

Evening Brief

Date/Time Stamp: Friday, August 14, 2015 - 11:05 PM

Weather Summary

High temperatures in Boise will be down a few degrees from yesterday and will only reach 85 degrees on Saturday then remain in that range through midweek next week. Another round of isolated to scattered showers and thunderstorms will kick up again this afternoon over the mountains of Utah and central/eastern Idaho/western Wyoming. The airmass will then become quite dry across the north and west over the weekend with single digit afternoon relative humidity.

Another low pressure system will drop out of southern Canada into the Northern Rockies on Tuesday/Wednesday keeping temperatures from rapidly increasing and may introduce another round of isolated thunderstorms to the central Idaho mountains.

This trough will also push the dry airmass into Utah causing relative humidity to drop into the single digits. Mild, dry west/northwest flow will continue across the region through the workweek.

Preparedness Levels

Current:

Great Basin	4
National	5

Great Basin Fire Activity:

New Fires and Acres: 38 fires 3288.3 acres

Moderate IA activity continues in Northern Nevada and Western Idaho.

Resources:

GBCC is below draw-down.

- Type 2 IMT (DeMasters) will inbrief at the McCall Smokejumper Base at 1800 8/14. There are no National Caterers, Shower units, engines, crews, helicopters and radio frequencies are critically low.

Great Basin Fire Potential Summary

Fire danger will remain high across the west and north today with continued gusty west/southwest winds. Fire danger will remain elevated through the next week as the air mass continues to be quite dry, but temperatures and winds will moderate somewhat, hopefully allowing crews to make progress on existing fires.

A break in lightning activity will likely decrease new IA, but holdover fires may pop up over the weekend.
