

## Morning Brief

Date/Time Stamp: Wednesday, Nov 24, 2021, 08:03

With the Holiday, brief is posting on Wednesday this week, will resume normal schedule next week.

### Preparedness Levels

#### Northwest PL

Current	3-Day	10-Day
1 (10/20)	1	1

National PL
1 (10/22)

Northwest Historic PL
See <a href="#">Preparedness Level</a> Product

#### Northwest IMT Rotation (11/23– 11/30)

For additional IMT information refer to the [IMT Status/Rotation](#) page

NW Area Type 1	NW Area Type 2
PNW Team 2 - Allen	NW Team 8 - Stock
PNW Team 3 - Johnson	NW Team 6 - Sheldon

### Northwest Incident Activity

#### New Fires and Acres (11/19 – 11/23)

Initial attack activity: Light

2 fires for 0.1 acre

OR: 1 fire for 0 acres

WA: 1 fire for 0.1 acres

#### Large Fire Summary

New large incidents: 0

Reported incidents: 0 (OR: 0, WA: 0)

No growth on existing incidents

#### Northwest IMT Activity

NIMOs committed: 0

Type 1 IMTs committed: 0

Type 2 IMTs committed: 0

### National Fire Activity

#### IMSR will post every Friday (11/12 – 11/18)

Initial attack activity: Light (367 new fires)

New large incidents: 7

Large fires contained: 4

Uncontained large fires: 6

#### National IMT Activity

Area Commands committed: 0

NIMOs committed: 0

Type 1 IMTs committed: 0

Type 2 IMTs committed: 0

Nationally, there are 0 fires being managed under a strategy other than full suppression.

### Northwest Activity Summary

The week started off with lighter amounts of precipitation moving over the Cascades to deliver light rounds of moisture accompanied by occasionally breezy conditions and cooler conditions. A cold front moving into the geographic area from the northwest prompted winter advisory conditions for the eastside of the Cascades. Pile burning tapered off over the week. No control problems emerged with damp and humid conditions.

### Northwest Current Incident Details

Incidents listed below meet large fire criteria and/or incidents with a Type 1 or 2 IMT assigned. Large incidents are defined as fires which are 100+ acres in timber or 300+ acres in grass/brush. For additional information on incidents no longer listed below please refer to the [Northwest Large Incident Summary](#) or [Northwest Fires Utilizing Other than Full Suppression Strategies](#)

Incidents not Previously Reported: 0

Incidents Previously Reported: 0

### Northwest Fire Weather Summary

The Pacific Northwest will enjoy relatively dry conditions today, but a weather system will bring precipitation and gusty winds to western Washington tonight, spreading south and east Thanksgiving Day and Friday. Warmer temperatures are expected Friday and over the weekend. Further storm systems will bring precipitation chances to the northern part of the region over the weekend and the first half of next week. The heaviest precipitation accumulation from the next several systems will be in western Washington, while southeastern Oregon looks to stay dry through the forecast period. See your NWS forecasts for the latest weather details including winds and snow levels for your area.

### Northwest Fire Potential Summary

The potential for new significant fires is low.

More info, see [NW 7-Day Significant Fire Potential Forecast](#), and [National 7-Day Significant Fire Potential](#)
