#### Significant Events:

Remarks: **Transition to Brett Pargman's Type 3 IMT will occur today at 1800.**

**The area closure along the historic Going-to-the-Sun Road is due to predicted weather and fire behavior and proximity of fire to values at risk and residences.**

**Flathead County has declared a State of Emergency.**

**Percent complete (Block 8a) is calculated by weighting the contribution of each of five primary operational objectives to the overall incident operations and estimating the percent**

# GACC Detailed Situation Report - by Protection

Report Date: Sep 23, 2017

Geographic Area: Northern Rockies Coordination Center

Preparedness Level: III

## Large Incidents:

complete for each objective.

Planned Actions: -Monitor fire spread on the Lake McDonald side of Mt. Brown & Snyder Ridge.  
 -Maintain structure protection in the Lake McDonald Lodge area and north end of Lake McDonald Road for the Lake McDonald Ranger Station and Wheeler historic cabins.  
 -Maintain structure protection at Avalanche Creek Campground and boardwalk.  
 -Utilize air resources from Mt. Brown Lookout south to Snyder Ridge and north toward Avalanche Campground as needed  
 -Maintain sprinkler system along John's Trail from Moose Pond south to corrals.

<b>Rice Ridge</b>		<b>MT-LNF-001464</b>		Type: <b>WF</b>		Start: <b>07/24/2017 1627 MDT</b>		Cause: <b>L</b>

<p>Significant Events: <b>Minimal fire behavior limited to deep duff, heavy fuels and stump holes. Fine fuels may become available to fire later today or tomorrow in unshaded areas and southerly aspects. Snow at higher elevations is receding slowly.</b></p> <p>Remarks: <b>(7) Area burned based on improved data and previous perimeters. No recent infrared perimeter updates due to continued overnight cloud cover.</b></p> <p><b>(8,9) Full suppression is the strategy used on all parts of the perimeter where high values resources are threatened. This includes the west, north and east side of the fire. The southern portion of the perimeter which does not threaten private land will be managed with a confine strategy, using natural barriers, constructed fire line, retardant and water drops. A large part of this portion of the perimeter is in the Selway-Bitterroot Wilderness. The ratio between the strategies will be calculated based on perimeter progression. The amount of contained fire perimeter will be calculated accordingly.</b></p> <p><b>There are no Evacuation Orders or Evacuation Warnings at this time.</b></p> <p><b>Unified command was dissolved Monday, September 18th.</b></p>									

## GACC Detailed Situation Report - by Protection

Report Date: Sep 23, 2017

Geographic Area: Northern Rockies Coordination Center

Preparedness Level: III

### Large Incidents:

Suppression repair progress and speed will depend on excavator availability.

Reported containment reflects portions of the perimeter where the fire has been engaged at control lines and has been contained. A portion of the fire along the southern part of the perimeter will not reach man-made containment lines. This portion will be confined by natural barriers and weather conditions not conducive to fire spread.

Planned Actions: Div A: As weather permits, identify and implement suppression repair as needed.

Div B: As weather permits, implement suppression repair as needed. Patrol Elk Meadows road and the 373B road, taking appropriate action when needed to maintain ingress and egress.

Div C, E, F, H, J, L: Continue suppression repair efforts as weather and risk management actions allow.

The BAER team will continue with assessments.

Fire managers will continue to assess for opportunities to mitigate risk while monitoring smoldering fire activity and making progress on containment or suppression repair.

# GACC Detailed Situation Report - by Protection

Report Date: Sep 23, 2017

Geographic Area: Northern Rockies Coordination Center

Preparedness Level: III

Agency	Hand Crew (Type 1)	Hand Crew (Type 2)	Helicopter (Type 1)	Helicopter (Type 2)	Helicopter (Type 3)	Engines	Overhead
BLM	0	0	0	0	0	0	2
FWS	0	0	0	0	0	0	1
NPS	0	0	0	0	0	0	1
FS	0	0	0	0	0	0	8
PRI	0	0	0	0	1	4	2
ST	0	0	0	0	0	0	8
NWS	0	0	0	0	0	0	1
OTHR	0	4	0	0	0	4	4

**Significant Events:** Minimal fire activity in the last 24 hours with precipitation occurring over the fire area and expected to continue through the next burning period.

**Remarks:** The existing confine/contain operational strategy is due to factors including elevated risk for personnel constructing direct line in heavy timber and snags with a low probability of success. Instead, an indirect containment strategy is used with natural fuel barriers and light fuels with little or no hazardous snags and constructed fire line. Indirect containment lines are not complete or considered "controlled" lines until the fire has reached those lines or they have been burnt out. Control means little likelihood that fire will escape the line. Change in completion percent reflects that the east side of the fire will not be completed until fire is held at the lines - approximately 50% of current fire perimeter. The remaining 50%, or west side of fire, will be managed under a confinement strategy within Wilderness and Primitive areas and few containment lines will actually be put in place.

Management Action Points have been developed for implementation in the long term strategy.

Last report unless significant activity occurs.

**Planned Actions:** Resources on Divisions A and B will be yarding material generated by line preparation operations for future transport or disposal. Resources on Divisions C, M, T, and U continue to mop-up, maintain, improve, patrol, and hold containment lines and mitigate hazard trees near containment lines through the use of mechanized equipment and handcrews. Aircraft are being used, when available, to support operations as needed. Backhaul of excess accountable property will continue.

Suppression repair has begun on all divisions.

Fire resources continue to provide initial attack capability of new starts within the TFR.
