

Fuel Moisture Report | Generated: 2026-08-12

Latest observation, change from previous, days between observations, and closest prior year values (value + date). Only fuel types with a 2026 observation are shown. Sites sorted by elevation within each PSA.

Fuel type cell colors: ■ Tan = dead fuels ■ Mint = conifer live ■ Purple = shrub live ■ Yellow = grass live | Change cell: ■ Red = drying ■ Green = wetting
