

# Annual Fire Report

Pacific Northwest Area

2008

A little fire is quickly trodden out;  
Which, being suffer'd, rivers cannot quench.  
- Shakespeare

## Contents of the 2008 Annual Fire Report

Seasonal Highlights	page 3
Large Fires Reported to NWC via ICS-209	pages 4 - 6
Wildfire Activity by Unit	pages 7 - 8
Pacific Northwest Area Fire Business - 2007 and 10 Year Average	page 9
Fires and Acres by Statistical Cause - All Units	pages 10 - 16
Summary of Air Tanker Base Activity	pages 17 - 18
Pacific Northwest Incident Support Cache Summary	pages 19 - 20
Northwest Area Helicopter Summary	pages 21 - 23
Pacific Northwest Area Interagency Hotshot Crew and Incident Management Team Summaries	page 24
Northwest Coordination Center Resource Support Summary	pages 25 - 27
Pacific Northwest Area Smokejumper Summaries	page 28
US Forest Service Ownership and Protection Data	page 29
US Forest Service Employment Data	page 30

## 2008 Pacific Northwest Area Fire Season - Significant Details

The 2008 Seasonal Fire Assessment noted a much above-average snow pack throughout the NW Area. This assessment predicted a slow start to the fire season with near-normal fire activity.

In late June, an intense lightning event started numerous large fires in northern California but left southern Oregon largely unaffected. The NW Area supplied and continued to supply resources to northern California throughout the fire season.

There was a rash of human-caused fires in eastern Washington between July 4 and July 14, largely due to an intense wind event, and the Northwest Area moved to a Preparedness Level 4 until July 23. Lightning episodes between August 1 and August 18 started fires on both sides of the Cascades in Oregon and in central Washington, and again caused Area Preparedness to move to Level 4 between 8/15 and 8/27.

The 2008 Fire Season ranks 13<sup>th</sup> in the list of most active fire season in the Northwest in the last 20 years.

Federal agencies had 2,265 fires, which is 102% of their 10 year average of 2,154. However, they burned 137,052 acres, which is only 32% of their 10 year average acres. This may be attributed in large part to the heavy snow pack at higher elevations of (mostly) federally-protected lands as well as the availability and effective use of resources.

State agencies had 1,918 fires, which is 98% of their 10 year average, and 40,261 acres, or 93% of their average, on the drier, lower elevation state-protected lands in Oregon and Washington.

Among Federal agencies, the US Forest Service reported an initial attack success rate, defined as the percentage of fires contained at less than 10 acres, of 96%. Department of the Interior units reported IA success, defined as fires controlled within 48 hours or at less than 300 acres, at 96%.

The table below illustrates Large Fire (>100 acres) trends in the PNW since 2000

	Cost	Acres	Type 1 Teams	Type 2 Teams	Structures	Residences	Cost/Acre
2000	\$38,263,000	618,285	1	23			\$62
2001	\$163,485,645	609,958	9	37			\$268
2002	\$407,750,720	1,076,330	22	57	155	36	\$379
2003	\$193,773,336	321,336	5	41	37	8	\$603
2004	\$78,024,772	113,554	4	18	19	8	\$687
2005	\$97,058,983	270,473	2	18	118	117	\$359
2006	\$232,011,364	865,135	8	27	43	12	\$268
2007	\$162,254,002	916,440	4	31	35	8	\$177
2008	\$162,741,039	250,533	2	27	43	24	\$650
5 Yr Avg	\$152,624,491	497,388	5	27	50	31	\$419
08 as % of 5 Yr avg	107%	50%	43%	100%	85%	78%	155%

5 Yr Avg does NOT include most recent year.

**NATIONAL INTERAGENCY INCIDENT SUPPORT CACHE**  
**2008 Activity Summary**

The Pacific Northwest Cache System (NWK) operates under the philosophy of one National Interagency Incident Support Cache Program composed of three cache sites: Wenatchee, La Grande, and Redmond.

Logistical support provided by the NWK Cache System during 2008 would be described as a high average season, with incident support requests for large incidents mostly in August and September.

Negotiations held with Incident Management Teams (IMT) in establishing ordering periods allowed for NWK to coordinate delivery of cache re-supply items from the National Cache System, GSA, and private vendors.

The application of direct ordering from the Incident to the servicing cache site was utilized. This direct ordering process was used on all incidents managed by IMT's in lieu of expanded dispatch organizations. This process enables the incident to receive its order in a timely manner. In addition, this allows Cache Management and the IMT to address emerging issues, critical items, anticipated and projected needs both promptly and effectively.

The Redmond Cache employed **33**, La Grande employed **5** and Wenatchee Cache employed **1** Administratively Determined (AD) employees to supplement the core organization. The utilization of AD employees continues to be an economic boost to the local economy and workforce. AD salaries totaled approximately **\$250,751**.

The Redmond and Wenatchee Caches recycled approximately **37,113** pounds of cardboard, **2,632** pounds of plastic, **3,900** pounds of metal, **1,045** each wooden pallets, **8** barrels of waste oil and (Wenatchee)**1845** lbs. of paper.

The Redmond pump shop repaired/retested approximately **1707** pumps, chainsaws, hose rollers, generators, and aerial sphere dispensers. Local vendors repaired **169** pieces of equipment for a cost of approximately **\$19,814**.

NWK provided support to **2** Type I and **20** Type II incidents with some incidents having more than one Incident Management Team (IMT) assigned. Approximately **\$39,028,204** of logistical items was issued during the fiscal year in support of incident and land use activities within the region and in support of the National Cache System. Values are as follows:

- Wenatchee----- \$4,565,193
- La Grande ----- \$3,370,965
- Redmond ----- \$31,092,046

This represents **387** different job codes, **245** for Redmond, **121** for Wenatchee and **41** for La Grande, which **65** job codes were specific to non-incident support. The non-incident support represents **17** percent of the cache business in supporting Rx burns, environmental camps, training, correction crew programs, and fire schools.

**COOPERATIVE AGREEMENT**

In 2002 the National Interagency Incident Support Cache at Redmond and the State of Oregon developed a draft Cooperators Operations Plan. This plan tested again well through the 2008 fire season and is currently waiting for the final approval through the State of Oregon. A significant difference was noticed in the return and accountability process, lowering the amount owed on state incidents.

**WORKFORCE**

Redmond Cache filled 2 CWN (1039) WG-5, Materials Handler positions.

Wenatchee and La Grande filled no positions in 2008.

**INCIDENT NUMBERS BY AGENCIES (Redmond, Wenatchee and La Grande):**

	Redmond	Wenatchee	La Grande
Oregon Department of Forestry .....	10	0	4

Department of Natural Resources, WA	0	15	0
Forest Service	148	70	34
Bureau of Indian Affairs	7	31	2
National Park Service	1	1	0
US Fish & Wildlife	1	4	0
Bureau of Land Management	31	0	1
Other States	51	0	0
FEMA	0	0	0

## LARGE INCIDENT SUPPORT

The combined Northwest Cache System continues to be a major contributor in providing qualified personnel and supplies, especially portable pumps, in support of the National Cache System. Redmond personnel provided approximately 224 person days, Wenatchee provided approximately 30 person days and La Grande provided approximately 70 person days in the following locations:

- Denver, CO
- Ontario, CA
- Redding, CA
- McCall, ID

## CONTRACTING

Our utilization of local service contracting continues to provide timely services, which enables us to maintain an inventory of hose and clothing. This is essential during large mobilization periods and provides for economic benefits to the local community.

- Fire Hose Refurbishment Contract ----- \$386,259
- Laundry Service Contract ----- \$26,547

NWK utilizes an exclusive use Trucking Service Contract with local trucking companies and a non-exclusive use contract with Relocation Management Worldwide Inc., which provides for the direct delivery of logistical support items in support of ongoing incidents for large shipments of supplies and equipment. The exclusive use Trucking Service Contract is critical to this operation due to the volume of supplies and the distances to the delivery points. Vendors are required to provide, at no cost to the government, a trailer at the cache site during their assigned week and have the capability to provide a tractor with driver within 1-1/2 hours of request. Estimated cost for trucking support was as follows:

- Redmond (exclusive) ----- \$247,257
- Redmond (non-exclusive) ----- \$60,688
- Wenatchee ----- \$40,408
- La Grande ----- \$20,003

NWK utilizes a vehicle fleet for smaller deliveries and drove 110,810 miles with no accidents.

- Redmond ----- 62,456
- Wenatchee ----- 23,061
- La Grande ----- 25,293

## SAFETY

A pro-active safety awareness philosophy is supported by the cache system and is discussed during weekly functional briefings. A pro-active approach was utilized through discussions of the current Job Hazard Analysis (JHA) and 1 injury/illness reported.

## Northwest Area Smokejumper Summary

### North Cascades Smokejumpers 2008 Season Report

North Cascades Smokejumpers staffed 64 fires nationally this season, with 30 of those fires (for a total of 156 jumps) staffed out of the North Cascades base. The first fire was jumped on July 1<sup>st</sup> and the last on September 20<sup>th</sup>. Of these fires the majority were jumped on the Okanogan/Wenatchee National Forests, followed by the Idaho Panhandle. Other users were the Mount Baker Snoqualmie NF, Colville NF, North Cascades National Park, Colville BIA, and the Washington State DNR.

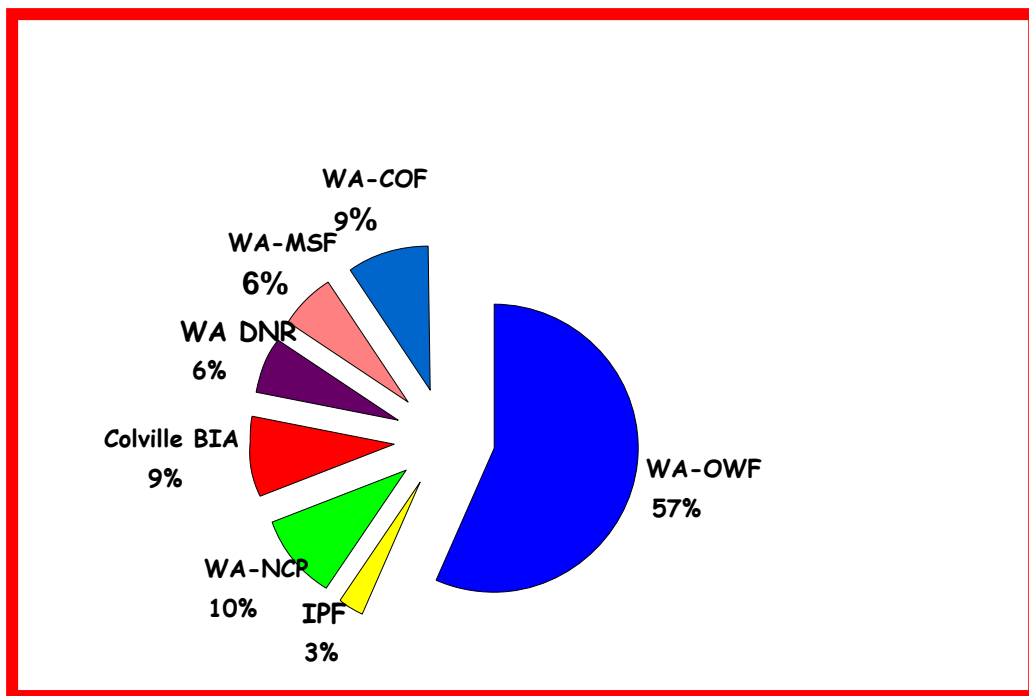

#### Personnel:

A total of 21 returning smokejumpers completed training for the 2008 field season. There were 7 rookie candidates this season that successfully completed rookie training.

#### Aircraft:

A CASA 212, on contract through Bighorn Airways, was the platform used by NCSB this season.

Percentage of fires jumped per user by NCSB smokejumpers
