INTRODUCTION

The Coeur d'Alene Interagency Fire Cache (hereafter referred to as Fire Cache, Cache, or CDK) is a nationally identified Type 2 interagency cache operation. It is primarily designed for stocking and maintaining wildland firefighting equipment and supplies to support Initial Attack (IA) and multiple Type 1, 2, and 3 incidents. Normal complement includes four (4) each, 250-person Mobile Support Cache Vans, NFES 082069, which are ready for shipment at any given time.

The mission of the Fire Cache is to provide supply and equipment logistical support to all requesting state and federal agencies. Support is primarily directed toward wildland fire suppression activities. Also supported are local and interagency regional efforts in cases of natural disasters and large projects such as prescribed burning.

The Fire Cache is service-oriented, with a goal to exceed expectations. Therefore, this guide serves as an overview of the services and procedures which can be utilized by agencies conducting business with the Fire Cache. It is not inclusive of all the support and services available.

FIRE CACHE OPERATIONS

The Fire Cache is primarily funded and staffed by the Idaho Department of Lands (IDL). However, through a joint cooperative venture with the US Forest Service, Idaho Panhandle National Forest (IPNF), the Assistant Fire Cache Manager – Database Administration position is filled by an IPNF employee. Within IDL infrastructure, the Fire Cache is assigned to the Bureau of Fire Management and is located at 3328 W. Industrial Loop, Coeur d'Alene, Idaho, 83815.

General Staffing

Fire Cache Manager	Additional Temporary Staffing*
Assistant Fire Cache Manager	Clerk(s)
Database Administration	Material Handler(s)
Assistant Fire Cache Manager	Driver(s) & General Laborer(s)
Operations	
Technical Records Specialist	
Fiscal Administration	
Fire Cache Storekeepers	
Receiving	
Shipping	
Returns	
Refurbishment	
Program Specialist – FEPP/FFP	
Pump Shop – Mechanic	

The Cache Manager, Assistant Cache Managers, and the Technical Records Specialist staff the Fire Cache year-round. These positions are permanent employees, funded at 12 months per fiscal year. The Fire Cache Storekeepers, Pump Shop, and FEPP/FFP Administrative Assistant positions are also permanent employees but funded at eight months per fiscal year.

*The temporary staffing position(s) are filled on an “as needed” basis. Terms of employment are not to exceed five months. Hiring for these positions is determined by the level of activity and need at the Fire Cache.

FIRE CACHE CONTACT INFORMATION AND OPERATING HOURS

Coeur d’Alene Interagency Fire Cache
FAX Orders to: (208) 769-1534

Office: (208) 666-8694
E-Mail: firecache@idl.idaho.gov

Fire Cache Hours: Monday through Friday 0800 – 1630

The Coeur d’Alene Interagency Fire Cache will adjust the hours of operation as needed during periods of moderate to heavy activity. During the months of June through September, there is always a Fire Cache employee on-call. All Fire Cache employees can be reached through Coeur d’Alene Interagency Dispatch Center (hereafter referred to as Dispatch Center or CDC) or by calling the employee directly using the following contact information:

Cache Manager

Bjorn Jordan CELL# (208) 691-7778
bjordan@idl.idaho.gov

Assistant Cache Manager – Database Administration

Mac Weaver..... CELL# (208) 227-6145
mweaver@idl.idaho.gov

Assistant Cache Manager – Operations

Kelly Mahler.....CELL# (208) 818-1843
kmahler@idl.idaho.gov

Storekeeper, Refurbishment

Cache Storekeeper, Marte Meredith CELL# (208) 659-4087
mmeredith@idl.idaho.gov

Storekeeper, Returns

Cache Storekeeper, Molly Oscarson CELL# (208) 310-9597
moscarson@idl.idaho.gov

Storekeeper, Shipping

Cache Storekeeper, Michael Deitrick CELL# (208) 790-9471
mdeitrick@idl.idaho.gov

Storekeeper, Receiving

Cache Storekeeper, Matthew Harrison CELL# (208) 596-6359
mharrison@idl.idaho.gov

Fiscal Administration

Technical Records Specialist, Renee Fisher CELL# (208) 704-2331
rfisher@idl.idaho.gov

FEPP/FFP

FEPP/FFP Program Specialist, Jessica Wirth CELL# (208) 640-3944
jwirth@idl.idaho.gov

SHOP CONTACT INFORMATION AND OPERATING HOURS

Coeur d’Alene Shop

Office: (208) 666-8665 or 8694

E-Mail: firecache@idl.idaho.gov

Shop Hours: Monday through Friday 0800 – 1630

The Coeur d’Alene Shop will adjust the hours of operation, as needed, during periods of moderate to heavy activity. During periods of increased fire activity, and as needed, Shop employees will be placed in on-call status. After hours, Shop employees can be reached through the Fire Cache Duty Officer, or by calling the employee directly using the following contact information:

Shop Superintendent

Matt Barnhouse..... CELL# (208) 755-2231

mbarnhouse@idl.idaho.gov

Mechanic

Michael Slack..... CELL# (208) 670-4020

mslack@idl.idaho.gov

Fabricator/Welder

Andrew Silveira..... CELL# (707) 328-2521

asilveira@idl.idaho.gov

PUMP SHOP CONTACT INFORMATION AND OPERATING HOURS

Coeur d’Alene Pump Shop

Office: (208) 666-8637 or 8694

E-Mail: firecache@idl.idaho.gov

Pump Shop Hours: Monday through Friday 0800 – 1630

The Coeur d’Alene Pump Shop will adjust the hours of operation, as needed, during periods of moderate to heavy activity. During periods of increased fire activity, and as needed, Pump Shop employees will be placed in on-call status. After hours, Pump Shop employees can be reached through the Fire Cache Duty Officer, or by calling the employee directly using the following contact information:

Pump Shop Mechanic

Nick Caraway..... CELL# (208) 659-0738

ncaraway@idl.idaho.gov

Fire Cache and Pump Shop Employees can also be reached by calling one of the following 24-hour numbers:

Coeur d’Alene Interagency Dispatch Center (208) 772-3283

Idaho Department of Lands, Bureau of Fire Management Duty Officer..... (208) 416-3604

Contact numbers are revised each year.

NATIONAL INTERAGENCY SUPPORT CACHE SYSTEM

The National Interagency Support Cache (NISC) system utilizes a six-digit numerical identifier. This National Fire Equipment System (NFES) number provides a standard numbering system and an accurate description for commonly stocked equipment and supplies used on an interagency and interregional basis. The NFES equipment and supplies catalog can be found online at nwcg.gov/publications/pms449-1.

Not all National NFES resources are stocked at every Cache. Therefore, it is important when reviewing the national online NFES catalog and recognize the stocking locations for the supplies considered. The CDK does not stock all the resources found within the National NFES Catalog. Contact the CDK Cache for current stock status or refer to the CDK Specific Catalog as everything listed in this document is current for what we stock on hand.

FIRE CACHE STOCK

All supplies and equipment are labeled and may or may not be new. If they have been previously used, they will have been inspected and refurbished to acceptable standards as set forth in *Fire Equipment Storage and Refurbishing Standards*, NFES 002249. Tools are sharpened and ready for immediate shipment and use. Many of the items stocked at CDK are prepared as kits or self-contained units. If the complete kit is required, order by the kit NFES catalog number assigned. If only certain items within the kit are required, order individually by the item's specific NFES catalog number.

All kits are ready for use and contain a complete inventory. If there are any discrepancies, report them to the Fire Cache. All kits which have been accepted as an NFES standard will be so identified and have the national standard complement of supplies and equipment. Some kits may vary in content from the national standards as necessary to comply with agency or interagency regional standards. When this occurs, the kit NFES number will be changed.

PUMP SHOP SERVICES

The Coeur d'Alene Pump Shop provides services as a program function operating under the policies and administration of the Coeur d'Alene Interagency Fire Cache.

The goal of the Pump Shop is to maximize performance, reduce costs, and improve longevity of the equipment for which it is responsible. The Pump Shop's primary objective is to increase firefighter safety through regular maintenance, with rigid standards applied to all work performed.

City, county, state, and federal cooperators, working in cooperation with the Idaho Department of Lands, have full access to the Pump Shop's personnel and services. The Pump Shop's workload may dictate turnaround time.

Maintenance Work Orders

All equipment requiring Pump Shop services must be initially routed through CDK to facilitate initiating the maintenance work orders.

1. Fire Suppression Maintenance: Equipment worked on by the Pump Shop must have a Work Order (WO) that includes the description of the work to be performed, the requestor's name and contact information, and pertinent fire billing information. Whenever possible, the request should have a Resource Order (RO) form authorizing the work to be done (CDA Cache equipment excluded).

2. Routine Maintenance: Equipment worked on by the Pump Shop must have a WO that includes the description of the work to be performed, the requestor's name and contact information, and pertinent billing information.

CLASSIFICATIONS OF EQUIPMENT AND SUPPLIES

Trackable Items: Those items which are tracked due to dollar value, sensitive property classification, limited quantities available and/or other criteria. For example: chainsaws, pumps, radios, and generators are considered "trackable items". These items have an assigned number for tracking purposes. Note that trackable items are also considered durable and cannot be sold to other agencies, fire service organizations, and/or other departments.

Durable Items: Those items considered having a useful life expectancy greater than one incident. For example: tents, lanterns, hoses, sleeping bags, and nozzles are all durable items.

Consumable Items: Those items that are expected to be consumed during incident use. Examples of consumable items are batteries, gloves, plastic canteens, forms, MREs, etc.

PROCEDURES FOR ORDERING

Use the National Fire Equipment System Catalog, NFES 000362 (now online only) as the reference catalog when ordering from the Fire Cache. A printed or electronic copy of the CDK Specific Catalog is available upon request. Taking the time to reference the front portion of this catalog will provide valuable information about the Fire Cache system and proper ordering etiquette. In all cases, order by the NFES number in conjunction with the correct [Units of Issue \(UI\), Attachment 1](#). To provide maximum assistance, and speed up the process of your orders, the Fire Cache needs lead time. **Do not wait until reserves are exhausted before reordering.** Order in standard packs, and make sure UIs are correct.

Routine Ordering – Non-Incident

FAX Orders to: (208) 769-1534 or E-Mail: firecache@idl.idaho.gov

Department of Lands: Orders should be submitted on a [Supply Order Form, DL 460, Attachment 2](#).

Federal Agencies: Requests should be submitted on a [Procurement Request, AD-700, Attachment 3](#).

All Other Agencies: Requests should be submitted on a [Resource Order, ICS 260-1, NFES 001470, Attachment 4](#). Can also utilize existing agency-specific supply order forms provided they contain the necessary information. For example, all orders must include requested items with correct UI. They also need to identify a point of contact, phone number(s), shipping address, billing address, purchasing account codes, requested delivery date and method of delivery (if preference).

Routine Ordering for agencies and/or organizations without an existing agreement: An existing agreement is required before ordering supplies through CDK. In the absence of an existing agreement, CDK provides an [Idaho Department of Lands–Coeur d'Alene Interagency Fire Cache Agreement for Non-Emergency Use, Attachment 5](#), which can be modified to address specific needs, as necessary.

Training Material Ordering

CDK does not maintain a library of training materials i.e., videos and instructor packages. Order needed materials from the Great Basin Cache (GBK) located at the National Interagency Fire Center (NIFC) in Boise, Idaho. Use the following link:

<https://www.nifc.gov/resources/supplies/great-basin-cache/ordering>

Incident and Project Support Orders

1. All initial attack and extended attack fire orders are to be placed through the local dispatch center.
2. Fire orders for Cache supplies should be submitted on a RO (supply "S#" request) form and emailed to the Fire Cache inbox: firecache@idl.idaho.gov. Incomplete information may cause delays and/or errors in the order(s).
3. Fire Cache NFES items must be submitted on a separate RO from all non-NFES item orders (i.e., items purchased locally).
4. Any additional support requests, outside of filling NFES request orders. i.e., filling cubie containers or gas cans, and picking up non-NFES items (Gatorade and bottled water) are reviewed on an incident-by-incident basis and support will be determined by the Cache Manager. Dispatch, or the ordering entity, is informed of the local purchase support that CDK can provide for each incident or request.
5. Local Purchasing: Local purchases will be done at the A/D/A level. A local buying team may be ordered, through proper channels, to support A/D/A incidents (Type 1, 2, or 3). The Fire Cache will not be doing local purchases. If A/D/A's do not have the retail businesses to fulfill their purchasing needs they can contact the Cache Manager who, on an incident-by-incident basis, will determine if the Cache can provide purchasing support. Dispatch, or the ordering entity, will be advised of the local purchasing support the Fire Cache is able to provide for each incident or request.
6. Fuel Purchases: The Fire Cache can provide fuel for initial attack for two days. After that, a contractor or fuel source will need to be ordered. Requests will require a Resource Order and a separate "S" number for each item (i.e., gasoline is a different request than gas cans).
7. The Fire Cache does not control the resource ordering numbers for any incidents. These numbers are assigned through the servicing Dispatch Center, and control may, or may not, be given to the incident.

Direct Cache Ordering

Direct ordering from an IMT will need to be coordinated with the servicing dispatch office and must receive final authorization by the Fire Cache Manager (FCMG) before the process can begin. The FCMG also reserves the right to revoke direct ordering if the FCMG feels a situation calls for it. Requirements include:

Full communication between the IMT Supply Unit Leader, or their designated representative, and CDK must be established and maintained before Direct Cache Ordering will be approved. IMT Supply Unit Leader, or

their designated representative, must be able to maintain the series of “S#’s” correctly while Direct Cache Ordering is authorized.

The primary ordering method is submitting a “Resource Order-Supplies” Excel form generated from CDK, which will be provided when approved for direct ordering.

1. This form is formatted to include all the items supplied by CDK using the NFES #'s mirrored in this catalog and will need to be submitted to CDK via email to: firecache@idl.idaho.gov
2. Notification to the CDK, or the CDK Duty Officer after hours, is required to confirm receipt of request to maintain sufficient ordering times.

If a resource ordering system, such as IROC, is available at the IMT then, with the CDK FCMG approval, that method of Direct Cache Ordering can be used as an alternate of the “Resource Order-Supplies”.

1. User of the IROC system must be knowledgeable with “bundling” and submitting orders to a National Cache.
2. Notification to the CDK, or the CDK Duty Officer after hours, is required to confirm receipt of request to maintain sufficient ordering times.

Ordering and Delivery times will be established and adhered to unless coordinated with the CDK FCMG or after hours CDK Duty Officer.

The Cache Manager reserves the right to terminate “Direct Cache Ordering” in the event of:

1. Ordering skills and/or knowledge on the incident are inadequate to maintain an effective supply ordering process.
2. Communication has become progressively worse or is not continually maintained.
3. The total order volume exceeds the CDK’s ability to process individual incident orders.

Reminder: All items are supplied to incidents on a temporary loan basis and must be returned to the Fire Cache when no longer needed or the end of the incident. Differences between quantities shipped and returned will be charged to the incident or to:

1. Idaho Department of Lands Forest Protective District and Timber Protective Association (referred to as A/D/A) Operating Expense (OE) account.
2. Federal Agency Management or Project Code.

Additionally, any associated refurbishment charges will be applied to the Incident/Project cost summary.

INCIDENT REPLACEMENT REQUISITIONS

In most instances, Incident Replacement Requisitions are to be submitted within 30 days of control of the incident!

Type 1 or 2 Incidents

The Supply Unit Leader (SPUL) will be responsible for handling incident replacement requisitions when a Type 1 or 2 Incident Management Team (IMT) is assigned. Prior to release from an incident, firefighting resources will prepare an [Incident Replacement Requisition, OF-315/NFES 001300](#) and, if necessary, an

[Incident Replacement Requisition Continuation, NFES 001286, Attachment 6](#), for items which have been lost, consumed, or destroyed during the incident.

If equipment and supplies are available at the incident for replacement, the request is filled at the incident's Supply Unit. If equipment and supplies are unavailable at the incident for replacement, and the requesting resource is not being immediately demobilized, the Supply Unit will place a RO for needed items through appropriate channels to the servicing Fire Cache. The order will be shipped to the incident, and replacement will take place at the Supply Unit.

Replacements for IDL engines must be based on an "Engine/Vehicle Inventory Sheet", or other fire equipment inventory documents. Replacements will not exceed the maximum complements. See **Fire Management Handbook 819, Attachments 1-3**. Replacements for other agencies and cooperator's fire equipment must use their own inventory documents.

If equipment and supplies are unavailable at the incident for replacement, and the requesting resource is being demobilized, an Incident Replacement Requisition form will be completed by the Supply Unit and forwarded to the geographic area cache. Authorized approvals and signatures must be included on the requisition to the geographic area cache. For Type 1 and 2 Incidents, these approvals are limited to: Supply Unit Leader, Logistics Section Chief, Support Branch Director, Incident Commander, or Line Officer or their representatives.

Type 3 Incidents

The Supply Unit Leader, or Logistics Chief, will be responsible for handling incident replacement requisitions when a Type 3 team is assigned. Replacement of consumable, durable, or non-standard cache government property items will follow the national cache system protocol in conjunction with the NWCG Standards for Interagency Incident Business Management, PMS 902.

Prior to release from an incident, firefighting resources will prepare an Incident Replacement Requisition, and continuation sheet (if applicable) and, [Report of Unserviceable, Lost, Stolen, Damaged, or Destroyed Property, AD-112, Attachment 7](#), if applicable, for items which have been consumed, destroyed, or damaged during the incident. Approval of replacement requests will be based on several factors, including the Accountability Sheet, or other fire equipment inventory documents. Replacement requests for resources left on the fireline for continued operations will also be honored. These replacement requests must have Incident Commander Type 3, Operations Section Chief, or Division Group Supervisor signature to validate the resources left behind.

If equipment and supplies are available at the incident for replacement, the request is filled at the incident Supply Unit. If equipment and supplies are unavailable at the incident for replacement, **and** the requesting resource is not being immediately demobilized, the Supply Unit or Logistics will place a RO for needed items through appropriate channels to the servicing Fire Cache. The order will be shipped to the incident, and replacement will take place at the Supply Unit.

If equipment and supplies are unavailable at the incident for replacement, and the requesting resource is being demobilized, an Incident Replacement Requisition, will be completed by the Supply Unit and forwarded to the servicing Dispatch for input into the Interagency Resource Ordering Capability (IROC). Dispatch will then electronically forward the order to the Cache. Upon being filled, the Cache will forward the order to the requester's home unit.

Type 4 Incidents

The Area Managers, Fire Wardens, District Rangers, and Fire Management Officers are the only authorities who can approve replacement order requests. These agency representatives approve replacement requests based on *pre-existing* Accountability Sheets, or other fire equipment inventory documents. If equipment and supplies are available at the incident for replacement, the request is filled at the incident host unit. If equipment and supplies are unavailable for replacement at the incident, and the requesting resource is not being immediately demobilized, the hosting unit will place a RO for needed items through appropriate channels to the servicing Fire Cache. The order will be shipped to the incident, and replacement will take place at the host unit.

The incident's servicing cache may forward complete requisitions to the requesting unit's geographic area cache for processing. If a cache is unable to fill the request (i.e., does not stock item), the cache will forward the request to the closest cache that does stock the item for processing.

DURABLE OR NONSTANDARD CACHE ITEMS OR EXCESSIVE REPLACEMENT REQUESTS

IMTs cannot authorize replacement of nonstandard cache items unless authorized by the incident agency.

Orders for chainsaw parts should be filled prior to departure from the incident. Only reasonable quantities of replacement parts will be issued for off-site RO "S" numbers.

Replacement of durable items which become **worn out through normal use**, on an incident, will remain the responsibility of the home unit to replace with home unit funds. Incident personnel are not authorized to approve replacement of these items.

For replacement of durable and nonstandard cache items, the [Report of Unserviceable, Lost, Stolen, Damaged, or Destroyed Property](#), and [Incident Replacement Requisition](#), must be submitted to the Supply Unit. The Logistics Section Chief, or Finance/Administration Section Chief, will review and forward to Dispatch Center Manager for review and approval. Questionable items will be forwarded to the Line Officer (LO), Agency Administrator (AA), Forest Fire Management Officer (FFMO) or Deputy FFMO for review and approval. All approved items will be issued RO "S" numbers. Depending on the resource, it may be necessary to turn in damaged items to the host agency before replacement authorization will be granted. Check with the Cache for more information before backhauling condemned supplies, for example burnt hose.

Pre-approval from the Line Officer or Agency Administrator will be required for any item ordered from non-cache sources to meet special needs, or individualism of specifications, where similar items are available from the Cache.

SPECIALTY ITEMS MAY BE REPLACED WITH NO MORE THAN "CACHE" QUALITY AND/OR COST.

GOVERNMENT PROPERTY – UNSERVICEABLE/LOST/STOLEN/DAMAGED/DESTROYED

The damaged/destroyed property must be returned to the Supply Unit, or Fire Cache with written documentation of the cause of damage, photos when appropriate and/or possible, and witness statements, etc.

If the Cache replacement is not acceptable, a RO may be issued with an "S" number assigned for the value commensurate to the cost of the (documented as identified above) destroyed/damaged item to allow the

purchase of the replacement item off of the incident. However, these items must be pre-approved by the Line Officer or Agency Administrator.

Property Management, Chapter 30, in the NWCG Standards for Interagency Incident Business Management requires that damaged or lost government property be documented on the [Property Loss or Damage Report Fire Suppression, OF-289, Attachment 8](#), or the [Report of Unserviceable, Lost, Stolen, Damaged, or Destroyed Property, AD-112, Attachment 7](#). It must describe the circumstances of the loss and have official signatures. The IMT will review, sign, and take any follow-up action. All reports are submitted to the incident agency.

TRANSFER OF SUPPLIES/EQUIPMENT BETWEEN INCIDENTS

Transfer of Fire Cache supplies and equipment between incidents will not occur unless the material is needed to support initial attack operations. If a transfer is to occur, the following must be applied:

The Cache Manager must agree to the circumstantial inability of the Fire Cache, and the logistical support system, to deliver materials within the same time frame of the proposed transfer.

A Cache Demobilization Specialist (CDSP), if available, will be assigned to facilitate and document the transfer. The sending unit should order the CDSP as soon as the decision for transfer has been made.

To assure compliance to NFES quality and safety standards, **used supplies and equipment will not be transferred**. They will be returned to the Cache for refurbishment.

The sending unit will produce an itemized inventory on an [Interagency Incident Waybill, NFES 001472, Attachment 9](#), and [Interagency Incident Waybill Continuation, NFES 001473, Attachment 10](#), filled out completely, of all items and quantities transferred. Copies will be sent to the receiving unit and the Fire Cache.

The receiving unit will produce a validated copy of the transferred waybill. Copies will be sent to the sending unit and the Fire Cache. This will not occur until any and all discrepancies have been documented and resolved.

The receiving unit will allocate "S" numbers and generate a RO form for the transferred supplies/equipment. Copies of the form will be sent to the sending unit and the Fire Cache.

Until these requirements have been met and documented, the sending unit will remain fully accountable for all costs of the transferred materials.

RETURNING EQUIPMENT

To avoid delays in the reconditioning and reissuance of equipment and supplies, all items should be returned directly to the Fire Cache when no longer needed, or within 30 days of control of the incident. Do not retain equipment and supplies for anticipated needs unless arrangements have been made and approved by the Fire Cache. Advance notification of all back-haul is required in order to ensure sufficient staffing is on hand. During periods of heavy demobilization, CDK may assign specific periods of time for incident haul-back.

Receiving units will be responsible for returning all equipment and supplies or must furnish an explanation as to why items are not being returned. Additionally, all returning equipment and supplies need to be

accompanied by a completed Interagency Incident Waybill, and if applicable, the Interagency Incident Waybill Continuation form.

Trackable Items: Needs to be returned to CDK as quickly as possible, absolutely no later than the end of the incident. If trackable item(s) are lost or damaged, contact the Fire Cache immediately for instruction on appropriate action to be taken.

Durable Items: Need to be returned in an orderly, systematic fashion. It is preferred that, whenever possible, items are returned in original containers. To promote efficient documentation and timely processing, CDK requires all fire hose to be rolled before being returned. Burned/ destroyed hose does not need to be returned, it must be documented and may be disposed of at the incident.

Consumable Items: Need to be disposed of at the incident and not returned to the Fire Cache. However, unused items may be returned to the Fire Cache for credit. Partial boxes of consumables should be distributed to the hosting agency or district.

Locally Purchased Items: Should be returned to the Fire Cache.

Back-haul services to CDK are generally available. Please call to check availability. All item(s) returned to the Fire Cache are refurbished as defined in *Fire Equipment Storage and Refurbishing Standards*.

RETURNING ITEMS NOT ISSUED BY THE COEUR D'ALENE INTERAGENCY FIRE CACHE

The customer should make every reasonable attempt to return items to the originating cache in order to obtain proper credit. The Fire Cache will not credit a customer for the return of an item that was not originally issued and is not stocked. The customer will be offered the opportunity to receive the item back. If CDK can determine the originating cache, it will return the item to that location where the appropriate credit is made. All related shipping costs will be charged to the incident.

CHARGES FOR FIRE CACHE EQUIPMENT

Federal agencies, state, and local governments will pay refurbishment and replacement costs as necessary. When equipment is not used and seals are unbroken, the billing will only include shipping and receiving costs. Total replacement cost will be charged for equipment not returned.

The benefiting function will pay for all refurbishing and replacement costs for issues from the Fire Cache for fire suppression and state or national disasters.

BENEFITS OF USING A CACHE DEMOBILIZATION SPECIALIST

Provides a constructive liaison between the supply section and the supporting supply cache.

Improves the accountability system during the course of demobilization.

Provides a working liaison between the incident and the coordinating agency for proper disposition of locally purchased, rented, and leased equipment.

Provides guidance on proper documentation and ensures that copies are submitted to the appropriate sections and the supporting supply cache.

Ensures proper processing, packaging, and loading standards are met.

Ensures that personnel involved in the transportation of hazardous materials use uniform procedures regulated by 49 CFR 171-180.

HAZARDOUS MATERIALS (HAZMAT)

The Fire Cache is not a hazardous materials disposal facility. It is not set up for, and will not accept, the shipments of materials that are classified as “hazardous” from incidents unless otherwise specified in this section or approved by the Cache Manager. It is the responsibility of the incident to properly dispose of hazardous material, including unused waste fuel and oils.

Allowable Back-Haul – Hazmat

CDK will accept materials which have a hazardous classification, provided the following conditions have been met:

All items have been properly identified, packaged, and shipped in accordance with 49 CFR 171-180.

Items have an assigned NFES number, have not been used by the incident, and are still in their original containers unopened.

Items must have been originally shipped by CDK.

For example:

The Fire Cache will accept used batteries for disposal from incidents. Disposal will be charged to the returning incident.

Incidents may return propane cylinders with or without fuel.

NOTE: By law, carriers must be notified about all hazardous material being shipped.

Common Transport Rules to Remember

- Transport empty fuel containers in an open-air, non-enclosed vehicle.
- Only packaging described in 49 CFR 171-180 will be used.
- Material within packaging secured from movement.
- Packaging is secured in transport vehicle to prevent movement.
- No sharp projections within the cargo hold area of the transport vehicle.
- Ensure no risk exists for puncture, damage, and/or ignition.
- Make sure multiple classes of materials may, or may not, be shipped together.
- Load hazardous materials toward rear of the transport vehicle.

- Ensure the total weight/volume of all hazardous materials in transport vehicle does not exceed allowable limits for any one type.

Review the [CDK Supply Catalog, HazMat sub-section](#), regarding hazardous material transportation to, or from, the Fire Cache. Remember, if you do not know, ask.

SPECIFIC EXCERPTS

- *Per 49 CFR 171.8 (05/04), Hazardous Material means a substance or material, that the Secretary of Transportation has determined is capable of posing an unreasonable risk to health, safety, and property when transported in commerce, and has been designated as hazardous under section 5103 of Federal hazardous materials transportation law (49 U.S.C. 5103). The term includes hazardous substances, hazardous wastes, marine pollutants, and elevated temperature materials, materials designated as hazardous in Hazardous Materials Table (see 49 CFR 172.101), and materials that meet the defining criteria for hazardous classes and divisions in part 173 of subchapter C of this chapter.*
- *Per 49 CFR 172.200, Shipping Papers (03/05) (a) Description of hazardous materials required. Except as otherwise provided in this subpart, each person who offers a hazardous material for transportation shall describe the hazardous material on the shipping paper in the manner required by this subpart.*
- *Per 49 CFR 172.300, Marking (03/05) (a) Each person who offers a hazardous material for transportation shall mark each package, freight container, and transport vehicle containing the hazardous material in the manner required by this subpart.*
- *Per 49 CFR 172.400, Labeling (03/05) Each person who offers for transportation or transports a hazardous material in any package or container, shall label the package or container with labels specified for the materials in the 172.101 table in 49 CFR.*
- *Per 49 CFR 172.700, Training (05/03) (b) Scope. Training as used in this subpart means a systematic program that ensures a HAZMAT employee has familiarity with the general provisions of this subchapter, is able to recognize and identify hazardous materials, has knowledge of emergency response information, self-protection measures and accident prevention methods.*

- *Per 29 CFR 1910.1200 (12/00), Hazard Communication (a) Purpose. (1) The purpose of this section is to ensure that hazards of all chemicals produced or imported are evaluated, and that information concerning their hazards is transmitted to employers and employees. This transmittal of information is to be accomplished by means of comprehensive hazard communication programs, which are to include container labeling and other forms of warning, material safety data sheets and employee training.*

FORMS, AND PUBLICATIONS

The Fire Cache maintains well-stocked copies of forms and publications. These materials are updated annually and available for requisitioning. Please call for verification of availability.

ANNUAL INVENTORY

A full inventory will be conducted annually, no later than January 31. The Fire Cache will close for business until the inventory and year-end processes are completed, including all documentation, adjustments, and annual price changes. The only exception will be for orders to incidents protecting life, property, and declared emergencies.

INSTRUCTIONS FOR REQUISITIONING ACTIVITIES

Do not make entries in shaded areas (blocks numbered, 4, 5, 6, 8, 9, 10, 13, 21, 22, 23A, 24, 26, 27, 31, and Purchase Order Delivery Order block). These spaces are provided for procurement personnel.

Block 1. REQUESTING OFFICE. Enter the office that prepares the procurement request

Block 1A. PROCUREMENT REQUEST NUMBER. Enter the appropriate Document Control Number.

Block 1B. DATE. Enter date the procurement request is prepared.

Block 2. RECEIVING OFFICE NUMBER. Enter last four positions of the GSA FEDSTRIP Requisition Number of the office responsible for answering inquiries concerning receipt of the order.

Block 3. CONTRACT NUMBER. If this is a delivery order against a GSA contract, or other Indefinite Delivery type contract, enter contract number. Otherwise leave blank.

Block 6. UNIT CODE. For Forest Service only; enter the code of the unit whole funds are to be charged.

Block 7. FUND CODE. Enter the appropriate Fund Code for agency and accounting station, as assigned by National Finance Center (NFC).

Block 11. SHIP TO. Enter the complete destination address to include zip code. Check "Inside Delivery Requested" box if applicable.

Block 12. LINE ITEM. Each separately priced item must be assigned a number, beginning with 1 and continuing consecutively.

Block 14. DESCRIPTION. Line item description. Enter details of the order, e.g., special delivery instructions, subscription renewal number, GSA Catalog stock numbers, etc. Attach lengthy specifications.

Block 15. BUDGET OBJECT. Enter NFC assigned Budget Object Classification Code (4 positions), incorporating agency assigned sub-object codes (3rd and 4th positions) as applicable.

Block 16. ACCOUNTING LINE. Enter the number from Block 28 that identifies the accounting classification to be charged. Enter an "X" if the line item is to be charged to more than one accounting classification.

Block 17. QUANTITY. Enter quantity required, consistent with unit of issue.

Block 18. UNIT ISSUE. Unit of issue must be consistent with unit of shipment/billing by the source of supply, e.g., DZ, EA, JOB, PK, etc. when ordering GSA stock numbered items, unit of issue in the GSA Supply Catalog.

Block 19. UNIT PRICE. Enter price per unit of issue, if known. Up to four decimal places may be used, e.g. .0625.

Block 20. AMOUNT. Enter extended value (quantity x unit price) or estimated price of each item.

Block 23. DELIVERY REQUESTED. Enter desired or required delivery date. Do not use ASAP.

Block 25. SUBTOTAL. Enter on last page the total estimated amount.

Block 28. ACCOUNTING LINE. This block identifies the appropriate account(s) to be charged. The identifying numbers in Block 28 are used also in Block 16 to relate the line item(s) with the appropriate accounting classification(s). Starting with "1" and continuing consecutively, enter a number for each line of accounting classification.

Block 29. ACCOUNTING CLASSIFICATION. Enter the appropriate accounting data for each accounting line number entered in Block 28. Use format prescribed by your agency.

Block 30. DISTRIBUTION. If an "X" has been entered in Block 16, enter in Block 30 the percentages of the amount to be charged the applicable accounting classifications. The percentages must total 100.

If sources of supply are known, enter name and full address.

**IDAHO DEPARTMENT OF LANDS
COEUR D'ALENE INTERAGENCY FIRE CACHE
AGREEMENT FOR NON-EMERGENCY USE**

The Idaho Department of Lands (IDL) recognizes the diverse utility of the Coeur d'Alene Interagency Fire Cache (CDK) and the inventory it manages. City, county, state, and federal government organizations are eligible to request supplies on a temporary loan basis when agreements are in place to do so. This will be at the discretion of IDL. Nonprofit organizations may be eligible to utilize the CDK inventory as well. However, when an agreement with the Idaho Department of Lands does not exist, or if it exists but does not cover the goods and services provided by CDK, this agreement, modified as necessary, shall be utilized.

Conditions:

Accountable property and durable items will be issued on a temporary loan basis. Consumable resources can also be ordered. However, whenever practical, consumable items should be requisitioned through sources other than CDK.

The ordering unit will pay for all borrowed resources which have been lost, damaged, destroyed, and/or consumed. Ordering unit will also be charged for all associated transportation, refurbishment, and replacement costs.

It is understood that CDK support of non-emergency requests will be limited during fire season, May 10 through October 20, or as necessary to maintain a state of constant readiness for actual emergency ordering. All requests are subject to Cache Manager and IDL Bureau of Fire Management review and approval.

The requesting unit may need to provide assistance for loading, unloading, delivery, and refurbishment of the resources being requested. Support assistance will reduce subsequent billing for the resources borrowed.

Requests shall be submitted using formal letterhead for documentation purposes at least two weeks prior to required date.

Confirmation of order receipt shall be requested by the ordering unit. This can be accomplished by calling CDK after faxing or mailing the request.

Ordering entity (agency/organization/person(s)) shall indemnify and hold harmless the state of Idaho from any and all liability, claims, damages, costs, expenses, and actions, including reasonable attorney fees, caused by or that arise from the negligent or wrongful acts or omissions of the ordering entity, its employees, agents, or associates under this agreement that cause death or injury, or damage to property, or arising out of a failure to comply with any state or federal statute, law, regulation, or act.

As noted on the attached addendum (Check here if applicable).

To place an order, ordering units will provide the following information:

Ordering unit name	Resources being requested
Responsible person(s) name/contact information	Requested method of delivery
Billing address	Date resources will be returned
Shipping address	Return transportation requirements
Required date	

Upon pickup or delivery of requested resources:

CDK will provide the ordering unit with an "Issue Report" outlining all resources being provided. This report also identifies the individual unit costs associated with each item and provides a total dollar amount for all ordered resources. Property numbers associated with accountable assets, weights, and cubic volumes are listed on the Issue Report as well. **Ordering unit will be required to verify contents and sign for the receipt of supplies.**

Upon return, pickup, or delivery to CDK:

The ordering unit is encouraged to manifest supplies and have CDK employees sign for the receipt. Ordering unit should retain a copy in the event a disparity occurs.

Interagency Incident Waybill Instructions

The completion of this form:

1. Ensures that hazardous materials shipments are listed in the required format
2. Documents the return of supplies from an incident.

The completions of this form is the responsibility "Ship From" unit. This would be the Supply Unit Leader (SPUL) at an incident; the Cache Manager (FCMG) or delegate at an incident support cache.

Ship To: Enter the unit name and physical street address. Do not use a P.O. Box

Ship From: Enter either the name of the incident base or the address from where the load is being shipped.

Incident Name: Name of the incident

Incident number: Do not forget the state identifier.

Accounting/Management Code: Enter Original numbers assigned, P number and BLM charge codes.

Contact/Phone: Name and telephone number in case of questions or a problem with the shipment.

Carrier/Driver/Vehicle #: Name and number of the vehicle and driver.

Pieces: Number of cartons/boxes/packages on the delivery.

ETD: Estimated Time of departure from "Ship From" location.

ETA: Estimated time of arrival to "Ship To" location.

Hazardous Materials Declaration: Complete per 49 CFR. If you are not trained in the proper handling of hazardous materials, obtain assistance from qualified individual.

Total Quantity: Total, gross or net, including unit of measurement.

Hazardous material must be entered as the first item or highlighted on this form. Hazardous materials must be correctly labeled and placarded.

Emergency Response Phone Number: Obtain from local unit with incident responsibility. Must be a 24-hour, on-call response number.

Item #: Incident use to identify a specific line item.

NFES #: Nations Fire Equipment System assigned number.

Qty: Quantity

U/I: Unit of Issue

Item description: Name of the item.

Property Number: Entered if the item being returned has an assigned property number.

Medical waste must be transported to a licensed facility for proper disposal. Do not ship medical waste to an incident cache. Recycling of plastics, cardboard, etc., is highly recommended and is the responsibility of the incident.

HAZARDOUS MATERIALS

HAZARDOUS MATERIAL SHIPPING GUIDE

The hazardous material items listed in this section are stocked by the National Interagency Support Caches (NISCs).

This information is intended as convenience to help shippers comply with the limitations and other requirements of various federal and industry regulations.

If shipped by agency transportation, all Department of Transportation (49 CFR Parts 171-180) regulations apply.

Anyone returning or transferring hazardous materials who is not familiar with hazmat shipping requirements should contact the servicing NISC for instructions.

Noncompliance may result in civil penalties of up to \$75,000 being assessed to the individual shipping the hazardous materials.

Use of the OF-316 Interagency Incident Waybill (NFES 1472) is encouraged to ensure the hazardous materials are listed in the required format with NFES numbers listed. OF-316A (NFES 1473) Interagency Waybill Continuation should be listed with NFES numbers as well.

The completion of this form is the responsibility of the "Ship From" unit and is generally the Supply Unit Leader at the incident. Hazardous material must be entered as the first item or highlighted on this form.

The 24-hour Emergency Response Phone Number **800-424-9300** can be used on all transactions involving NISC shipping and waybill documents. If circumstances necessitate calling this number, the customer identifications to use is "National Interagency Support Caches".

49 CFR NON-BULK CHECKLIST

- Identification** - Proper Shipping Name, Class, UN/NA Number, and Packing Group
- Packaging** - Will depend on quantity shipped, single or combination loads
- Marking** - Proper Shipping Name, UN/NA Number, and the name and address of recipient
- Labeling** - Primary hazard and placement
- Shipping Papers** - Basic description and the emergency response telephone number
- Placards*** - As necessary
- Emergency Response Information** - SDS sheets or DOT Emergency Response Guide

*Placards are required when the combined weight of all hazmat exceeds 1000 lbs.
