NW Team 2 – (Loomis)

Northwest Incident Activity

0 fires for 0 acres (2/16 – 2/22)

OR: 0 fires for 0 acres

WA: 0 fires for 0 acres

Large Fire Summary

New large incidents: 0

Reported incidents: 0 (OR: 0, WA: 0)

0 acres growth on existing incidents

Northwest IMT Activity

NIMOs committed: 0

Type 1 IMTs committed: 0

Type 2 IMTs committed: 0

Complex IMTs committed: 0

National Fire Activity (IMSR 2/16 – 2/22)

Initial attack activity: Light (821 fires)

New large incidents: 0

Large fires contained: 5

Uncontained large fires: 6

National IMT Activity

Area Commands committed: 0

NIMOs committed: 0

Type 1 IMTs committed: 0

Type 2 IMTs committed: 0

Complex IMTs committed: 0

*Nationally, there are no fires being managed under a strategy other than full suppression

Northwest Activity Summary

Cool winter weather with periodic moisture, continued to impact the Northwest. The eastern parts of Oregon and Washington remained mostly dry. Fuel moistures across most areas are trending near average values but snowpack development continues to lag in many areas of the Cascades and the Olympic Mountains. Initial attack activity remained minimal.

Northwest Current Incident Details

Incidents listed below meet large fire criteria and/or incidents with a Type 1 or 2 IMT assigned. Large incidents are defined as fires which are 100+ acres in timber or 300+ acres in grass/brush. For additional information on incidents no longer listed below please refer to the [Northwest Large Incident Summary](#) or [Northwest Fires Utilizing Other than Full Suppression Strategies](#)

Incidents not Previously Reported: 0

Incidents Previously Reported: 0

Northwest Fire Weather Summary

Dry today and most of Saturday for much of the region but a strong cold front will cross over the region Sunday and Monday. Rain and snow will advance across the region with gusty winds and dropping snow levels. The weather next week appears wet as well.

See your local NWS forecasts for details.

Northwest Fire Potential Summary

Weather and fire danger combinations are not in line with any noteworthy risk of large costly fires.
