13 EA	Drop Box (spider box) & power cords for Tents (Rent from or buy from electrician or rental company)		ICP	1 EA	All Terrain Forklift (mandatory with Cache Van)		ICP

Northern Rockies IMT (Dispatch Order) Incident Name _____ Incident Number _____ Date _____

This list was developed to assist Dispatch Centers with filling the basic initial needs for a Type 1 or 2 IMT that is **setting up** an ICP and Camp. The intent is that these items need **NO** concurrence from the IMT but should be based on your local knowledge. Teams have experienced delays is becoming functional when these items are delayed. Additionally, the reason to order these items is that in the field we'd rather send something back than have the impact of any delay. For example, generators. While there may be power to the site, it may not be enough to meet the needs. Or we might need the generator at another location.

Take into account expected number of people and durations to determine and if local options have a high likelihood of success in providing support (e.g. shower or caterer).

This list is not specific to your incident. Other items should be added if you have knowledge of the situation that would facilitate the team's successful transition.

Notes:

- For Potable Water Truck, Gray Water Truck and Refrigerator Trailer size requirements – don't get hung up on specific size, if recommended sizes/types are not available, dispatch should order what they can get (larger ok). Or maybe change the verbiage that those sizes/types are a minimum. (The background there was dispatch got hung up on 40' van with steps. A 40' wasn't available but a 52' was.)
- **Fuel Tender.** Add to list or as a tickler if not near a town will need to order.
- Cache Vans don't include **¾ inch hose**. If incident is near mop-up stage upon arrival, ¾ inch hose may need to be added to the pre-order.
