Northwest Fires Utilizing Monitor, Confine, Point Zone Protection Suppression Strategies (YTD) (link)

Lists fires (of any size) that singly utilize Monitor, Confine or Point Zone Protection suppression strategies, or use Multiple Suppression Strategies (which may also include a Full Suppression component).

Northwest Fire Potential Summary

A wetter and very windy weather pattern is expected today as a cold front moves through the region. Unsettled weather will continue Wednesday and Thursday with relatively mild temperatures for this time of season. Precipitation will not arrive in Southern Oregon until around Thursday. A cold front late in the week will cool the region down to more seasonal temperatures with the return of mountain snow.
