FAM-IT PORTAL

APPLICATIONS / Resource Ordering And Status System (ROSS)

Resource Ordering and Status System (ROSS)

Update Posted 03/30/18 0600 MDT

ROSS version 1.6.11 has been deployed.

You will need to Uninstall and reinstall the ROSS Application.
ROSS 2.16.11 Installer: <https://rossinstaller.nwcg.gov/ROSSPROD2/>

NOTE: Once ROSS 2.16.11 is implemented it will break the connection with Irwin until Irwin does their update on Friday. This means no incident header info will come over until Irwin updates. However, once Irwin release is done on Friday, the incidents will catch up.
If you have a WildCAD/CAD incident that would normally come over from IRWIN and can wait for it to be in ROSS, it will come over when IRWIN is updated preventing duplicate incidents.

2.16.11 Release Notes: <https://famit.nwcg.gov/sites/default/files/2.16.11%20-%20Release%20Notes%20-%20ROSS.pdf>

IROC ??

INTERAGENCY RESOURCE ORDERING CAPABILITY

IROC in a Nutshell

- Completely replaces ROSS
- More intuitive and web based
- Maintains current ROSS functionality PLUS MORE
- Utilizes agile development

Timeline

- Contract/project began October 1, 2017.
- Contract requires development to be completed by September 2019.
- Training/transition to IROC October 2019-December 2019.
- IROC goes live January 1, 2020.

The Agile Development Process

- All about flexibility.
- 2 week sprints followed by a demonstration and feedback session.
- 39 total sprints = 18 months.
- Just finished Sprint 8.

What you can do to help!

It's all about the data!!!

- We want the cleanest slate possible.
- Monthly clean up reports.
- Main areas of concern:
 - Locations
 - Resource Items (viable??)
 - Duplicates
