Northwest Incident Activity
New Fires and Acres
Initial attack activity: Light
10 fires for 6 acres
OR: 6 fires for 1 acre
WA: 4 fires for 5 acres

Large Fire Summary
New large incidents: 0
Reported incidents: 16 (OR: 8, WA: 8)
49,458 acres growth on existing incidents

Northwest IMT Activity
NIMOs committed: 0
Type 1 IMTs committed: 3
Type 2 IMTs committed: 5

Northwest Current Incident Details
Incidents listed below meet large fire criteria and/or incidents with a Type 1 or 2 IMT assigned. Large incidents are defined as fires which are 100+ acres in timber or 300+ acres in grass/brush. For additional information on incidents no longer listed below please refer to the NW Large Incident Summary or Northwest Fires Utilizing Monitor, Confine, Point Zone Protection Suppression Strategies (YTD)

Incidents not Previously Reported: 0

Incidents Previously Reported: 16

Northwest IMT Rotation (9/7 – 9/14)
For additional IMT information refer to the IMT Status/Rotation page

National Fire Activity
Initial attack activity: Light (124 new fires)
New large incidents: 4
Large fires contained: 0
Uncontained large fires: 60

National IMT Activity
NIMOs committed: 3
Type 1 IMTs committed: 12
Type 2 IMTs committed: 16

Nationally, there are 42 fires being managed under a strategy other than full suppression.

Northwest Activity Summary
Widespread precipitation across the eastern side of the geographic area. Widespread lightning from south central Oregon to northeast Oregon. Cooler temperatures and higher relative humidities moderated fire behavior. Winds were calm with higher gusts in southeast Oregon and Cascade gaps. Most of the large fires received some precipitation which minimized growth and fire activity.

Northwest Fire Weather Summary
The region will be clear and drying today and Sunday. Temperatures a little below normal in most areas. No lightning or widespread strong winds are forecast during the weekend. A bit warmer and drier on Monday and Tuesday. See your NWS forecasts for the latest fire weather details for your area.

Northwest Fire Potential Summary
Decreasing fire danger and lack of critical weather patterns will diminish significant fire potential this weekend and well into the coming week. No critical combinations of weather, fuels, and sufficient ignitions are anticipated.

More info, see NW 7-Day Significant Fire Potential Forecast, and National 7-Day Significant Fire Potential
