Boise, Idaho 83705-5354

January 21, 2016

To: Agency Personnel

From: Fire and Aviation Directors;  
Bureau of Land Management  
Forest Service  
National Park Service  
Bureau of Indian Affairs

Subject: *Standards for Interagency Hotshot Crew Operations*

In 2015 the National Interagency Hotshot Crew Steering Committee undertook an effort to update the *Standards for Interagency Hotshot Crew Operations (SIHCO)*. These updated standards reflect changes in minimum crew standards and address changes in IHC certification processes since the last update in 2007. Crews will meet the minimum standards and be in full compliance with the certification process found in this document to be considered an Interagency Hotshot Crew. It will remain in effect until revised or rescinded.

Please note that the revised nationally accepted process for certification of new Interagency Hotshot Crews is outlined in Chapter 5 with required supporting documentation and forms provided in Appendices B, C and E.

The annual requirement for existing Interagency Hotshot Crews is outlined in Chapter 5 with required supporting documentation and forms provided in Appendices B and C.

The contents of this standard are not to be modified. Supplemental agency specific direction of a more restrictive nature may be issued separately.

## CHAPTER 1

### STANDARDS FOR INTERAGENCY HOTSHOT CREW OPERATIONS DEFINITION, POLICY AND IHC MISSION STATEMENT

#### **DEFINITION**

Interagency Hotshot Crews (IHC) are nationally available Type 1 hand crews within the Incident Command System meeting the minimum standards and in compliance with the certification process found in this document. IHC are a national shared resource, statused and assigned through the National Interagency Coordination Center.

#### **POLICY**

Sponsor agencies shall provide direction, support, and review processes that ensure IHC operations are safe, effective, and meet the IHC operations standards as outlined in this document. The National IHC Steering Committee will facilitate any proposed revisions to these standards under the direction of the IHC Sponsor Agency Fire Directors.

#### **OBJECTIVE**

The *Standards for Interagency Hotshot Crew Operations* provides the standard for IHC operations. These standards are to be used by IHC leadership, agency administrators and first line supervisors, for planning, administering and conducting IHC operations. These standards are to be used as a measure of IHC qualifications.

#### **IHC MISSION STATEMENT**

The primary mission of the IHCs is to provide a safe, professional, mobile and highly skilled hand crew for all phases of fire management and incident operations.

#### **PROGRAM EMPHASIS**

IHCs can be used to meet management objectives other than their primary mission of wildland fire operations. Utilization of IHCs will be initiated with strict compliance to accept interagency and agency specific safety standards. Responsibility for compliance with these standards and the safe operation of an IHC ultimately lies with the IHC superintendent. The priority for use of IHCs is as follows:

##### **Wildland Fire Incident Operations**

IHCs are staffed, conditioned, equipped and qualified to meet a variety of strategic and tactical wildland fire assignments. The organizational structure allows IHCs to form into small modules or squads and accomplish independent incident assignments. IHCs may be prepositioned for initial attack or perform ready reserve duties as required by national planning level requirements.

##### **All Hazard Incident Operations**

Within the limits of their experience and qualifications, IHCs are capable of providing a disciplined, self-contained and adaptable workforce to meet the needs of incident managers in a variety of situations and during all hazard assignments.

##### **Resource Management Objectives**

When not committed to fire assignments, IHCs can provide a workforce to accomplish a variety of resource management objectives while maintaining availability for incident mobilization.

##### **Training Cadres**

IHC can provide a high quality cadre for fire management training at local, geographic area and national levels.

### **PROFESSIONAL ETHICS**

IHC acknowledge their responsibility to sponsor agencies and to the wildland fire community as a whole. IHCs subscribe to a Code of Ethics to guide them in their practice as wildland fire professionals. IHCs will:

- Perform only services they are qualified, trained, and equipped in which can be accomplished safely. Continue to educate themselves in order to improve their qualifications and performance. Give earnest effort and provide their best professional advice in the performance of their duties.
- Build their professional reputations based on the leadership values of duty, respect and integrity. Ensure the quality and cost effectiveness of each IHC. Be accountable to host unit supervisors, incident management teams, other IHC and to host units as a safe, productive and professional resource.
- Conduct themselves and crews in accordance with the *Standards for Interagency Hotshot Crew Operations*, relevant Agency, State and Federal policies and all required operational and safety procedures.
- Ensure the civil rights of constituents and employees by treating every person with respect. Hazing, harassment of any kind, verbal abuse or physical abuse by any employee toward any other person will not be tolerated. Professional behavior will be exhibited at all times.
- Endeavor to enhance public knowledge and promote understanding of the functions and achievements of the wildland fire community.

### **GEOGRAPHIC AREA IHC STEERING COMMITTEES**

Geographic Area IHC Steering Committees will provide the IHC community, fire managers and agency administrators a means for proactive problem and issue resolution at the local level. Geographic Area IHC Steering Committees will promote safe, effective IHC operations and strive to ensure consistent adherence to area and national fire management policies.

Elected representatives will act as a guiding body and unified voice for all area IHCs. Each Geographic Area IHC Steering Committee will be chartered under the local Geographic Area Coordinating Group. Each agency will continue to provide specific program management and oversight for their respective crews.

### **NATIONAL IHC STEERING COMMITTEE**

The National IHC Steering Committee will provide the IHC community, fire managers and agency administrators a means for proactive problem and issue resolution at the national level. The National IHC Steering Committee will promote safe and effective IHC operations and strive to ensure consistent adherence to national fire management policies.

Elected representatives will act as a guiding body and unified voice for all IHCs on matters of national scope. The National IHC Steering Committee will be chartered under the IHC sponsor agency National Fire Directors.

## CHAPTER 2

### STANDARDS FOR INTERAGENCY HOTSHOT CREW OPERATIONS STANDARDS AND QUALIFICATIONS

#### MINIMUM IHC MOBILIZATION STANDARDS

For mobilization to an incident Interagency Hotshot Crews, will at a minimum:

- The standard crew size is 20-22. A minimum of 18 fireline-qualified personnel is required for mobilization.
- Have 80% of the crew members with at least one previous season of fire experience.
- Have four (4) certified as FAL2 per crew, with 50% of the crew certified as FAL3 or better.
- Have a minimum of seven (7) permanently assigned leadership.
- Have an assigned availability period with a minimum of 90 consecutive calendar days (including required days off).
- Work and train together a minimum of 40 hours per week during their availability period.
- Be able to mobilize within 2 hours of receipt of orders during their availability period.
- Be available for incident assignments with no geographic restrictions.
- Have the ability to break down into a minimum of three squads for initial attack and/or other independent operations.
- Have assigned vehicles, hand tools, power saws and communications equipment configured for their needs.
- Have a minimum of eight (8) programmable radios.
- Be logistically self-sufficient utilizing credit card or agency purchasing authority.
- When mobilizing via commercial or charter airline to an incident and the crew is authorized to transport crew vehicles, not have the staffing of the crew at the incident drop below 18 fireline-qualified personnel without approval from the ordering unit.
- When mobilizing via commercial or charter airline to an incident the crew will not have more than 20 personnel flying without prior approval from the National Interagency Coordination Center.

#### MINIMUM IHC LEADERSHIP STAFFING

IHC shall be staffed to provide skilled personnel to accomplish IHC mission objectives. IHC will maintain a minimum of seven permanent/career positions. This standard is based on the *1995 Interagency Management Review Team Hotshot Action Plan*. Apprentice Program positions that may be assigned to IHCs will be in addition to the minimum seven career positions.

Non-federal IHCs will meet the retention and qualification intent of this standard using equivalent employment authority within their sponsor agency human resource policy and the sponsor Geographic Area Coordinating Group.

Minimum IHC leadership staffing will include the following positions as part of an IHC organization:

One Superintendent  
One Assistant Superintendent/Captain  
Three Squad Leaders  
Two Senior Firefighters

OR

One Superintendent  
Two Assistant Superintendents/Captains  
Two Squad Leaders  
Two Senior Firefighters

## **POSITION DESCRIPTIONS**

While specific job descriptions of leadership personnel may vary among IHCs, each crew will provide the personnel to perform the following functions:

### **Superintendent**

- The superintendent is a permanent employee with administrative and supervisory skills to conduct training and sufficient fire experience to provide capable leadership to the crew. The superintendent is responsible for all hotshot crew program management activities including certification that the crew is available for incident assignment.

### **Assistant Superintendent/Captain**

- Assists the superintendent in all aspects of crew management.
- This is a career position.

### **Squad Leader**

- Provides day-to-day leadership for squad members. It is their responsibility to keep the assistant superintendent/captain or superintendent informed on all aspects related to safe and effective crew operations. This is a career position.

### **Senior Firefighter**

- Within the crew there are a minimum of two senior firefighters that are career positions.

### **Firefighter**

- No more than 20% of the crew (4 positions) may be first year fire fighters.

Upon mobilization, if for any reason one of the leadership positions is absent from the crew the person filling in behind them must meet the NWCG qualifications of the position they are filling in order to maintain IHC status. For example, the Superintendent is absent from the crew, the person filling in as the acting superintendent must meet the IHC Superintendent minimum qualification standards.

Reference Chapter 3 for specific NWCG Incident Management Qualifications required for each position.

## CHAPTER 3

### STANDARDS FOR INTERAGENCY HOTSHOT CREW OPERATIONS TRAINING

#### TRAINING PLAN

Each Interagency Hotshot Crew will establish a training plan to meet their mission objectives and address operational standards. The superintendent has the discretion to organize the training program to best fit the needs of a particular crew.

#### IHC REQUIRED MINIMUM INCIDENT MANAGEMENT QUALIFICATIONS AND TRAINING

The following are the required National Wildfire Coordinating Group (NWCG) training courses and qualifications for IHC personnel:

Position	NWCG Qualification	Fire Training
<b>Firefighter</b>	FFT2	I-100 Introduction to ICS S-130 Firefighter Training S-190 Introduction to Wildland Fire Behavior L-180 Human Factors in the Wildland Fire Service
<b>Senior Firefighter</b>	FFT1	All the above plus: S-211 Portable Pumps and Water Use S-212 Wildland Fire Chain Saws S-131 Firefighter Type 1 S-133 Look Up, Look Down, Look Around S-270 Basic Air Operations
<b>Squad Leader</b>	CRWB and ICT5	All the above plus: I-200 Basic ICS S-215 Fire Operations in the Wildland/Urban Interface S-230 Crew Boss (Single Resource) S-234 Ignition Operations S-260 Interagency Incident Business Management S-290 Intermediate Wildland Fire Behavior L-280 Followership to Leadership
<b>Assistant Superintendent or Captain</b>	STCR or TFLD and CRWB and ICT4	All the above plus: I-300 Intermediate ICS S-200 Initial Attack Incident Commander S-330 Task Force/Strike Team Leader S-390 Introduction to Fire Behavior Calculations L-380 Fireline Leadership M-410 Facilitative Instructor or equivalent
<b>Superintendent</b>	TFLD and ICT4 and FIRB	All the above

## **ANNUAL TRAINING**

All IHC personnel must receive 40 hours of Operational Preparedness Training as defined below to include classroom, field exercises and other fire related courses determined by the superintendent. This training must be completed prior to becoming available for incident assignment. All training shall be documented.

This training provides skills and knowledge that allows an IHC to perform safely and effectively in the all hazard incident environment. This is training that must be completed and recorded before a crew is available for any incident or prescribed fire assignment. Training will include, but is not limited to, agency specific fireline refresher, OSHA required safety training, firefighter safety, first aid, fire behavior and crew operating procedures.

Upon completion of this training, crewmembers will understand their professional responsibilities as a member of a team working in a high risk environment and be able to identify critical safety issues and demonstrate appropriate reactions to unsafe conditions.

## **OPERATIONAL PREPAREDNESS TRAINING**

This training is not inclusive of agency specific administrative requirements. The final responsibility for crew availability will rest with the superintendent's certification to management that all requirements are complete. The following are suggested training and in no way exclude other crew specific training:

### **Fire Behavior and Safety**

- Incident Response Pocket Guide
- LCES, the Standard Firefighting Orders, Watch Out Situations, and Common Denominators
- Entrapment Avoidance
- Job Hazard Analysis System
- Firefighter Health (heat stress, nutrition, fatigue, smoke)
- Proper Gear and PPE
- Look Up, Look Down, Look Around
- Characteristics of Extreme Fire Behavior
- Basic Firing Operations
- Firefighter Safety in the Wildland/Urban Interface
- Hazard Tree Safety
- Predictive Services

### **Leadership Development and Human Factors**

- 1995 Human Factors Workshop Findings
- Tactical Decision Games Library
- Staff Ride Library
- Professional Reading Program: each crew should offer a variety of leadership publications.
- Crew Cohesion Assessment

### **Lessons Learned**

- Fatality Fire Case Studies
- Incident Reports and Lessons Learned Analyses
- Wildland Firefighter Fatalities in the United States
- High Reliability Organizations

### **Crew Organization**

- Standard Operating Procedures
- Chain of command
- Configuration for smaller unit operation

### **Intra-Crew Communication**

- Briefing
- Debriefing with AAR's
- Identification of hazards
- Sending messages and asking for clarification
- Handheld radio protocol and operations

### **Transportation**

- Fixed-wing transport
- Helicopter transport
- Ground transport

## **FIELD EXERCISES**

In addition to the classroom portion of the training program, crewmembers will be required to demonstrate their physical ability to perform arduous duties while in the field. Field exercises give crew leadership an opportunity to observe, assess, instruct and evaluate individual crewmembers in the field work environment. It also provides crew leaders the opportunity to develop intra-crew communication and stress the basics of tool use and field safety. It gives crewmembers an opportunity to familiarize themselves with crew operations, practice proper and safe tool use and develop crew cohesion. Field exercises are essential for team building. The following are suggested field exercise scenarios and in no way exclude other drills:

### **Cut and scrape as a crew**

- Tool orders
- Saw operations

### **Small module operation/split configuration**

- Hot spotting
- Spot fires
- Firing and holding

### **Medivac procedures**

- First aid/CPR and initial assessment
- 9-line training or current equivalent
- Establishing helispot
- Extrication of injured crewmember

### **Fire shelter use**

- Entrapment avoidance
- Withdrawal to escape routes and safety zones
- Individual and group deployment (planned and hasty)
- Drop gear and go/ two in one shelter/ high wind

### **Interface operations**

- Structure assessment and triage
- Tactics for hand crews

### **ADDITIONAL REQUIRED MINIMUM TRAINING**

This is training to be accomplished based on crew and individual needs identified by the superintendent. Specific training objectives can be met through NWCG courses, other classroom training, on the job training or task book position assignments.

### **FITNESS TRAINING**

As a part of the fire line performance required of IHCs, the physical ability to perform arduous labor is critical to crew morale, personal health and safety standards. As part of the training program for IHCs, all crew personnel will be required to participate in a minimum of 1 hour of fitness training, 5 days a week, during unassigned periods.

The fitness training program will focus on stretching, aerobic fitness and strength building. All IHC personnel shall meet the sponsor agency's current Work Capacity Test (WCT) fitness standard for fire line personnel. All IHC crew members should strive to meet the *Fitness and Work Capacity, 3rd edition* by Dr. Brian Sharkey:

- 1.5 mile run in a time of 10:35 or less
- 40 sit-ups in 60 seconds
- 25 pushups in 60 seconds
- Chin-ups, based on body weight:
  - More than 170 lbs. = 4 chin-ups
  - 135-170 lbs. = 5 chin-ups
  - 110-135 lbs. = 6 chin-ups
  - Less than 110 lbs. = 7 chin-ups

## CHAPTER 4

### STANDARDS FOR INTERAGENCY HOTSHOT CREW OPERATIONS SUPPORT REQUIREMENTS

#### HOST UNIT SUPPORT

IHC require management oversight, administrative support and facilities to accomplish their mission. IHC are available to assist the host unit with other resource management objectives when not assigned to incidents or conducting training. Host units benefit from the skills, knowledge and abilities of crew personnel. IHC are available to assist the sponsor agency in accomplishing its mission in addition to instructing a variety of local, geographic area and national fire management courses.

#### MANAGEMENT RESPONSIBILITIES

The local host unit first line supervisor and the agency administrator shall:

- Certify the crew is ready for incident assignment using the Annual IHC Mobilization Checklist (Appendix C) prior to national availability.
- Ensure completion of an Annual IHC Preparedness Review (Appendix B) on an annual basis.
- Assist in career development and training of crew personnel.
- Ensure that crew health, safety and welfare needs are addressed.

When establishing a new IHC program, the host unit is responsible for the requirements listed in the *Standards for Interagency Hotshot Crew Operations* and facilitating the IHC Certification Process, found in Chapter 5.

#### ADMINISTRATIVE SUPPORT

The local host unit first line supervisor and the agency administrator are responsible to provide administrative support such as personnel management, time and attendance, travel, purchasing and fleet management.

#### FACILITIES

The local host unit first line supervisor and agency administrator are responsible to provide adequate facilities for the crew including: office space, crew ready room, access to physical training facilities, equipment storage and fire cache.

#### INCIDENT SUPPORT

IHCs are self-contained and self-sufficient in most aspects. The ordering incident will be expected to supply the IHCs with needed supplies depending on method of transport. IHCs are required to arrive at the incident with a complete inventory of all non-cache items approved for crew use by the local unit.

#### GROUND TRANSPORTATION

When ordering IHCs by ground transportation, they will come equipped to the following minimum standards:

- Assigned crew vehicles
- Assigned mobile/handheld communication equipment
- Four (4) chain saws with fuel
- Firing equipment
- Hand tools
- Water handling equipment
- All required overnight gear

- First aid and trauma kits
- Drinking water and food for 48 hours
- GPS/Cell Phone

#### **COMMERCIAL OR CHARTER AIR TRANSPORTATION**

When IHCs are delivered by aircraft the receiving unit will need to provide the following:

- Crew personnel transportation/separate vehicles for transportation of saws, fuel and hand tools
- Firing equipment (minimum 2 cases of fusees, 4 drip torches w/fuel)
- Hand tools
- Four chainsaws with 28" bar
- 10 gallons unmixed gas
- 5 gallons of bar oil
- 2 cycle mix for 10 gallons of gas
- 50 gallons of drinking water and 10 cases of MREs

## CHAPTER 5

### STANDARDS FOR INTERAGENCY HOTSHOT CREW OPERATIONS CREW CERTIFICATION AND MOBILIZATION

#### ANNUAL CREW READINESS REVIEW

On an annual basis the superintendent of crews holding IHC status the previous season are required to complete the Annual IHC Preparedness Review (appendix B). This process is designed to evaluate crew preparedness and compliance with the *Standards for Interagency Hotshot Crew Operations*.

The annual review will be conducted while the crew is fully staffed and operational. This review is not required prior to a crew being made available for incident assignment at the beginning of their availability period.

The completed Appendix B will be kept on file at the local host unit fire management office.

#### ANNUAL CREW PRE-MOBILIZATION PROCESS

All IHC are required to complete the Annual IHC Mobilization Checklist (appendix C) and send the completed document to the local GACC prior to making the crew available for national mobilization each season.

#### CREW CERTIFICATION PROCESS

Crew programs seeking to be certified as an IHC will use the following process:

- 1) A crew requesting IHC status must complete an imbedded review. This review is conducted by a current or past IHC Superintendent (not from the home unit) who will imbed with the crew seeking IHC status on a fire assignment. The imbedded reviewer will provide a written evaluation of the crew which includes a recommendation to the crew's host Geographic Area Operations Committee if the crew is deemed ready for a certification review.
- 2) The requesting crew superintendent and their host unit first line supervisor shall complete a draft of the Annual IHC Mobilization Checklist (appendix C) and the Annual IHC Preparedness Review (appendix B) to ensure the crew's readiness for certification.
- 3) When Appendix C and Appendix B are complete, the requesting crew host unit or hosting agency will contact the dispatching GACC who will contact the Geographic Area IHC Steering Committee chair to initiate IHC certification.
- 4) The crew has Peer Review for Initial Interagency Hotshot Crew Certification forms (appendix E) and incident performance appraisals completed during incident assignments.
- 5) Certification team will be assembled and a team leader identified.
- 6) Date of certification will be negotiated and confirmed.
  - a. The host unit is responsible for arranging accommodations and providing logistical support for the certification team.
  - b. The certification team will in brief with requesting crew superintendent and host unit fire leadership/supervisors to discuss objectives and agenda for review.
  - c. Certification team will meet with requesting crew for introductions and provide a briefing of planned activities and expectations.
  - d. A thorough review will be conducted of records, plans, crew evaluations, vehicles, facilities, equipment, safety, training, fitness, qualifications, etc.
  - e. Short-term individual simulations (i.e., sand table exercises, readiness) will be conducted.
  - f. Crew field simulation (drills), possibly with other resources involved (i.e., fireline construction, initial attack organization) will be conducted.

- g. Requesting crew will conduct an "After Action Review".
- 7) Certification team will make a recommendation on certification.
- 8) Certification team closes out with requesting crew and host unit.
- 9) Certification recommendation
  - a. If recommended for certification, the Annual IHC Mobilization Checklist Mobilization (appendix C) is signed by the team leader and forwarded to the Geographic Area Operations Committee.
  - b. If not recommended, the Certification Team should identify the elements in which the crew did not meet the standard and discuss with the crew superintendent and host unit supervisor how the crew may attain those proficiencies in the future.
- 10) If the Geographic Area Operations Committee endorses the certification recommendation they will issue the final certification documentation and notify the host agency, crew, and Geographic Area Coordinating Group (GACG).
- 11) Final certification
  - a. The certification letter is forwarded by the GACG to the National Multi-Agency Coordination Group and the National Interagency Coordination Center.
  - b. If not certified the documentation and a letter of items not meeting standards will be left with the host fire management unit.

#### **CERTIFICATION TEAM MEMBERSHIP**

The certification team will be comprised of at least four individuals, including a team leader:

- A current IHC superintendent
- A representative from the host unit's agency not directly associated with the crew
- A unit fire management officer selected by the Geographic Area IHC Steering Committee
- A representative from the host Geographic Area Operations Committee

The team leader and at least one other member will be independent of the host unit. Certification will be based on compliance with the current *Standards for Interagency Hotshot Crew Operations*.

#### **STATUS CHANGE**

Integrity cannot be written into a document and it is impossible to address every conceivable scenario. It is the responsibility of the superintendent and first line supervisor and agency administrator to objectively assess their crew to see if they are meeting the standards for IHC contained in this document. They are duty bound to not misrepresent the IHC community. Leadership of the highest moral character is required during these decisions.

Failure to meet the minimum requirements of the Annual IHC Mobilization Checklist (Appendix C) requires only a change in status (i.e. Type 2 I.A.).

#### **DECERTIFICATION**

In the event the crew does not meet the requirements of Appendix C within one calendar year from the date of change in status the crew and host unit agency shall:

1. Develop a plan to get the crew up to the IHC standard prior to the start of the next season; or
2. Decertify the crew.
3. If after 2 calendar years from the date in change in status the crew is unable to meet IHC standards a New Crew Certification process will be required (see above).

# APPENDICES

## APPENDIX A

### STANDARDS FOR INTERAGENCY HOTSHOT CREW OPERATIONS MINIMUM CREW STANDARDS FOR NATIONAL MOBILIZATION

Minimum Standards	Type 1 IHC	Type 2 with IA Capability	Type 2
<b>Fireline Capability</b>	Initial attack/can be broken up into squads, fire line construction, complex firing operations(backfire)	Initial attack/can be broken up into squads, fireline construction, firing to include burnout	Initial attack, fireline construction, firing as directed
<b>Crew Size</b>	18-22	18-20	
<b>Leadership Qualifications</b>	Permanent Supervision Supt: TFLD, ICT4, and FIRB Asst Supt: STCR or TFLD and CRWB and ICT4 3 Squad Leaders: CRWB and ICT5 2 Senior Firefighters: FFT1	Crew Boss: CRWB 3 Squad Bosses: ICT5	Crew Boss: CRWB 3 Squad Bosses: FFT1
<b>Language Requirement</b>	All senior leadership including Squad Leaders and higher must be able to read and interpret the language of the crew as well as English.		
<b>Experience</b>	80% 1 season	60% 1 season	20% 1 season
<b>Full Time Organized Crew</b>	Yes (work and train as a unit 40 hrs. per week)	No	No
<b>Communications</b>	8 programmable radios	4 programmable radios	
<b>Sawyers</b>	4 certified as FAL2 and 50% of crew certified as FAL3 or better	3 agency qualified	None
<b>Training</b>	As required by the <i>Standards for Interagency Hotshot Crew Operations</i> or agency policy prior to assignment	Basic firefighter training and/or annual firefighter safety refresher prior to assignment	Basic firefighter training and/or annual firefighter safety refresher prior to assignment
<b>Logistics</b>	Crew level agency purchasing authority	No purchasing authority	No purchasing authority
<b>Maximum Weight</b>	5300 lbs.		
<b>Dispatch Availability</b>	Available nationally	Available nationally	Variable
<b>Production Factor</b>	1.0	.8	.8
<b>Transportation</b>	Own transportation	Transportation needed	Transportation needed
<b>Tools &amp; Equipment</b>	Fully equipped	Not equipped	Not equipped
<b>Personal Gear</b>	Arrives with: Crew First Aid kit, personal first aid kit, headlamp, 1 qtr. canteen, web gear, sleeping bag		
<b>PPE</b>	All standard designated fireline PPE		
<b>Certification</b>	Must be annually certified by the local host unit agency administrator or designee prior to being made available for assignment.	N/A	N/A

**APPENDIX B**

**STANDARDS FOR INTERAGENCY HOTSHOT CREW OPERATIONS  
ANNUAL IHC PREPAREDNESS REVIEW**

The following document is designed to evaluate crew preparedness and compliance with the *Standards for Interagency Hotshot Crew Operations (SIHCO)*. It will be used to review IHC programs annually while the crew is fully staffed and operational. This review is not required to verify that a crew is ready for incident assignment at the beginning of their availability period.

When a review is completed the document is to be kept on file at the local host unit fire management office.

<b>Respondent:</b>		<b>Reviewed By:</b>	
<b>Key Code: E = Exceeds Standard M = Meets Standard NI = Needs Improvement NR = Not Reviewed</b>			
<b>Description</b>		<b>Code</b>	<b>Remarks</b>
<b>1</b>	Crew meets Agency and National Standards for Organizational Requirements: a. Superintendent b. Assistant Superintendent/Captains c. Squad Leaders d. Senior Firefighters e. Number of career positions (7 required)		
<b>2</b>	Crew meets Agency and National Standards for: a. Mobilization and dispatch time frames b. Government purchase authority c. Operational Preparedness Training d. SIHCO and Red Book		
<b>3</b>	Is the crew properly stuated with the appropriate Geographic Area Coordination Center?		
<b>4</b>	Has the local first line Supervisor, Agency Administrator and IHC Superintendent signed Appendix C? (SIHCO)		
<b>5</b>	IHC has been trained on accident/injury notification procedures: a. Vehicle Accident Reporting b. SAFENET c. SAFECOM d. CA-1/CA-16/APMC e. Safety Management Information System (SMIS) (SHIPS)		
<b>6</b>	IHC regularly participates in documented tailgate safety sessions.		
<b>7</b>	Unit Safety Plan is available and can be readily accessed.		
<b>8</b>	IHC has Job Hazard Analysis completed for each fire related task.		
<b>9</b>	IHC has Risk Assessment completed for each project task. (Agency requirement)		
<b>10</b>	Radio operations meet requirements: a. Minimum number of radios b. Knowledge of radio programming (Narrow/Wide Band/Digital Frequencies) c. Understand frequency authorization and use issues d. Facility radio and speaker system e. Approved local radio frequencies are posted		

11	IHC leadership is familiar with administrative issues and prepare and secure documents as per agency standards: <ul style="list-style-type: none"> <li>a. Time &amp; Attendance</li> <li>b. Crew time reports</li> <li>c. Fire time reports</li> <li>d. Per Diem forms</li> <li>e. Accident reports</li> <li>f. Credit card purchases and records</li> <li>g. Fleet purchasing cards</li> </ul>		
12	IHC members meet the agency qualifications required of their positions.		
13	Status (filled/vacant) of leadership positions within the approved Organizational Chart.		
14	Leadership is familiar with air cargo transport limitations and requirements including: <ul style="list-style-type: none"> <li>a. Purging of gas receptacles</li> <li>b. Air transport manifesting</li> <li>c. Weight limitations</li> <li>d. Safe packaging procedures for specialized equipment</li> <li>e. Local security requirements and procedures</li> </ul>		
<b>INCIDENT QUALIFICATIONS AND CERTIFICATION CONSIDERATIONS</b>			
15	The Incident Qualifications and Certification System is used to produce Red Card qualifications.		
16	IHC members have current Red Cards.		
17	IHC members have a documentation file for current season training, certification, and experience (Hardcopy or Electronic).		
18	IHC members have a hard-copy file for past season fire training, fire experience, task books, performance evaluations and physical fitness.		
19	Each IHC member who drives a government vehicle is current with agency required driving documentation.		
20	IHC has access to training materials and equipment.		
21	IHC members are current in annual firefighter safety refresher training.		
22	IHC members have task books initiated appropriate to their training needs. (NWCG 310-1)		
23	IHC members have documentation of currency with the agency medical standards.		
24	IHC members have completed the following training as per agency requirements: <ul style="list-style-type: none"> <li>a. Defensive driving for drivers</li> <li>b. First aid</li> <li>c. CPR Certification</li> <li>d. Blood-borne pathogens</li> <li>e. Hazardous materials awareness/MSDS(OSHA 29CFR/1910.1200 &amp; 29CFR 1910.120)</li> </ul>		

25	IHC members have attended agency required employee orientation.		
26	Each IHC member has reviewed and signed an Employee Performance Appraisal Plan (EPAP) for the current season.		
27	Per agency standards IHC members participate in an established physical fitness program.		
28	IHC is aware of and meets agency mobilization standards, including: <ul style="list-style-type: none"> <li>a. Mobilization and get-away time frames</li> <li>b. Driver duty limitations</li> <li>c. Work/rest requirements</li> </ul>		
29	IHC members possess commercial drivers' license where appropriate.		
<b>FACILITIES</b>			
30	Annual Agency Safety Inspection is documented and complete.		
31	Computer/fax/telephone equipment meets the needs of the IHC(s).		
32	Facility has security for: <ul style="list-style-type: none"> <li>a. Personnel records (privacy act notice OS-76 Item 43 schedule)</li> <li>b. Government equipment</li> <li>c. Personal equipment</li> </ul>		
33	Safety Equipment and Signing includes: (OSHA 29CFR1910) <ul style="list-style-type: none"> <li>a. Fire Extinguisher</li> <li>b. Smoke alarms</li> <li>c. First aid kits</li> </ul>		
34	Storage of flammables/hazardous materials meets standards. (OSHA 29 CFR1910)		
35	Bulletin board includes appropriate postings: <ul style="list-style-type: none"> <li>a. Unit and IHC organization charts.</li> <li>b. Emergency Notification Procedures</li> <li>c. 10 Standard Firefighting Orders</li> <li>d. 18 Watch Out Situations</li> <li>e. LCES</li> <li>f. Facility fire plan</li> <li>g. Fire danger information</li> <li>h. Fire weather information</li> <li>i. Smoking policy</li> <li>j. Sexual harassment policy/EEO counselors</li> <li>k. Department of Labor required information</li> </ul>		

36	Employee right-to-know information/Material Safety Data Sheet (MSDS) is posted.		
<b>CACHE</b>			
37	Inventory and use records are available and current.		
38	Inventories are posted, dated, signed.		
39	Cache is secure.		
40	Tools meet maintenance standards. (Fire Equipment and Storage and Refurbishing Standards NFES 2249)		
41	Fire extinguisher service is current and location is identified in a highly visible manner.		

<b>VEHICLES</b>			
42	Preventive maintenance checks are documented and current.		
43	If required by the agency an Annual Gross Vehicle Weight (GVW) slip from a certified scale is documented in logbook and meets vehicle specifications.		
44	References/paperwork available include: <ul style="list-style-type: none"> <li>a. Accident report forms</li> <li>b. Communications plan</li> <li>c. Posted frequencies</li> <li>d. Inventory (specific to compartment/location)</li> <li>e. Use record current</li> <li>f. Preventive maintenance records</li> <li>g. Personnel accident/injury forms</li> <li>h. Unit maps</li> <li>i. Current North American Emergency Response Guide Book</li> <li>j. Current credit card</li> </ul>		
45	Jack (serviceable for GVW).		
46	Lug wrench (serviceable for vehicle).		
47	Non-skid surface per (OSHA 29CFR1910)		
48	Fire extinguisher service is current and location is identified in a highly visible manner.		
49	Hazard reflectors/flares.		
50	First aid/trauma kit is available and appropriate size; location is identified in a highly visible manner		

## PROFICIENCY CHECKS

This is a listing of skills that an IHC should have as a minimum. How the Proficiency Checks are conducted is up to the local unit. The intent is for the Superintendent and Reviewing Official to verify the crew being reviewed is proficient in these skill areas. This is a crew proficiency check, all items do not necessarily apply to all crewmembers

<b>51</b>	<p>Basic Handcrew Tactics:</p> <ul style="list-style-type: none"> <li>a. Handline construction</li> <li>b. Chainsaw operations</li> <li>c. Firing &amp; holding organization</li> <li>d. Mop-up &amp; spot grid organization</li> <li>e. Portable pump setup</li> <li>f. Simple and progressive hoselays</li> </ul>		
<b>52</b>	<p>Specialized Handcrew Operations:</p> <ul style="list-style-type: none"> <li>a. Lookouts and scouting</li> <li>b. Hot spotting</li> <li>c. Spot fire attack</li> <li>d. Felling teams</li> <li>e. Initial attack</li> <li>f. Structure protection</li> <li>g. Medivac</li> <li>h. Map/Compass/GPS navigation</li> </ul>		
<b>53</b>	<p>Air Operations:</p> <ul style="list-style-type: none"> <li>a. Fixed-wing transport of Crew</li> <li>b. Helicopter passenger safety</li> <li>c. Helicopter transport of flammables</li> <li>d. Directing helicopter drops by radio</li> <li>e. Helispot specifications</li> <li>f. Longline/Hover hook operations</li> </ul>		
<b>54</b>	Demonstrated ability to make fire weather observations (using belt weather kit, accessing local daily forecast, using weather indicators to anticipate potential fire behavior).		
<b>55</b>	Demonstrated ability to use two-way radios (Dispatch contact protocol, local call sign system, programmable radio procedures).		
<b>56</b>	Demonstrated knowledge of basic individual communication responsibilities (briefings, debriefings, acknowledge messages, identify hazards, asking questions for clarification).		
<b>57</b>	Demonstrated knowledge of the key components of the Fire Orders (LCES) and established protocol for Crew disengagement.		
<b>58</b>	Demonstrated knowledge of the differences between a Safety Zone and a Deployment Zone.		
<b>59</b>	Demonstrated ability to deploy fire shelters in various situations (individual, group, two people in one shelter, drop gear and run, with wind).		

**PREPAREDNESS REVIEW SUMMARY**

Comments:

General preparedness of the crew:

Items which are deficient:

Corrective action to be taken:

I have reviewed the \_\_\_\_\_ IHC program and certify the crew meets the requirements of the *Standards for Interagency Hotshot Crew Operations*.

Crew Superintendent: \_\_\_\_\_

Reviewing Official: \_\_\_\_\_  
Signature and Title

Date: \_\_\_\_\_

## APPENDIX C

### STANDARDS FOR INTERAGENCY HOTSHOT CREW OPERATIONS ANNUAL IHC MOBILIZATION CHECKLIST

The Annual IHC Mobilization Checklist will be completed by the IHC superintendent and approved by the first line supervisor and agency administrator. The signed document must be forwarded to the responsible GACC notifying them of crew availability. This checklist must be provided prior to national mobilization.

If at any time an IHC fails to meet the required red card qualifications or the superintendent, first line supervisor and or the agency administrator feels their crew is not meeting the intent of the *Standards for Interagency Hotshot Crew Operations* it is incumbent upon the crew superintendent to re-status the crew.

The IHC will be required to have a **change in status** per crew typing in the Minimum Crew Standards for National Mobilization (appendix A). The superintendent is responsible for informing the first line supervisor, agency administrator and the local GACC of any required changes in the crews typing. The use of this form (Appendix C) will be utilized as the mechanism to re-status the crew.

(In the event of a change in status, the crew and host unit agency has one calendar year to re-status the crew as an IHC otherwise the host unit agency should consider decertification of the crew.)

#### REQUIRED IHC STAFFING

This table designates employees in leadership positions on the IHC being certified for mobilization. A minimum of seven (7) career positions or fully qualified personnel are required for certification as defined in Chapter 2:

Position	Fully Qualified Career Employee (Name)	Fully Qualified Detailed Employee (Name)	Current NWCG Qualifications
Superintendent			
Asst Supt or Captain			
Captain or Squad Leader			
Squad Leader			
Squad Leader			
Senior Firefighter			
Senior Firefighter			

#### TRAINING AND CERTIFICATION

Have all crewmembers completed Operational Preparedness Training? Yes \_\_\_\_\_ No \_\_\_\_\_  
 Do all crewmembers have a current Incident Qualifications Card? Yes \_\_\_\_\_ No \_\_\_\_\_

#### PREPAREDNESS

Does the IHC meet mobilization standards defined in Chapter 2? Yes \_\_\_\_\_ No \_\_\_\_\_  
 Does the crew have dedicated transportation and the required fire equipment? Yes \_\_\_\_\_ No \_\_\_\_\_  
 Has the crew undergone an annual preparedness review? Yes \_\_\_\_\_ No \_\_\_\_\_

The \_\_\_\_\_ IHC program is available for national assignment.

IHC Superintendent \_\_\_\_\_ Date \_\_\_\_\_

IHC first line Supervisor and Title \_\_\_\_\_ Date \_\_\_\_\_

IHC Agency Administrator and Title \_\_\_\_\_ Date \_\_\_\_\_

Other (Optional) \_\_\_\_\_ Date \_\_\_\_\_

## **APPENDIX D**

### **STANDARDS FOR INTERAGENCY HOTSHOT CREW OPERATIONS NATIONAL INTERAGENCY HOTSHOT CREW STEERING COMMITTEE CHARTER**

#### **CHARTER AUTHORITY**

The National Interagency Hotshot Crew (IHC) Steering Committee will function under the authority of the IHC Sponsor Agency Directors and/or Fire Directors.

#### **MISSION**

The National IHC Steering Committee will provide the IHC community, fire managers, and agency administrators a means for proactive problem and issue resolution; will promote safe and effective IHC operations and will strive to ensure consistent adherence to national fire management policies. Interagency Hotshot Crews are those crews identified as National Shared Resources.

#### **OBJECTIVE**

The National IHC Steering Committee will assist fire managers, agency administrators, and IHCs in the management of the hotshot program through solicitation, review and validation of input and concerns relating to fire operations that are national in scope. The Steering Committee will facilitate the exchange of information between the above groups.

#### **STEERING COMMITTEE COMPOSITION**

The Steering Committee will consist of 16 standing members to include the following:

- Five Operations representatives appointed from each agency.
  - The U.S. Forest Service (USFS)
  - The Bureau of Land Management (BLM)
  - The Bureau of Indian Affairs (BIA)
  - The National Park Service (NPS)

The following steering committee members will operate under the consensus model:

- Three IHC Superintendents representing Department of Interior agencies.
  - One representing BLM crews
  - One representing BIA crews
  - One representing NPS crews
- One IHC Superintendent representing the non-federal crews.
- Seven USFS IHC Superintendents selected by the IHC Superintendents in these Regions:
  - One representing the Northern Rockies Region
  - One representing the Pacific Northwest Region
  - One representing the Intermountain Region
  - One representing the Pacific Southwest Region
  - One representing the Southwest Region
  - One representing the Eastern and Southern Region
  - One representing the Rocky Mountain Region

## **CONSENSUS MODEL:**

### **Decision Making Process**

1. A quorum consisting of at least 9 voting members of the IHC Steering Committee is required to conduct official business
2. The IHC Steering Committee will utilize consensus in the decision making process. For the purpose of this document, consensus is defined to be: "All voting committee members can fully support the decision although it may not be their personal choice or preference."
3. When consensus cannot be reached, the reason(s) must be clearly articulated. The steering committee can:
  - a. Table the issue until the next predetermined meeting, at which time it will be revisited, or
  - b. Refer the issue to an existing working team or task group with a specific task order to address concerns in an attempt to clarify and resolve obstacles.
4. If after reconsideration, consensus is not resolved, the Chair of the steering committee will elevate the item to the agency Operations representatives for resolution.

## **CHAIRPERSON**

A Chairperson and Co-Chair will be elected for a 2-year term from the superintendents listed above.

## **ELECTION PROCESS**

Elections will be held at the beginning of the National IHC Steering Committee meeting. Committee members will nominate the new chair and co-chair, outgoing chair will facilitate the election process.

## **MEMBERSHIP TENURE**

IHC Superintendents serve a 4-year term that can be extended with the support of their agency sponsors. Agency committee members serve at the pleasure of their selecting sponsor.

## **MEETING FREQUENCY**

The National IHC Steering Committee will meet annually, at a minimum. Meetings will be conducted in the various geographic areas; technical specialists may be invited to participate.

## **STANDARDS FOR INTERAGENCY HOTSHOT CREW OPERATIONS**

The National IHC Steering Committee will facilitate the process for any national IHC operations standards revisions under the direction of the IHC Sponsor Agency Fire Directors.

## **NATIONAL IHC WORKSHOP**

The National IHC Steering Committee will recommend the need for and timing of National IHC workshops.

**APPENDIX E**

**STANDARDS FOR INTERAGENCY HOTSHOT CREW OPERATIONS  
PEER REVIEW FOR INITIAL CERTIFICATION OF INTERAGENCY HOTSHOT  
CREWS**

<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>CORPORATE KNOWLEDGE Communications - Sharing information</b>	<b>Comments</b>	
<p>Crew clearly understands and demonstrates the knowledge expected of Type 1 crews. Crew shares critical information in a timely manner utilizing the appropriate vernacular for the situation.</p> <ul style="list-style-type: none"> <li>• Face to face and radio communications are accurate, concise and respectful.</li> <li>• Intra and intercrew communications are maintained and appropriate for the situation.</li> <li>• Crew clearly understands and utilizes "Trigger Points" and "Trip Wires" and makes them know to all affected resources.</li> </ul>		
<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>CORPORATE KNOWLEDGE Strategy and Tactics</b>	<b>Comments</b>	
<p>Crew clearly understands the overall incident strategy and control objectives. Crew selects the correct tactics to meet the control objectives and is able to adjust their tactics as the situation warrants.</p> <ul style="list-style-type: none"> <li>• Crew demonstrates knowledge of line placement and standards.</li> <li>• Crew demonstrates knowledge of water use and hoselays.</li> <li>• Crew demonstrates extensive knowledge in the use of portable pumps.</li> </ul>		

<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>CORPORATE KNOWLEDGE Mobilization - Travel: Ground/Air</b>	<b>Comments</b>	
<p>Crew has been mobilized inside/outside of region and they clearly demonstrate an understanding of travel policies and guidelines.</p> <ul style="list-style-type: none"> <li>• Crew has driven to incidents and demonstrates a clear understanding of policies and procedures associated with this type of mobilization</li> <li>• Crew has flown in contract aircraft demonstrating a clear understanding of policies and procedures associated with this type of mobilization</li> <li>• Crew has flown commercially and prepared and secured equipment and personnel in accordance with airport security policies</li> <li>• Crew has "chased" the buggies and still maintains minimum expectations/standards of receiving units</li> </ul>		
	Contact Phone #	
<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>Line Construction – Hotline</b>	<b>Comments</b>	
<p>Crew was engaged in a "Hotline" assignment of significant duration, (# of hours/shifts) crew performed efficiently and effectively adhering to all applicable rules of engagement. The quality, quantity and location of their line were commensurate to the conditions.</p> <ul style="list-style-type: none"> <li>• Crew briefing was conducted and included assignment objectives and LCES</li> <li>• Personnel, tools and equipment were adequate for the conditions</li> <li>• Escape Routes and Safety Zones were adequate for the conditions and known by all crewmembers</li> <li>• Crew overhead and crewmembers appeared to have good Situational Awareness</li> <li>• Crew conducted effective and well organized After Action Review</li> </ul>		
	Contact Phone #	

<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>Line Construction - Cold Trail</b>	<b>Comments</b>	
Crew clearly demonstrated an understanding of the concept, utilizing the appropriate techniques of securing, mopping up and lining hot spots adjacent to the fires edge.		
	Contact Phone #	
<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>Working with Engines</b>	<b>Comments</b>	
<ul style="list-style-type: none"> <li>• Crew worked with water handling equipment coordinating with and supporting fire engine crews.</li> <li>• Crew briefing was conducted which included assignment objectives, hazards, communications, lookouts, escape routes, and safety zones.</li> <li>• Crewmembers assisted engine companies in setting up engine operations.</li> <li>• Crewmembers looked for water sources (ponds, pools, stand pipes, etc.) set up portable pumps and hose lays.</li> <li>• Crew utilized working lines in combination with hand tools to suppress and/or mop up fire activity.</li> <li>• Crew personnel maintained good communications and were accounted for at all times.</li> <li>• Crew maintained good situational awareness dealing with fire activity and hazards. LCES was maintained.</li> </ul>		
	Contact Phone #	

ASSIGNMENT	Reviewer's Name:	Reviewer's Crew:
<b>Line Construction – Downhill</b>	<b>Comments</b>	
<p>Crew participated in a downhill line construction operation. LCES was in place and maintained for the duration of the operation.</p> <ul style="list-style-type: none"> <li>• Crew supervisor(s) and fireline overhead will discuss assignments prior to committing crew(s). Responsible overhead individual will stay with job until completed. (Minimum TFLD or ICT4)</li> <li>• Decision will be made after proposed fireline has been scouted by supervisor(s) of involved crew(s).</li> <li>• LCES will be coordinated for all personnel involved. <ul style="list-style-type: none"> <li>➢ Crew supervisor(s) is in direct contact with lookout that can see the fire.</li> <li>➢ Communication is established between all crews.</li> <li>➢ Rapid access to safety zones in case fire crosses below crew(s).</li> </ul> </li> <li>• Direct attack will be used whenever possible.</li> <li>• Fireline will not lie in or adjacent to chute or chimney.</li> <li>• Starting point will be anchored for crew(s) building fireline down from the top.</li> <li>• Bottom of the fire will be monitored; if the potential exists for the fire to spread, action will be taken to secure the fire edge.</li> </ul>		
<b>ASSIGNMENT</b>		
<b>Line Construction – MIST</b>	<b>Comments</b>	
<p>Crew engages to suppress a wildfire with the least impact to the land. Fire conditions and good judgment dictate actions taken.</p> <ul style="list-style-type: none"> <li>• Safety is of the utmost importance. Line standards and specifications are commensurate to the conditions.</li> <li>• Proper procedures, tools and equipment are selected that least impact the environment.</li> </ul>		

<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>Spot Fire Procedures</b>	<b>Comments</b>	
<p>Crew has pre-identified spot fire protocols and procedures.</p> <ul style="list-style-type: none"> <li>• Notification procedures: To overhead, firing boss, holding boss, burners, crew members, adjoining forces.</li> <li>• Appropriate size-up procedure.</li> <li>• Safety - LCES implementation.</li> <li>• Engagement method(s).</li> <li>• Ability to request additional resources if needed.</li> <li>• Contain, control, patrol, mark and notify procedure or system.</li> </ul>		
<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>Firing Operations - Burnout/Division Level</b>	<b>Comments</b>	
<p>Crew initiated and conducted a successful burnout to accomplish Division level control objectives. The crew was able to maintain control of fire intensity and keep the main fire and burnout operation within the control lines.</p> <ul style="list-style-type: none"> <li>• Incident, division and crew level briefings were in agreement and crew fully understood the assignment.</li> <li>• Coordination with adjoining resources and neighboring divisions was apparent and maintained for the duration of the shift.</li> <li>• Crew utilized firing techniques appropriate for the fuels, weather and topography.</li> <li>• Crew showed proficiency in the use of various types of firing equipment.</li> <li>• Crew demonstrated the ability to control the intensity and rates of spread of the burnout necessary to meet incident objectives.</li> </ul>		

<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>Firing Operations - Burnout/Crew Level</b>	<b>Comments</b>	
<p>Crew initiated and conducted a successful burnout to accomplish crew level control objectives. The crew was able to able to maintain control of fire intensity and keep the main fire and burnout operation within the control lines.</p> <ul style="list-style-type: none"> <li>• Superintendent or the crew overhead maintained communications with division supervisor and adjoining resources</li> <li>• Crew had sufficient personnel, equipment and expertise to conduct the burnout without assistance.</li> </ul>		
	Contact Phone #	
<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>Firing Operations – Holding</b>	<b>Comments</b>	
<ul style="list-style-type: none"> <li>• Crew was involved in holding operations in support of a burnout or backfiring operation.</li> <li>• Superintendent and or crew overhead briefs and develops an organizational holding plan and assigns equipment and crews.</li> <li>• Holding Boss should assure safety of personnel.</li> <li>• Overhead and crew maintains communication with adjoining</li> <li>• Resources to ensure plan is followed accordingly.</li> <li>• Holding Boss advises Division Supervisor of the progress and holding conditions.</li> <li>• Selected Individuals should be at a vantage point where both the firing and holders can be seen.</li> <li>• Objective hazards and crew members and adjoining forces can be observed.</li> <li>• Holding Boss should insure that crews and equipment are progressing with the firing operations when possible.</li> </ul>		
	Contact Phone #	

<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>Interface Operations – General</b>	<b>Comments</b>	
<ul style="list-style-type: none"> <li>• Crew operations stayed fluid in their performance of the overall plan. Crew's strategy and tactics were able to adjust to changing conditions and situations.</li> <li>• Priorities for the protection of life, property, and environmental resources were kept in focus, maintaining safety first.</li> <li>• Crew conducted an organized and meaningful After Action Review following the assignment.</li> </ul>		
	Contact Phone #	
<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>Interface Operations - Firing Around Structures/Improvements</b>	<b>Comments</b>	
<p>Crew was actively engaged in firing operations adjacent to structures/improvements threatened by an approaching wildland fire.</p> <ul style="list-style-type: none"> <li>• Crew overhead obtained a briefing from division or operations concerning the firing operation.</li> <li>• Superintendent participated in the tactical planning of the firing procedures and crew responsibilities.</li> <li>• Crew briefing was conducted addressing the objectives, safety concerns, LCES, firing procedures, and the crew's part in the tactical implementation.</li> <li>• Crew safely and effectively fired out from roads, lanes, pathways, hand line, etc. in an effort to protect structures/improvements.</li> <li>• Burners showed a firm knowledge of firing techniques and firing equipment used.</li> <li>• Crew maintained a vigilant stance during the holding period of the firing operation, actively searching for spot fires, and problems associated with doglegs, widow makers, snags, etc.</li> </ul>		
	Contact Phone #	

ASSIGNMENT	Reviewer's Name:	Reviewer's Crew:
<b>Interface Operations - Structure/Improvement Triage</b>	<b>Comments</b>	
<p>Crew performed or assisted in the structure/improvement triage process, sizing up the threat to individual structures/improvements, prioritizing, and determining how best to minimize property damage and loss.</p> <ul style="list-style-type: none"> <li>• Crew briefing was conducted addressing assignment objectives, predicted fire and weather activity, special hazards, communications, escape routes and safety zones.</li> <li>• Crew showed a firm grasp of the defensible space concept.</li> <li>• Crew was aware of occupancy coordinating efforts between property owners and fire fighters maintaining a professional attitude when dealing with the public.</li> <li>• Crewmembers performed hazard reduction by cutting brush, limbing trees and shrubs, constructing handline, and removing debris from around structures/ improvements.</li> <li>• Crew maintained good situational awareness with urban interface conditions such as vehicle traffic, best ingress and egress, domestic animals, electrical hazards and propane lines.</li> <li>• Crew maintained a mobile capability, and maintained LCES.</li> </ul>	Contact Phone #	
ASSIGNMENT	Reviewer's Name:	Reviewer's Crew:
<b>Line Construction – Indirect</b>	<b>Comments</b>	
<p>Crew participated in an indirect line construction operation. LCES was in place and maintained for the duration of the shift.</p> <ul style="list-style-type: none"> <li>• Assignment was to construct an indirect control line some distance from the main fire.</li> <li>• Assignment was to widen a road and eliminate all hazards in anticipation of a firing operation.</li> </ul>	Contact Phone #	

<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>Working with Dozers</b>	<b>Comments</b>	
<ul style="list-style-type: none"> <li>• Crew works in conjunction with dozer to meet control objectives on the fireline.</li> <li>• Crew briefing was conducted which included assignment objectives, hazards, communications, lookouts, escape routes, and safety zones.</li> <li>• Communication was maintained between crew and dozer boss.</li> <li>• Crew was never placed directly below dozer operations.</li> <li>• If firing behind, crew supervisor(s) coordinates to not allow dozer to get too far ahead of firing crew.</li> <li>• Crew maintained good situational awareness dealing with fire activity and hazards. LCES was maintained.</li> </ul>	Contact Phone #	
<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>Construct/Prepare Helispot</b>	<b>Comments</b>	
<ul style="list-style-type: none"> <li>• Locate appropriate site</li> <li>• Determine prevailing wind directions and clear approach and departure paths appropriate to size class of helicopter</li> <li>• Level touchdown area appropriate to size class of helicopter</li> <li>• Install windsock or wind indicator</li> <li>• Remove or secure loose items</li> <li>• Clear area of stumps, brush, posts, large rocks or anything over 18 inches high</li> <li>• Relay any hazards to pilot</li> </ul>	Contact Phone #	

<b>ASSIGNMENT</b>	<b>Reviewer's Name:</b>	<b>Reviewer's Crew:</b>
<b>Working with aircraft - Fixed wing: Air Attack/ASM's</b>	<b>Comments</b>	
<ul style="list-style-type: none"> <li>• Crew supervisor(s) do an adequate job of describing crew location and crew needs.</li> <li>• Radio communications are accurate, concise and respectful.</li> </ul>
