Greys River Ranger District
Bridger-Teton National Forest
U.S. Department of Agriculture

Strawberry Creek Prescribed Burn

Scheduled: September -October 2019
Location: Approximately 7 miles east of Bedford, WY
Unit Area: Approximately 2500 acres
Fuel Type: Conifer and Mountain Shrub

Objectives:

- Reduce the abundance and canopy cover of conifer trees to improve the forage conditions for wildlife.
- Contribute to a balanced mix of major vegetation types.
- Fuels Reduction: Prescribed fire allows the use of fire as a natural method for treating fuels and promoting desired and historical fire regimes.

Cooperators:

This fire is a cooperative project supported by the Wyoming Game and Fish Department and the Bridger-Teton National Forest.

Project Details:

Actual ignition (1-2 days) will be dependent on meeting strict parameters for weather and fire behavior conditions. Both hand ignition and/or aerial ignitions with a helicopter may be utilized. Forest users may experience temporary smoky conditions in the vicinity of the burn unit, along with the possibility of occasional, short-term trail or road closures. Interagency fire managers will attempt to minimize any adverse impacts as the burn proceeds. Thank you for your cooperation.
