**Northwest Fires Utilizing Monitor, Confine, Point Zone Protection Suppression Strategies (YTD)** (link)

Lists fires (of any size) that singly utilize Monitor, Confine or Point Zone Protection suppression strategies, or use Multiple Suppression Strategies (which may also include a Full Suppression component).

### Northwest Fire Potential Summary

Fire danger will continue to remain high over the geographic area today due to high temperatures and lightning in Oregon and Southern Washington. A marine push is moderating conditions on the west side but bringing gusty winds to the east side. The potential for lightning continues through Tuesday mainly in Southwest and Central Oregon. Conditions remain dry through the remainder of the week. Significant fire potential is high where lightning is focused.
