Northwest IMT Rotation (2/01-2/15)

For additional IMT information refer to the [IMT Status/Rotation](#) page <https://gacc.nifc.gov/nwcc/content/products/intelligence/teams.pdf>

NW Area Type 1	NW Area Type 2
PNW Team 3 – Quinones	
PNW Team 2 – Loomis	

Northwest Incident Activity

New Fires and Acres (1/28 – 2/03)

4 fires for 0.3 acres
OR: 3 fires for 0.2 acres
WA: 1 fire for 0.1 acres

Large Fire Summary

New large incidents: 0
Reported incidents: 0 (OR:0 WA:0)
0 acres growth on existing incidents

Northwest IMT Activity

NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 0

National Fire Activity

IMSR will post every Friday (1/28 – 2/03)

Initial attack activity: 227
New large incidents: 0
Large fires contained: 0
Uncontained large fires: 0

National IMT Activity

Area Commands committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 0
Type 2 IMTs committed: 0
Complex IMTs committed: 0

Nationally, there are 0 fires being managed under a strategy other than full suppression.

Northwest Activity Summary

Prescribed fire operations continue mainly east of the Cascades. Wildfires incidents were minimal, less than five fires reported for minimal acres.

Northwest Current Incident Details

Incidents listed below meet large fire criteria and/or incidents with a Type 1 or 2 IMT assigned. Large incidents are defined as fires which are 100+ acres in timber or 300+ acres in grass/brush. For additional information on incidents no longer listed below please refer to the [Northwest Large Incident Summary](#) or [Northwest Fires Utilizing Other than Full Suppression Strategies](#)

Incidents not Previously Reported: 0

Incidents Previously Reported: 0

Northwest Fire Weather Summary

Rain and snow moving into the region today and at times over the weekend. Frontal systems will arrive over the region at intervals next week as well. Dry spells will be fewer and farther between than last week.

Check your NWS forecasts for the latest details and request spot forecasts.

Northwest Fire Potential Summary

Fuel moisture is expected to rise from unusually low values observed through January because of the wetter weather so far in February. Otherwise, the potential for new significant fires is expected to remain low through the winter.
