

Morning Brief

Date/Time Stamp: Monday, May 10, 2021, 07:58

Starting May 10th, Report with post daily Mon – Fri at 0800, unless significant activity occurs.

Northwest Activity Summary

A cloudy and slightly cool weekend occurred over the geographic area. Traces of precipitation were mostly on the west side of the Cascades from the Willamette Valley up into the Olympic Peninsula and northeastern Washington. Initial attack and prescribed fire activity was light.

Preparedness Levels

Northwest PL

Current	3-Day	10-Day	30-Day
1 (1/1)	1	1	1

National PL
2 (4/1)

Northwest IMT Rotation (5/4 – 5/11)

For additional IMT information refer to the [IMT Status/Rotation](#) page

NW Area Type 1	NW Area Type 2
PNW Team 3 - Johnson	NW Team 13 - Gales
PNW Team 2 - Allen	NW Team 12 - Dimke

Northwest Incident Activity

New Fires and Acres (5/7 – 5/9)

19 fires for 28 acres

OR: 9 fires for 23 acres

WA: 10 fires for 5 acres

Large Fire Summary

New large incidents: 0

Reported incidents: 1 (OR: 1, WA: 0)

17 acres growth on existing incidents

Northwest IMT Activity

NIMOs Committed: 0

Type 1 IMTs committed: 0

Type 2 IMTs committed: 0

Area Command committed: 0

National Fire Activity

IMSR posts daily M-F (5/7 – 5/9)

Initial attack activity: Light (319 new fires)

New large incidents: 7

Large fires contained: 5

Uncontained large fires: 9

National IMT Activity

Area Command Teams: 0

NIMOs committed: 0

Type 1 IMTs committed: 1

Type 2 IMTs committed: 0

Nationally, there are 3 fires being managed under a strategy other than full suppression.

Northwest Current Incident Details

Incidents listed below meet large fire criteria and/or incidents with a Type 1 or 2 IMT assigned. Large incidents are defined as fires which are 100+ acres in timber or 300+ acres in grass/brush. For additional information on incidents no longer listed below please refer to the [NW Large Incident Summary](#) or [Northwest Fires Utilizing Monitor, Confine, Point Zone Protection Suppression Strategies \(YTD\)](#)

Incidents not Previously Reported: 0

Incidents Previously Reported: 1

Meadow. OR-FWF-210148. ICT4. 9 mi NE of Chiloquin, OR. Start 5/5. **Full Suppression.** Cause: Unknown. 832 acres (+17). 98% containment. Brush and timber. Minimal fire behavior.

Northwest Fire Weather Summary

The Pacific Northwest will be warm and mostly dry through the workweek under a ridge of high pressure aloft. A few showers could visit the mountains in northeastern Washington and northeastern Oregon today and maybe tomorrow. The next chance for appreciable precipitation won't come until next weekend as a trough weakens the ridge, but models show much uncertainty on the timing and strength of the system at this point. See your NWS forecasts for local details.

Northwest Fire Potential Summary

Significant fire potential remains low through the forecast period, although fire danger indices will gradually rise with the warming conditions.

More info, see [NW 7-Day Significant Fire Potential Forecast](#), and [National 7-Day Significant Fire Potential](#)
