Remarks by Reporting Office:

Reporting Office	Remarks
ID-EIC	One county fire that we assisted on and deemed a threat for 5 acres. Hot and dry tomorrow with lightning in the forecast for Wednesday.
MT-DDC	Nothing new to report. We survived the Solar Eclipse. There were traffic issues and our IA resource were stuck in the traffic jam south of Dillon on I-15. Expecting lightning and storms on the zone mid-week. Trying to booster resources to be able to respond if we get hit with new starts.
WY-CDC	IA activity was light, despite the eclipse. Weather conditions were cool and slightly breezy with moderate humidity. Tomorrow will be mostly sunny with a zero percent chance of wetting rain. The solar eclipse came through our zone as a POT and very limited impact to the dispatch center.. We have no current critical resource needs.
WY-TDC	No new fires to report today, increased acreage on Pole Creek.

Significant Events: **Continued interior burnout, occasional isolated single-tree or group torching, spotting, and generally low to moderate fire behavior. Small fire growth late yesterday.**

Remarks:

Planned Actions: **Assess the increase in active fire behavior along Northern edge and Northeast flank of fire perimeter. Continue advancing efforts to minimize spread potential and prevent unwanted fire spread toward values at risk.**

Summary Situation Report - by Ownership

Report Date: Aug 21, 2017

Special Interest Area: Greater Yellowstone Area

Significant Events: Remarks: (7) The Meyers fire area continues to include 3621 final acres of the Whetstone Ridge Fire. Land Ownership: USFS - 15,476 acres; Private - 4 acres. (8) The team is constructing indirect fire breaks to be used as contingency line. The focus of this effort is protecting private development, primarily on the east side of the fire. The structure group has triaged and/or prepared 82 structures nearest to the fire. These numbers are for both Meyers and Whetstone Ridge fires. (45) Cost for the Whetstone Ridge fire is currently captured under the Meyers fire. (49) A timber task force (not shown on the Resources list) is currently working on control lines. A long-term strategy has been developed to aid in mitigation efforts for hazards posed by numerous snags, and that includes management action points, identification of contingency lines and point protection for communities several miles from current perimeter based on the extended time needed to acquire sufficient new resources and maneuver our current resources.
Planned Actions: Continue to implement structure protection measures at Moose Lake, Frog Pond, and Senate Mine. Implement suppression strategies commensurate with values at risk. Continue to strengthen primary line in Division R and constructing check north of Zekes Meadow utilizing Moose Meadow Creek. Continue contingency line preparation in Divisions S, Y, and Z to protect the Georgetown Lake area. Continue to monitor fire progression in Divisions A, E, K, T, and W. Continue to support IA responsibilities within the designated Initial Attack Responsibility area.
