**Northwest Fires Utilizing Monitor, Confine, Point Zone Protection Suppression Strategies (YTD)** (link)

Lists fires (of any size) that singly utilize Monitor, Confine or Point Zone Protection suppression strategies, or use Multiple Suppression Strategies (which may also include a Full Suppression component).

**Northwest Fire Potential Summary**

A major winter storm is expected across the northwestern portion of the country as a very moist system drops south from British Columbia and overrides the cold arctic air mass to produce copious amounts of snow across the Cascades through early Monday. As the system moves southward Tuesday, much colder air shall be pulled from Canada into the west. More info, see [NW 7-Day Significant Fire Potential Forecast](#), and [National 7-Day Significant Fire Potential Forecast](#)
