Northwest Incident Activity

New Fires and Acres
Initial attack activity: Light
15 fires for 17 acres
OR: 9 fires for 16 acres
WA: 6 fires for 1 acre

Large Fire Summary
New large incidents: 0
Reported incidents: 1 (OR: 0, WA: 1)
450 acres growth on existing incidents

Northwest IMT Activity
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 0

Northwest Current Incident Details

Incidents listed below meet large fire criteria and/or incidents with a Type 1 or 2 IMT assigned. Large incidents are defined as fires which are 100+ acres in timber or 300+ acres in grass/brush. For additional information on incidents no longer listed below please refer to the Northwest Large Incident Summary or Northwest Fires Utilizing Other than Full Suppression Strategies

Incidents not Previously Reported: 0

Incidents Previously Reported: 1

Northwest Fire Weather Summary

Warm and dry conditions continue today into tomorrow. Expect some light breezes east of the Cascades this afternoon. An upper-level trough will start across the region around mid-day tomorrow, cooling temperatures a bit and boosting breezes. Little precipitation is expected other than maybe some coastal drizzle, but there could be some thunderstorm chances in northeastern Washington Friday. By late Sunday, a warming and drying trend will set up, which is expected to continue next week.

Your NWS fire weather planning forecast has the details and any Red Flag warnings for your local area.
Northwest Fire Potential Summary
With warm and dry weather, fire danger will gradually ramp up, but no critical fire weather patterns are anticipated this week. Significant fire potential remains generally at or below seasonal norms through the week, but the warming conditions will increasingly result in elevated potential for significant fire and increasing initial attack efforts going forward.

More info, see NW 7-Day Significant Fire Potential Forecast, and the National 7-Day Significant Fire Potential map located here: https://fsapps.nwcg.gov/psp/npsg/forecast#/outlooks?state=map
