map is created on Jan 26 then it represents statistics for end of day on Jan 25. If NA is displayed it indicates that either the current or median snowpack for that site is melted off by this day.
