

# NRK Supply Specific Catalog 2024

NRK 2024 V1

**We will be implementing new protocols in addition to our standard procedures to ensure the safety of our customers as well as our staff, please make note of the changes below and call with any questions.**

Delivery timeframe for issues may be longer than normal and may take two days rather than next day depending on ability to obtain drivers or trucking companies. We will work hard to maintain our normal delivery times.

At this time, Cache Demob Specialists (CDSP) **will not be dispatched from NRK**. Assistance will be given virtually.

Order requests will receive closer scrutinization due to restocking issues and backorders at vendors and other caches; it will be harder to restock NRK if each order is filled with the quantities historically ordered by incidents.

If an item is not listed in NRK catalog, do not order it. Send requirement to the buying team as the NRK will not be forwarding orders out of region to fill or purchasing non NFES items. All orders will be fill or kill. **Please call 329-4949, if you need direction, verification or a substitution to a different item stocked at NRK prior to the order being placed.**

Incident is responsible for returning laundry in a sealed (zip tied-000610) plastic bag (000880 or 000021), bag marked with NFES's of items and quantities.

Laundry includes – shirts, pants, packs, sleeping bags, 2 person tents, rain flies, not in cache sealed original cartons. (NISC Risk Analysis/JHA)

Incident Management Teams/Personnel will be responsible for sorting all RFI and NRFI items, packaging, and securing all items on pallets with stretch wrap before returning backhaul to the cache. No loose items will be backhauled. (NISC Risk Analysis/JHA)

Demobilizing a large incident will no longer be a quick affair, please plan 2-3 days for a demobilization.

Every attempt should be made at incident to minimize amount of supplies ordered, they are hard to replace, and everything will require three days to decontaminate used or not.

Medical supplies are currently hard to obtain, every possible way to conserve medical supplies will need to be considered at incident.

## Ordering Information

NRK (Northern Rockies Fire Cache) is a Type I Interagency Cache that supports the fire logistics needs in the Northern Rockies GACC. The NRK maintains a large enough inventory to support 5000 firefighters and 30 large incidents simultaneously, and is capable of refurbishment, repair and replacement for all equipment issued.

With some exceptions, we can deliver large amounts of fire equipment anywhere in the GACC within 5 hours. In addition to the NRK, Type 2 caches are in Billings, MT and Coeur d'Alene, ID and service all levels of fire.

We are obligated above all to fully support wildfire and other emergency incidents, wildland fire management and prescribed fire projects. As a good neighbor, the Cache will support activities unrelated to fire, when circumstances and available resources permit. The Cache's ability to support activities is subject to legal, financial, human, and physical constraints.

Priorities are subject to change based on Regional and/or National fire management strategies, tactical priorities, and preparedness levels. Cache management may also revise priorities for such reasons as inventory depletion, changing fire conditions and expanded emergency activity. A low priority does not translate to "no support": The Cache will always do its best to help the field meet their mission, but depending on fire activity, supply shortages may occur.

### Availability

- Normal work schedule is 0730-1600
- The NRK's schedule reflects fire activity. During periods of active fire the NRK will operate seven days a week.
- The NRK is available to support fire when needed. If you anticipate a need for support over a weekend or holiday simply contact the Cache or Dispatch and cache personnel will be made available.

### Ordering

- Type 1 & 2 teams that have IROC capability should order directly through IROC.
- IA, Type 3 and others will place orders through the local dispatch office.

## Order Status

- If a firefighting item is “UTF” (cancelled), it will be noted in the shipping documentation. Please read the shipping documentation carefully.
- If an item is cancelled, it must be re-ordered on a preceding order.

## Delivery

- Each fire should work with the NRK admin section to establish a set time each day for their order to be placed. It is preferred to get each fire on a schedule that works for them instead of having all orders come in at once.
- Fires are expected to have personnel with proper equipment (forklift if necessary) at the designated location to receive cache orders prior to order delivery. Fires are responsible for loading/unloading all fire equipment. Drivers provided by the cache are not permitted to drive forklifts or load/unload cache vehicles by hand.

## Accountability

- Inventory your delivery and note any discrepancies on the shipping document, then call the NRK admin office to resolve the issue.
- Incident summary reports can be requested from the admin office to help maintain accountability.

## Demobilization

- Unneeded equipment can be backhauled throughout the duration of the fire unless cache transportation or return capabilities are maxed. Any backhaul must be preapproved by NRK to avoid transportation conflicts.

## Other Important Information

- The Cache does not accept credit card purchase orders, standard purchase orders or requisitions for purchase.
- Customers must have a valid accounting code to place a resource order, regardless of agency or status. If not a Forest Service unit, the customer must have or be party to, an interagency agreement with the Northern Region.
- Accountable property that is lost, destroyed, or damaged beyond repair will be documented with a Form AD-112 per Federal Management Regulations.

## Dispatch Aid For Placing NFES Supply Requests To Cache

Do **not** place individual NFES supply requests to cache unless you have a valid reason to do so. The preferred method is to place items in bulk from the Pending Request screen. This aid shows you how to place your items **all at once**, rather than placing one at a time.

After you have built your NFES supply requests, navigate to the Pending Request and highlight ALL.

The screenshot shows two side-by-side panels. The left panel is titled 'PENDING REQUESTS' and has a sub-header 'Pending Requests'. It contains a list of filters with counts: All (6), Local (6), Placed Out (19), My Claimed (0), All Claimed (0), Unclaimed (6), Non-Local (0), Named Request (0), and Past Needed By (3). The 'All' filter is highlighted. The right panel is titled 'REQUEST STATUS' and has a sub-header 'Local Requests'. It contains a list of statuses with counts: Pending (25), Filled (0), Complete (0), and All (25). The 'All' status is highlighted.

Click in the appropriate boxes in the Selected column for the items you want to place to the cache.

The screenshot shows the 'PENDING REQUESTS' table with a toolbar above it. The toolbar has two sections: 'PLACE:' with buttons for Place Up, Place Down, Place Direct, Place to Cache, UTF, and Send Back; and 'ACTIONS:' with buttons for Cancel Request, Cancel UTF, Claim, Remove Claim, Edit Request, Generate ROF, PDF (All), PDF (Selected), and Excel (All). Below the toolbar, the table shows 6 records. The first three records are selected, indicated by checkboxes in the 'Selected' column. The table columns include: Selected, Manage, Support Indicator, Incident, Incident Dispatch, Request Number, Needed By Date / Time, Needed By TZ, Last Action, Request Catalog, and C.

## RX Ordering

The following text is pulled directly from the new Region One RX Support SOP. Please pay particular attention to the Restrictions and Funding sections:

- **Scope:** This Standard Operating Procedure (SOP) applies to the support of Region One Forest Service prescribed fire projects by Northern Rockies Fire Cache (NRK).
- **Purpose:** This SOP provides direction for the support of Region One Forest Service prescribed fire projects by Northern Rockies Fire Cache. When local units are not able to provide necessary equipment and supplies that are available via the cache system, this SOP shall be followed.
- **Procedures:** Northern Rockies Fire Cache will support normal service area Forest Service prescribed fire projects.
- **Restrictions:** Prescribed Fire orders will not be used to stock fire programs and circumvent the normal ordering process for programs. The NRK's primary focus is Wildfire Suppression. Prescribed fire orders that potentially interfere with supporting the Wildfire mission will not be filled at the discretion of the NISC Manager. As RX burns are a planned event, it is the expectation that the units order consumables to support these planned RX events. All property will be returned the NISC in a timely fashion or upon request of the NISC Manager.
- **Funding:** An approved project code from the receiving Forest Budget Officer must be provided for all cache orders. Project codes must be both active and have sufficient funding to cover all cost associated with the RX order. These codes must also be active for the potential length of issue and refurbishment, which may cross into two fiscal years. The following will be charged to the project code: Equipment refurbishment costs including labor costs for Administratively Determined (AD) cache employees, replacement costs for missing or unserviceable items (durable, trackable, and accountable property), replacement costs for consumable inventory, including but not limited to ground and aerial ignition devices (plastic spheres), Class A foam, batteries, etc., and transportation and shipping costs. Costs for agency cache employees, including base and overtime hours, will be charged to the cache home unit salary and

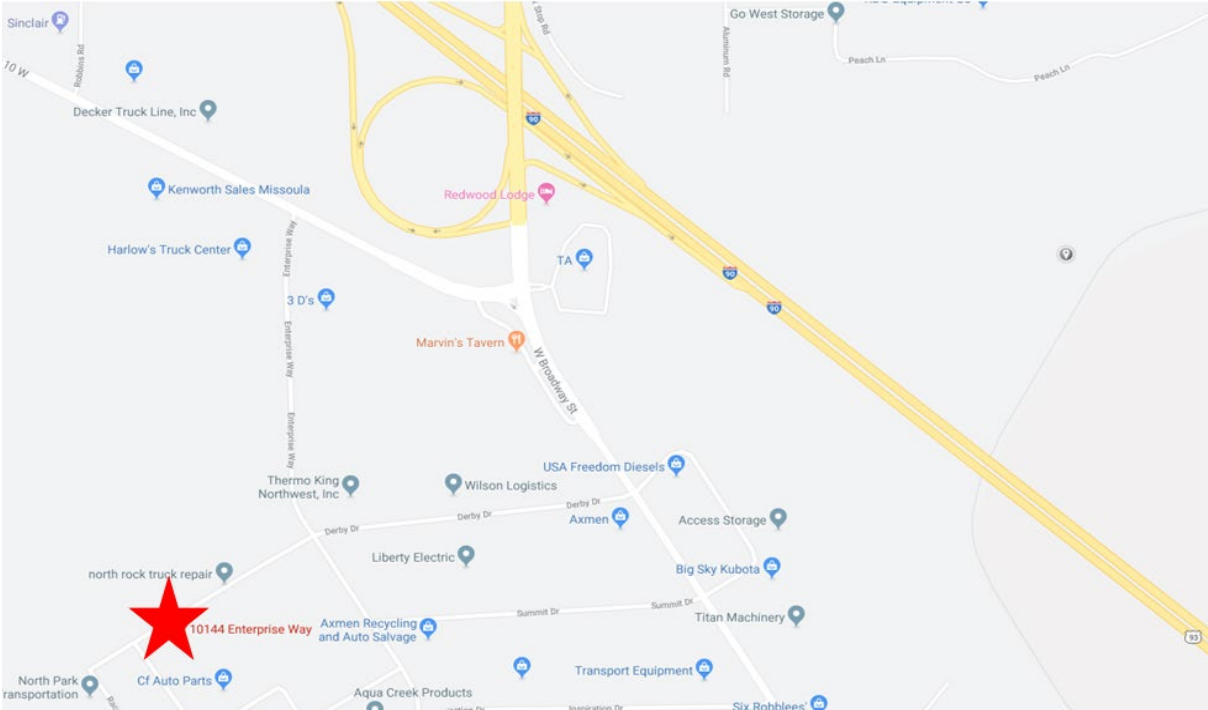

expense (SE) code. Overtime related to prescribed fire support does not meet the criteria for affected exempt employees to claim the full overtime rate

- **Accounting Adjustment Procedure:** The servicing cache will generate the Enterprise Incident Summary Loss Use report after all refurbishment is completed and may generate interim reports as requested by the ordering Forest. The servicing cache will provide a copy of the Enterprise Incident Summary to the ordering Forest with the Outstanding Balance with Consumables highlighted. The Forest may use interim reports to assist budget tracking and accountability for cache items during the life of the project and should use the final report to ensure that unused consumables and all durable, trackable, and accountable property has been returned for credit. Forests will be given 1-2 weeks to return any additional items or may report to the NISC prior to that timeframe that returns are complete. The supporting NISC will provide a final Enterprise Incident Summary Loss Use report to the ordering Forest, highlighting the outstanding balance with consumables. The ordering forest will process an accounting adjustment to move the outstanding balance shown on the final Enterprise Incident Summary Loss Use Report from PCD06K/1325 and any transportation costs shown on the BOL/freight invoice(s) from PWD1MB/1325 to the appropriate project code(s). After accounting adjustments have been processed, the ordering Forest will provide a copy of each adjustment to the NISC for record keeping.
  
- **Records:** Incident Summary and Loss Use reports for specific prescribed fire projects shall be maintained by the cache and will be provided to the Forest for review of charges recorded to their project.

## **Return Information**

Reports are forwarded to the responsible Agency Administrator within 60 days of the close of the incident or as required by the servicing NISC geographic area mobilization guide.

The responsible Agency Administrator should review the report and recommend appropriate follow up action if losses are excessive. Those actions and recommendations should be documented and filed with the final incident records. All items must be returned within 120 days of the close of the incident.

Warehouse 2 is located at 10144 Enterprise Way, Missoula, MT 59808, PHONE: 406-549-0214

Please return all backhaul to our Warehouse 2 location. We ask that you reach out to us at our main line 406-329-4949 to find out Warehouse 2 hours and to arrange drop off.

**THINGS TO REMEMBER:**

**HOSE:** We do not accept unrolled or “butterflied” hose. Please coordinate with us to order a hose roller if needed. NFES 0665.

**FUEL:** Tanks, gas cans, dolmar containers, jerry cans, and pumps should be free of all oil/fuel.

**BACKHAUL TIPS:**

Please ask for items like; blue bins, empty boxes, shrink wrap, extra pallets to aid the organization of the items you are backhauling. Make sure you verify number of pallets before requesting trailer or box van.

## NRK Recycling Program

In 2016, the Northern Rockies Fire Cache initiated a fire battery recycling program. It is our goal to provide this service to the field to reduce the amount of waste during fire season (for incidents only).

The process for utilizing this service is simple:

1. We will send battery buckets on cache vans (Type I and II incidents) when a fire is established. For Type III incidents, you may request directly from the cache.
2. When your bucket is full, call the cache to have a replacement bucket sent on your next delivery.
3. Coordinate to send full buckets back with your next delivery or return during demobilization.

Please note:

- Alkaline batteries only – we do not accept 9V batteries
- Please return repeater batteries in cardboard boxes to save space in bucket
- You do not need to order buckets through dispatch or IROC – buckets are ordered directly from the cache
- Fire batteries only – we can only accommodate batteries used during incidents. Please do not use this program to dispose of batteries used during normal District operations.

## Hazardous Material Disposal

NRK **does not** provide hazardous material disposal services. The cache has neither the facilities nor the resources to handle hazardous materials beyond what it regularly stocks.

All gas cans, sigs, saws, pumps, hose rollers, generators, etc. must be emptied or purged of fuel **before** they are transported back to NRK.

Any defective hazmat item is to be disposed of at the incident. Please contact Safety or the NRK for clarification.

Bio-hazardous material will not be accepted.

It is the responsibility of the incident to properly dispose of hazardous material, as prescribed by applicable laws, rules, and regulations.

## Hazardous Material Shipping Guide

This information is intended as convenience to help shippers comply with the limitations and other requirements of various federal and industry regulations.

If shipped by agency transportation, all Department of Transportation (49 CFR Parts 171-180) regulations apply.

Anyone returning or transferring hazardous materials who is not familiar with hazmat shipping requirements should contact the servicing NISC for instructions.

Noncompliance may result in civil penalties of up to \$75,000 being assessed to the individual shipping the hazardous materials.

Use of the OF-316 Interagency Incident Waybill (NFES 1472) is encouraged to ensure the hazardous materials are listed in the required format with NFES numbers listed. OF-316A (NFES 1473) Interagency Waybill Continuation should be listed with NFES numbers as well.

- The completion of this form is the responsibility of the “Ship From” unit and is generally the Supply Unit Leader at the incident.
  
- Hazardous material must be entered as the first item or highlighted on this form.

The 24-hour Emergency Response Phone Number 800-424-9300 can be used on all transactions involving NISC shipping and waybill documents. If circumstances necessitate calling this number, the customer identification to use is “National Interagency Support Caches”

#### 49 CFR NON-BULK CHECKLIST

Identification – Proper Shipping Name, Class, UN/NA Number, and Packing Group

Packaging – Will depend on the quantity shipped, single or combination loads

Marking – Proper Shipping Name, UN/NA number, and the name and address of recipient

Labeling – Primary hazard and placement

Shipping papers – Basic description and the emergency response telephone number

Placards – As necessary

Emergency Response Information – SDS sheets or DOT Emergency Response Guide

\*Placards are required when the combined weight of all hazmat exceeds 1000 lbs.

**Hazardous material (hazmat) shipping regulations shall be strictly adhered to when transferring hazmat items.**

If you are unsure how to classify hazmat, see *Emergency Response Guidebook*.
