

Morning Brief

Date/Time Stamp: **Monday, Jun 24, 2019, 07:53**

Northwest Activity Summary

Light precipitation occurred in NW Washington with seasonably mild weather elsewhere. Several lightning strikes occurred in far NE Washington. Initial attack was light. A new large fire occurred just north of Elmer City, WA. IMT2, NW Team 13 (Gales) has mobilized to Alaska.

Preparedness Levels

Northwest PL

Current	3-Day	10-Day	30-Day
1 (1/1)	1	1	2

National PL
2 (6/12)

Northwest Incident Activity

New Fires and Acres

18 fires for 3,512 acres
OR: 8 fires for 2 acres
WA: 10 fires for 3,510 acres

Large Fire Summary

New large incidents: 1
Reported incidents: 1 (OR: 0 WA: 1)
No growth on existing incidents

Northwest IMT Activity

NIMOs Committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 0

National Fire Activity

Initial attack activity: Light (96) new fires
New large incidents: 2
Large fires contained: 4
Uncontained large fires: 6

National IMT Activity

Area Command Teams: 0
NIMOs committed: 0
Type 1 IMTs committed: 1
Type 2 IMTs committed: 3

Nationally, there are 17 large fires being managed under a strategy other than full suppression.

Northwest Current Incident Details

Incidents listed below meet large fire criteria and/or incidents with a Type 1 or 2 IMT assigned. Large incidents are defined as fires which are 100+ acres in timber or 300+ acres in grass/brush. For additional information on incidents no longer listed below please refer to the [NW Large Incident Summary](#) or [Northwest Fires Utilizing Monitor, Confine, Point Zone Protection Suppression Strategies \(YTD\)](#)

Incidents not Previously Reported: 1

Elmer City. WA-COA-190067. ICT3. 4 miles N of Elmer City, WA. Start 6/23. **Full Suppression.** Cause: Undetermined. 3,500 acres. Brush and grass. Minimal fire behavior. 100% Lined. IMT 3 ordered with planned TOC 6/24 at 1200.

Incidents Previously Reported: 0

Northwest Fire Weather Summary

Today will be mostly dry across the region with light winds and cool temperatures. Chances for showers and thunderstorms pick up tomorrow afternoon and peak Wednesday afternoon. Thunderstorm activity is expected mainly east of the Cascade crest. Southwesterly winds will become breezy in SW Oregon Thursday afternoon. Unsettled weather will continue into the weekend. Monitor NWS fire weather planning forecasts for local details.

Northwest Fire Potential Summary

Cool, moist air will push fire danger indices down for most of the region through the next week. PSA NW12 will be the exception with ERC rising slightly through mid-week, but still remaining at normal levels for the end of June. Lightning starts become more likely starting Tuesday, but the cool conditions should keep growth manageable. Occasionally gusty winds – and erratic around thunderstorms - could boost fire behavior. More info, see [NW 7-Day Significant Fire Potential Forecast](#), and [National 7-Day Significant Fire Potential Forecast](#)
