

# Fire Information

Big Piney Ranger District  
Bridger-Teton National Forest  
U.S. Department of Agriculture

## Cottonwood II Prescribed Fire

**Scheduled:** September - October  
**Size:** 1,093 Acres  
**Fuel Type:** Aspen, Mixed Conifer, Slash  
**Contact:** Big Piney Ranger District 307-276-3375

The Big Piney Ranger District of the Bridger-Teton National Forest will resume ignitions on the Cottonwood II prescribed burn. This project is located 20 miles west of Daniel, WY. Weather and fuel conditions will drive actual ignition dates for the burn.

### Objectives:

- Increase aspen regeneration and reduce encroaching conifer
- Increase forage conditions for wildlife habitat
- Reduce hazardous fuels build-up
- Restore fire-adaptive ecosystem

Smoky conditions may be experienced temporarily in the area. Hazards exist in and near the burn and the public is urged to avoid recreating in the vicinity during burn operations. Interagency fire managers will attempt to minimize impacts to Forest visitors during implementation.
