### FIRE ACTIVITY:

The Dollar Lake Fire is currently at 19,319 acres and 29% containment. The reduced containment reflects recent fire growth.

Dependent on favorable conditions, firefighters plan to continue strategic firing operations in Division Mike between the indirect line constructed from Little Sheep to Big Sheep Mountain and the southeastern interior of the fire. Increased fire activity and smoke can be expected during this operation.

A wilderness group is being formed and is identifying opportunities to keep the fire from moving further east and south. From the southwestern end of the fire to Little Sheep Mountain, crews will continue today mopping up and securing the fire's edge. Crews on the west and north sides of the fire continue to mop up and patrol, as well as secure existing control features around the wildlife feedground on the northeastern side of the fire. The structure defense group continues to bolster defense systems around the Bible Camp area and assess defenses around structures to the south of the Camp. In the event of a new incident, the structure group will support local resources with initial attack.

### WEATHER:

Chances of precipitation increase today as moisture streams into the atmosphere from the west, bringing isolated showers and thunderstorms to the area by mid-afternoon. Wetting rain chances remain low. Gusty and variable outflow winds will be a concern with any shower or storm in the area. Shower chances will continue overnight. Chances of wetting rain increase on Sunday as showers and storms become more widespread.

### EVACUATIONS:

Per the Sublette County Sheriff's Office, everything south of the forest boundary (end of State Highway 352) to Black Butte Road has now been returned to the "Ready" state. Red Cliff Bible Camp and north of Union Pass Road (FS RD 660) remains in "Go."

For more information see: <https://www.sublettecountywy.gov/AlertCenter.aspx?AID=2>

### CLOSURES:

The Bridger-Teton National Forest has issued a closure order for the Dollar Lake Fire area.

Beginning at the intersection of Union Pass Road (FS600) and the southern Forest boundary, the fire area follows the Union Pass Road to the north (keeping the Union Pass Road open) to the intersection with the Green River Lakes Road (650). From there, the fire area encompasses the Forest east and south of the Green River to Green River Lakes. The eastern terminus of the closure includes both Green River Lakes and follows the Continental Divide Trail (CDT)/Highline Trail (7094) southeast to the intersection with the Clark Creek Trail

(7185). The closure follows the Clark Creek Trail, which remains open, to the intersection with the New Fork/Porcupine Trail (7137). From there, the closure continues south along the New Fork/Porcupine trail up to the Porcupine Ridge/Porcupine Pass area. It then continues to the west along the hydrological divide to the southern fork of the South Fork Gypsum Creek and down the drainage to the Forest Boundary, then west back to the Union Pass Road. The CDT/Highline Trail is also closed from the described area to the north until it intersects with the Union Pass Road. Gypsum Creek Road from the Forest boundary north and the network of roads branching off it are in the closure area and not open to the public.

#### **SMOKE INFORMATION:**

Smoke from wildfires in the Pacific Northwest and Canada may continue to impact the area. Locally, smoke from the Dollar Lake Fire will continue to sink overnight and drift down through the Green River valley, lifting throughout the day as temperatures increase. Residents and visitors impacted by the smoke are encouraged to monitor local air quality conditions using the following suggested resources.

Real-time Air Conditions: <https://map.purpleair.com>  
Air Quality Index and Map: <https://www.airnow.gov/>  
Fire and Smoke Map: <https://fire.airnow.gov/>

#### **FIRE RESTRICTIONS:**

Stage 1 Fire Restrictions are in effect for the Bridger-Teton National Forest. Fires are not permitted unless they are within a metal or concrete fire pit installed and maintained at a developed recreation site; liquid or gas fuel that can be turned off and no flammable materials within three feet; or a fully enclosed metal stove with a chimney and mesh screen spark arrestor.

For fire restriction information please go to: <https://www.fs.usda.gov/r04/bridger-teton/alerts/stage-1-fire-restrictions>
