

CALIFORNIA MOBILIZATION GUIDE 2013

CALIFORNIA INTERAGENCY

MOBILIZATION GUIDE

Date: April, 2013

Memorandum

To: California Mobilization Guide Holders

From: California Wildland Fire Coordinating Group (CWCG)

Subject: 2013 California Mobilization Guide

Attached is the 2013 California Interagency Mobilization Guide. This guide is written to reflect the interagency needs of the user and formatted to accept local inserts. CWCG sponsors this guide for the cohesive mobilization of resources by California.

The 2013 Mobilization Guide has been through a rewrite process. Significant change has been made to all the Chapters.

CWCG embodies the representatives from Bureau of Indian Affairs (BIA), Bureau of Land Management (BLM), California Department of Forestry and Fire Protection (CAL FIRE), Fish and Wildlife Service (FWS), US Forest Service (USFS), National Park Service (NPS), California Governor's Office of Emergency Services (OES), and Contract Counties. The signature of the CWCG Chair is acknowledgment and agreement of the CWCG Charter Agencies to follow this Mobilization Guide as presented. Signature page of CWCG members is located at: http://www.fs.fed.us/r5/fire/intel/mob_guide/index.php

Approved by CWCG April 2013

Ron Recker, Chair

Chapter 10 - Objectives, Policy and Scope of Operations

Mission Statement

The principal mission for the California Geographic Area Coordination Centers (GACC) is the cost-effective and timely coordination of wildland protection agency emergency response for wildland fire and all risk incidents. This is accomplished through planning, situation monitoring and expediting resource usage between the Forest Service (USFS), California Department of Forestry and Fire Protection (CAL FIRE), Bureau of Land Management (BLM), National Park Service (NPS), Fish and Wildlife Service (FWS), Bureau of Indian Affairs (BIA), National Weather Service (NWS), Governor's Office of Emergency Services (OES) and other cooperating agencies.

The California Interagency Mobilization Guide identifies standard procedures which guide the operations of multi-agency logistical support activity throughout the coordination system. This guide is intended to facilitate interagency dispatch coordination, ensuring the timeliest and most cost effective incident support services available are provided. It is designed to accommodate amendments as needed and will be retained as current material until amended. The California Mobilization Guide is used to supplement the National Interagency Mobilization Guide. This guide is governed by each of the signatory agency's policy and procedures. If you are unable to locate the references you are looking for, contact your GACC for specific information.

The California GACCs, the Emergency Command Center (ECC)/Dispatch Center and their respective Duty Chiefs/Officers have many responsibilities, the most important of which are effective and timely communications with and service to the field. All levels of dispatching and coordination involving the various agencies throughout the state must provide for continuous and adequate communication. The GACCs, ECCs and Duty Chiefs/Officers must ensure that responsible officials are kept current on resource availability.

Communication between Units, GACCs, State, Regional Offices and other cooperative agencies are addressed in each section of the California Interagency Mobilization Guide as they apply to that section.

Geographic Area Coordination Centers

There are two GACCs within the State of California and they will follow the established mobilization procedures identified in the National Mobilization Guide. The GACCs act as focal points for internal and external requests not filled at the local level.

Each GACC's Federal and CAL FIRE Duty Chief, through their dispatching organization, is responsible for providing for the coordination of all National, Regional, and Unit resources located within their respective Geographic Area. Each Duty Chief must maintain an awareness of resource commitment and availability in order to enable adequate coordination between the neighboring GACCs and other agencies within the state.

Northern California GACC (Northern Operations – North Ops - NOPS)

North Ops provides coordination and dispatch services for Northern California National Forests, Bureau of Land Management, National Park Service, Fish and Wildlife Service, Bureau of Indian Affairs, CAL FIRE.

North Ops is located on the Northern California Service Center compound at the Redding Airport.

Southern California GACC (Southern Operations – South Ops - SOPS)

South Ops provides coordination and dispatch services for Southern California National Forests, Bureau of Land Management, National Park Service, Fish and Wildlife Service, Bureau of Indian Affairs, CAL FIRE and FEMA assignments for Hawaii and Pacific Trust Territories.

South Ops is located at the CAL FIRE Southern Region Headquarters in Riverside.

Unit Level

Unit Duty Chiefs and Duty Officers, through their dispatchers, are responsible for the coordination and use of resources within their span of control. Procedures are established for notifying the Coordination Center when Regional or National resources are committed.

In this and the following chapters, the term "Unit" refers to Forests, CAL FIRE Units, BLM Districts, National Parks, National Wildlife Refuges, National Monuments, and other resource providers that have their own dispatch centers.

Priorities

When competition for resources occurs among the Units, the GACCs will use the Multi-Agency Coordination System (MACS) process to establish incident priorities.

For MACS Organization Chart, refer to the California Mobilization Guide Chapter 30.

For MACS Process, refer to the California Mobilization Guide Chapter 30.

Initial Attack

Initial Attack will be defined, as per the 2013 California Master Cooperative Wildland Fire Management and Stafford Act Response Agreement (CFMA).

Initial Attack: A planned response to a wildfire given the wildfire's potential fire behavior. The objective of initial attack is to stop the fire and put it out in a manner consistent with firefighter and public safety and values to be protected.

Initial Attack Period: The first 24 hours, or by written local agreement.

Initial Attack Fire: Fire that is generally contained by the resources first dispatched, without a significant augmentation of reinforcements, within two hours after initial attack, and full control is expected within the first burning period.

Initial Attack Zone: An identified area in which predetermined resources would normally be the initial resource to respond to an incident.

Drawdown for Initial Attack (IA)

Drawdown is established by the local Unit based on their standard operating procedures. For CAL FIRE, reference CAL FIRE Handbook 8100, policy 8121.2.1. For the Federal agencies, reference the Unit Fire Management Plan.

When available resources are drawn down to a critical level, the Unit is responsible for advising their respective GACC of the situation, including any anticipated shortages and projected needs. This information enables the GACCs to adjudicate allocation of available resources within California, and, if feasible, to provide resources for national needs.

When availability of Unit resources within a geographic area is drawn down to critical levels, the affected GACC is responsible for advising the adjacent GACC and CAL FIRE State Headquarters of the current situation, including anticipated shortages and projected needs. This information is needed in order to ensure effective allocation of the remaining available resources.

Mobilization/Demobilization

The GACCs will coordinate the movements of resources across Unit dispatch boundaries not covered by local operating plans or agency specific policy.

All agencies will follow the *closest resource concept* for initial attack. Established dispatch channels will be followed at all times.

Work/Rest Guidelines

Federal

Work/Rest Guidelines and Days Off Policy, are outlined in the Interagency Incident Business Management Handbook, the National Mobilization Guide, Interagency Standards for Fire and Fire Aviation Operations, and the Incident Response Pocket Guide. All resources which have been requested to extend will complete and follow the instructions on the Resource Extension Request form. Refer to California Mobilization Guide, Appendix A.

State

For State Work/Rest Guidelines, reference the CAL FIRE Handbook 7700, policy 7757.

Incident Operations Driving

Refer to your agency's latest policy regarding driving regulations.

For Federal agencies, reference the National Mobilization Guide and the Interagency Standards for Fire and Fire Aviation Operations.

For CAL FIRE, reference the CAL FIRE Handbook 6400, policy 6557 and CAL FIRE Handbook 7000, policy 7060.

Resource Mobilization

The Resource Ordering and Status System (ROSS) is the only ordering system to be used by all California Units. It will be used to:

- Create new incidents

- Order and mobilize resources
- Track resources and their status

Resource availability shall be continually updated in ROSS.

For California incident mobilization, use the Interagency Standards for the ROSS Operations Guide (ISROG) located at the following website: <http://www.nifc.gov/nicc/logistics/references/ISROG.pdf> and augmented by the California ROSS Business Practices and Standards guide:

http://gacc.nifc.gov/oscc/logistics/docs/12_ross_business_practices.pdf.

Notification of Commitment of Resources

In addition to National Mobilization guidelines, the Units will notify GACCs of resource commitment. Per the California ROSS Business Practices and Standards guide, Chapter 8, notification to the GACCs will be as follows:

- Commitment of aircraft will be entered at the time of dispatch, so aircraft status will be current.
- Commitment of crews will be entered within ten (10) minutes.
- If after thirty (30) minutes, it appears the incident will continue to impact a Unit's resource base, the Unit's equipment and overhead resources will be entered into ROSS.
- Any request for resources from outside the Unit, other than IA, *must* be entered and placed in ROSS immediately.

Wildland Fire Weather Forecasts

In California, the National Weather Service will produce daily fire weather forecasts (by agreement) from the representative office.

In Hawaii, the Honolulu office of the National Weather Service will produce daily fire weather forecast covered by the Fire Weather Operations Plan.

Chapter 20 - Administration

Communication

The formal route of communications for the Unit/Forest/Local government level is through the GACC Federal and CAL FIRE Duty Chief. The Duty Chiefs are responsible for briefing their organizations in the procedures of incident information flow and for assuring timely exchange of information with a minimum of disruption to the dispatch function. These guidelines are offered to assist the Duty Chief in briefing their personnel. The following items give some general indicators of situations that should prompt contact between agencies and with the Federal, CAL FIRE Regions and Headquarter levels.

- When a large incident, an incident in a sensitive area, or multiple incidents occur.
- When geographic area federal or state resources are becoming depleted.
- When resources are being moved outside of their assigned GACC.
- When an Incident Management Team is mobilized for an incident.
- When structures or property are destroyed, or serious injuries or aircraft accidents occur.
- Fire Directors and CWCG will be notified when preparedness levels are adjusted due to suppression activity in their Geographical Area or the adjacent Geographical Areas.

Aircraft

For all aircraft procedures and details, refer to California Mobilization Guide Chapter 80.

Night Aviation Operations – Forest Service – New in 2013

Night flying operations will augment those that the Forest Service currently uses on an as-needed basis and will be based in Southern California. For details, refer to California Mobilization Guide Chapter 80.

Mobilization

All resource requests will be submitted using the Resource Ordering and Status System (ROSS). Requests for all tactical aircraft will be made using the state intercom and the FC 106 Script to expedite the requests. Refer to California Mobilization Guide Chapter 80 and California Mobilization Guide Appendix A.

Unit Dispatch Procedures

California will provide all-risk dispatching services through existing dispatch centers that are consistent with the needs and tours of field going employees.

- Each Unit will provide for its own dispatching needs. Standardized dispatching procedures will be used at each dispatching level within California.
- Dispatching procedures are developed so that each Unit will dispatch to the extent of its available resources before requesting additional aid from the GACC.
- Units will pre-plan and identify all mutual aid assistance/move-up of resources between adjoining Units, including those in other geographic areas/States and other agencies. Resource commitments should be limited to those resources that could be expected to provide effective initial attack, or fast follow-up to initial attack, within the established areas for mutual assistance. It is the responsibility of the sending Unit to notify the appropriate GACC whenever action is taken under one of these plans.
- Units will work directly with other dispatch centers, county and city fire departments, and local and state law enforcement agencies in their Unit or GACC's area of influence. They will keep the GACC advised of all mobilization/demobilization of personnel/crews and aircraft received through this procedure.
- Units will handle **ALL** dispatching procedures for agency personnel during scheduled field operation hours. CAL FIRE Emergency Command Centers are staffed 24 hrs.
- Federal Dispatch Centers may enter into cooperative agreements with other agencies, or amend existing agreements, to provide dispatching services outside of normal field operation hours.
- Each Dispatch Center will have a work schedule that allows them to meet the needs and scheduled work hours/shifts of field going personnel.
- CAL FIRE Command Centers will use CAL FIRE issuance publications, in particular the 8100 Command and Control Handbook, as their operational guides.

- Each Federal Unit will utilize operational guides which define procedures and required actions for all hazardous activities. These guides will be available in each Dispatch Center and field office.
- All field going personnel WILL remain in radio contact with the Dispatch Center unless otherwise arranged through the Center.
- Dispatch Centers are to communicate weather forecasts to all field going personnel, especially firefighters according to agency direction. Dispatch Centers are to update field personnel of changes in predicted weather patterns.

GACC Dispatch Procedures

The GACC will fill orders from the most appropriate source available. The most appropriate source will be determined on the basis of urgency, resource availability, delivery time, reasonable cost effectiveness, impact on other Units, and consideration of the overall fire program. Within 30 minutes, the ability or inability to fill the order will be relayed to GACC by the Unit attempting to fill the order. Objectives of the GACC include:

- Provide 24-hour dispatch and coordination services. Dispatch personnel, equipment, aircraft, and supplies between GACC's, Units, other States, or agencies. Expand the GACC dispatching organization to meet current demands.
- Maintain status on amounts and location of specified overhead, crews, equipment, aircraft, and supplies.
- Assist in determining GACC priorities for overhead, crews, equipment, aircraft, and supplies in multiple incident situations, and fill requests accordingly.
- Inform State and Federal Duty Chief, Units, National Interagency Coordination Center (NICC), and other cooperating agencies of current and critical incident situations.
- Collect and distribute information concerning the overall incident situation.
- Encourage and practice close cooperation in using shared resources with other cooperating agencies, as well as private wildland fire services, including contract and Agreement resources.
- Anticipate requirements, evaluate requests in light of the actual and imminent incident situation, and question (through proper channels) orders appearing to be out of balance with requirements, needs, or policy/procedure.
- The GACCs may fill each other's requests within California prior to requesting assistance from NICC.
- The GACC Duty Chiefs will work closely to support each others existing needs.

NICC Dispatch procedures

NICC will follow defined National Mobilization guidelines.

Mutual Aid

Mutual Aid is utilized when an incident is likely to exceed, or has exceeded, the ability of the responsible agency to control. Agencies receiving mutual aid are responsible for logistic support to all mutual aid personnel and equipment.

For all Agreements governing mutual aid, refer to the California Mobilization Guide, Chapter 40.

Request for Assistance

After local agreements and mutual aid resources have been exhausted, requests for assistance should be placed directly with the appropriate GACC or Fire Rescue Operational Area. A file of all mutual aid and other agreements will be maintained in the ECCs. These files will be available to the GACC upon request.

Support to Border Fires

A border fire is defined as a wildfire that has crossed the boundary from one GACC into another, or which is expected to cross the boundary within two burning periods. For specifics for operating plans and agreements, refer to the California Mobilization Guide, Chapter 40.

Since both GACCs have a responsibility and authority to provide resource support to the incident, they may place requests for resources directly between each other in order to support the incident. The following protocols apply:

- A single ordering point will be designated to ensure proper assignment and demobilization of resources. The incident will remain with the originating Unit for situation reporting and prioritization.
- The dispatch organization designated as the single ordering point may place orders to either GACC using established ordering channels; however only the GACC of the designated single ordering point is

authorized to place requests up to NICC.

- Prior to initiating border fire support operations, concurrence and agreement must occur between the two GACCs and NICC. Coordinate as needed to maintain effective incident and GACC support.

Unified Ordering Point (UOP)

When an incident involves more than one jurisdiction, and a Unified Command is activated, a Unified Ordering Point (UOP) shall be established.

Purpose

To establish a single ordering point for all resources required by the incident.

Goal

The goal of the UOP is to allow the agencies involved in the incident the opportunity to fill requests at the lowest level including the use of local mutual aid and assistance, to avoid duplication of orders and to provide a single system for tracking resources for cost share agreements.

Guidelines

- The Unified Commanders will determine which agency ECC will be identified as the UOP. Notification will be made immediately by each agency involved.
- The UOP should be staffed with personnel from all agencies involved in the Unified Command. Once the UOP has been designated, it should remain at that location for the duration of the Unified Command.
- The UOP will use the Order Number that has been assigned by the agency in whose Direct Protection Area (DPA) the incident started. This number should not change for the duration of the incident.
- All requests from the incident will be processed through the UOP.
- The UOP will utilize local agency resources and those available through agreements with local cooperators of the agency assuming financial responsibility before passing requests to the next level.
- When the UOP is unable to fill a request, it will be forwarded to the next level ECC based on the UOP host's agency dispatch channels.
- The incident will order cache items direct from the nearest National Cache.

Relocating the UOP

It may be necessary to relocate the UOP due to one of the following conditions:

- The incident returns to a single jurisdiction (the UOP will be terminated and the responsible agency ECC will assume the role.)
- Unified Commanders are advised and concur that limited or unsatisfactory service will result if the UOP remains at the current location.

The following guidelines are recommended:

- Determine the new location.
- All documents (or clean copies) will be moved to the new UOP location prior to commencing operations.
- Allow adequate time for transition including movement of UOP personnel and documents.

Resource Ordering

ROSS shall be used for documenting mobilization and demobilization actions of all resources. Reference the California ROSS Business Practices and Standards guide for procedures in utilizing the program.

The Resource Order Form will be used as the backup for all agencies. Refer to the California Mobilization Guide, Appendix A.

Each ECC/GACC will use local time at the departure point and the local time (ETA) at the destination point to which the resource is being sent when passing travel itineraries.

All resource requests will be submitted using Resource Ordering and Status System (ROSS). Only requests for aircraft and/or immediate need ground forces may be made using the intercom, then followed as quickly as possible with the matching ROSS request. This allows immediate-need resource requests to be processed in the most expedient manner. All other ordering is to be accomplished utilizing ROSS and the telephone.

Request Information

Request Number:

Reference the latest California ROSS Business Practices and Standards document for detailed information regarding requests. All known information, as detailed as possible, including the financial code, will be entered into ROSS.

Contract Resources/Hired Equipment**Federal**

Administratively Determined (AD)/Casual Hire refers to individual personnel hired for emergency purposes. Reference the federal Interagency Incident Business Management Handbook.

Contract Engines and Crews are a resource of the Host Unit Dispatch Center. The contract resources will be dispatched through the Host Unit.

Regional Contract resources may be utilized when agency resources are insufficient to meet present and anticipated needs according to the Unit's Specific Action Guide and/or the Geographic Area Staffing Guide (page 49).

Units will check the availability of Agency resources (federal/state) within their GACC prior to using contracted resources. When mobilizing contract resources, Units will utilize Agency owned resources first, followed by agency cooperators, national contract resources, regional contract resources, and then contract resources, according to agency direction. Requests for contract resources will follow normal dispatch procedures.

Contract resources ordered in Strike Team configuration will use agency personnel as the Strike Team Leader.

For mobilization of National Contract Resources, reference the National Mobilization Guide, Chapter 20.

For mobilization of Regional Forest Service Contract Resources, refer to the California Mobilization Guide, Chapter 60 for Crews and Chapter 70 for Equipment.

CAL FIRE

Hired Equipment resources may be utilized when agency resources are insufficient to meet present and anticipated needs. The contract resources will be dispatched through the Host Unit.

Specifics for Hired Equipment and Emergency Workers can be found in CAL FIRE Handbooks 3900 and 7700, section 3934 and section 7761.

Refer to California Mobilization Guide, Chapter 70 for Hired Equipment.

Demobilization**Emergency Demobilization**

For emergency release of a resource, the Emergency Release form will be completed by the Host ECC and submitted to the GACC. Refer to the California Mobilization Guide, Appendix A.

Demobilization planning should begin with the mobilization build-up.

Notify the GACC prior to releasing Out of Unit resources.

Demobilization Considerations

- Release Timing: The Planning Section Chief will alert the incident host Unit with adequate lead time to allow planning to be accomplished.
- Payments: Each agency will follow their Incident Business plan for incident payment processes.
- Transportation: Costs should be considered in determining release priority. Sufficient lead time is imperative in arranging for transportation to be at the departure point when crews or personnel are ready to depart. Late night releases or travel are to be avoided. **Every effort will be made for released resources to be home or remain over night (RON) by 2200, local time.**
- Communications: Adequate communication between key personnel (i.e. Plans Section Chief, Demob Unit Leader, Logistics Chief, Ground Support Unit Leader, Finance Team, AREP if applicable, GACC and home Unit.) must be established and maintained. It is important that the ECC receive notice of ETA of returning personnel in sufficient time to arrange for their travel.

Demobilization Plan

All extended attack incidents involving out-of-Unit or National Resources will have a Demobilization Plan. A copy will be provided to the Incident Expanded Dispatch and the GACC in a timely manner prior to resources being released from the incident.

Each Demobilization Plan has five parts:

1. **General Information.**

Includes procedures to get resources from incident base to home.

2. **Responsibility.**

Includes specific procedures and responsibility for each function on release, schedule and transportation, or other specific areas that need to be covered.

3. **Release priority.**

Includes procedures to coordinate and establish a release priority list.

4. **Release procedures.**

Includes specific procedures to be followed for surplus resources.

5. **Incident Directory.**

Includes all communication methods from base to dispatch, with a list of names and phone numbers for all functions.

Travel Mobilization and Demobilization

Resource Ordering and Status System (ROSS) will be used for mobilization and demobilization of resources from all incidents. All times (ETA and ETD) are in local time zones.

Orderly flow of personnel and resources from the incident to the place of origin must follow the chain of command and remain within established communication channels. Complete and accurate records of personnel, transportation, and equipment are a must.

Tactical aircraft: All information regarding travel will be relayed by intercom, unless out of state, then relayed by phone, as well as being entered into ROSS.

Commercial airline travel will be documented in ROSS using the Travel Itinerary function.

Any travel involving a known RON location will also be documented in ROSS using the Travel Itinerary function.

Intelligence Reporting Procedures

The main function of the intelligence unit is to provide up-to-date, real-time information to management staff regarding active incidents (wildfire suppression and/or managed fire), fire weather conditions, and resource allocations and availability.

Each GACC must rely on the Units to report certain information that enables compliance with national and state requirements. The ECC's will use established procedures in the daily reporting of shared resources. GACCs will maintain a list of days-off for crews and airtankers. It is the responsibility of the Unit controlling the resource to advise the GACCs of any change in available status.

Federal Daily 1000 AM Report

By 1000 hours every day during fire season, each Unit will report the following information to their GACC as an update to the previous day's 1700-hour Situation Report. Resource status will be updated continually, using ROSS.

The 1000 information will include:

- Number of Engines, Dozers, Water Tenders: Available, Assigned, Unavailable, or Out of Service. Equipment that is out of service or on mandatory days off after an assignment should be statused in ROSS as "Unavailable".
- Individual aircraft status: Available, Assigned, Unavailable, or Out of Service. Aircraft on days off should be statused as "Unavailable".
- Type 1 and Type 2 IA handcrew status: Available, Assigned, Unavailable, or Out of Service. Crews on scheduled days off or on mandatory days off after an assignment should be statused as "Unavailable".
- Type 2 handcrew status: Available, Assigned, Unavailable, or Out of Service. Crews on scheduled days off or on mandatory days off after an assignment should be statused in ROSS as "Unavailable". All Type 2 crews including Organized Crews (OC) should be statused as "Available" if they are ready for an initial attack dispatch and "Unavailable" if they are not.

- Prescribed fire activity: update to previous day's 1700 hour Situation Report.
 - Number of new planned fires (next 24 hours)
 - Number of new planned acres (next 24 hours)
 - Number of planned acres burned last 24 hours
 - Number of new unplanned fires last 24 hours
 - Number of new unplanned acres burned last 24 hours
- Wildfires managed for ecological objectives – update to initial report (when declared a managed fire)
 - Growth and Potential
 - Potential threats
 - Political impacts
 - Smoke impacts

By 1100 hours each day during fire season, each GACC will compile and post to the GACC Intel webpage the Daily Report which documents current resource status. Incident activity and any newsworthy items concerning the Region will be posted to the GACC Intel News and Notes webpage.

Available for ONCC at: http://gacc.nifc.gov/oncc/predictive/intelligence/news_notes/index.htm

Available for OSCC at: http://gacc.nifc.gov/oscc/predictive/intelligence/news_notes/index.htm

Situation Report

Interagency Situation Reporting

Daily: May through October.

November through April when either of the following conditions are met:

- Wild fire activity occurs.
- A Unit's Fire Danger is reported as Very High or Extreme.

The GACC will ensure that Units complete data entry on a daily or weekly bases as required by NICC.

The Federal Interagency Situation (Sit) Report program captures incident activity and resource status information in a brief summary intended for use by managers. Once the information has been submitted via the web site (<http://fam.nwcg.gov/fam-web/>), it is used at the local Dispatch Offices, the GACCs and NICC to produce summary reports, which are then distributed to agency managers for use as a decision-making tool.

The GACCs and NICC use the Sit Report program to run reports from data that has been entered by the Units. The GACCs have edit access to all their respective Units' Sit Report data. NICC has edit access to all Units' Sit Report data, and bases the National Incident Management Situation Report (IMSR) on this information.

Access to the input side of the Interagency Situation Report program can be obtained by calling the GACC Intelligence Coordinator for your area.

During the active fire season, the Sit Report is prepared on a daily basis. In the off-season, it is submitted on a more limited basis, depending on the level of incident activity, NICC requirements, or direction from the GACC. For more specific reporting requirements and program instructions, reference the Sit Report User's Guide at:

http://gacc.nifc.gov/predictive_services/intelligence/national_intelligence_operations_program/sit_report_program/sit_report_users_guide/index.htm

By 1700 hours each day during fire season, each Unit will report the following information using the web-based Sit Report program:

- Unit Preparedness Levels.
- Daily Fire Statistics.
- Resource Status, what each Unit expects to have available for tomorrow.
- Planned Prescribed (Rx) Fires.
- Dispatch Center Remarks:
 - Brief summary of current situation.
 - Predicted NFDRS adjective ratings.
 - On-call dispatcher.
- Year-To-Date (YTD) Statistics.
- Dispatch office incident priority.

Incident Status Summary (ICS-209) Form

The GACC will ensure that information in the 209 Program is current for use in the Sit Report.

The Incident Status Summary (ICS-209) is submitted to the GACC through a web-based application. Specific instructions for completing the web-based ICS- 209 are available at:

http://gacc.nifc.gov/predictive_services/intelligence/national_intelligence_operations_program/ics_209_program_users_guide/index.htm

For fire size and class, refer to California Mobilization Guide, Appendix A.

Units or Incidents should submit ICS-209 forms according to the following:

a. Initial ICS-209:

1. When a fire in timber reaches 100 acres or grass/brush reaches 300 acres.
OR
2. Non-Fire incident, commitment of Type 1 or Type 2 IMT.
OR
3. Significant commitment of national resources (Aircraft, Federal Type 1 crews, Smokejumpers)
OR
4. When incident is determined to be a wildfires managed for ecological objectives, regardless of size
OR
5. At discretion of GACC and/or CalMAC (based on resource commitment)

b. ICS-209 Update:

1. Twice during each established operational period by 0600 and 1800 hours. May be negotiated to once a day with concurrence from IC, Agency Administrator and GACC.
AND/OR
2. Upon special request by CalMAC.
OR
3. Wildfires managed for ecological objectives will be submitted daily, at 1800 hours

c. Final ICS-209:

1. When less than 15 single resources remain assigned to an incident,
OR
2. When the incident no longer has any significant effect on agency resource availability.

Incident Map

Incidents should send incident map data directly to the GACC (electronically if possible) as soon as it becomes available, and as it is updated.

Monthly Fire Report

At the end of each month all National Forests will tabulate the total number of fires and acres burned that month. The totals will be transmitted to the respective GACC, on the forms provided, by the second day of each month.

Interagency Intelligence Report

The Interagency Intelligence Report will include a synopsis on current overall status within the GACC, a section on the general weather forecast for the day, and an extended weather outlook for the next 2-4 days. This report will also include sections detailing each significant incident within the GACC. These sections will give a brief incident summary of individual incidents and the resources committed to them. This report will be compiled from the most current information available and will be electronically shared with cooperating agencies by 1200 hours each day during large fire activity.

Each GACC's Predictive Services will utilize a Fire Behavior Analyst (FBAN) for preparing a Fuels and Fire Behavior Advisory.

Predictive Services Weather

Weather and fire danger products and a variety of other tools are often utilized to make fire management decisions. Many of these products, including firefighter pocket cards, are based on the data maintained in historical fire occurrence and weather databases. In order to make these products as accurate as possible, fire management staff will ensure weather station and fire history data are entered correctly and accurately into the appropriate databases in a timely manner. The importance of these systems will be reiterated at fire management meetings, training sessions

and through email systems.

Daily issuance of the 7-Day Significant Fire Potential product:

Each GACC's Predictive Services/Fire Weather Centers will produce a "7-Day Significant Fire Potential" product daily. This will be posted on the Predictive Services Weather web pages by 1030.

North GACC website at: <http://psgeodata.fs.fed.us/7day/action/forecast/10>

South GACC website at: <http://psgeodata.fs.fed.us/7day/action/forecast/8>

Reference the National Mobilization Guide (NMG) Chapter 20, for content and format.

<http://www.nifc.gov/nicc/mobguide/index.html>

Monthly Fire Weather/Fire Danger Outlook:

The Monthly Fire Weather/Fire Danger Outlook and map will be completed by each GACC and submitted to NICC three days prior to the end of each month. It is due monthly year-round.

NICC National Wildland Fire Outlook:

Each GACC Predictive Services will ensure that a copy of the Monthly National Wildland Fire Outlook is posted to:

North GACC website at: <http://gacc.nifc.gov/oncc/predictive/outlooks/index.htm>

South GACC website at: <http://gacc.nifc.gov/oscc/predictive/outlooks/index.htm>

Monthly Zone/Regional Fire Report:

Each GACC will compile their respective forest's fires and acres tabulations for the preceding month and develop the monthly geographic area fire report for their area. North Ops Predictive Services will electronically transmit their report to South Ops Predictive Services/Intelligence for compilation of the two Geographic Area reports into the Regional Monthly Fire Report. Upon completion of this regional report by South Ops Predictive Services a copy will be transmitted to the Regional Office as well as to North Ops Predictive Services. Each GACC's Predictive Services Section will be responsible for electronically transmitting this report to their respective Units.

Smoke Transport and Stability Outlooks:

Each Predictive Services/Fire Weather Center will produce daily a "Smoke Transport and Stability Outlook",

with North Ops at http://gacc.nifc.gov/oncc/predictive/weather/daily_smoke/Smoke.html,

and South Ops at http://gacc.nifc.gov/oscc/predictive/weather/daily_smoke/Smoke.html.

These are to be posted on the websites by 1230.

Fire Weather/ Fire Danger Products:

The GACCs Predictive Services sections will produce weekly Fire Danger Outlooks in addition to the monthly outlook. These two products show fire danger indices at severity weather stations within the GACC, and are posted on the Pacific Southwest Region website.

ONCC Predictive Services website at: http://gacc.nifc.gov/oncc/predictive/fuels_fire-danger/index.htm

OSCC Predictive Services website at: http://gacc.nifc.gov/oscc/predictive/fuels_fire-danger/index.htm

NFDRS RAWS Maintenance Based on Preparedness Level:

The following is a matrix describing preparedness level driven actions authorized and action required in maintaining RAWS utilized for NFDRS based products and decision processes.

<i>Item</i>	<i>ACTION DESCRIPTION</i>	<i>Preparedness Levels</i>				
		1	2	3	4	5
	NFDRS RAWS: Year Round - PSA - PocketCard Stations					
U1	Stations meet NFDRS maintenance standards and siting guidelines	AR	AR	AR	AR	AR
U2	All days with available RAWS data for regular scheduled (R/S) observation times will be "published" in WIMS	AR	AR	AR	AR	AR
U3	All annual maintenance completed as early in the field season as possible (prior to WIMS "greenup is preferred) and maintenance is documented in WFMI	AR	AR	AR	AR	AR
U4	Identify and troubleshoot data errors within 48 hours	AR	AR	AR	AR	AR
U5	Adhere to the 3-day response time to system failures in fire season - NFDRS STANDARD	AR	AR	See U6 & U7	See U6 & U7	See U6 & U7
U6	Adhere to 24-hour response time to identify, troubleshoot, and process a RAWs Depot/vendor replacement order			AR	AR	AR
U7	Adhere to 24-hour response time to replace or make repairs after receiving the RAWs Depot/vendor replacement order			AR	AR	AR
FS-1	If Forest Service items (U1- U7) are not at required level, the Regional RAWs Coordinator is authorized to secure annual maintenance and or system failures maintenance at Forest expense.		AR	AR	AR	AR

Item FS-1 is Forest Service specific. Items U1-U7 apply to all agencies.

AR = Action Required AA=Action Authorized

Internet Sites:

Sit Report and ICS 209: <http://fam.nwcg.gov/fam-web/>

GACC Intelligence: <http://gacc.nifc.gov/oncc/predictive/intelligence/index.htm>

<http://gacc.nifc.gov/oscc/predictive/intelligence/index.htm>

Preparedness Plan**Preparedness Plan For Wildland Fire Agencies Of California**

The Preparedness Plan is endorsed by the California Wildland Fire Coordinating Group (CWCG) which represents the following agencies:

- United States Forest Service
- California Department of Forestry and Fire Protection
- Bureau of Land Management
- National Park Service
- U.S. Fish and Wildlife Service
- Bureau of Indian Affairs
- Governor's Office of Emergency Services
- CAL FIRE Contract Counties

Purpose

California will have two preparedness levels, corresponding to the North and South Geographic Areas. These levels will reflect fire activity and fire weather conditions in each Geographical Area and therefore may be different. California's commitment to meet National activities will only extend to federal personnel and resources which are available. State, County, and Local Fire Department Resources can only be made available on a case by case basis determined at the time requested.

The purpose of the Preparedness Plan is:

- To coordinate workforce and equipment needs for wildland fire activities and prescribed fire.
- To ensure that fire protection responsibilities and commitments to prescribed fire do not exceed State wildland fire capabilities, and are coordinated with state and national wildland fire activities.

Monitoring

Preparedness Levels 1, 2, and 3 will be monitored and managed by the GACC's in Redding and Riverside. The determination of these levels will represent a consensus of the Interagency Coordinators from the Forest Service, Department of the Interior, and CAL FIRE management. Preparedness Levels 4 and 5 will be declared by a consensus of the members of the CWCG / CalMAC (California Multi-Agency Coordination Group). The GACC's will contact the Chair of CWCG to recommend moving above Preparedness Level 3. The Chair of CWCG will contact the members or representatives to develop consensus on the recommendation, and report the result to the GACC.

Preparedness Level Activation and Deactivation

Based on fire weather, fire activity, and resource commitment to wildland fires, prescribed fires, and fuels projects, each GACC will start preparedness planning no later than May 1 and continue to at least October 15 of every year. Each agency representative will initiate the restrictions imposed by the preparedness levels upon those lands within their jurisdiction. Federal agencies will impose these restrictions that are required by the National Preparedness Plan as well.

Managers of prescribed fires and fuels projects using national resources (Type 1 handcrews, air tankers, etc.) are to request the use of the national resources from the appropriate GACC each day prior to implementation. GACC agency coordinators will also track the planned use of these national resources in contingency planning to avoid simultaneous commitment of the same resources to multiple fires or projects.

Preparedness Levels

Preparedness Level 1

Definition: Few or no class A, B, and C wildland fires. Minimal or no commitment of interagency resources to suppression activities. Current and short-range predictions for low to moderate fire danger. Local Units implementing prescribed fire operations with sufficient contingency resources available. Agencies above draw down levels and requests for personnel and resources outside of the local area are not occurring.

Action/Responsibility:

- North and South GACC's post preparedness levels out on the daily situation report for agency field units.
- North and South GACC to notify NICC of starting preparedness planning or daily preparedness level.
- All prescribed fires within Geographical Areas are to be reported to the respective GACC for inclusion in the morning report. Coordinators to notify Units if national/shared resources are not available as contingency resources.

Preparedness Level 2

Definition: Numerous class A, B, and C wildland fires. Local commitment of interagency resources for initial attack, fuels projects and wildfires managed for ecological objectives. Current and short-term weather predictions for moderate fire danger. Local Units implementing prescribed fire operations with sufficient contingency resources available. Agencies above drawdown levels and requests for personnel and resources outside of the local area are of minimal to low impact.

Action/Responsibility:

- Continue Preparedness Level 1 activities.

Preparedness Level 3

Definition: High potential for Class D and larger fires to occur, with several active Class A, B, and C fires. Mobilization of agency and interagency resources within the geographic area, but minimal mobilization between or outside of geographic area. Current and short-term forecasted fire danger is moving from medium to high or very high. Local Units implementing prescribed fire operations starting to compete for interagency contingency resources.

Agencies still above draw down levels for suppression resources, but starting to have difficulty maintaining sufficient resources to meet initial attack responsibilities, project fire support, and fuel projects/prescribed fire

requirements without prioritizing or using non-local support. Some critical resource needs are starting to be identified.

Action/Responsibility:

- Continue previous preparedness activities.
- CWCG chair is made aware by GACC's when fire danger, fire activity, drawdown, and GACC mobilization patterns likely to lead to Level 4. Chair of CWCG informs members of current preparedness level in advance of moving to Preparedness Level 4.
- When a prescribed burn is scheduled or is in progress the appropriate Coordination Center will be informed through agency channels of the date of ignition, acres planned to be burned during the next 24 hours, and acres burned the previous day.
- Cooperating agencies can limit the use of their resources as contingency resources, or make them unavailable for use on prescribed fires.
- Establish contact with appropriate geographic area military aviation assets and apprise them of current preparedness level.

Preparedness Level 4

Definition: Continuing initial attack activity and Class D or larger fires are common in one or both geographic areas. Resource ordering and mobilization of personnel is occurring between GACC's. The long range forecast for the next week indicates continued high fire danger. Local Units may implement new fuels and prescribed fire projects, but operational and contingency resources must be provided by the agency or by local arrangements.

Long range fire weather forecasts predict high to very high fire danger. Significant potential exists for moving into extreme fire danger in at least one geographic area.

Personnel and resources at minimum draw down levels, especially for initial attack. Fuels projects and prescribed fires can only be implemented with agency contingency resources or special arrangements within the local Units.

Mobilization and resource requests are occurring for suppression assignments within the GACC and between the Northern and Southern GACC's.

Action/Responsibility:

- Continue with previous preparedness activities.
- CalMAC determines the need for conference calls.
- Consider activation of the California Interagency Military Helicopter Firefighting Program.
- Consider activating Military Aviation Operations Coordinator to proactively work with local military aviation assets.

Preparedness Level 5

Definition: CalMAC is fully activated. Agencies are below drawdown levels. Class D and larger fires are common in one or both geographic area. Either or both GACC's cannot fill many outstanding resources requests and are sending these orders to NICC. Use of local government resources is common. Reassignment of personnel and resources between incidents is common.

Current and short-range weather forecasts predict very high to extreme fire danger. Long range forecasts for the next week for either GACC indicate continued very high to extreme fire danger. Activation of National Guard or military personnel and resources is being considered or has occurred.

Requests for CAL FIRE resources are causing the agency to drop below drawn down levels. State and Local government personnel are being used to fill out-of-state requests. Actual and long range fire danger predictions are for very high or extreme.

Personnel and resources are at or below agency minimum draw down levels.

Action/Responsibility:

- CalMAC has been activated either with conference calls or at one location. Statewide priorities being set by CalMAC.
- The status of on going fuels projects or prescribed fires will be reviewed by CalMAC, as well as any proposed new fuels/wildland fire use/prescribed fire projects. Final decision to implement rests with implementing agency.

- No new prescribed fire or fuels projects without certification by CalMAC representative that these activities are expected to have no significant effect on suppression activities. Existing projects should consider different management strategies to make personnel available for suppression activities elsewhere. Final decision to implement these projects rests with the implementing agency.
- Individual Units will report resource status to CalMAC as specified (as needed).
- CalMAC assesses statewide/national situation for determination of the need for resources.

Guidelines for Determining Preparedness Level

The following information will be used to determine preparedness levels for the Northern Operations and Southern Operations, and/or the entire state.

- Current California and National fire situation.
- National Preparedness levels.
- Predicted fire potential.
- Firefighting resource availability.

Move-up

When resource availability becomes critical and extreme incident danger is expected to continue, move-up resources may become necessary (aircraft, crews, engines, etc).

Forest Service

Resource move-up must be approved prior to such action taking place. Each GACC Coordinator must assess the situation, and if such actions are determined necessary, approve expenditure of funds for move-up.

CAL FIRE

When resources are needed for move up from outside a Unit, the Unit must enter a request into ROSS and place the request to the GACC. The GACC will assess the overall situation of the Region, and shall place the requests with the appropriate Unit to fill. Reference the CAL FIRE 8100 Handbook, policy 8121.2.2

BLM & NPS

Requests for resource move-up will be initiated by the requesting District or Park and coordinated through the DOI Coordinator. Move-up requests will then be processed through normal procedures through the respective GACC.

Draw Down Levels

Draw Down definitions for engines, crews and aircraft:

- 0** There is **no resource draw down** (fully staffed with minimal commitment to initial attack). Initial attack success is highly probable.
- 1** Resource **draw down is Moderate** (approximately two-thirds of resources available). Initial attack success is likely.
- 2** Resource **draw down is Significant** (approximately one half of resources available). Initial attack success is marginal.
- 3** Resource **draw down is Critical** (approximately one-third of resources available). Initial attack success is questionable. There are insufficient resources to support any new large fires.

Forest Service Minimum Draw Down Standard

The following matrix depicts the minimum resources necessary to ensure Forest Service GACC coverage:

	North Ops	South Ops
Type 1 Crews	4	4
Smokejumpers Load	1	0
Helicopters	4	4
Airtankers (heavy) on order	1	1
Type 2 IMT's	1	1
Aerial supervision	1	1

DOI Agencies Draw Down Levels

Department of Interior Agencies will follow the identified draw down levels per the Agencies Fire Management Plans.

CAL FIRE Draw Down Levels

CAL FIRE incident drawdown levels are defined in the CAL FIRE 8100 Handbook, policy 8121.2.1.

California Incident Priorities

When California is involved in multiple incidents that are drawing resources, the cooperators (USFS, CAL FIRE, BLM, NPS, and other wildland agencies) will prepare a California Incident Priority List.

The GACC will revise the list daily and provide it to NICC, the GACC's, involved cooperators, and Units with incidents. Priorities are negotiated with involved cooperators and incorporated into the Multiagency Coordinating Group (MAC) Incident Status Summary, ICS Form 209, and other documents.

MACS Group Procedure Guide (MACS 410-1) can be found at this web address:

<http://www.firescope.org/macs-docs/MACS-410-1.pdf>

Joint Criteria Used To Determine Priorities:

Threats and Potential for Current and Projected:

A. Life and Safety Threats (Public and Emergency Responders) (maximum total points is 15)

Definition: Events which increase complexity, resulting in high potential for serious injury and/or death.

A.1 Evacuations	Rating
In Progress	5
Precautionary	3-4
Potential (48-72 hrs) or Completed	1-2
A.2 Road, Highway or Freeway Closures	
Major Highway or Freeway	4-5
State Routes or Improved Roadways	2-3
Potential for Closures 48-72 hrs	1
A.3 Extreme Fire Behavior, Weather Event, Natural or Human Caused Disasters	
Occurring or Predicted/Forecasted to Continue (24 hrs)	5
Predicted/Forecasted 24-72 hrs	3-4
Occurring but Predicted/Forecasted to Diminish	1-2

B. Property Threatened and/or High Damage (Next 48 hours) (maximum total points is 15)

Definition: This category relates to potential for damage or actual impact to Communities or other high value investments that contribute to dwellings, commercial workplaces and critical infrastructure that supports human life, income or support to the general population. Threats under this category should not be listed unless there is significant potential to impact these elements and an eminent threat is recognized within a 48-hour timeframe.

B.1 Structures (residential, commercial, vacation or other)	Rating
200+	4-5
25-200	3-4
<25	1-2
B.2 Community Loss (within 48 hours)	
Potential for >75% Community Loss	5
Potential for 50-75% Community Loss	4
Potential for 25-50% Community Loss	3
Potential for <25% Community Loss	1-2

B.3 Infrastructure – National, State, Local (Power Lines, Energy Corridors, Domestic Water Systems, Communications Grid, Railroads, etc)

Systems shutdown and/or damaged	5
Potential threat 24-48 hrs	3-4
Potential threat 72+ hrs	1-2

C. Resource Issues and Potential for Loss (maximum total points is 20)

Definition: Resource concerns can vary widely depending on place and type of resource considered. Each of the below items must be carefully considered in its relation to both local/regional or national significance and may have economic impact at local or regional levels. Resources that are not commercial should be considered in the Natural Resources category rather than in both Natural and Commercial Resources. Consider timeframes and proximity when rating.

	Rating
C.1 Historical and Significant Cultural Resources	1-5
C.2 Natural Resources (T&E Species Hab., Watershed, Forest Health, Soils, Airshed, etc)	1-5
C.3 Commercial Resources (Grazing, Timber, Agricultural Crops, etc)	1-5
C.4 Potential for Economic Impact (Tourism i.e. fishing, hunting; loss of jobs, etc)	1-5

D. Incident Complexity/Duration (maximum total points is 10)

Definition: Multiple incidents or complex of incidents versus a single incident have a way of making prioritization setting difficult. However, it is common enough that it needs to be included in the process. Attention needs to be given to travel distances, support to incident personnel and logistical challenges not always associated with a single incident.

Timely containment implies that if all critical resource needs from the 209 were met, then containment objectives would be met within the specified timeframes indicated. Containment at an early date is beneficial during high activity periods and would result in earlier resource reassignment opportunities to supplement Initial Attack or to assist other incidents.

D.1 Complex vs. Single Incident	Rating
5+ incidents or >25,000 acres	4-5
3-4 incidents or 5-25,000 acres	2-3
1-2 incidents or <5,000 acres	1
D.2 Potential for Timely Containment and/or Mitigation	Rating
<72 hrs	5
3-7 days	4
8-14 days	3
15-21 days	2
Unknown or long term management	1

NOTE: Initial attack, new starts, and life threatening situations have overall priority, overriding the priorities listed above.

Handling Hazardous Materials

Procedures for handling hazardous materials can be found in each Unit's Plan for Handling Hazardous Materials. Reference materials listed below are to assist in the appropriate handling of these materials.

- Transportation of Hazardous Materials - 49 CFR, Sections 106-180
- Department of Transportation Emergency Response Guidebook.
- Medical Waste Management Act, California Health and Safety Code Division 20, Chapter 6.1.
- International Air Transportation Association (IATA) 35th Edition.
- Material Safety Data Sheets (MSDS)

Dozer and Helicopter Use in Wilderness and Special Areas

Forest Service

Agency Administrators will prepare requests for use of dozers and helicopter within wilderness areas. Requests will be specific in terms of work to be considered (length and width of fire line, and other factors), and consequences of not using the equipment. The request will go through the Agency Administrator, who will obtain permission or

denial from the Regional Forester. The request will be in writing, via electronic mail, or by telephone if after hours (followed up in writing the next day).

Department of Interior Lands

BLM State Director approval is required for use of dozers on Bureau of Land Management Wilderness Areas and Wilderness Study Areas (WSA). In Areas of Critical Environmental Concern (ACEC) the local agency administrator can approve dozer use. On all other DOI Units the approval is given by the local Unit Agency Administrator.

Disaster Procedures

Federal Resource Response

With a federal declaration the federal agencies will provide assistance based on the Emergency Support Function (ESF) identified under the declaration (for additional information <http://www.fema.gov/pdf/emergency/nrf/nrf-esf-intro.pdf>).

Without a Presidential declaration of a major disaster, the ability of the federal agencies to react is lessened. Local Units must respond within their normal authorities and under local agreements. Authority to take action in disasters and emergencies when there is an imminent threat to life or property is the Disaster Relief Act of 1974 (PL 93-288). Where there is no agreement in effect, the Act of May 27, 1955 authorizes the Forest Service to take action for incident emergencies and the BLM Manual authorizes the BLM to take action where a life threat exists.

CAL FIRE Resource Response

CAL FIRE Units can respond to non fire incidents based on Unit Chief discretion or may be mission tasked by the Governor's Office of Emergency Services. Reference CAL FIRE Handbook 8100, Procedure 601.

Accident and Incident Reporting

Follow Agency Specific Policies.

Critical Incident Stress Management Procedures (CISM)

All local, state, and federal fire fighting agencies endorse the use of CISM in California. The agencies offer CISM services to all personnel, including contractors, exposed to critical incident situations on the job. To this end, regardless of which Unit has management and control, CISM should be offered to personnel immediately following a critical incident situation. This should be arranged by the incident management organization working closely with the hosting agency representatives.

Professional contractors provide Critical Incident Stress Debriefing (CISD) services within 24-48 hours of a request for service. CISM services are covered under each Unit's Employee Assistance Program (EAP) contract. In addition to professional contractors, CAL FIRE has local CISM teams that may be available.

Management personnel contacting Dispatch for CISM services should be referred to the contractor or local mechanism cited for the Unit.

The following information should be provided to assist the responding CISM Teams:

- Description (type) of incident.
- Number of employees in need of CISM services.
- Whether any family members or children are involved. (Note: Authority to provide service to FS and CAL FIRE family members is covered under the EAP -- which extends services to family members for the benefit of employees and the agency.)
- Date and time of incident.
- Desired day, time, and location for Debriefing.
- Name and phone number of Unit contact for final set-up of Debriefing.
- Name, phone number, and location on site of main contact for on site coordination, once CISM specialist arrives to conduct Debriefing.

Federal Incidents

The costs for CISM services in fire operations are to be charged to the fire incident's management code. Non-fire incidents should be charged to the Unit. It is our practice (and that of our contractors) to provide CISM services after business hours, upon request, even if the management code for paying for the service is unknown at that time.

1 The costs for CISM services will vary from incident to incident depending on the number of personnel involved, the
2 availability of CISM specialist, travel costs, overtime, and holiday pay. The manager requesting service can obtain a
3 preliminary cost estimate from the contractor when services are ordered. The final costs may vary depending on
4 actual services delivered once the CISM specialist is on site and can assess the needs.

5
6 **CAL FIRE Incidents**

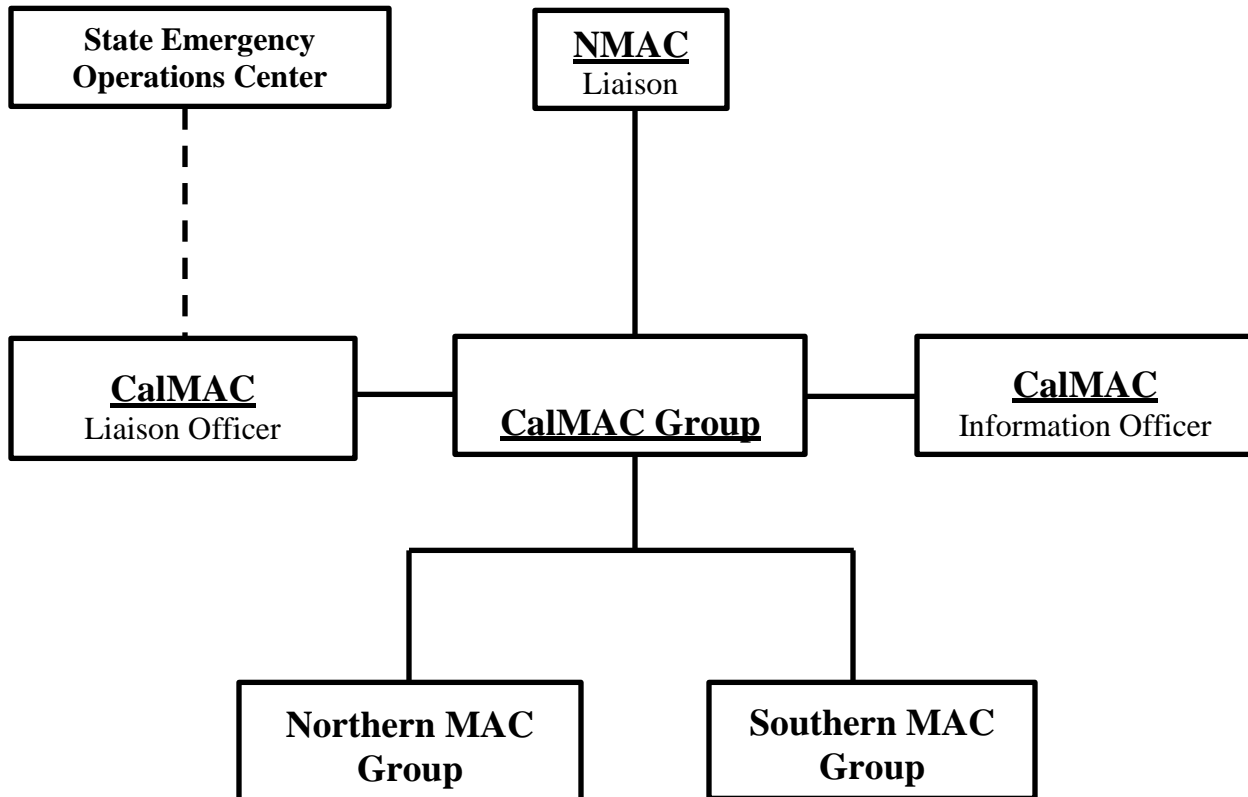

7 CAL FIRE Units should be familiar with local procedures for CISM Team activation, reference CAL FIRE
8 Handbook 1000, Policy 1861.

Chapter 30 – Organization

California Fire Service Multi-Agency Coordination System (MACS) Organizational Structure

<http://www.firescope.org/macs-docs/MACS-410-1.pdf>

The following organizational structure displays a FIREScope MODE 3 and 4 or a National Preparedness Level 4 and 5 activation.

MAC Group Purpose and Function

A MAC Group typically consists of Agency Administrators or their designees who are authorized to commit agency resources and funds. Their function is to support incident management through coordinating their collective resources, sharing incident information, implementing coordinated strategic policies to prevent and/or combat a growing emergency(s). In order to accomplish this objective the MAC Group must establish a common operating plan. The area represented can be a City, County/Operational Area, Region, such as one of the six OES Fire and Rescue Mutual Aid Regions or a Geographic Area, such as Northern and Southern California Geographic Areas or a Statewide MAC Group such as CalMAC.

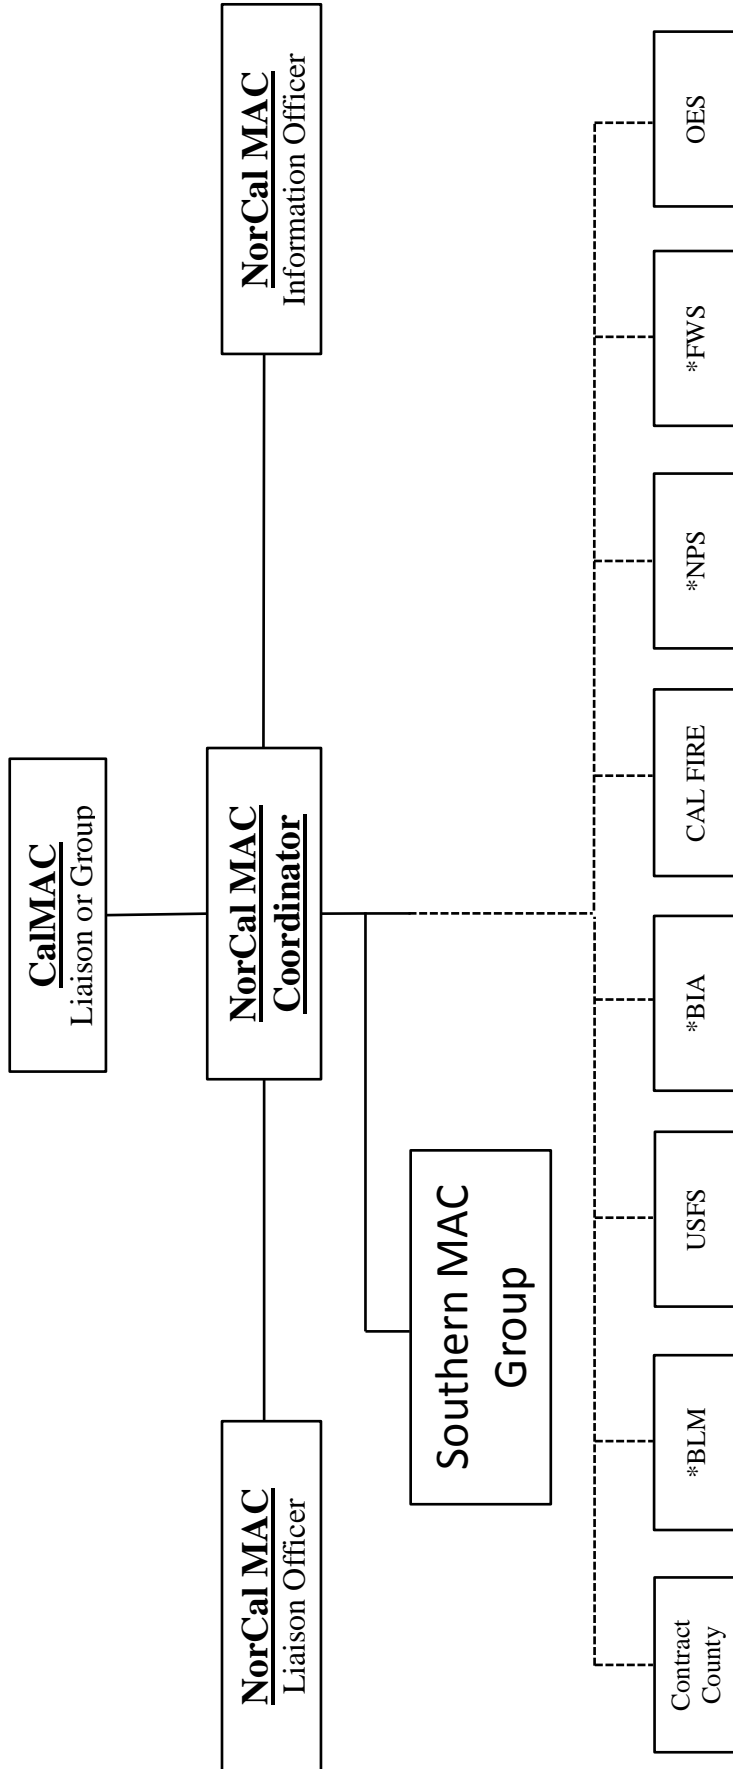

MAC Group objectives in coordinating finances, equipment, personnel and resources are:

- 1) Establish priorities for response.
- 2) Allocate critical resources based on established priorities.
- 3) Establish and/or implement communication systems integration.
- 4) Ensure Information coordination both internally and externally.
- 5) Establish intergovernmental decision coordination, develop strategies and contingency plans.

It is extremely important that MAC Group members have full authority from their respective agencies to commit resources, including equipment and personnel, and fully represent their agency or department in MAC Group decisions.

Northern MAC Group Organizational Chart

Northern MAC Group Organizational Chart

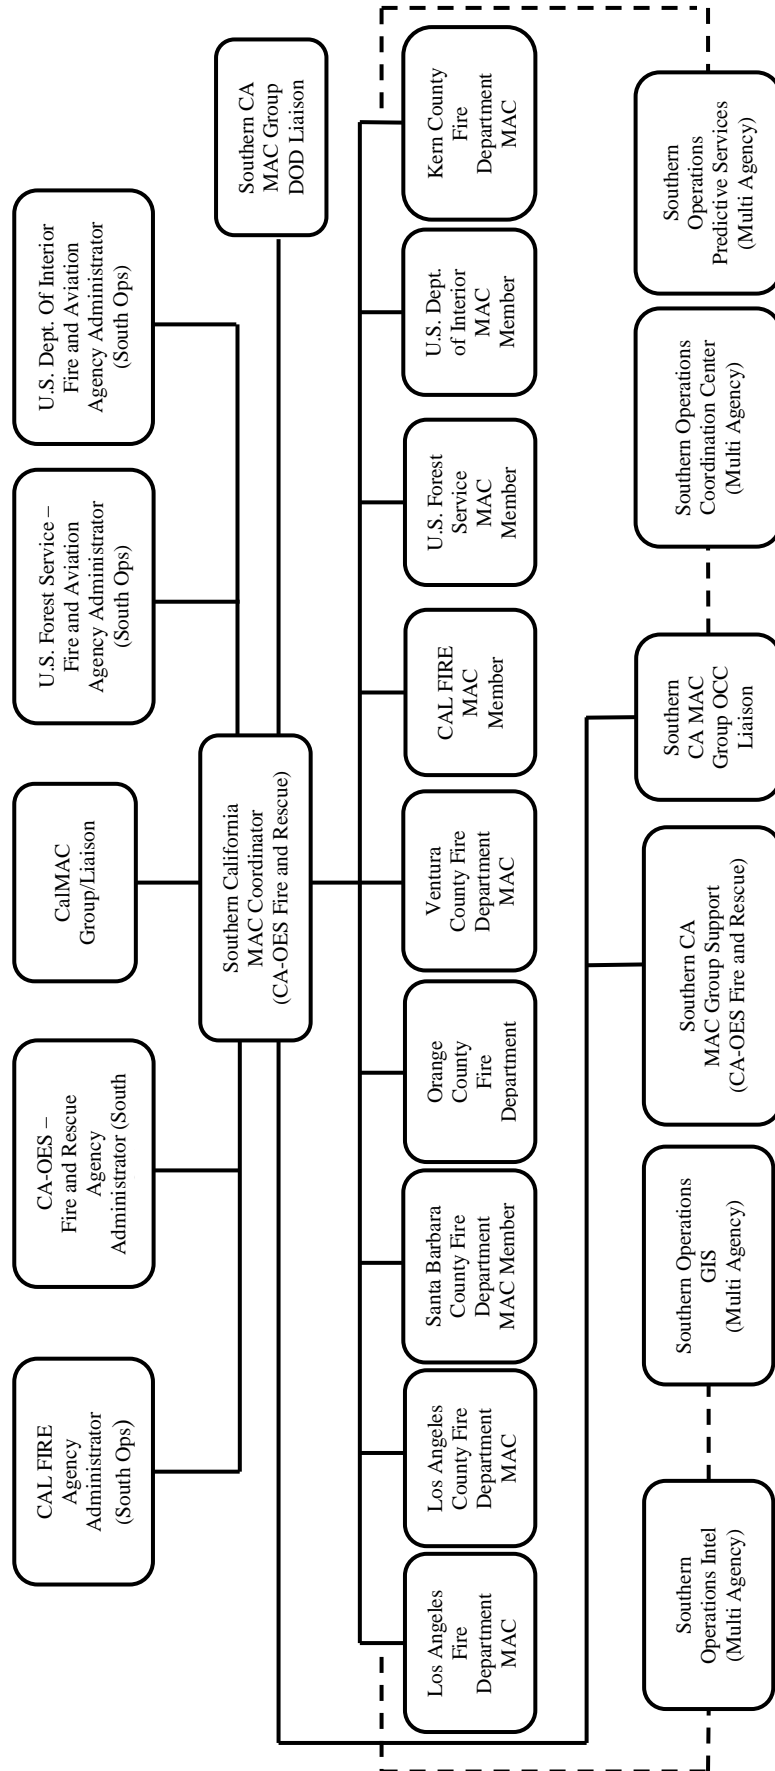

----- Dotted line denotes the agencies that could be represented during Preparedness Levels 4 and 5. This list is not all inclusive.

The Northern California Multi-Agency Coordination Group (NorCal MAC) acts as the geographic area authority to:

- Evaluate incident situation status reports and organizational resource status reports, as provided by the Northern California Geographic Area Units.
- Provide oversight for geographic area allocation of scarce and/or limited resources based on established priorities.
- Develop geographic area incident priorities and submit to CalMAC for evaluation and inclusion in national incident priorities.
- * DOI agencies may be represented at MAC by one DOI representative.

Southern MAC Group Organizational Chart

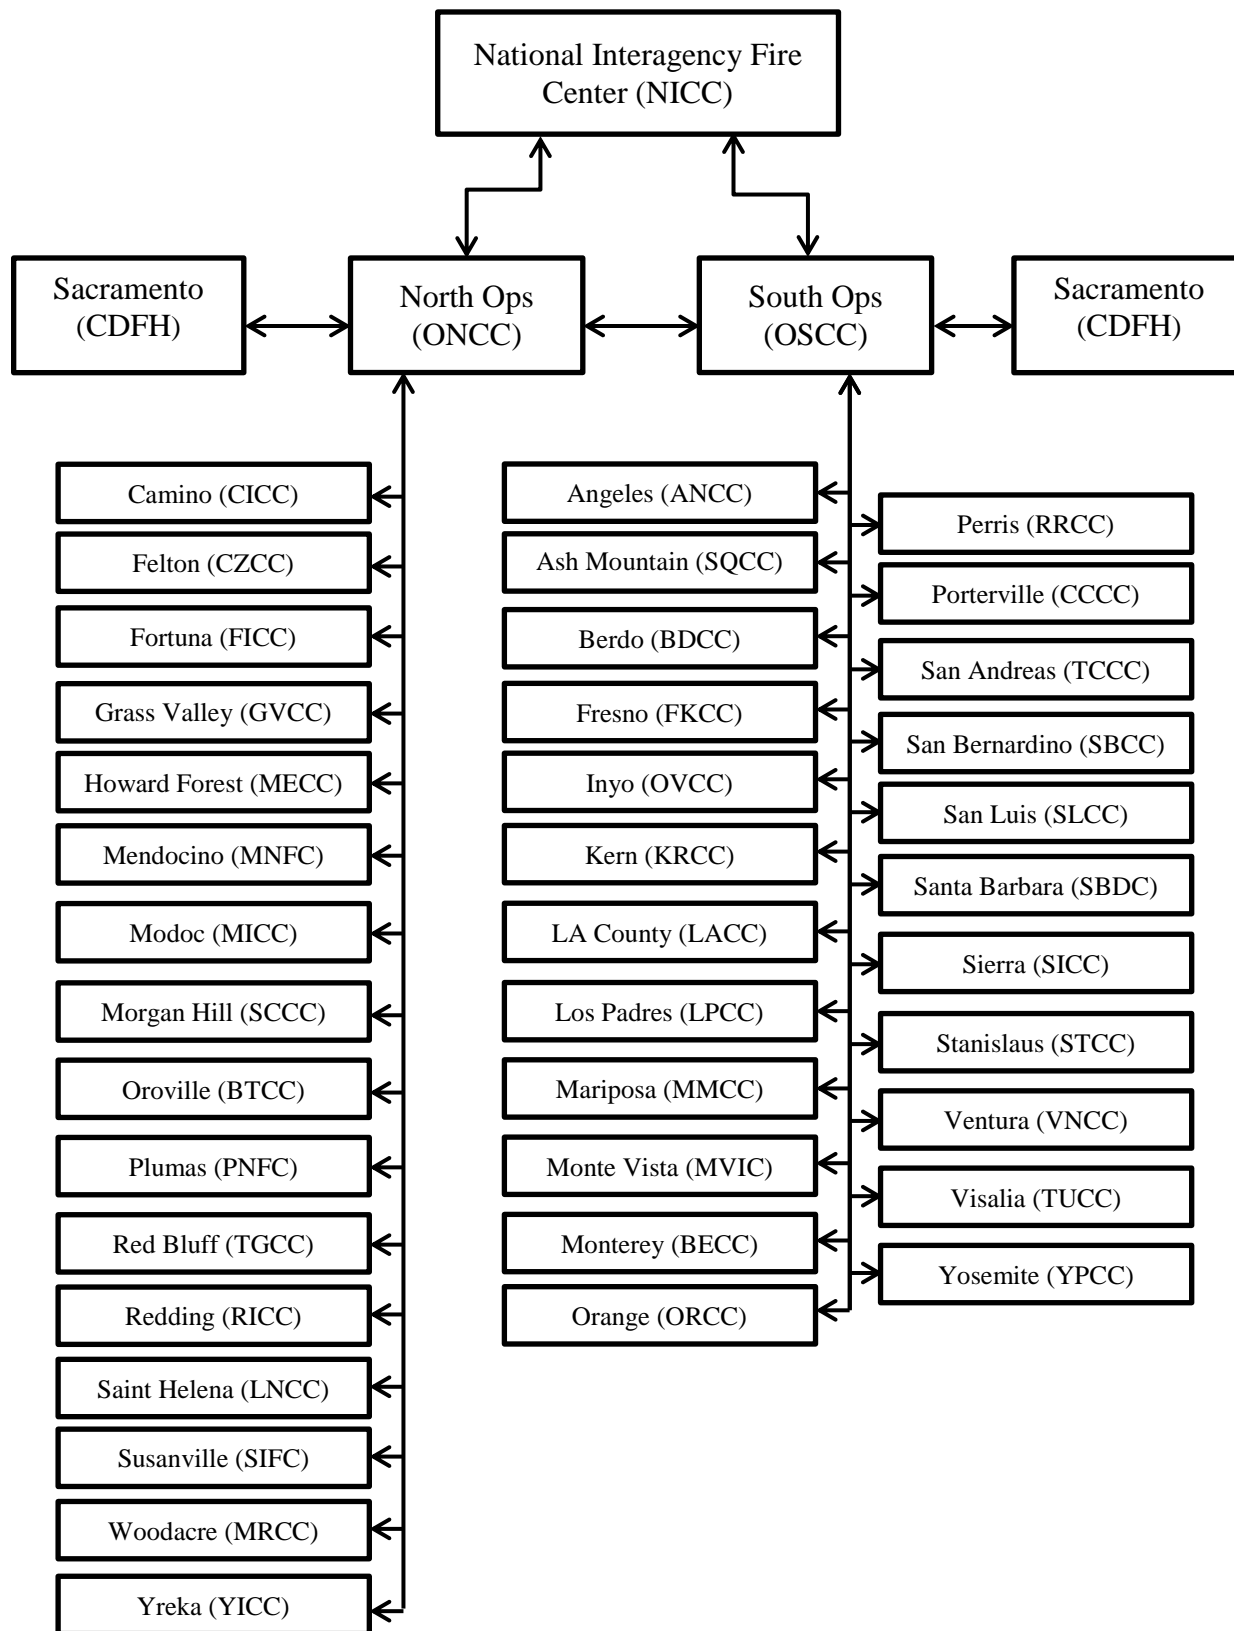

Southern MAC Group Organizational Chart

The Southern California Multi-Agency Coordination group (Southern California MAC) acts as the geographic area authority to:

- Evaluate incident situation status reports and organizational resource status reports, as provided by the Southern California geographic area Units.
- Provide oversight for geographic area allocation of scarce and/or limited resources based on established priorities.
- Provide written and verbal communication of MACS priority settings out to the following entities:
 - Applicable Agency Administrators
 - OCC MACS Liaison
 - FIRESCOPE Member Agencies
 - Home Agency
 - NorCal GeoMAC (if activated)
 - CalMAC (if activated) for evaluation and inclusion in National incident priorities.

Chapter 40 – Cooperation

Successful incident management within California requires close cooperation with a number of other fire departments, agencies, and organizations. Incident managers must be knowledgeable regarding the abilities and needs of cooperators. Copies of cooperative agreements and operating plans should be available to all incident managers. It is generally most effective to handle cooperative efforts at the local level. However, if needed assistance is not available at the local level, direct requests to the GACC.

Cooperative Agreements

There are various Regional/State and Local Agreements and Operating Plans currently in use. A short summary of some of these agreements follows.

National Agreements

For all National agreements, including the NIFC and Meteorological Services, can be found at:

<http://www.nifc.gov/nicc/mobguide/Chapter40.pdf>

Statewide Agreements

California Master Cooperative Wildland Fire Management and Stafford Act Response Agreement (CFMA)

The “California Cooperative Wildland Fire Management and Stafford Act Response Agreement” (CFMA) is an agreement between the BLM (California and Nevada), NPS (Pacific West Region), BIA (Pacific Region), US Fish and Wildlife (Pacific Southwest Region), USFS (Regions 4, 5, and 6), and CAL FIRE. The purpose of this agreement is to document the commitment of the Agencies to improve efficiency by facilitating the coordination and exchange of personnel, equipment, supplies, services, information and funds among the Agencies to this Agreement. Only wildland fires and Presidentially-declared non-wildland fire emergencies or disasters are covered under this Agreement.

Reference CFMA at: <http://gacc.nifc.gov/oncc/index.htm>

California Fire Assistance Agreement (CFAA)

Under this all risk agreement, the State of California (CAL FIRE and Cal EMA) and Federal Fire Agencies (USFS, BLM, NPS, BIA, US Fish and Wildlife) may request emergency apparatus and personnel from the California Fire and Rescue Mutual Aid System (Cal EMA and Local Government Agencies). The State of California and Federal Fire Agencies shall use this agreement as the primary fiscal authority for reimbursing local government agencies for the use of their resources

Reference CFAA at: <http://www.calema.ca.gov/FireandRescue/Pages/Documents-and-Publications.aspx>

California Fire Service and Rescue Emergency Mutual Aid Plan and the California Disaster and Civil Defense Master Mutual Aid Agreement (MMA)

The purpose of this plan and agreement are to provide for systematic mobilization, organization and operation of necessary fire and rescue resources of the state and its political subdivisions in mitigating the effects of disasters, whether natural or man-caused. This plan and agreement are for the voluntary expeditious mobilization and response of available fire and rescue resources on a local, area, regional and statewide basis.

Reference MMA at: <http://www.calema.ca.gov/FireandRescue/Pages/Documents-and-Publications.aspx>

California Interagency Military Helicopter Firefighting Program

This agreement between the California National Guard, CAL FIRE, USDA Forest Service, USDI Bureau of Land Management, USDI National Park Service and Cal EMA provides access to additional aircraft in times of emergency. This agreement identifies operational procedures and administrative procedures for cost and reimbursement.

California Conservation Corps (CCC)

The CCC has an agreement with CAL FIRE and Federal Agencies to provide fire and support crews.

Refer to California Mobilization Guide Chapter 60 for ordering.

FAA and Forest Service Region 5

This agreement outlines procedures and responsibilities for temporary airport traffic control tower services for firefighting activities within the Forest Service Region 5. Each GACC will keep a copy of the agreement.

Memorandums of UnderstandingSierra Front, Carson City Field Office to Plumas National Forest - Memorandum of Understanding: DOI, BLM Carson City Field office and USDA USFS Plumas National Forest

The purpose of this memorandum of understanding (MOU) among the U.S. Department of the Interior, Bureau of Land Management (BLM), Carson City Field Office and the U.S. Department of Agriculture, Forest Service, Plumas National Forest is to outline and formulate a cooperative plan to ensure the continued support efforts for wildfire preventions, pre-suppression, suppression and cohabitation thru the sharing of the BLM facility Doyle Fire House,

Sierra Front to NorCal District, Eagle Lake Field Office and Lassen Modoc Plumas Unit CAL FIRE - Memorandum of Understanding

USDI Bureau of Land Management, Eagle Lake Field Office, Nor Cal District, the USDI Bureau of Land Management, Carson City District, and CAL FIRE, Lassen Modoc Plumas Unit. The purpose of this MOU is to provide efficient fire protection and suppression in the Eagle Lake Field Office's District Protection Area in southeast Lassen County and northwestern Nevada. In addition, this MOU is intended to enhance the sharing of fire management resources and the utilization of closest forces in the completion of the agencies fire protection and suppression responsibilities.

Interagency Agreement between USDI, Bureau of Land Management Bishop Field Office and the USDA, Forest Service Humboldt Toiyabe

The purpose of this agreement is to document the cooperation between the parties to define the initial attack boundaries, suppression and dispatch responsibilities, provide engine and office space, duty officer coverage and provide maintenance for Topaz Station.

Operating Agreement between the US Forest Service Klamath National Forest, Rogue River-Siskiyou National Forest, Modoc National Forest and Six Rivers National Forest; California Department of Forestry and Fire Protection (CAL FIRE); Oregon Department of Forestry; Southwest Oregon District, Klamath/Lake District Office, Coos Forest Protection Association; National Park Service-Redwood National Park

Pre-planned Mutual Aid Initial attack response by identifying the "closest forces" to each planned response area, agreeing to which resources will be automatically dispatched and entering that planned response in their individual dispatch databases.

Mutual aid will be provided for specific pre-planned initial attack response areas. Only Initial Attack Response areas that border on an agency's DPA border will be considered for mutual aid.

Resources identified for automatic initial attack for these response areas will be covered under mutual aid. All resources will be covered by CFMA and will provide mutual aid. All other resources being supplied by the supporting agency will be covered under assistance by hire.

Four-State Mutual Assistance Operating Plan (California, Nevada, Arizona, Utah)

This agreement is between Bureau of Indian Affairs: Colorado River Agency and Fort Yuma Agency; Bureau of Land Management: California Desert District, Las Vegas Field Office, Arizona Strip Field Office, Phoenix District Office, Yuma Field Office, Lake Havasu Field Office and Kingman Field Office; National Park Service: Lake Mead National Recreation Area, Mojave National Preserve, Death Valley National Park and Joshua Tree National Park; US Fish and Wildlife Service: Arizona Yuma Complex; US Forest Service: Spring Mountain National Recreation Area. The purpose of this agreement is to improve intrastate and interstate utilization of closest initial attack resources. Enhance coordination of fire management objectives between federal agencies in the four adjoining states within the first 24 hours of an incident.

Initial Attack Operating Plan Western Great Basin and California Coordination Centers.

This Operating Plan exists to document the intent of the participating agencies to provide specified fire suppression forces to each other. This plan is intended to document the agencies methods of complying with the National Interagency Mobilization Guide, Chapter 10 and provide for State of California resources which are often involved in this response. This plan in no way alters local Initial Attack (IA) agreements and, in fact, may enhance the execution of local IA agreements by improving the response time. Resources provided by CAL FIRE will be in accordance with CFMA, when responding to federal wildland agency incidents in Nevada.

Airspace Boundary Management Plan

The requirement for increased management and coordination is due to the possibility of two or more agencies/cooperators conducting simultaneous, uncoordinated aviation operations within those areas which would unknowingly put the responding aerial operations within close proximity to another, placing aircraft and crews at risk. The purpose of this plan is to identify such boundaries and Initial Attack zones and provide means of

communication, coordination, and airspace deconfliction within those areas. Aerial operations on, or adjacent to agency/cooperator boundaries, and areas where a neighboring agency/cooperator provides fire suppression on lands administered by the adjoining agency/cooperator (mutual aid, shared, or exchanged Initial Attack areas or zones) require increased management and coordination.

Interagency Dispatch Agreements

An interagency agreement with dispatch procedures in California and Hawaii was signed by the Forest Service, BLM, and NPS in 1981. It is reviewed annually and incorporated into the NPS Pacific West Region Emergency Operations Plan. When areas in states other than California have utilized all of their incident supervisory personnel and/or equipment, they will request assistance from other local agencies if such assistance or mutual aid is covered by an agreement. If the situation cannot be handled with resources from other local agencies, Hawaii Parks should contact Mendocino Interagency Dispatch Center.

Department of Interior, Bureau of Land Management: Northern California District, Winnemucca District, Lakeview District, Burns District and Vale District
Fish and Wildfire Service: Sheldon-Hart Mountain NWR, Malheur National Wildlife Refuge
Department of Agriculture, Forest Service: Fremont-Winema National Forest and Modoc National Forest
Oregon Department of Forestry-Klamath-Lake District. Purpose: To improve efficiencies and effectiveness by facilitating the exchange of information, personnel, equipment, aircraft, supplies and services among the cooperating agencies.

Local Agreements

Numerous Local agreements exist between Units in California. Many of the border units have Initial Attack Agreements in place to request assistance from Units across GACC borders for initial attack resources.

Selection areas in ROSS are open or can be opened to Units who have initial attack agreements.

Normally operational procedures are in place to return resources in a timely manner and not to utilize this process for extended needs. Contact GACC's to open these selection areas.

Non-Suppression Activity Agreements

Reimbursement Processes for Forest Service and Department of Interior

These agreements are in place for Non-Suppression activities, including fuels projects and rehabilitation of public lands.

Reimbursement Process for Non-Suppression Activities under Forest Service/DOI Master Interagency Agreement – extended to September 30, 2015

Agreement Number References:

FS Agreement # 10-IA-11130206-032

BLM Agreement # L10PG00569

BIA Agreement # AGFIRE10K101

NPS Agreement # G9560100055

FWS Agreement #93252-A-H100

Reimbursement Processes for Federal Agencies and CAL FIRE (CFMA)

Several provisions of the CFMA allow the Federal Agencies and CAL FIRE to jointly conduct cooperative projects and engage in certain non-suppression activities.

Reference the CFMA at: <http://gacc.nifc.gov/oncc/index.htm>

Reimbursement Process for Forest Service with Local Fire Departments

Cooperative Fire Agreements allow for the use of local fire department resources in certain non-suppression activities, i.e. prescribed burning. Reimbursement for these activities is different from processes used to reimburse for suppression activities.

Interagency Facilities

Operations, Southern California Geographic Area Coordination Center (South Ops. OSCC):

Combines the CAL FIRE's Southern Region, U.S. Forest Service, Bureau of Land Management, and National Park Service Dispatch functions into one office complex. The facility is currently administered under a Memorandum of Understanding between these agencies. South Ops will maintain a file copy of this agreement.

Owens Valley Dispatch Center (OVCC):

Combines the Inyo National Forest and BLM Bishop Field Office into one cooperating unit located in Bishop.

Fresno-Sierra Interagency Command Center (FKCC/SICC):

These units are co-located in the same facility but do not dispatch for each other, and have separate identifiers FKU (FKCC) SNF (SICC). Combines the Sierra National Forest and CAL FIRE Fresno-Kings Unit into one cooperating unit located in Fresno.

San Bernardino Interagency Command Center (SBCC):

Combines the San Bernardino National Forest, BLM California Desert District, Death Valley National Park, Joshua Tree National Park, Mojave National Preserve and BIA-Southern California Agencies into one cooperating unit located at the San Bernardino National Forest Headquarters.

Angeles Emergency Communications Center (ANCC):

Combines the Angeles National Forest and Santa Monica Mountains National Recreation Area into one cooperating unit located in Lancaster.

Monte Vista Interagency Command Center (MVCC):

Combines the Cleveland National Forest, Southern California Wildlife Refuge, Camp Pendelton Marine Base, Cabrillo National Monument, and CAL FIRE Monte Vista Unit into one cooperating unit located at El Cajon.

Los Padres Interagency Communications Center (LPCC):

Combines the Los Padres National Forest, Channel Islands National Monument the Pinnacles National Monument into one cooperating unit located at Santa Maria.

Central California Interagency Communications Center (CCCC):

Combines the Central California District BLM, Tule Indian Reservation, Kern National Wildlife Refuge, and Sequoia National Forest into one cooperating unit located at the Porterville Airport

Operations, Northern California Geographic Area Coordination Center (North Ops. ONCC):

Combines the U.S. Forest Service, the CAL FIRE Northern Region, the BLM Northern California Region, National Fish & Wildlife Service, Bureau of Indian Affairs, and the National Park Service into one cooperating unit located at the Northern California Service Center in Redding. The facility is currently administered under a Memorandum of Understanding between these agencies. North Ops will maintain a file copy of this agreement.

Fortuna Interagency Command Center (FICC):

Combines the Six Rivers National Forest, CAL FIRE Humboldt-Del Norte Unit, Redwood National Park, Hoopa Reservation, and the Humboldt Bay National Wildlife Refuge into one cooperating unit located at Fortuna.

Yreka Interagency Dispatch Center (YICC):

Combines the Klamath National Forest and CAL FIRE Siskiyou Unit into one office complex located in Yreka.

Susanville Interagency Fire Center (SIFC):

Combines the Lassen National Forest, BLM Northern California Region, Lassen Volcanic National Park, and CAL FIRE Lassen-Modoc-Plumas Unit into one cooperating unit located in Susanville.

Redding Interagency Command Center (RICC):

Combines the Shasta-Trinity National Forests, Whiskeytown National Recreational Area and CAL FIRE Shasta-Trinity Unit into one cooperating unit located in Redding.

Grass Valley Emergency Command Center (GVCC):

Combines the Tahoe National Forest and CAL FIRE Nevada-Yuba-Placer Unit into one cooperating unit located at the Nevada County Airport.

Camino Interagency Command Center (CICC):

Combines the Eldorado National Forest, Lake Tahoe Basin Management Unit and CAL FIRE Amador- El Dorado Unit into one cooperating unit located in Camino.

Modoc Interagency Command Center (MICC):

Combines Modoc National Forest, Lava Beds National Monument and the National Fish & Wildlife Lower Klamath Refuge into one cooperating unit located at Alturas.

Mendocino Fire Center (MNFC):

Combines the Mendocino National Forest, Golden Gate NRA, Point Reyes National Seashore, Hawaii Volcanos National Park and Sacramento National Wildlife Refuge into one cooperating unit located in Willows.

Chapter 60 – Overhead/Crews

Overhead

Units will maintain a list of qualified personnel for assignments and keep their qualifications current in ROSS and/or the agency's system of record. Units will maintain a hard copy of personnel qualifications, to serve as a backup to ROSS.

If a request is required to be self-sufficient it means the resource will be able to provide for their own food, lodging and local transportation if needed.

Name Requests

Agency overhead can be name requested. The ordering unit will receive confirmation of availability, supervisor approval, and provide Unit ID.

OES Name Request Justification form is required for all local government overhead requests. Refer to the California Mobilization Guide, Appendix A.

Presuppression/suppression detail requests in ROSS, must be accompanied by a Preparedness/Detail Request form. Form will be submitted to the GACC. Refer to the California Mobilization Guide, Appendix A.

Specialized Overhead

All specialized overhead will be ordered through normal ordering process unless specified.

Archaeologists (ARCH) – All Agencies

Efforts should be made to incorporate archaeologists into the fire organization.

Federal - a list should be available at each Federal Unit of qualified archaeologists. Unit archaeologist should be pre identified.

CAL FIRE – all requests for archaeologists will placed to the appropriate GACC.

Cost Share Specialist – All Agencies

Cost Share incidents (multi-jurisdictional, unified command) may require special skills to develop a cost share agreement. When determined by the incident and the incident management team, Cost Share Technical Specialists can be ordered. In most cases, the expectation is to have a Cost Share Specialist representative from each agency having jurisdiction on the incident.

Federal - Cost Share Specialist orders will be coordinated with the appropriate federal incident business coordinator (listed below) to ensure resource assignments are commensurate with the complexity of the incident.

Agency	Contact	Office	Cell
BLM	Ann Marie Carlson	916-978-4446	916-496-0518
BIA	Julie White	916-978-6146	916-215-5653
FS	Yolie Thomas	707-562-8835	707-980-8956
FS	Patty Espinosa	707-562-8834	925-858-9504
FWS	Jessica Wade	916-978-6181	916-230-1730
NPS	Berkeley Yoshida	808-985-6100	510-604-1373

Once a Cost Share Specialist is ordered, that individual shall identify and order the necessary Cost Share Analyst position(s). Both the Cost Share Specialist and Analyst can be ordered as a Name Request.

Cost Share Specialists will be ordered as THSPs in ROSS. In special needs include "Cost Share Specialist".

Cost Share Analysts will be ordered as THSPs in ROSS. In special needs include "Cost Share Analyst".

CAL FIRE - Cost Share Specialists will be ordered as Cost Apportionment Technical Specialists (CATS).

Hired Equipment Technical Specialist (EQTS) – CAL FIRE

Assist the incident with contract administration and ensure contract compliance through technical fire contract inspection.

Human Resource Specialist (HRSP) – Federal

HRSPs are assigned to federal incidents when a federal IMT is assigned.

Incident Contract Project Equipment Inspector (ICPI) – FS

Assist the incident with contract administration and ensure contract compliance through technical fire contract inspection.

Name requests are appropriate.

Incident Meteorologist (IMET) – All Agencies

When an IMET is requested for an incident, the request will be created and placed to the appropriate GACC. The GACC will then request an IMET from the NWS National Fire Weather Operations Coordinator (NFWOC) at 1-877-323-IMET (4638). The NFWOC will advise the GACC of fill information. The GACC will advise the requesting Unit to edit the request to a "Name Request" with the fill information. The IMET will be mobilized by the appropriate GACC.

NOTE: All requests for IMETs must note in Special Needs, "authorizing a rental vehicle and computer support".

The following list designates which California GACC will status and dispatch personnel for the California Weather Forecasting Offices. ROSS status can be maintained as Available/Local.

North Ops		South Ops	
CA-EKAW	Eureka WFO	CA-HNXW	Hanford WFO
CA-STOW	Sacramento WFO	CA-LOXW	Los Angeles/Oxnard WFO
CA-MTRW	San Francisco/Monterey WFO	CA-SGXW	San Diego WFO
HI-HFOW	Honolulu WFO		
AS-PPOW	Pago Pago/American Samoa WFO		

Interagency Incident Business Advisors (IBA1/2) – Federal

IBAs provide oversight on administrative and financial activities and serve under the authority of the Agency Administrator, as per each agency's policy. Name requests are appropriate.

IBA orders will be coordinated with the appropriate federal incident business coordinator (listed below) to ensure resource assignments are commensurate with the complexity of the incident.

Agency	Contact	Office	Cell
BLM	Ann Marie Carlson	916-978-4446	916-496-0518
BIA	Julie White	916-978-6146	916-215-5653
FS	Yolie Thomas	707-562-8835	707-980-8956
FS	Patty Espinosa	707-562-8834	925-858-9504
FWS	Jessica Wade	916-978-6181	916-230-1730
NPS	Berkeley Yoshida	808-985-6100	510-604-1373

In some situations, IBA assignments are with an individual from the local Unit. Orders will be initiated by incident Unit, not the Incident Management Team.

Infrared Interpreters (IRIN) – All Agencies

All infrared flights, require an Infrared Interpreter be ordered.

All orders for IRIN will be placed with the GACC. The GACC will work with the California or National IR Coordinator.

For additional ordering information, refer to California Mobilization Guide, chapter 80.

Smokejumper (SMKJ) – All Agencies

Refer to California Mobilization Guide, chapter 80.

Training Specialist (TNSP) – All Agencies

The training specialist organizes and implements the incident's training program, by developing individual training plans and documenting individual trainee assignments.

All Agencies – A training specialist will be ordered, as part of an IMT activation. A TNSP may also be ordered on non-team incidents, at the discretion of the incident commander. Order through normal ordering process.

FS – Upon activation of a Type 1 or Type 2 IMT on a Forest Service incident, the GACC Training Officer, in concert with the host Forest, shall process a resource order requesting a minimum of 20 trainees. Forest Service will have first attempt to fill these requests.

Wildland Fire Safety Officer – Federal

When a federal agency activates an IMT, the GACC will notify the appropriate agency Wildland Fire Safety Officer. It is the responsibility of the Safety Officer to notify the affected Unit if there is an intended visit for the purpose of review or observation. Affected Units may initiate the request on their own. Each agency will set its own guidelines for protocols regarding such visits. Unless otherwise stipulated or agreed to, such visits should be of an informal nature to help foster positive safety attitudes within the incident environment. Informal reviews and observational visits do not require a formal entrance or exit meeting with agency administrators. Written documentation will be required if further formal action or follow-up is needed by the IMT, affected Unit or a higher management level. The Safety Officer will discuss the visit with the IMT and with appropriate members of the Agency Administrator's staff prior to departing.

Overhead Specialized Program

Logistics Accelerated Development – Federal

The Logistics Accelerated Development (LAD) program is a mentoring program designed to allow for the accelerated training and development of employees in the field of logistics.

The LAD Program Coordinator will maintain the roster of LAD trainees and their availability.

LAD Dispatching Procedures:

GACCs will notify the LAD Program Coordinator Sue Zahn, (w) 909-382-2786, or (c) 951-217-5146, when any Forest activates a Type I or II Incident Management Team.

The LAD Program Coordinator, in consultation with the incident Logistics Section Chief, will determine how many trainees may be utilized.

The LAD Program Coordinator will have the incident place “name request” orders for available LAD trainees.

Incident Management Teams (IMT)

All Incident Management Team Rosters and Rotations are located at the end of this chapter.

All Hazard Incident Management Teams – National Park Service

The National Park Service has All Hazard Incident Management Teams for national use. The purpose of the teams are to manage any incident except a wildland or prescribed fire.

These teams are ordered in ROSS as: Team, All Risk NPS.

The GACC will advise the Regional Contact listed below and then place the request to NICC.

Pacific West Region Contact: Regional Chief Ranger Scott Wanek, 540-999-3412 or cell 510-501-0459.

CAL FIRE Incident Management Teams – Type 1

CAL FIRE will maintain 6 statewide Type 1 All Hazard Incident Management Teams to direct large-scale complex emergency incidents. CAL FIRE IMTs are available year round for statewide response, with one team on call at any given time.

CA IMTs are ordered through the GACC. These teams are ordered in ROSS as: Team, Type 1 Long

California Federal Interagency Incident Management Teams – Type 1 and 2 – Federal

The California Federal Interagency Incident Management Teams (IMT) are managed by the California Wildfire Coordinating Group (CWCG), which consists of a representative from each agency with wildfire suppression responsibility. CWCG is responsible for selecting team members, monitoring and evaluating team performance, and providing for team member development.

CWCG will select and manage four Type 1 IMTs, as components of a national rotation established and maintained by NICC, through the National Mobilization Guide.

California can activate all four CA IMTs before going to the National Rotation. The four Type 1 teams are available for assignments to other geographic areas that utilize the Incident Command System for managing wildfires.

CWCG will also select and manage seven Type 2 IMTs. Type 2 IMTs may also be available for out of state mobilization. During Preparedness Levels 4 or 5, out of state mobilizations may be restricted to ensure adequate coverage within the state.

CWCG sponsored Type 1 and 2 teams may have the following team composition listed below. The California Incident Commanders have the flexibility to substitute the standard positions suggested below with other positions according to the team needs, as long as they stay within the standard numbers.

Short Team Configuration (Total of 10 positions)

1 ICT1
1 DPIC or ICT1(trainee)
2 OSC1
1 SOF1
1 PIO1
1 PSC1
1 LSC1
1 FSC1
1 AOBD

Long Team Configuration (Total of 27 positions)*

1 ASGS, 1 ATGS
1 SPUL, 1 FACL, 1 GSUL, 1 COML
1 SITL, 2 RESL, 1 FBAN
4 DIVS
1 TIME, 1 COMP, 1 PROC

*Long team includes the 10 positions from the Short team.

In addition to the 27 positions identified on the long team configuration, teams may have a maximum of seventeen (17) positions to be negotiated and concurred on by the Incident Commander and the Agency Administrator from the requesting Unit. As well, they may bring an additional six (6) trainee positions and six (6) S-420/520 command and general staff mentees. These positions are identified by the teams and not by receiving Unit. Unless notified otherwise, these trainees will be mobilized for incidents on Federal lands.

The GACC's will annually compile a rotation schedule for the teams to be included in the California Mobilization Guide.

NICC will be advised by the GACC as soon as the current Type 1 two-hour team is committed, to enable them to place an out-of-Region team in 24-hour rotation.

Teams will be mobilized through normal dispatch channels. GACC's will arrange transportation and advise each team member through their Dispatch Center. Trainees are an integral part of the team and will be included in transportation planning.

CA Federal IMTs are ordered through the GACC. These teams are ordered in ROSS as: Team, Type 1 Long; Team, Type 1 Short; Team, Type 2 Long; Team, Type 2 Short.

Reference the California Mobilization Guide, Appendix B, for the current California Federal Incident Management Team Operating Guidelines.

National Area Command Teams – All Agencies

Area Command (AC) is an organization established to ensure inter-incident coordination for Command, Planning, Logistical and Aircraft matters. AC will work closely with the Multi-Agency Coordination Group that establishes priorities for the GACC. AC will normally request their own support personnel to work within the Area Command organization.

There are four National Area Command Teams. AC Teams are comprised of 6 positions: Area Commander, Assistant Area Commander Planning, Assistant Area Commander Logistics, Area Command Aviation Coordinator and 2 trainees identified by the Area Commander.

All requests for National AC Teams will be placed through established ordering channels to NICC. AC is ordered in ROSS as: Team, Area Command.

CAL FIRE – The GACC may choose to order a National AC Team or assemble CAL FIRE personnel to form a California Area Command Team. AC is ordered in ROSS as: Team, Area Command.

National Incident Management Organization (NIMO) Team – Federal

Appropriate assignments for NIMO consideration include: Wildland fire, Long Duration Incidents or Mission Specific Assignments (regional and national special projects; require a completed Project Request Form on the NIMO Web site: <http://www.nifc.gov/nimo>, under the contact us tab). For details and trigger points for ordering NIMO, reference the National Mobilization Guide, chapter 60.

NIMO teams are ordered through the GACC. NIMO teams are ordered in ROSS as: Team, NIMO.

Non-IMT Teams**Burned Area Emergency Response Teams (BAER) – Federal**

BAER Teams are ordered to assist field units to plan for immediate post-wildland fire site stabilization. These teams address post incident needs, including: potential floods, mud and debris flows, watershed/municipal water supplies. It is the responsibility of the local Unit to select the number of team members and the skills needed by those team members.

FS – BAER team members are ordered in ROSS as individual overhead requests, as: BAES. In special needs, list type of skills needed and level of skill.

DOI – BAER team members are ordered in ROSS as individual overhead requests, as the approved agency-specific BAER mnemonic (as shown in ICQS/ROSS).

DOI maintains two (2) National BAER Teams to assist field units plan for immediate post wildland fire site stabilization. National BAER Teams are dispatched to only the most complex BAER incidents involving risks to human life and critical Federal assets. Potential floods, mud and debris flows, watershed/municipal water supplies, urban interface, and complex and multiple jurisdictions are the dispatch prioritization criteria issues factored into the mobilization decision.

Buying Unit Teams – Federal

The Buying Unit will normally be assigned to and located on the Unit, and report to a designated administrative staff based on location. Buying Unit Teams supplement the local Unit procurement and dispatching organizations during emergencies.

Buying Unit Teams will be ordered through the GACC. If unable to fill regionally, the GACC will place order through NICC for National Buying Unit Team. These teams are ordered in ROSS as: Team, Buying.

ECC Support Teams – CAL FIRE

ECC Support teams provide personnel qualified in ECC expanded functions for timely mobilization in support of Emergency Command Center operations. Reference CAL FIRE Handbook 7700, section 7758.

Dispatch procedure in CAL FIRE Handbook 8100, procedure 372.

There are a total of 10 teams statewide, with each Region fielding 5 teams. Normal configuration is Team Leader/EDSP, Deputy Team Leader/EDSP(t) or EDSD, 2 EDSDs, 2 EDRCs and 2 optional Trainee positions.

Teams will be on immediate call (one-hour getaway) for one week rotations.

Order in ROSS as: Team, ECC Support CA Only.

Fire Behavior Assessment Teams (FBAT) – Federal

The primary mission of FBAT is the collection of real-time fire behavior data on wildland and prescribed fire incidents. The data collected can be used to validate the effectiveness of fuels treatments, evaluate fire effects and calibrate fire behavior and emission modeling. The module consists of 5-8 fireline qualified personnel, led by overhead qualified at the strike team leader level or above. The team provides a fire behavior specialist who may be used to augment incident planning requirements as requested by fire managers.

The Team is located on the Tahoe and Stanislaus National Forest and can be mobilized by contacting the Team leads:

Carol Ewell.....	530-559-0070
Ali Reiner.....	530-559-4860

These teams are ordered in ROSS as individual overhead requests (based on needs of the ordering Unit).

Interagency Dispatch Teams – Federal

Dispatch teams provide personnel, qualified in Dispatch Center expanded functions, for timely mobilization in support of wildland incidents. There are 5 federal dispatch teams in California. Normal configuration is 2 EDSPs, 2 EDSDs, 2 EDRCs and up to 2 trainees.

Priority use of these teams is to support incidents in California. Out of state assignments will be approved by the GACC on a case by case basis.

Team rotation will be bi-weekly, effective at 0800 on alternating Mondays. If Monday is a holiday, rotation will occur at 0800 on Tuesday. The rotation schedule can be located at:

<http://gacc.nifc.gov/oncc/logistics/overhead/index.htm> and <http://gacc.nifc.gov/oscc/logistics/index.htm>. If a team is committed, another team will not automatically be available. The GACC may choose to contact the next up team leader to check availability.

Order in ROSS as: individual overhead, normally 2 EDSPs, 2 EDSDs, 2 EDRCs (plus trainees). Case by case configuration.

Medical Emergency Response Teams (MERT) – CAL FIRE

MERT is ordered when a significant commitment of California Department of Corrections and Rehabilitation (CDCR) inmate firefighters are assigned to an incident. A MERT is typically made up of three personnel consisting of a registered nurse and two medical technical assistants to provide medical assistance to inmate firefighters. The CDCR MERT personnel respond from the Susanville Training Center (LMU) and Sierra Training Center (TCU).

Order in ROSS as: MERT (California Only). Create and place a single overhead request for the team.

Wildland Fire Modules – Federal (FS and NPS)

The primary mission and priority for these modules is to provide skilled and mobile personnel to assist with prescribed fires in the areas of planning, fire behavior monitoring, ignition, and holding. Secondary priorities (in order) include support of prescribed burn unit preparation, assistance with fire effects plot work, and support of mechanical hazard fuel reduction projects. Some agency restrictions exist for fuels related work.

As a national interagency resource, the modules are available nationally throughout the fire season. Each module is comprised of a module leader, assistant leader, three to five module members, and a detailer during the primary burning season.

FS has Wildland Fire Modules on the Stanislaus NF, Klamath NF, Sequoia NF and Inyo NF.

NPS has Wildland Fire Modules on the Whiskeytown NRA.

These modules are ordered in ROSS as: Module, Wildland Fire.

CREWS**California Conservation Corps (CCC)**

CCC Support and Type 2 crews are available for assignments nationwide. Support crews can be utilized for a wide variety of incident support activities not requiring direct supervision such as traffic control, runners, equipment set-up, waste management, etc.

CCC Type 2 crews are fully equipped and the crew supervisors are federally qualified Crew Bosses.

CCC Type 2 crews will be available through their local Unit or through the CCC Duty Officer.

CCC has a centralized dispatch system for crews. All calls for crew assistance go directly to the CCC Duty Officer.

The CCC Duty Officer will secure the closest available crew(s) for the assignment.

For CCC Support crews, order in ROSS as: Crew, Camp

For CCC Type 2 crews, order in ROSS as: Crew, Type 2

When two or more CCC crews are ordered, the CCC may request an Agency Representative to assist the crews while on assignment. CCC crews can be ordered 24 hours per day but do not respond to incidents between 2200-0600 hours due to safety, driving and union concerns.

Unit and/or GACC:

Contact CCC Duty Officer 24 hour contact number at **916-599-1415** leave a message.

If no answer within 2 hours, call CCC Emergency Manager at 916-341-3103 or 916-531-2256 (cell).

If no answer within 2 hours, call CCC Operations Chief at 916-341-3135 or 916-531-4259 (cell).

CAL FIRE

Type 1

CAL FIRE fire crews are comprised of adult inmates or youth wards. CAL FIRE fire crews are not breakdown capable. These firefighters require custodial supervision during off shift periods, and are limited to incidents within the confines of California. Reciprocal agreements have been made with the State of Nevada, allowing these crews to respond to wildland fires threatening the State of California up to 25 air miles within the Nevada border. They are trained for wildland firefighting and, in some cases, for Urban Search and Rescue missions.

CAL FIRE may require that all CAL FIRE crews be ordered in Strike Team configuration when responding to incidents outside their home Unit.

The CAL FIRE crew will consist of 12-17 crew firefighters and one (1) Fire Captain. With adult inmate CAL FIRE crews, California Department of Corrections & Rehabilitation (CDCR) custodial personnel will accompany the crews to provide off shift supervision. For youth ward CAL FIRE crews, California Department of Juvenile Justice (DJJ) counselors will accompany the crews to provide off shift supervision. Custodial coverage will be arranged and dispatched by the sending CAL FIRE Camp. Technical Specialists Crews (THSC) will be ordered when the number of crews assigned to an incident reaches seven (7), and the fire is expected to actively burn into the next burning period. This number will remain flexible and responsible to special needs such as duration of incident, complexity of incident or custodial problems.

For logistical considerations CAL FIRE utilizes male, female and youth inmate crews and must be housed separately. The female crews are from Puerta La Cruz and Rainbow camps. The youth crew is from Pine Grove camp. In addition there also Los Angeles County male and female inmate crews that fall under the CDCR that are used statewide.

CAL FIRE crews are ordered in ROSS as: Crew, Type 1

If an Agency Representative has not been ordered, once the crews and custodial personnel are on the incident the senior custodial officer will request an order/request number for an Agency Representative through the Incident Commander. The senior custodial officer will notify his/her agency of the requirement for an Agency Representative and will take the responsibility for making direct contact with the individual to fill the order/request.

Federal

Annually, each Unit will provide their respective GACC a list of the crews administered by their Unit. All crews will consist of 20 members. When crews are mobilized to an incident, the minimum crew strength will be 18 members. When any combination of crews numbering four or more are committed to an incident out of State, an Interagency Resource Representative (IARR) may be assigned by the GACC.

NWCG Minimum Crew Standards for National Mobilization, reference the National Mobilization Guide, chapter 60.

Type 1 Hotshot

Hotshot Crews, and Smokejumper Crews meet the minimum National Type 1 Crew standards. Crew listing is available at http://www.fs.fed.us/fire/people/hotshots/IHC_index.html.

The GACC will coordinate all movement of these Crews. Units may commit their Type I Federal Crews to initial attack incidents in the Unit. Response to cooperator's requests for Assistance by Hire in the immediate vicinity of the Mutual Threat area can be initiated by the Units. Both above actions will be followed by immediate notification to the GACC of resource commitment.

When Type 1 federal crews are flown to an incident, it is prudent to follow up with their crew vehicles, when the home Unit or GACC can provide drivers. Sending GACC's have the responsibility to arrange for the mobilization and coordination of their transportation. Efforts will be coordinated with the home Unit and local GACC, as ordered overhead that are enroute to the same incident could benefit from the transportation. The home Unit will arrange for transportation to the incident for crew members not initially mobilized. This practice is not intended for crew or module members other than Type 1 Crews.

Ordered in ROSS as: Crew, Type 1

Smokejumpers

A 40 person Smokejumper crew is based at the Northern California Service Center in Redding. Smokejumpers can be utilized as a Type 1 Crew. Approximately 30% of the crew is Crew Boss rated and most Smokejumper supervisors hold Division Supervisor ratings. At least 50% of the Smokejumpers are qualified Class C Timber Fallers and the entire crew is trained in the use of cross-cut saws. Emergency medical care and rescue equipment can be delivered via paracargo. The Smokejumper unit maintains 2 basket litters rigged for paracargo delivery. Trauma kits with IV blood expanders, oxygen, splints and equipment to monitor vital signs are carried on the jumper aircraft.

To order as a Type 1 Crew, in ROSS, order as: Crew, Type 1

Type 2 Initial Attack Capable

Type 2 IA Crews can initial attack fires, be broken up into squads, and perform firing operations.

Ordered in ROSS as: Crew, Type 2 IA

Type 2 Regular

Regular Crews that do not meet the criteria of a Type 1 Crew as outlined in the ICS 420-1 Resource Designation List. Regular Crews are formed as needed. They are comprised of Unit employees normally assigned to various disciplines on the Unit. Regular Crews are Unit resources and are considered part of the national mobility concept. GACC's will coordinate movement of these crews.

Ordered in ROSS as: Crew, Type 2

Type 2 Organized

Organized Crews (OC) are emergency firefighting employees. Crew members must meet the same training and physical standards established for other Unit crews. Organized Crews are sponsored or contracted by various Units. Sponsoring Units are responsible for training, outfitting, mobilizing, and paying the crews. Organized Crews are Unit resources but are considered part of the national mobility concept. GACC's will coordinate movement of the crews.

Each handcrew will have the standard configuration for supervision as Regular Crews. This consists of a Unit Crew Supervisor and three Squad Bosses. These supervisory positions may be filled with agency personnel or Administratively Hired (AD) personnel who meet all the NWCG 310-1 and Forest Service standards for each position.

A Crew Representative may be assigned if the Crew Supervisor does not meet Crew Representative standards specified in Chapter 20 of FSH 5109.17 Wildland Fire Qualifications Guide. If an AD Crew Supervisor is used, a Crew Representative will be dispatched with the Organized Crew. A single Crew Representative may be assigned to one or more Organized Crews. The total makeup of the crew will meet National Standards of 20 people per crew.

Ordered in ROSS as: Crew, Type 2

Organized Kitchen and Camp**North GACC****South GACC**

SRF 2 10-12 person Camp Crews

SQF 2 10 person Camp Crews

Order in ROSS as: Crew, Camp

California Incident Management Teams and Rotation Schedule

1

Out-of-Region Rotation for Type 2 IMT

- Agreed to by California Type 2 Incident Commanders and/or Deputies and accepted by the CWCG Operations Committee.
- Once a team goes out-of-region, they will be unavailable for an out-of-region assignment until all teams receive an out of region assignment.
- When a team “On-Call/2 Hr” is not available due to being assigned; already had an out-of- region assignment; or is unavailable, the next team on the rotation moves up to “On-Call” position for the remainder of the current on-call period and all additional periods until their own on-call period has expired unless another team becomes available and is put back into rotation.
- GACC Intel will update” News and Notes” as soon as possible and keep rotation information consistent on both GACC websites.
- At the beginning of each calendar year, all team rotations will start over for out-of-region assignment(s).
- Out-of-GACC assignment(s) within California does not count as an out-of-region assignment.
- Any out-of-region assignment, including pre-positions greater than 72 hours from “date and time needed” to “time of release” will count as an out-of-region assignment.
- Both GACCs will have final decision on management of all IMT assignments and deviation from the rotation based on commitments, PL levels, specific NICC requests, unit commitments of Chief Officers, or other unforeseen factors.

In-Region Rotation for Type 2 IMT

- Once either California GACC has fully exhausted their Type 2 Team capability, they will place an order to the other California GACC who will utilize the regional rotation to fill the order.
- When a team “On-Call/2 Hr” is not available due to being assigned; already had an out-of- region assignment; or is unavailable, the next team on the rotation moves up to “On-Call” position for the remainder of the current on-call period and all additional periods until their own on-call period has expired unless another team becomes available and is put back into rotation.
- GACC Intel will update” News and Notes” as soon as possible and keep rotation information consistent on both GACC websites.
- Both GACCs will have final decision on management of all IMT assignments and deviation from the rotation based on commitments, PL levels, specific NICC requests, unit commitments of Chief Officers, or other unforeseen factors.

2013 Interagency Type 2 IMT Rotation

The following Rotation Schedule begins at 0001 Wednesday and ends at 2400 on Tuesday

Start Date	End Date	On Call/2 Hr
01/02/13	01/08/13	CS
01/09/13	01/15/13	SC1
01/16/13	01/22/13	NC1
01/23/13	01/29/13	SC2

Chapter 70 – SUPPLIES AND EQUIPMENT

National Interagency Incident Support Caches

California operates two National Interagency Incident Support Caches as part of the National System (NFES). The Northern California Incident Support Cache (NCK) is located in Redding, CA; and the Southern California Incident Support Cache (LSK) in Ontario, CA. These caches serve the Supply needs of the Geographical Area Coordination Centers, including supplies required for project activities when not in conflict with incident activity. Both caches stock National and Regional "NFES" items.

The caches stock three types of goods; Consumable, Durable and Property. All three of these types of goods are considered accountable.

- Consumable items are intended to be consumed at an incident, with life expectancy not to exceed one incident, if used (example: batteries).
- Durable items have a life expectancy of more than one incident, or use (examples: sleeping bags, fire hose).
- Property items are items with a purchase price greater than \$5,000 or Sensitive items valued less than \$5,000. Property items are expected to be returned to the cache without exception. If a Property Numbered item is not returned, the cache will forward a Transfer of Property Form to the Unit where the incident is located, and procure for replacement of the unreturned item (examples: Regional RAWs, pumps).

Limited Resource items are those items which have a fixed inventory in the national system. When ordering Limited Resource items, it is mandatory that all units go through a GACC to place the request. The GACC maintains records to monitor available quantities, providing management of these items as National Resources.

Kits have been established to provide a collection of related articles, pre-assembled to accomplish specific functions. There are over 40 national kits, with an additional six specific to California. National kits are of standard configuration throughout all caches in the nation. Contents of all kits may be found in the NWCG National Fire Equipment System Catalog.

All supplies or equipment furnished to incidents will be considered "on loan" and should be returned as soon as practical.

Ordering

Interagency Cache Business System (ICBS) and Resource Ordering and Status System (ROSS) are now interfacing. This interface allows ROSS users to enter S number requests to be sent to the cache direct for processing and filling. The cache, via ICBS is allowed to input S numbers for supply orders that go directly to the cache without the request being created in ROSS. These S numbers must be assigned by the incident and be between 100000 – 199999. This interface also allows ROSS users to see fill information for all S numbers that the cache has filled, no matter which way the requests were initiated.

Except for Limited Resource items, each Fire Cache will accept and process Incident Resource Orders directly from Units within their area of influence once the incident is created in ROSS. All other initial orders (from all cooperators); will be required to originate from a GACC until the incident has been established. At the discretion of the GACC, orders from the Ordering Unit to the Fire Cache may then be permitted.

Orders to the cache from any Unit **not** within the area of influence of a cache must go through their respective GACC.

Cache orders from any Unit will require Incident Request Numbers assigned by the ordering Unit, one per line item.

Once an incident is established, contact the local Cache to establish an ordering schedule.

The NFES Numbers and the established Unit of Issue associated with each NFES item are mandatory parts of any order placed with the Caches. When placing orders through the Cache, it is always necessary to provide the NFES Number, corresponding Unit of Issue, quantity requested, and a written description of the item.

For NFES numbers, descriptions, and Units of Issue reference the National Fire Equipment System Catalog - Parts 1 and 2 PMS 449 NFES 0362 at: <http://www.nwcg.gov/pms/pubs/catalog.htm>

Abnormal Quantities

Any order exceeding 25% of the established cache stocking level for an item is subject to verification by the GACC Assistant Director, Coordinator, Logistics Chief, or the Incident Commander.

Mobile Cache Vans

Mobile Cache Vans provide the preliminary supply essentials to establish an Incident Base. For this reason it is expected that one Mobile Cache Van should suffice per incident.

Each Mobile Cache Van contains supplies to support 150 people working and 150 people sleeping.

Mobile Cache Vans are sealed, and are intended to be utilized as a complete unit. Component items may be ordered separately.

Many Mobile Cache Vans are pre-positioned on host units. If your unit does not host a Mobile Cache Van, your order is to be placed with your respective GACC. They in turn will order a Mobile Cache Van from the nearest location. If your unit does host a Mobile Cache Van, it may be utilized at the discretion of the unit Fire Management Officer. The use of a local cache van must be documented with an S number on an incident resource order and the request placed to the respective GACC. The GACC places the request with the cache. It is the responsibility of the host unit to provide transportation of the van.

Mobile Cache Vans are to be returned to their respective cache after use.

Mobile Cache Vans are ordered in ROSS as Supplies, NFES 008646 (NCK) and NFES 008640 (LSK).

Mobile Cache Vans are on standby at each Geographic Area Cache and the following pre-positioned locations:

Northern CA

SRF	Rohnerville
LNF	Susanville
PNF	Quincy
LNU	Konocti
ENF	Placerville
KNF	Yreka (2)
MDF	Alturas

Southern CA

SNF	North Fork
SQF	Porterville
SQF	Kernville
LPF	King City
LPF	Los Prietos
INF	Bishop
CNF	Goose Valley
STF	Sonora

Demobilization

All supplies being demobilized from an incident are to be documented on an OF-285 Interagency Incident Waybill, NFES 1472; one per shipment. Any supplies being retained on an incident during the demobilization process are to be documented on a Waybill, and forwarded to the cache as well.

To help facilitate the return process, used (Not Ready for Issue) and unused (Ready for Issue), supplies being demobilized back to the cache should be divided, packaged, and packed separately. The caches will only accept rolled hose.

Sensitive or Property Numbered items requiring reconditioning prior to reissue from a cache, should be returned as soon as no longer required. Seal numbers securing the shipping containers for these items are to be documented on Incident Waybills. Seals are mandatory when transporting any Sensitive items to or from the caches, i.e. Radios and Computer Equipment.

An AD-112 will be prepared for any property items that are lost, stolen or found to be unserviceable. Each cache requires immediate notification when Property Numbered items are involved.

Contact the cache with intended demobilization plans.

Both California Caches will close an incident 45 days following a control status, and charge unreturned supplies and equipment to the Ordering Unit. Replacement Orders received after the closing process will **not** be filled. Upon incident closure, a Loss/Use Tolerance Report will be generated for all Type 1 and 2 incidents supported by the Geographic Area Caches. This is a comprehensive report, displaying totals of Loss/Use rates for all Consumable and Durable items issued from the caches. Total percentages above or below the nationally accepted standard are also displayed. This report is forwarded to the agency administrator hosting the incident.

The following percentages have been assigned nationally as potentially acceptable rates of loss for Durable items:

Water handling (valves, nozzles)	10%
Helicopter accessories (cargo nets, lead lines)	10%
Camp items (tents, heaters, tables)	10%
Tools (shovels, pulaskis)	20%
Hose	20%
Backpack pumps	20%
Sleeping equipment (sleeping bags, cots)	20%
Clothing (jeans, shirts, coveralls)	30%

Replacement Orders

Whenever possible, Replacement Orders are to be filled from stock on hand in Supply at the incident. If resources are unable to fill replacement orders at incident, their home Unit should assign the order to the GACC cache. Incident Replacement Requisition, OF-315, (NFES 1300) shall be used when forwarding Replacement Orders to the cache.

Incident Replacement Requisitions from Type 1 or Type 2 incidents must be authorized by the Supply Unit Leader or other appropriate position. If received at the cache unauthorized, the requisition will be mailed to the appropriate FMO according to the incident location, for signature.

Incident Replacement Requisitions from Type 1 or Type 2 incidents can be sent to the cache, the S numbers must be assigned by incident and be between 100000 – 199999. S numbers will be input in ICBS and sent to ROSS via the interface. Incident Replacement Requisitions from individual resources will be created by the incident/expanded dispatch in ROSS and sent to the cache via the ICBS ROSS interface.

Replacement Requisitions require Incident Request Numbers be included, as a continuation of the incident documentation process.

Fire Management Officers shall forward to their respective cache, by April each year, a list of those persons authorized to approve Replacement Orders on their Unit. The authorized designees may then approve requisitions for incidents located on their Unit.

Recycling

The recycling of plastics, cardboard, etc., is highly recommended, and is the responsibility of an incident to process.

Hazardous Materials – Ordering and Shipping

Hazardous materials are identified by definition in the Department of Transportation (DOT) Emergency Response Guidebook. Hazardous materials are: Any substance or material, which has been determined by the Secretary of Transportation to be capable of posing an unreasonable risk to health, safety or property when transported in commerce, and which has been so designated. The definition includes hazardous substances, hazardous waste, marine pollutants and elevated temperature materials as defined in 49 CFR, part 106 to 180.

If storing an identified hazardous material, refer to the DOT Emergency Response Guidebook. The guidebook lists all hazardous materials, and in the event of an accident explains precautions and actions to take.

If intending to ship the material by highway, the material and its quantity will determine how the item is to be packaged, documented and shipped.

* The following directions apply to all hazardous material shipping documents:

- All information must be printed (mechanically or manually) in English.
- Shipping documents must contain the shipper's name and address, as well as the destination name and address.
- "Hazardous materials" must be entered as the first line item on a shipping document, or be printed in a different color.
- Hazardous materials must be listed by their proper shipping name, hazard class, ID number and packaging group. No abbreviations.
- All hazardous material packages must be properly marked, labeled, and packaged. The total weight must be included.
- The following shipper's certification must be entered on each shipping document: "This is to certify that the above named materials are properly classified, described, packaged, marked and labeled, and are in proper condition for transportation according to the applicable regulations of the DOT."
- A 24 hour emergency response telephone number, with someone available while the commodity is in transit.

- Emergency response information listed in the DOT Emergency Response Guidebook is also to be included.
- For questions regarding National Fire Equipment System (NFES) stocked hazardous materials, reference the Interagency Transportation Guide for Gasoline, Mixed Gas, Drip-torch Fuel and Diesel, 06/09 PMS 442 (<http://www.nwcg.gov/pms/pubs/pubs.htm>) or the current “Hazardous Materials Haulback Guide”.

Hazardous Waste

Regulations for hazardous waste are directed by the State. The State in turn charges the counties with enforcing their regulations. Therefore, determining the disposition of hazardous waste depends greatly upon the jurisdiction you are in. In all states, the regulations which govern the generation, containment, storage, transportation and documentation of bio-hazardous waste are very specific and well enforced.

Use of red bio-hazardous waste bags are specifically regulated. When used, contents are to be documented *immediately* by the user, as the bag may not be re-opened under any circumstances. The bag may not be taken to a landfill until it has been properly treated. Caches do not have a method of disposal for bio-hazardous (medical waste) bags.

Under NO circumstances, will any California Cache accept used bio-hazard bags.

Communications

National Fire Radio Caches (NFRC)

A cache of ICS Command Starter systems, NFES 4390 kit is available at the National Interagency Fire Center's National Incident Support Cache (NIRSC). The standard 4390 kit contains sufficient equipment for Command and Logistical communications needs for a three Division incident. The entire system will be packaged and shipped as a standard unit. Requests for individual or additional kits (boxes) will be honored. They must be ordered by their individual NFES stock numbers. A description of the equipment available from NIRSC is located in the ICS Communications user guide. Dispatch of NIRSC systems will be through the GACC. The NIRSC starter system will still have Air Guard located in the last channel of all starter systems. This frequency is **not** authorized for use by the incident for communications.

California may preposition 4390 kits at the Caches. These kits are only pre-positioned at the Cache—they remain under the control of NIFC.

They are ordered through the GACC as Supplies, with the appropriate NFES number, using the following procedures:

1. Ensure that the request has accurate Latitude/Longitude information.
2. In the Shipping Information block of the request,
 - Select Shipping Address from the drop down or enter Shipping Instructions.
3. In the Special Needs block of the request, include the full “Bill to” information.
4. In the Shipping Contact block of the request, identify the Shipping Contact and a phone number.
5. In the Incident Ordering Contact block of the request, identify the Communications Leader, specifying “on order” if needed.
6. Specify if freight shipping is OK, or if a charter aircraft is required to meet the needed date and time.

As 4390 kits are released from the incident, they are to be returned to NIRSC at NIFC for refurbishment. The receiving unit will check with the GACC before returning any NFRC system back to NIFC. All NIRSC kits will be returned to NIFC for refurbishment, even if the seal is not broken.

Federal HT Radio Kit

NFES 4381 kits are available from the Interagency Caches. Each kit contains 16 hand held radios configured with all USDA-FS and DOI tactical, command and national air frequencies. The *radio manufacturer* requested needs to be confirmed by the Communications Unit Leader and specified in the order in “Special Needs”.

Order in ROSS as: Supply, NFES Supplies, Kit – Command/Tactical Radio, (Synthesized)

CAL FIRE HT Radio Cache

CAL FIRE has 40 HT Radio Caches. There are 20 located at CNR, 20 located at CSR (10 at CSR and 10 at FKU). Each kit contains 10 BK GPH Commander Portable Radios with antenna, clamshell, leather case and T-card. Batteries are included for all 10 radios. Each radio is programmed to current CAL FIRE statewide “Group 3” on Groups 16-25.

Order in ROSS and place to the appropriate GACC as: Supply, Non-NFES; Cache, HT Radio

Refer to the ordering requirements in the National Fire Radio Caches Section above for completing the order in ROSS.

CAL FIRE Portable Repeaters

CAL FIRE has a variety of portable command repeater kits available throughout the state. Each Unit and MCC has a portable command repeater available. For specifics, contact CAL FIRE Telecom at (916) 327-8652. Portable command repeater requests should be placed from the Unit to the GACC to Sacramento CC (CDFH). Ensure that "Special Needs" in ROSS has the ordering contact information so CAL FIRE Telecom can call to fill the request with the appropriate equipment.

Order in ROSS as: Supply, Non-NFES; Kit, Command Repeater

Frequencies

Responders need to verify frequencies and tones to use when responding to or assigned to an incident. All individual frequencies shall be ordered in ROSS using A numbers. This section addresses only GACC Assigned Incident Frequencies.

Activation of National Fire Radio Frequencies will be controlled and coordinated by the GACC due to the complexity of Incident radio usage.

For frequency listings reference: <http://gacc.nifc.gov/oncc/logistics/index.htm> or <http://gacc.nifc.gov/oscc/logistics/index.htm>

For California Tones refer to the California Mobilization Guide Appendix A and the GACC websites listed above.

Mobile Communications Units – All Agencies

Statewide there are mobile communication units available through CAL FIRE, OES, and CA BLM. To check for availability, contact the GACC.

Order in ROSS as an Equipment request.

CAL FIRE order as: Telecommunications (CDF Only) Communications Unit, Mobile, Type 1.

BLM and OES order as: Trailer - Communications

Remote Automated Weather Station (RAWS)

Federal

When a Unit requires additional RAWS units they should be ordered using the normal dispatch procedures. They are ordered on a Supply Request and have NFES numbers.

Regardless of acreage or type of incident, NIFC Fire RAWS will be ordered by local area fire managers through ROSS using a S number. This request will be filled with a NIFC Fire RAWS. Two RAWS technicians will accompany the RAWS and need overhead requests, unless the requesting Unit specifies that RAWS technicians are available locally.

All requests will be generated from the incident to the local area dispatch centers and passed to the GACC. The GACC will process and place the order to NIFC for final approval. Shipping and Billing addresses must be provided.

CAL FIRE

CAL FIRE currently has seven (7) portable RAWS assigned to Units for use on State incidents. When a CAL FIRE Unit requires additional RAWS units, they should be ordered using the normal ordering process. Reference the CAL FIRE Handbook 8100 procedure 344.

Mobile Food Service

National Contract Mobile Food Service – Federal

For a complete listing of the Schedule of Items and Contract Specifications for the National Mobile Food Service Contract, reference the current National Mobile Food Services publication, NFES 1276. This information can also be found at the following website: <http://www.fs.fed.us/fire/contracting/>

National Food Service units are ordered as E number and are called Food Service, Mobile in ROSS. All National Food Service unit orders are placed to the GACC and then onto NICC. NICC will determine and assign the appropriate units to all federal wildland fire incidents.

Mobile Food Service requests must be completed and faxed to the GACC at time of ROSS request. Refer to the California Mobilization Guide, Appendix A, for the National Mobile Food Service/Shower Unit request form. When the determination is made that contract mobile food services are needed in support of federal wildland fire activities in the United States, the Government is obligated to order services from National Mobile Food Service Unit (MFSU) Contractors (National Caterer) when at any time:

- The number of people to be fed is at or above 150 persons per meal,
AND
- The headcount is estimated to remain at those numbers, or greater, for at least 72 hours from when the headcount first reaches 150 per meal.

If national incident activity is high and a National Mobile Food Service Unit is unavailable, cooperator units may be used. A second E number will be generated for cooperator unit (See next section, MKU/FDU). In such case, the cooperator is guaranteed a minimum 72 hours of work, even if a National unit becomes available before then. Cooperators include state managed kitchens.

All requests to reassign National Contract Mobile Food Service will be placed through established ordering channels to NICC. All reassignments of National Mobile Food Service will be done by NICC.

All release information will be documented in ROSS and relayed to NICC within 15 minutes. Contractors may take 24 hours to rest and replenish supplies within the local area after release. After 24 hours, contractors must return to the unit's designated dispatch point.

Mobile Kitchen Unit (MKU) and Food Dispensing Unit (FDU) – CAL FIRE

MKUs and FDUs are specialized resources and require certain support resources to facilitate their operations. Each camp which supplies a MKU/FDU will have specific needs for their operation. Once a MKU/FDU is requested the goal is to get the resource to the incident by either the next morning or evening to feed the incident personnel.

Food Dispenser Units (FDU) - Food Dispenser Units or steam tables should be used, when available, when the number of meals to be served will not exceed the unit's capacity (200-300 meals).

Mobile Kitchen Units (MKU) - When the needs of the incident exceed the capacity of the FDU, a FDU is not available, an incident base has been established, or an incident management team will be assigned, Mobile Kitchen Units will be the first choice for feeding of incident personnel. CAL FIRE MKUs should be used first followed by MKUs from cooperating agencies and then rented MKUs with CAL FIRE kitchen crews.

Order in ROSS as E number as: Food Service, Mobile. In special needs, include Date and Time of first meal and number of persons served. The Unit who fills the MKU/FDU will coordinate with the appropriate camp, and roster all specific equipment needs.

Reference the CAL FIRE Handbook 8100 procedure 341.

If national incident activity is high and a National Mobile Food Service Unit is unavailable to federal units, a CAL FIRE MKU may be used. In such case, CAL FIRE is guaranteed a minimum 72 hours of work, even if a National unit becomes available before then.

Northern California

AEU	Growlersburg	MKU/FDU
HUU	Eel River	MKU
HUU	High Rock	FDU
LMU	Antelope	MKU
LNU	Konocti	MKU
SHU	Trinity River	MKU
TGU	Salt Creek	MKU/FDU

Southern California

BDU	Prado	MKU
FKU	Miramonte	MKU
MVU	Puerta La Cruz	MKU/FDU
SLU	Cuesta	MKU
TCU	Vallecito	FDU

Mobile Shower Facilities

Federal

For a complete listing of the Schedule of Items and Contract Specifications for the National Mobile Shower Facilities Contract, refer to the current National Mobile Shower Facilities Contract publication, NFES 2729. This information can also be found at the following website: <http://www.fs.fed.us/fire/contracting/>

National Mobile Shower Facilities are ordered as an S number and are called Shower, Mobile in ROSS. All National Mobile Shower Facilities orders are placed to the GACC and then onto NICC. NICC will determine and assign the appropriate units to all federal wildland fire incidents.

The National Mobile Food Service/Shower Unit request form must be completed and faxed to the GACC, at time of ROSS request. Refer to the California Mobilization Guide, Appendix A, for the form.

National shower contractors may offer to bring other optional items such as hand-washing units and water tenders, in addition to the shower units. Incidents are not required to order or use these items from national contractors. Units should use local vendors to fill these needs when possible.

All requests to reassign National Contract Shower units will be placed through established ordering channels to NICC. All reassignments of National Shower units will be done by NICC.

All release information will be documented on the resource order and relayed to NICC within 15 minutes. Contractors may take 24 hours to rest and replenish supplies within the local area after release. After 24 hours, contractors must return to the units' designated dispatch point.

CAL FIRE

Requests for showers on CAL FIRE incidents will follow CAL FIRE Hired Equipment Guidelines. Refer to Hired Equipment in the California Mobilization Guide, Chapter 70.

Hired Equipment

Forest Service Incidents – Contract/Hired Equipment (non-National Contract)

Use the R-5 Expanded Dispatch Incident Guide for VIPR, DPL, IBVPA, Incident Only/EERA
http://gacc.nifc.gov/oncc/logistics/equipment_supplies/docs/12_exp_disp_contract equip_guide.pdf

For Incident Procurement and Fire Contract Clarification/Assistance, reference:
<http://www.fs.usda.gov/detail/r5/fire-aviation/management/?cid=stelprdb5303034>

Each host dispatch center will give dispatch priority to the resource offering the greatest advantage to the Government **before** all other private resources not under Agreement with the following exceptions:

- For Immediate Need/Initial Attack, dispatchers will follow the “closest forces” concept and utilize locally available resources according to agency and incident needs.
- Tribal preference policy established within reservation jurisdiction

CAL FIRE Incidents – Contract/Hired Equipment

The Hired Equipment Management System (HEMS) will be used for dispatching immediate need and planned need fireline dozers and water tenders, as well as, support equipment. Reference CAL FIRE Handbook 7700, Policy 7761.6.5 and CAL FIRE Handbook 8100, Procedure 345.

Chapter 80 - Aircraft

The paramount consideration for aircraft use in California is to conduct all operations safely and reduce risk exposure.

In order to maximize IA effectiveness, the GACCs will retain operational control of all tactical aircraft.

Aircraft Administration

Bureau of Land Management

The California State Aviation Manager (SAM) is located at the California State Office. The State Aviation Manager provides guidance to 4 Unit Aviation Managers (UAM) located in Riverside, Bishop, Bakersfield and Susanville. These Unit Aviation Managers coordinate the daily fire, law enforcement and administrative aviation use in their geographical areas. All requests for incident support and administrative flights will be made through the Interagency Communication Centers identified in those geographic areas. Geographic area communication centers are as follows.

- Northern California District (NOD) - Susanville Interagency Communications Center (SIFC)

- Owens Valley District (OVD) - Owens Valley Interagency Communication Center (OVCC)

- Central California District (CND) - Central California Interagency Communications Center (CCCC)

- California Desert District (CDD) - Federal Interagency Communications Center (SBCC)

Requests for administrative flights for the California State Office are requested and processed through the State Aviation Manager in coordination with Northern California Geographic Area Coordination Center.

CAL FIRE

CAL FIRE Aviation is integrated within two organizational classifications: Aviation Management Unit (AMU) and Tactical Air Operations (TAO) both under the direction of Fire Protection. Program responsibilities overlap in many areas; the following only serve to identify accountability:

AMU:

- Aviation Policy and Procedure

- Maintenance of both fixed and rotor wing aircraft

- Aviation Life Support Equipment (ALSE)

- Aviation Safety

- Management of aviation contract personnel

 - Maintenance staff

 - Fixed wing pilots

- Management of Call When Needed(CWN) and any Exclusive Use (EU) contracts

TAO:

- Command and Control

- Fire chemicals

- Base operations and standardization

- Aviation Training and Standards of CAL FIRE personnel

- Military Program Coordination

 - Title 10 assets

 - MAFFS

 - California National Guard

- Operational technical assistance

Forest Service

The Regional Aviation Group (RAG) is divided into operational areas to better serve the units in the region. All units should direct requests for technical assistance to the office designated to serve them. There will be personnel at each location to assist the units in all aspects of aviation. All requests for incident support and administrative flights will be made through the appropriate GACC.

NOPS will be the dispatch point for the McClellan Office and Redding Aviation Units. SOPS will be the dispatch point for the Lancaster Aviation Unit. Aviation Units needing assistance should make request to the dispatch office that serves them.

Designated Operational Areas and Units served are:

Lancaster Aviation Unit - ANF, BDF, CNF, INF, LPF, SQF, SNF, STF and OSC

Redding Aviation Unit - ENF, KNF, LNF, MDF, MNF, PNF, TMU, TNF, SHF, SRF and ONC

It will be the responsibility of the Aviation Units to furnish the appropriate GACC a duty schedule during the fire season for all pilots, inspectors and aircraft status.

Fire and Aviation Safety Teams (FASTs) assist agency administrators during periods of high fire activity by assessing policy, rules, regulations, and management oversight relating to operational issues. For more information reference the National Mobilization Guide, Chapter 20.

Aviation Safety Assistance Teams (ASAT) enhance safe, efficient, and effective aviation operations. An ASAT provides assistance to Unit and Aviation Managers, flight crews, and Incident Management Teams for increasing ongoing or declining incident aviation activity. For more information reference the National Mobilization Guide, Chapter 20.

National Park Service

The National Park Service Aviation program is managed at the Park level by the Fire Management Officer or Park Aviation Officer. In California there are two National Park Service Helicopters, one Type 2S in Yosemite National Park and a Type 3S in Sequoia and Kings Canyon National Parks. The primary mission for these helicopters are wildland fire response and all hazard missions including short haul emergency extraction on a case by case basis. All requests should be routed thru unit dispatch centers. Assignment length can be negotiated with the Park Fire Management Officer or Park Aviation Officer.

Federal Cooperator Aircraft Use

Cooperator aircraft to the Forest Service and Office of Aviation Services (OAS) (State contracted, State Owned, State managed National Guard aircraft, county city, or other) may be used on federal fires under the following conditions:

- The pilot and aircraft have been approved in writing for the mission, by the Forest Service Regional Aviation Officer (RAO) or the DOI Western OAS office.
- There exists a written MOU (Memorandum of Understanding) , Interagency Agreements or other document that authorizes their use and payment for this use.
- The cooperator aircraft will be operated within any limits on its use established in the written approval.
- The cooperator aircraft will be used only in situation where federal aircraft are not available.
- The cooperator aircraft will be released when federal aircraft becomes available.

The Federal Excess Personal Property (FEPP) is Forest Service-owned property that is on loan to State Foresters for the purpose of wildland and rural firefighting. Reference: <http://www.fs.fed.us/fire/partners/fepp/index.html>
CAL FIRE tactical aircraft are FEPP.

In the Initial Attack period, aircraft will be filled using the “closest resource concept”.

In the Extended Attack period, using cooperator-owned aircraft prior to exhausting contracted resources must involve a “significant and imminent threat to life or property”. When using a cooperator aircraft in the Extended Attack period, an Incident Aircraft Certification form will be completed. This form will be validated by the Federal Aircraft Coordinator at the GACC and will ensure the sending unit, the receiving unit and GACC have a completed copy. Refer to form in the California Mobilization Guide, Appendix A.

Aircraft Ordering Procedures

Initial Attack Ordering

The GACC will be notified of movement of all initial attack aircraft.

To expedite the closest available aircraft to initial attack fires, the Units will announce on the intercom when there is a status change of their Aircraft:

- Down staffed for the evening
- Brought on early in the morning
- Out of service mechanical and back in service
- Visibility conditions (smoke, fog, etc.)

- On a delay for any reason with expected time of delay

This procedure will increase the efficiency of the GACC to facilitate requests for aircraft especially during lightning events and periods of increased initial attack activity.

“Closest resource concept” will be followed by all agencies for IA and is defined as:

Regardless of the controlling agency, the agency resource that has the shortest timeframe to reach a predetermined incident location first will be dispatched. Established dispatch channels will be followed at all times. When multiple agency aircraft are available at a base, the agency specific aircraft will be dispatched to that agency’s incident first.

When an aircraft is on base and in the IA Zone of Influence, Units will order direct from the administering base for initial attack. The Unit administering the aircraft base will be responsible for:

Resource Order.

Notifying the GACC of aircraft status.

Requests for the aircraft when the closest base is vacant will be through the GACC.

The GACC will fill orders from the most appropriate source available. The most appropriate source will be determined on the basis of urgency, resource availability, delivery time, reasonable cost effectiveness, impact on other units, and consideration of the overall fire program.

The GACCs are responsible for the strategic movement of aircraft throughout the state, as needs dictate.

Units ordering aviation resources will follow the FC 106 intercom script. Refer to California Mobilization Guide Appendix A.

Items needed to be relayed between Units for aircraft dispatch are (as found on FC-106, CA Interagency Aircraft Dispatch):

- Incident Name
- Order number
- Location: Descriptive location & section, township, range *and* latitude/ longitude
When giving latitude and longitude use the format of degrees, decimal minutes (DD mm.mm)
- Air Tactics/Air to Air FM
- Victor/Air to Air AM
- Air to Ground FM, repeater tone if applicable
- Ground Tactics/FM
- Command Frequency/FM, repeater tone
- Request number
- Other Aircraft
- Hazards

Unless specified by Unit Standard Response Plan, Initial Attack Aircraft orders in ROSS should be ordered as:

Airtanker, Any Type

Helicopter, Type 2 Standard (with crew)

Fixed Wing, Leadplane

Fixed Wing, Air Tactical

Fixed Wing, Aerial Supervision Module (ASM)

Aircraft Group, IA smokejumper load

Aircraft call signs and ETA's will be relayed at the time of departure from the base.

Additional Aircraft Requests

Additional aircraft ordered may not be the closest based on GACC operational needs.

Once the Aircraft identified by the initial response plan (CAD/WildCAD) have been committed, all additional requests will be placed with the GACC by ICS standard types. For ICS typings, refer to the California Mobilization Guide Chapter 80, “Airtankers” and “Helicopters” sections.

Single Engine Airtankers (SEATs) may be used under the following conditions:

- Used as Initial Attack Airtanker as long as it is the closest resource and the pilot is IA qualified.
- If pilot is not IA rated aerial supervision must be present.
- Used with other Airtankers only if a Lead Plane, Air Attack or ASM is present.
- On State incidents, may only be used to augment Type 1, 2 and Type 3 Multi-engine Airtankers and not as a replacement.

Airtanker Dispatch Rotation

When more airtankers are available at the base than originally requested or allotted for the incident, the protection unit or Air Attack base can request rotational use of all available airtankers. The air attack base or unit will initiate the request for rotation and route it through the ECC and GACC for consideration.

At no time will additional rotation airtankers exceed the number of airtankers originally allotted to be flying on the incident.

Each airtanker assigned to the incident will be issued it's own "A" request number.

For airtanker rotation, reference the Interagency Airtanker Base Operations Guide (NFES 2271).

http://www.fs.fed.us/fire/aviation/aviation/av_library/index.html

Aircraft Diverts

Diverts

This Divert policy applies to all incidents regardless of size.

All agencies should utilize the closest available airtanker on a new incident, except when the Incident Commander (IC) has a "no divert" in place.

No Divert

When the IC recognizes critical fire advances and has urgent need for continued air support for the *direct and immediate threat to life of a firefighter or a civilian* approaching fire front, the IC shall immediately contact their dispatch and request a "no divert" for a specified number of aircraft. The dispatch center will immediately notify the appropriate GACC.

The "no divert" status will be reevaluated every 30 minutes for its appropriate use by the dispatch's direct contact with the IC or Air Attack. When the critical phase has passed, the IC shall immediately advise the dispatch center and cancel the "no divert". The dispatch center will then contact the appropriate GACC over the intercom with the cancel.

A life threat is not a justification for a blanket "no divert" for all aircraft on an incident. Incident personnel should assess the threat and request "no divert" for the number of aircraft necessary to assure safe egress from the threat.

Example: "On the Salt Fire, requesting a 'no divert' for two airtankers due to immediate life threat to firefighters and civilians"

Aircraft Flight Plan

Federal

All aircraft will have an agency flight plan prepared before the flight takes place, except for initial attack flights. Flight plans will be prepared for all flights leaving an incident to travel home or to another incident. Flight plans will be used in flight following. On flights where another unit controls the aircraft, a facsimile of the flight plan will be transmitted to all the other units involved in the flights. On incident related flights, ensure the order and request numbers are included on the flight plan. A sample of the Aircraft Flight Request form (FS 9400-1a) can be seen in California Mobilization Guide Appendix A.

CAL FIRE does not require a flight plan. Reference CAL FIRE Handbook 8100, procedure 401.

Air Communication

National Air Guard - 168.6250 MHz (Tx 110.9 Rx 110.9) - A National Interagency Air Guard frequency for government aircraft will be used for emergency aviation communications. Continuous monitoring of this frequency in narrowband mode is mandatory by Federal agency dispatch centers.

Restricted to the following use:

- Air-to-air emergency contact and coordination.
- Ground-to-air emergency contact.
- Air Guard Channel is not available for tactical frequency or use.

National Flight Following - 168.6500 MHz (Tx 110.9 Rx 110.9) is used to monitor interagency and contract aircraft. This frequency is used for flight following of official aircraft and is not intended to be used for tactical communications or incident operations. All Federal dispatch centers will monitor the National Flight Following frequency at all times.

Restricted to the following use:

- Flight following, the dispatching of local aircraft, and/or redirection of aircraft
- Air to Ground and Ground to Air administrative travel, **not** tactical communications
- **Not** authorized for ground to ground traffic

Pre-Assigned Aviation Frequencies

In order for aircraft communications to be manageable and functional, air frequencies are preassigned on a temporary basis to expedite initial attack but will remain under the control of the GACC. Occasionally the preassigned frequencies will have to be withdrawn from a Unit to serve multiple incidents on another Unit. In that event, alternative frequencies will be provided by the GACC.

For a complete listing of pre-assigned frequencies reference:

<http://gacc.nifc.gov/oncc/logistics/index.htm>
<http://gacc.nifc.gov/oscc/logistics/index.htm>

Requesting Additional Aircraft Frequencies

Initial Attack

When the aircraft communications load on an on-going incident is too congested to be handled by existing incident and air operations networks, temporary frequencies can be obtained. The IC should request additional frequencies.

Extended Attack

Extended Attack operations will be required to order new aviation frequencies allowing IA frequencies to be released.

The Unit will request the following frequencies from the GACC: Air Tactics (FM), Victor (AM) and Air to Ground (FM).

The GACC will be notified of all frequency releases.

Aircraft Flight Following

These procedures for flight following apply to all aircraft which move across Unit or Geographical boundaries. Flight following is the primary responsibility of the unit scheduling the flight (sending unit). The method to be used will be determined between the pilot and the dispatch office prior to departure. Receiving and intermediate units will only get involved in tracking the aircraft when requested by the sending unit or when the aircraft is overdue.

Once an aircraft has become airborne the flight manager/pilot will contact the ECC and relay the following information, this information will also be relayed when the aircraft is handed off to another unit for flight following responsibility

- Aircraft tail number/Call sign
- Number of souls on board
- Amount of fuel on board (hours/mins)
- Estimated flight time to destination and/or first fuel stop.

- Aircraft will advise on method of flight following (AFF is the preferred method).

National Flight Following – Federal. Can be used for flight following of official aircraft and for the use as a local aircraft dispatching frequency for flight following to an incident.

Automated Flight Following (AFF). AFF displays real time information regarding an aircraft's location, speed, heading, altitude, and flight history.

Federal: For more information on this see the National Mobilization Guide, Chapter 20.

CAL FIRE: Reference the CAL FIRE Handbook 8100, procedure 400.

Web link for AFF: <https://www.aff.gov/>

Radio check-in/check-out Flight following requires verbal communication via radio every 15 minutes. The ECCs will log the aircraft call sign, latitude, longitude and heading.

Flight Following Responsibilities

Sending Unit

- Ensure that the flight crews are properly briefed on flight following procedures, responsibilities, and frequency. Flight follow the aircraft to its final destination. Advise the pilot of any exceptions to routine flight following procedures. Obtain ATD (Actual Time of Departure) from initial departure airport from pilot/vendor or chief-of-party.
- Communicate to local GACC through established ordering channels all aircraft flight plans which cross Unit or GACC Boundaries. All resources will advise the GACC of all aircraft movement. Make sure the sending dispatch telephone number appears on the flight plan.
- Notify GACC of any delays/advances of a flight plan exceeding 30 minutes.
- Initiate appropriate procedures for overdue/missing aircraft. Utilize agency Aircraft Search/Rescue Guides as appropriate and notify GACC of overdue aircraft.

CAL FIRE reference the CAL FIRE Handbook 8100, procedure 406 for aircraft accident/incident procedures.

Pilot

- Receive briefing of flight following procedures from sending ECC.
- File an FAA flight plan.
- Obtain and carry the sending ECC, GACC's and NICC's 24 hour telephone numbers.
- Contact sending ECC at time of initial departure and provide ATD.
- Contact sending ECC while enroute as directed.
- Call sending ECC upon arrival at destination.

Receiving Unit

- Notify the sending unit of any aircraft which has not arrived within 30 minutes of ETA.
- If problems are encountered contacting the sending unit, contact the GACC for assistance.

Sending GACC

- Forward flight plan information to the receiving GACC
- If flight crosses GACC boundaries, forward to NICC.
- Notify receiving GACC and NICC of any delays/advances of flight plan exceeding 30 minutes.
- Immediate notification to NICC when an aircraft on GACC to GACC flight is overdue/missing.
- Immediate notification to CAL FIRE Region Duty Officer when a CAL FIRE aircraft is overdue/missing.
- Immediate notification to Forest Service Regional Aviation Safety Officer or respective DOI Aviation Managers when an aircraft is overdue/missing.
- Coordinate with units/GACCs/NICC in searches for overdue/missing aircraft.

Receiving GACC

- Relay flight plans to all units affected by the flight plan through established dispatch channels.
- Notify intermediate or receiving units of any delays/advances of flight plan exceeding 30 minutes.
- Coordinate with intermediate or receiving units in searches for overdue/missing aircraft.

NICC

- Monitor federal flight plans for additional utilization.
- Coordinate with sending and receiving GACCs in searches for overdue/missing aircraft.

Aircraft Release

All aircraft users should anticipate that tactical aircraft could be reassigned to new incidents at any time, especially upon the completion of the current assignment.

At no time will supervisory aircraft or the ECC release positive control of any tactical aircraft until approved by the GACC. Flight following will be performed on all released tactical aircraft.

Units may release charter and CWN aircraft to the vendor without flight following, providing there are no federal passengers or cargo on board and will make notification to the GACC.

All airtankers will be released daily and reordered for next day's shift by 1900 hours, under a new request number.

All federal aerial supervision aircraft may remain on their original request number (A#) until released from the incident, diverted to another incident, or go on days off.

On State incidents, all (state and federal) aerial supervision aircraft will be released at the end of each day. They need to be reordered for next day's shift by 1900 hours, under a new request number.

Notification for Aircraft Accident or Incident With Serious Potential

Upon notification of an aircraft accident or incident with serious potential the following notifications will be made:

Federal

Unit - Immediately notify their Aviation Officer, Unit Duty Chief, Agency Administrator, and GACC Federal Aircraft Coordinator.

Federal Aircraft Coordinator – Notify the GACC Duty Officer, the Regional Aviation Safety Officer, the Regional Aviation Officer and NICC Coordinator-On-Duty (COD).

State

Unit - Notify through the Unit Duty Officer chain-of-command, the Unit Duty Chief

Unit Duty Chief - Notify through the Duty Chief chain-of-command, the Regional OCC Duty Chief, Sacramento Fire Protection Duty Chief and Tactical Air Operations Duty Officer.

Unit Duty Officer - Notify the Aviation Safety Officer via the Aviation Management Unit (AMU).

Reference the CAL FIRE Handbook 8100, procedure 406.

Air Tactical Supervision

Refer to the "Aerial Supervision Aircraft" chart at the end of this chapter for a listing of identifiers, locations, pilots and qualifications.

Aviation operations on an incident are often conducted under extremely adverse flight conditions such as congested airspace, reduced visibility, adverse weather conditions and mountainous terrain., all of which add to the complexity of aircraft operations over an incident. For Fire Traffic Area over an incident, refer to the California Mobilization Guide Appendix A.

Air Tactical Supervision Over an Incident.

Individual situations with their inherent complexities dictate the level of supervision required to safely and effectively conduct an aerial suppression operation. This section identifies levels of Air Tactical Supervision required over an incident and summarizes the intent of USFS, DOI and CAL FIRE manual directives. Reference the Interagency Aerial Supervision Guide.

Aerial Supervision Requirements

The following defined terms are used in this section, per the Interagency Aerial Supervision Guide:

Required: Aerial supervisory resource(s) that shall be over the incident when air tactical operations are being conducted.

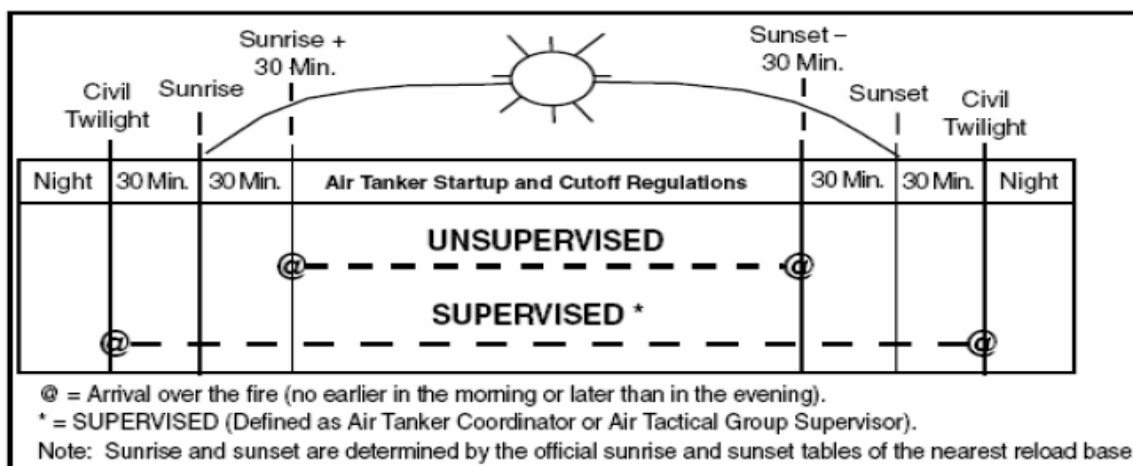

Ordered: Aerial supervisory resources shall be ordered by the appropriate controlling entity. (Air tactical operations may be continued while the aerial supervision resource is enroute to the incident or is on order. Operations can be continued if the resource is not available.)

- 1 Over: The air tactical resource is flying above or is in a holding pattern adjacent to the incident.
- 2 Assigned To: Tactical resource allocated to an incident. The resource may be flying to and from, or on hold at a
- 3 ground site.

Incident Aerial Supervision Requirements

When aerial supervision resources are co-located with retardant aircraft, they should be launched together on the initial order to maximize safety, effectiveness, and efficiency of incident operations. Incidents with 3 or more aircraft over/assigned to them should have aerial supervision over/assigned the incident. Federal policy dictates additional requirements as listed below.

Situation	Lead/ATCO/ASM	ATGS
Airtanker not IA rated.	Required if no ATGS	Required if no Lead/ATCO/ASM
MAFFS	MAFFS Qualified Lead/ASM	
When requested by airtanker, ATGS, ATCO, or ASM	Required	Required
Foreign Government airtankers.	Required if no ATGS	Required if no Lead/ATCO/ASM
Multi-engine airtanker: Retardant drops conducted between 30 minutes prior to, and 30 minutes after sunrise, or 30 minutes prior to sunset to 30 minutes after sunset.	Required if no ATGS	Required if no Lead/ATCO/ASM
Single engine airtanker (SEAT): SEATs are required to be "on the ground" by ½ hour after sunset.	See level 2 SEAT requirements	See level 2 SEAT requirements
Level 2 SEAT requirements: Level 2 rated SEAT operating over an incident with more than one other tactical aircraft on scene.	Required if no ATGS	Required if no Lead/ATCO/ASM
Retardant drops in congested/urban interface areas.	Order	May use if no Lead/ATCO/ASM
Periods of marginal weather, poor visibility or turbulence.	Order	Order

* The chart above does not apply to Night Aviation Operations.

Airtanker dispatch, use the official sunrise, start-up, cutoff, and sunset times of the Airtanker Base nearest the fire.

Aerial Supervision Module (ASM)

The ASM is a fixed wing platform that utilizes 2 crewmembers to perform the functions of traditional air attack and when necessary, performs low-level operations including Lead profiles. The ASM requires both crewmembers to be trained as a team, utilizing Crew Resource Management (CRM) skills and techniques to enhance safety, efficiency and effectiveness. Module operations require a fluid relationship between crewmembers that incorporates task sharing and coordination. The ASM provides aerial supervision in support of incident objectives.

An ASM is formed by pairing an ASM qualified Lead Pilot and an ASM qualified ATGS.

An ASM can perform Lead Plane duties and Air Attack duties at the same time.

National designators will be used to identify the operating agency and crewmembers.

For Forest Service ASM units, the Lead Plane call sign will be used and “Bravo” will replace “Lead”. For example: Bravo 5-2. For CAL FIRE ASM units, call sign “Charlie” will be used. BLM ASM’s have national call signs assigned.

All dispatching of Lead Planes/ASMs will be done by the GACCs. Normal ordering procedures will be followed.

There are three Forest Service Lead Planes/ASM assigned to California: One in Southern California GACC at Lancaster Fox Field, and two at the Northern California Service Center in Redding. They are staffed seven days a week during the summer months, and are available the rest of the year, pilot dependent. The GACC Federal Aircraft Coordinators will coordinate with the two Aviation Groups for the availability and assignments for all Federal Lead/ASM planes. Refer to end of this chapter for complete listing of pilots, locations, qualification and identifiers.

GACCs will be responsible for the Aircraft Flight Schedules, form 9400-1a, when needed for the aircraft.

CAL FIRE may, upon request, provide up to three (3) qualified Lead plane/Aerial Supervision modules. Minimum status includes MAFFS and VLAT lead qualifications.

Airtankers

Airtanker Standard ICS Types

Type	Capacity
1	3,000+ gallons
2	1,800 to 2,999 gallons
3	800 to 1,799 gallons
4	up to 799 gallons

Very Large Airtanker (VLAT)

VLAT can only be reloaded at specific bases. They are identified in the “Airtanker Bases” chart at the end of this chapter.

VLATs are ordered in ROSS as a Type 1 airtanker. Special needs to specify “VLAT”.

DC-10/B-747:

These aircraft can be used on all lands in California and if available, may require up to 24 hours for activation. These aircraft are best utilized on rapidly emerging fires which are, or will be moving into the extended attack phase. Consider using the DC-10 (12,000 gallons) or B-747 (20,000 gallons) if you are anticipating continuous use of multiple Type 1 and Type 2 Airtankers.

DC-7s:

These are compact resources (Governors agreement) between the States of California and Oregon. They are not approved for use within federal jurisdiction, unless it is a situation that requires immediate action to prevent the loss of life and property and has been authorized by the local Federal Line Officer or Regional Aviation Officer. This approval will be on a case by case basis. Any qualified Federal or State Lead Plane can lead the DC-7s.

Scoopers:

The CL-215 and 415 are approved water scooping aircraft in California.

New Generation Federal Airtankers

As the new generation airtankers come on an exclusive use contract with the Forest Service, they will have individual operating plans that will be followed. These will be Type 1 Airtankers.

Federal Modular Airborne Firefighting Systems (MAFFS)/Airborne Firefighting System (AFFS)

MAFFS/AFFS are military transport aircraft reconfigured to deliver retardant. They are activated to augment and enhance contract and agency airtanker capabilities. The Air Force requests a 24 hour lead time, however, in some cases they can mobilize quicker.

Requests will be placed through normal dispatch channels in ROSS.

MAFFS/AFFS can only be reloaded at specific bases. They are identified in the “Airtanker Bases” chart at the end of this chapter.

Smokejumper Aircraft

California Smokejumpers and aircraft are national resources, administered and managed by the GACCs. Priorities for their use are established nationally.

The Region maintains two smokejumper (para-cargo) fixed wing aircraft during the active fire season and are based at Redding. They are identified as “Jump 5-1” and “Jump 5-2”.

NOPS will determine the number of aircraft and Smokejumpers available for a given day.

Once on the ground, the Smokejumper Incident Commander/Crew Leader will contact the ordering unit or local Incident Commander and provide a situation report. Smokejumpers arrive at an incident with tools and supplies for 3 days of fire suppression activity. The Smokejumper Incident Commander will contact the ordering unit and arrange for incident demobilization.

Responsibility for arranging transportation of Smokejumpers back to their base lies with the ordering unit. If problems arise, contact GACC for assistance. The GACC may be able to provide transportation for the Smokejumpers and their gear.

Satellite Bases

When Smokejumpers are being deployed to SOPS, Satellite Bases may be activated. When a Unit in SOPS places the initial request for jumpers, the request will be placed to NOPS to fill; the SOPS Federal Aircraft Coordinator will then canvas other potential users to determine if there is a need to activate a Satellite Base. When a SOPS Satellite Base is activated, a Smokejumper Liaison will be assigned by the NOPS Smokejumper Base. Potential SOPS Satellite Bases include, but are not limited to: Fresno, Porterville, San Bernardino, Stockton, Bishop and Santa Maria. Potential NOPS Satellite Bases include, but are not limited to: South Lake Tahoe, Grass Valley, Chester, Siskiyou, and Rohnerville.

When there is an activation of a Satellite Base in SOPS jurisdictional area, the operational control of the Satellite Base will remain under SOPS. The Smokejumper Plane and the Smokejumpers themselves will be hosted by SOPS and be requested on OSC Preparedness/Preposition order.

NOPS will fill all requests for Smokejumpers, para-cargo, Smokejumper/para-cargo aircraft, and necessary supplies for all Smokejumper satellite base operations. NOPS Smokejumper base will ensure that all satellite smokejumper bases are properly outfitted. Any additional orders for Smokejumpers, para-cargo, supplies, and aircraft will be made through NOPS.

All requests from a SOPS unit for Smokejumpers when there is an activated satellite base will be processed through normal dispatch channels. All agencies will place the request for Smokejumpers as an “A” number as “Load, Smokejumper, Initial Attack”, located under Aircraft Groups in ROSS.

Example: Fresno Satellite base needs additional Jumpers or equipment. The Smokejumper Liaison Officer will contact the NOPS base and ask for additional Jumpers or equipment. When the desired number of Jumpers gets finalized, then NOPS aircraft coordinator will contact the designated person at SOPS and ask for the appropriate “O” numbers on the OSC order, to be placed with NOPS to be filled. If the request for additional Jumpers cannot be fulfilled by the Jumpers currently on base then NOPS may put in a request for boosters.

Satellite base resources; Smokejumpers, supplies, and aircraft, will be demobilized through NOPS.

Para-Cargo Delivery

The Smokejumper Unit is charged with maintaining the para-cargo delivery system.

The following information is needed to fill a para-cargo request:

- Desired Cargo.
- Incident name, order number and “A” request number.
- Location of drop zone (Legal or Latitude X Longitude).
- Ground contact.
- Desired time of delivery.

Almost all fire cache items can be delivered via para-cargo. In addition, special items such as fresh food, drinking water and sack lunches can also be delivered. Emergency medical care and rescue equipment can be delivered via para-cargo. The Smokejumper unit maintains two Sled Kits rigged for para-cargo delivery. Trauma kits with IV blood expanders, oxygen, splints and equipment to monitor vital signs are carried on the jumper aircraft and can be ordered. The trauma kit must be accompanied by a qualified member EMT of the Smokejumper Unit. IV starts must be administered by qualified EMT Smokejumpers and only to U.S. Forest Service employees.

The time frames for delivery of para-cargo are dependent on the availability of requested items, aircraft, cargo riggers and cargo droppers. As a general rule, any fire cache items can be ready within two hours and special items within four hours. Orders placed after dark can be prepared at night and delivered at dawn.

Para-cargo weight capacities vary for aircraft assigned.

Infrared Aircraft

Infrared mapping services are available for use on any wildland fire activity and are obtained through the appropriate GACC in accordance with the National Infrared Operations Plan.

Requests to the GACC will be via ROSS and a completed Infrared Aircraft Scanner Request form, submitted on-line from the National Infrared Operations (NIROPS) website: <http://nirops.fs.fed.us/rcr/scanner>. If internet is unavailable, a faxed copy to the GACC will be accepted. Request(s) need to be received at the NICC by 1500 Mountain Time to be scheduled for that night’s flight, which means they must be received by the GACC no later than 1345 Pacific Time.

For the Infrared Aircraft Scanner Request Form, refer to the California Mobilization Guide, Appendix A

A qualified Infrared Interpreter (IRIN) must be confirmed or in place at the time of the Infrared flight.

Refer to the California Mobilization Guide Chapter 60, Specialized Overhead

Night Aviation Operations

Forest Service

The decision to have night operations in Southern California follows extensive analyses that indicate helicopter night operations can keep down the costs and risks of wildfires by helping keep fires small.

An Exclusive Use helicopter will be available during fire season 24-hours a day and an Air Attack platform will be staffed at night for firefighting operations. The night helicopter operations will be based on the Angeles National Forest and will support wildfire suppression on Forest Service-protected lands, including communities and homes within and adjacent to the Angeles, Cleveland, and San Bernardino National Forests, and the southern half of the Los Padres National Forest. At night, the helicopter will be restricted to water dropping only. Daylight missions are not restricted to water dropping.

Ordering will follow standard procedures, with a “*Special Needs*” of “night operation capable”.

ROSS order helicopter as: Helicopter, Type 2 Standard

ROSS order Air Attack as: Fixed Wing, Air Tactical

Cooperators

Cooperator helicopters can be used if proper agreements, approvals and procedures are in place.

Helicopters

Helicopter Standard ICS Types

Limited Helicopters (L): no passenger carrying, external cargo only.

Standard Helicopters (S): passenger carrying, internal cargo and external cargo.

Type*	Bucket size	Seats (including pilot)
1	700 gallons	16
2	300 gallons	10
3	100 gallons	5
4	75 gallons	3

* Type is based on bucket size and passenger capability.

Type 2S with crew is the standard IA helicopters

Type 3S with crew are additional IA helicopters

- A Host Unit may use their Type 3S helicopters on local IA response

Type 1L are Large Fire Support helicopters (LFS)

- These helicopters are primarily used as extended support of IA fires or in support of established large fires, not on standard IA response requests
- A Forest may use their Type 1L helicopter on local IA response
- If all Type 2S helicopters are committed, the GACC may go to a Forest with a Type 1L helicopters on an IA response

Federal Helicopter Rappelling

Helicopter rappelling performed by qualified helitack modules can be utilized for a variety of missions where conventional means of delivering personnel by ground or by other aerial platform is prohibitive due to time, geographical features, or other environmental conditions. Either a Booster or CWN rappeller can be ordered through normal dispatch channels.

Refer to the “Helicopter” chart at the end of this chapter for a listing of rappel qualified helicopters in California.

Air Rescue

CAL FIRE

All CAL FIRE helicopters can perform rescue operations. This capability is intended for use on incidents to rescue trapped or endangered firefighters and citizens when there is no other feasible alternative for evacuation.

National Park Service

NPS have 2 helicopters based at Yosemite National Park at Crane Flat (Type 2S helicopter) and Sequoia/Kings National Park at Ash Mountain (Type 3S helicopter). Both helicopters serve as the parks' primary rescue/life flight helicopter for life threatening emergencies and may not always be available.

Reference the DOI Helicopter Shorthaul Handbook: https://www.iat.gov/docs/HS HH_2010.pdf

For additional air rescue resources, reference the Interagency Helicopter Extraction Source List: [http://www.fs.fed.us/fire/aviation/av_library/Revision_6_EHE_Source_List\(03-12\).pdf](http://www.fs.fed.us/fire/aviation/av_library/Revision_6_EHE_Source_List(03-12).pdf)

Firewatch Aerial Supervision Platforms

The USFS Firewatch Aerial Supervision Helicopter is a Bell 209 Cobra Helicopter converted for use as an aerial supervision and remote sensing intelligence gathering platform. There are currently two platforms in use in California, 507 and 509, refer to the “Aerial Supervision Aircraft” chart at the end of this chapter

Call signs for mission clarification:

- As ATGS profile, use the call sign “Air Attack”.
- As HLCO mission, use the call sign “HelCO”.
- As intelligence gathering or mapping mission use the call sign “Firewatch”.

Airspace Coordination

Fire Traffic Area (FTA)

FTA is the initial attack airspace structure over a wildland fire.

For examples of FTA reference www.airspacecoordination.net and refer to the California Mobilization Guide Appendix A.

Temporary Flight Restrictions, FAR 91.137 (TFR)

Temporary airspace restrictions will be established when incident related Aviation activities present potential conflict with other Aviation activities. The FAA requires that latitude/longitude information for TFRs (Temporary Flight Restrictions) must be provided in degrees, minutes, and seconds, including reference to north latitude and west longitude. If seconds' information is not available, add two (2) zeros to the description. Do not use spaces, commas, or other symbols in the description. Example: ddmmsN/ddmmssW or 450700N/1175005W. The corner points should be listed in a clockwise sequence around the requested TFR to avoid "bow tie" depictions.

The Interagency Airspace Coordination Guide (located at www.airspacecoordination.net) describes further how flight restrictions are requested and implemented.

Units are responsible for initiating and cancelling all TFR requests, with a phone call and completion of the Interagency Request for Temporary Flight Restrictions form (FAR part 91.137), to the appropriate GACC, as well as processing request in ROSS. This form is located at: http://gacc.nifc.gov/oncc/logistics/aviation/docs/tfr_request.rtf and may be viewed in the California Mobilization Guide Appendix A. All violations must be reported immediately to the GACC.

GACCs are responsible for coordinating the issuance and cancellation of all requests with the FAA. The GACCs will process the local advisory NOTAM with FAA. During high incident activity an Airspace Coordinator may be requested. The GACC will contact the FAA-ARTCC, and military facility if applicable.

Media aircraft, Medical Aircraft and Law Enforcement aircraft are allowed in the TFR as long as they contact the Air Attack on the posted Air to Air frequency to request permission prior to entering the area and at what altitude.

Military Training Routes (MTR) and Special Use Airspace (SUA)

Military Training Routes and Special Use Airspace present conflicts with incident related aviation activities and will be identified by local Units. One source for this information is AP-1B, Flight Information Publication, "Military Training Routes." Each ECC should download a current edition of the AP-1B. Instructions for access are available at www.airspacecoordination.net under "Airspace Coordination".

Special Use Airspace may be found on Sectional Aeronautical Charts. Critical Airspace information pertinent to flight should be organized for easy and rapid utilization; i.e., displayed on dispatching hazard. Special Use Airspace (SUA) includes Low Altitude Tactical Navigation Areas (LATN), Military Operations Areas (MOA), Restricted Areas (RA), Prohibited Areas (PA), Alert Areas (AA), Warning Areas (WA) and Controlled Firing Areas (CFA). Units may obtain Operational Agreements with the Military Units having control over any Special Use Airspace in their area and keep the Military advised of all activities (fire and non-fire) that may be occurring inside these areas. Units will follow up with notification to the GACC. Further direction may be obtained in the Interagency Airspace Coordination Guide at www.airspacecoordination.net.

For deconfliction of Special Use Airspace, refer to the Documentation of Contacts Requesting Deconfliction of Airspace by the Military form in the California Mobilization Guide, Appendix A.

Incident Related

When air activities of an unplanned nature (i.e., fire or flood) occur that may conflict with an MTR or an SUA the GACC Aviation Coordinator will contact the responsible military originating or scheduling facility to notify them of the situation and gather information on whether the routes are active. Provide the following information:

1. MTR number and points along the route where incident is located.
2. Whether route needs to be closed or altitude adjusted so route can remain operational and safe.
3. Hours the restriction/change is to be in effect.
4. Temporary airspace restriction, TFR (91.137) is filed with the FAA. If a TFR has not been requested through the FAA, the request to the military is considered a voluntary cessation of activity(s); it is between the agency and the military. Any conflicts arising will need to be coordinated directly with the military as

no FAA air space restriction has been violated. All conflicts should be reported on SAFECOM Report (or OAS-34), to Regional/State Aviation Safety Officer.

Non-Incident Related

When a Unit schedules an air activity project that may conflict with a MTR, the GACCs Aircraft Coordinator will assist with the operating procedures and ensure that the use of the MTR is coordinated with the responsible military facility. The project needs must be made known to the GACCs Aircraft Coordinator at least two days prior to starting the project to allow time to coordinate with the military, so they may adjust their schedules if needed.

Temporary Airport Control Tower Operations

Requesting FAA Air Traffic Control Support - When aviation operations in support of an incident become too complex or unsafe at uncontrolled airports or helibases, the FAA may be requested to provide air traffic control support.

GACCs within the FAA's Western Service Area (AK, AZ, CA, CO HI, ID, MT,NV, OR, UT, WA, and WY) may request FAA Air Traffic Control support through the Western Service Area Agreement.

FAA Temporary Control Towers are ordered in ROSS as an A number. A lead time of 24 hours is desirable when ordering. If the FAA cannot supply radios, the incident COML will order radios as a Supply Request through established ordering channels.

Requesting Units are required to provide full support and subsistence for FAA assigned personnel, as needed, per FAA Agreement.

- Ground/takeoff control problems.
- Approach control/landing problems.
- Where it is needed.
- Approximate duration of use.
- Contact person's name and phone number that will provide support and subsistence for FAA personnel.

Requesting Unit must complete and submit Temporary Airport Control Tower Form to the GACC:

http://gacc.nifc.gov/oncc/logistics/aviation/docs/temp_tower.doc

The GACC will contact the FAA's WSA Regional Operations Center (ROC) at 425-227-1999 and ask to speak to a duty officer regarding a Temporary Tower order. The ROC will connect the GACC with the appropriate FAA Duty officer. The ROC is the primary point of contact for the FAA for this request. The Temporary Tower Request Form along with the aircraft resource order will be forwarded to the FAA at the time of the request. In addition, there is a helpful checklist in Chapter 11 of the Interagency Airspace Coordination Guide that aids in the ordering and set up process of a temporary tower.

Ordering procedures is outlined within the current FAA agreement located at www.airspacecoordination.net.

Airspace Conflicts

Consult the Interagency Airspace Coordination Guide: www.airspacecoordination.net

Call When Needed (CWN) Aircraft

Call signs for CWN helicopters will be the last 3 numbers of the FAA tail number.

For the Passenger and Cargo Manifest Form for CWN flights, refer to California Mobilization Guide, Appendix A.

CAL FIRE

Unit ECCs are authorized to directly hire CWN aircraft: reference policies and rules of the current CAL FIRE 8300 Handbook, Section 8353. The current list of CWN aircraft is available on the CAL FIRE intranet.

If Incident activity prohibits the ECC personnel from implementing the CWN hiring process, contact the GACC for assistance.

All payments are processed through the unit's finance office utilizing the CAL FIRE 62 Emergency Aircraft Use Invoice.

Department of the Interior

A list of approved CWN aircraft and pilots is available via the Internet at: <http://oas.doi.gov/apmd/cwn/cwn.htm> and is maintained by the Office of Aviation Services (OAS). DOI agencies are required to use the OAS Source List when ordering and utilizing CWN aircraft and pilots.

All Type 3 CWN helicopters that are located within the administrative jurisdiction of a BLM District may be ordered by the appropriate ECC from the OAS Source List. The ordering unit will order or provide a qualified Helicopter Manager and crew members.

CWN Helicopter Selection Factors:

- Closest forces.
- Cost effectiveness.
- Performance specifications for density altitude/high altitude operations.
- Carded and contracted for local or emergency use.
- Special applications such as helitorch, L.A. tank, etc.
- Daily availability based on expected duration of assignment and projected use.

Type 1 and 2 helicopters are available under National Contract and will be requested through the GACC by ICS type and specifications.

CWN Inspection Criteria

All DOI helicopters are solicited and inspected by the OAS. The OAS and Forest Service will honor each other's inspection certifications. If the aircraft is not used immediately, it must be reinspected by the Project Inspector for contract compliance prior to use. This inspection includes checking all required equipment for installation and function. In addition, the log book will be reviewed to see that the aircraft has not been damaged and that it is in compliance with required inspections (10-hour, annual, etc.).

Forest Service

A listing of pilots and aircraft carded for the current year are kept at the GACC.

Forest Service requests for CWN aircraft will be placed to the appropriate GACC. The GACC will utilize the aircraft that best accomplishes the requested mission and provides maximum cost benefit.

The GACC will process requests for Federal T3 CWN Helicopters directly with the vendor. Type 1 and 2 helicopters are available under National Contract and will be requested through the GACC by ICS type and specifications. For project or emergency hire the ECC must identify the manager's name in "Special Needs". The helicopter and manager will be married up at a non-fire incident location.

The GACC will process requests for Federal aircraft directly with the fixed wing vendor. Forest Service requests for CWN aircraft will be placed to the appropriate GACC. The ECC must identify the ATGS or Aerial Observer name in "Special Needs".

For additional pre-assigned call signs refer to the end of this chapter in the Air Attack/Fire Detection chart.

When the aircraft are being used for activities other than for fire detection the FAA registration number will be used as the call sign.

Forest Aviation Officers are responsible for insuring all Flight/Aircraft Use Report (FS 122s) are submitted into the ABS system for CWN aircraft used on their Forests. All payments will be processed through Aviation Business System (ABS) web site. CWN Managers are responsible for providing performance evaluation forms to the GACC Aviation Coordinator for payment management in ABS.

For all non-fire projects a copy of the Project Aviation Safety Plan needs to be provided to the ECC and GACC by the Project Manager.

CWN Helicopter Modules – Federal

Call When Needed (CWN) helicopters will be managed by a qualified module when assigned for incident use. For project work, a qualified helicopter manager (HMGB) will be assigned as a minimum on federally hired CWN helicopter contracts.

Module requirements:

HELICOPTER TYPE	FAA STANDARD/ TRANSPORT CATEGORY	FAA STANDARD Category Temporarily Designated for Limited Use	FAA Category Permanently Designated for Limited Use or FAA Restricted Category
1	Manager * plus four (4) Helicopter Crew Members**	Manager * Only	Manager * Only
2	Manager * plus three (3) Helicopter Crew Members	Manager * Only	Manager * Only
3	Manager * plus two (2) Helicopter Crew Members	Manager * Only	Manager * Only

*If the intended use is for Forest Service or DOI initial attack, the helicopter manager request must specify that a fitness level of arduous is required. Any other qualification requirements (ICT4, etc.) must also be specified in Special Needs. Remember to specify where the HMGB and helicopter are going to marry-up, also notated in Special Needs.

** Forest Service no longer allows passenger transport in Type 1 helicopters with the exception of authorized military helicopters.

Large Transport Aircraft – Federal

Large transport aircraft are used to mobilize and demobilize large volumes of overhead, crews, equipment and supplies nationally and internationally.

Large transport aircraft are National Resources and requests are filled at the national level (NICC) after the request has been initiated at the GACC, by the Aircraft Coordinator.

The GACCs will place these requests with NICC at least 48 hours before the flight is needed.

Airport Guide

The Pilots Guide to California Airports will be used in California. It is recommended that each Unit maintain their own copy(s) through the subscription process or have access to the internet site, due to continual updates.

Resource Extension Request Form**Resource Extension Request Form****RESOURCE and INCIDENT INFORMATION:**

Resource Name: _____

Incident Name: _____ Incident #: _____ Request #: _____

Position on Incident: _____

EXTENSION INFORMATION:

Prior to any extension consider the health, readiness and capability of the resource. The health and safety of incident personnel and resources will not be compromised under any circumstances.

Length of Extension and last work day:Justification (Select from the list below):

- ☐ Life and property are imminently threatened,
- ☐ Suppression objectives are close to being met, or
- ☐ Replacement resources are unavailable or have not yet arrived.

REQUESTED BY* :

Incident Supervisor: _____ Incident Position: _____

1) Resource or Resource Supervisor: _____

2) Incident Commander or Deputy: _____

3) Host GACC Coordinator on Duty: _____

4) Home Unit Supervisor: _____

5) Sending GACC Coordinator on Duty: _____

6) NICC (only if National Resource): _____

*Signatures should be gathered in the order they are numbered above

December 2011

FC 106 Intercom Script

All requests for agency initial attack and immediate need extended attack aircraft will be ordered through the GACC via the Intercom. The script below will be used to ensure all required information is conveyed in a standard format.

New Order

When aircraft is requested via the intercom it is assumed they are being requested for a wildland fire.

For use of aircraft on incidents other than a wildland fire, the incident type must be announced at the start of the intercom traffic. Example: North Ops, Fortuna, new order, aircraft for Air Rescue. All incident, location and hazard information will be provided but the frequencies provided will be limited to what is being used for this incident type.

Required Information:	Examples:
Unit with the new incident addresses GACCs/Regions, Units/Forests, and air bases affected, based on where the requests have been placed in ROSS.	North Ops, Redding Air Attack Base, Redding, New Order (Wait for acknowledgement)
Incident Name	On Incident name Millville
Order Number	Order number SHU-5555
Descriptive Location (i.e. prominent landmark or community; do not use street addresses)	Descriptive location: Highway 44, 5 miles east of Palo Cedro
Legal Description and Latitude/Longitude Decimal minutes: read only 2 numbers past the decimal. 40 33.4051 would be 40 degrees 33 decimal 40 minutes. Read: four zero degrees; three three decimal four zero minutes. Read: one two two degrees; one zero decimal zero three minutes.	Legal: Section 6, Township 32 North, Range 2 East, off Mt. Diablo Latitude: 40 degrees 33 decimal 40 minutes; by Longitude 122 degrees 10 decimal 03 minutes.
FM Air Tactics and Frequency Read: one five one decimal three zero two five.	Air Tactics: Air Tactics 23, 151.3025
Air to Air AM (Victor) Frequency Read: one three five decimal five seven five.	Victor: 135.575
Air to Ground Frequency and Tone (if applicable) Read: one five one decimal two two zero; Tone one	Air to Ground: CDF Air to Ground 151.220 Tone 1
Ground Tactical (Frequency # given when tac is non-standard)	Ground Tactics: CDF Tac 6
Command Frequency and Repeater Tone (Frequency # given when Command is non-standard)	Command: SHU Local Tone 6.
Break	Break (Pause for North Ops/South Ops to acknowledge before continuing)
Request Numbers and resources dispatched or needed	Alpha 1, using Air Attack 240; Alpha 2, to Redding for 1 air tanker; Alpha 3, to Redding for 1 air tanker; Alpha 4, requesting one air tanker Alpha 5, using Copter 205
Other Aircraft	Other Aircraft: CHP Copter H13
Hazards	500 KV Power lines over the fire

Old Order, New Request – Immediate Need

Required Information:	Examples:
Unit with the existing old incident addresses their GACC/Region.	North Ops, Redding, old order SHU-5555, new request (Wait for acknowledgement)
Request Numbers and resources dispatched or needed	Alpha 6, requesting one air tanker, any type, Alpha 7, requesting one type 2 air tanker.

Old Order, Fill Information

Required Information:	Examples:
Unit/Airbase filling the request addresses the GACC/Region and requesting Unit and provides the order number of the incident the aircraft is being assigned to.	North Ops, Redding, Redding Air Attack Base, old order SHU-5555, aircraft information (Wait for acknowledgement)
Request Number, resource identifier, eta to incident and AFF Status of Aircraft.	Alpha 1, Air Attack 240 off Redding ETA 1520. (AFF Status of Aircraft) “Positive/Negative AFF”.

Old Order, Release Information

Once the aircraft has departed their base and Fill Information is voiced over the intercom, the resource is considered to be released requiring release information from the requesting Unit. If positive radio contact has not been made with the responding aircraft, notify the GACC, sending Unit and Airbase by stating “Negative Contact”. This advises the GACC, sending Unit and Airbase that the requesting ECC has not been able to contact the aircraft to advise them of the release.

An aircraft is considered “Canceled” only if prior to becoming airborne and receiving Fill Information the aircraft is determined not to be needed.

Required Information:	Examples:
Unit with the existing old incident addresses their GACC, sending Unit and Airbase.	North Ops, Oroville, Chico Air Attack Base, Redding old order, SHU-5555. aircraft release (Wait for acknowledgement)
Request Number, resource identifier, load status, the name of the base they are returning to and eta	On Alpha 4, Tanker 93 released with half a load, returning to Chico, ETA 1548.

Incident Information

If an incident is escalating and the ECC feels that it will need to continue ordering resources or will have resources committed for an extended length of time, providing a brief incident update over the intercom is appropriate. This update will allow neighboring Units to assess potential for resource requests. Updates are low priority traffic on the intercom.

Incident/Fire Update example;

“North Ops, Redding incident update on SHU-5555, the Millville incident. The fire is 150 acres with moderate rate of spread in grass, brush and oak woodlands. Potential for 500 acres. Anticipate additional orders for aircraft, crews, equipment and overhead.”

FC106 Intercom Voice Out Script

North Ops, and/or South Ops _____,
(ECC's and Tanker Bases you would Notify), (Your Unit)

New Order (Wait for acknowledgement from each location you contacted)

On Incident Name: _____ Order Number: _____
(3 letter unit identifier plus inc #)

Descriptive Location: _____
(Major Landmark, City, Town – something recognizable to a resource coming from out of the Unit.)

Legal: _____
(Section, Township, Range, and Meridian)

Latitude: _____ by Longitude: _____

(Degree, Decimal Minute format) (Degree, Decimal Minute format)

Air Tactics, _____; Victor, _____
(Frequency Name and Number) (Frequency Number)

Air to Ground, _____ Ground Tactics, _____
(Frequency Name, Number) (Frequency Name)
(and Tone (if required)) (Freq. # is optional, use if unfamiliar frequency)

Command _____
(Frequency Name, Repeater Tone)
(Frequency Number is optional use if unfamiliar frequency)

Break (wait for OCC acknowledgement to continue)

Alpha One – Requesting (or Using if aircraft you direct dispatch) _____
Type of Aircraft

Alpha Two – Requesting (or Using if aircraft you direct dispatch) _____
Type of Aircraft

Alpha Three - Requesting (or Using if aircraft you direct dispatch) _____
Type of Aircraft

Alpha Four - Requesting (or Using if aircraft you direct dispatch) _____
Type of Aircraft

Other Aircraft: _____
(any aircraft at or going to incident not noted above)

Aircraft Hazards: _____
(Power lines, etc.)

NWCG Fire Class Size**NWCG Wild Land Fire Class
Size**

Class A	.25 or less
Class B	more than .25 but less than 10 acres
Class C	10 acres or more, but less than 100 acres
Class D	100 acres or more, but less than 300 acres
Class E	300 acres or more, but less than 1000 acres
Class F	1000 acres or more, but less than 5000 acres
Class G	5000 acres or more

California Federal Incident Management Team **Operating Guidelines**

I. Mission Statement

The mission of the California Federal Interagency Incident Management Teams (IMTs) is first and foremost to provide for firefighter and public safety. In addition, the IMTs are to provide Agency Administrators with organized, highly skilled and qualified personnel to implement land management based objectives on wildland fires. All hazard incidents will be supported as appropriate.

II. Purpose and Guidelines

- A. Oversight of the CA IMTs is provided by the California Wildland Fire Coordinating Group (CWCG) through use of this guide.
- B. The CWCG Operations Committee will provide specific direction and guidance to the IMTs on an ongoing basis.
- C. IMT status, availability, and mobilizations are coordinated through the Northern and Southern California GACCs.
- D. Team workshops may be held prior to each fire season to orient, inform, educate, and train team members. These workshops also support the development of team cohesion, and provide an opportunity to develop standard operating procedures for the team.

Agency Administrators are invited to participate during these workshops. They may communicate any specific issues or concerns they have during their participation at the team meetings. If unable to attend they are asked to communicate in advance through their agency representative on the CWCG.

III. Expectations of CWCG for CA Federal Incident Management Teams:

- A. Type 1 IMTs will have team membership from throughout both geographic areas. Type 2 IMTs will include membership primarily from within the geographic area but can include both.
- B. Team members from out of the California geographic areas will follow their home geographic area's process for out of GACC nominations.
- C. IMTs are both a National and California resource with national commitment expectations.
- D. Teams will ensure that safe operations are maintained during the entire incident, with special emphasis to safety during the transfer of command.
- E. IMTs will meet mobilization criteria as referenced in the CA Mobilization Guide.

- F. IMT assignments are generally up to 14 days, but may be extended.
- G. The hosting agency administrator should coordinate and interact with the Incident Commander and provide guidance utilizing a delegation of authority.
- H. As appropriate, and in coordination with the unit Fire Staff, IMTs will provide opportunities for local unit personnel to serve as trainees on the incident.
- I. The IMT rotation covers all 12 months of the year. When IMTs become unavailable, it is the IC's responsibility to work with their respective GACC regarding the team status.
- J. When two of the SoCal Type 2 IMTs have been mobilized, the GACC will attempt to mobilize an out of area team before going to the third SoCal Type 2 IMT in order to maintain staffing levels of the agencies/departments that provide individuals for the SoCal IMTs.
- K. Each IMT that is deployed is required to submit a copy of the Incident Narrative to the GACCs within two weeks of the closeout of the incident (see XIV. Incident Closeout).
- L. All IMTs are responsible for developing Incident Emergency Plans. These plans will be identified in the Incident Action Plan for the purpose of managing unforeseen incidents, including severe accidents that require a rapid response. For additional guidance, refer to Interagency Standards for Fire and Aviation Operations, Chapter 7 pp 14.
- M. The IC is expected to immediately address conduct and performance issues of team members.
- N. Team performance evaluations will be based on the 2013 CWCG evaluation template and be presented in conjunction with the delegation of authority.
- O. CWCG provides oversight to the IMTs and reserves the right to approve team complement.
- P. Individuals who wish to apply as an official IMT member for out-of-California IMTs will be approved on a case-by-case basis by the CWCG. These applicants must notify the chair of the CWCG Operations Committee who will be in contact with the out-of-California GACC Operations committee with an approval or disapproval to participate.

IV. Selections and Qualifications

- A. All California IMTs are required to apply electronically through the Incident Command Application System (ICAP). Instructions on how to obtain passwords and database access will be published annually.
- B. All IMT members must meet one of the following agency specific requirements: NWCG 310-1, or California Incident Command Certifications System (CICCS), or FSH 5109.17, or CAL FIRE 4039 qualification systems. Additionally, there may be agency/department

qualification requirements that are more stringent than the documents above. Successful completion of S-520 Advanced Incident Management or the equivalent Complex Incident Management Course (CIMC) is required for Type 1 level certification.

- C. Individuals that are interested in being considered as an Incident Commander (IC), a Deputy Incident Commander (DIC), or an Incident Commander trainee for CWCG sponsored IMTs will need to follow this process.
 - a. Access the CWCG website and review the application process requirements
 - b. If the requirements are met, submit the application in the ICAP system by the closing deadline in November.
 - c. After reviewing the applications submitted and/or conducting interviews, the CWCG Operations Committee will make recommendations to the CWCG Board of Directors.
 - d. The CWCG Board of Directors will make the final selections.
- D. Current ICs will have the opportunity to provide input to the CWCG Operations Committee when selecting Deputy ICs and IC trainees. Selection of other IMT members will occur at the annual IMT selection meeting by the ICs and their staff in conjunction with the CWCG Operations Committee and CA Training Working Team.
- E. Individuals may be assigned to only one Interagency Incident Management Team at a time; this includes both in and out of GACC IMTs.
- F. All CA IMT rosters will be approved by the CWCG, through the CWCG Operations Committee after the team selection meeting. The ICs will provide the approved standardized team rosters to the respective GACCs for use as the official team roster for year.
- G. CWCG will only accept Incident Commander Applications from personnel within the CA Geographic Area.
- H. IMT applicants who are out of GACC will be considered on a case-by-case basis by CWCG; first priority will be given to California resources.
- I. IMT members must reapply if one of the following conditions is met:
 - The individual's tenure was completed
 - All trainees
 - All Administratively Determined (AD) employees
 - Trainee applying as a newly qualified member
 - Current IMT member who is changing a position within the IMT
 - Employee who has changed agencies
 - Out of California resources; All applications from outside of the CA Geographic Areas are required to follow their sending Geographic Area protocols and will be approved by CWCG on a case-by-case basis.
 - Anyone not identified on the team's previous year official roster
- J. It is the responsibility of the Incident Commanders to notify the selected applicants.
- K. An open and continuous application process will be used for Incident Commanders, Deputy Incident Commanders, Incident Commander Trainees, and all Command and

General Staff positions. If a vacancy occurs for one of these positions after the initial selection process, the position can be filled from the available pool of applicants. This would be considered a permanent change to the team's roster **for the remainder of that year**. This position will not be a permanent member of the team, and will only hold the position until the next year's selection process. During the following year's selection process the applicant may compete for a permanent position on the team.

V. Team Oversight

- A. IMT configuration will follow the National standard; any variation from this configuration is at the discretion of the requesting unit.
- B. Each California IMT will provide a written team succession plan to the CA Operations Committee annually by June 1. The suggested format will be disseminated to the ICs during the team selection meeting.
- C. The CWCG Operations Committee has the responsibility to manage the CA IMTs and implement the direction from CWCG. This committee will serve as the IMTs primary point of contact.
- D. An Incident Commander will be assigned as the representative to the Operations Committee for a period of one year. This IC will be the designated host team IC for the following year IMT workshop. This time period will be from the week after the IMT Workshop and conclude when the workshop is complete. See section XVI for IMT workshop rotation.

VI. IMT Evaluation

- A. Units will utilize the CWCG standard IMT evaluation form.
- B. IC will submit a copy of the IC/team evaluation to the hosting GACC of the team, attention to Assistant Director for Operations (USFS) within two weeks of the closeout.
- C. If a an evaluation is submitted which needs immediate attention, the Assistant Director for Operations (USFS) will notify the CWCG Operations Committee, who will work with the CWCG Board of Directors to address the issue. Otherwise, the Assistant Director for Operations will send the evaluations to the chair of the CWCG Operations Committee by December 30th.
- D. Final evaluations will be reviewed by CWCG Operations Committee to address performance issues and maintain consistency in the evaluation process.
- E. GACCs and/or CWCG Operations Committee will make site visits, and attend closeouts whenever possible.

VII. California IMT Composition

- A. Under CWCG, IMT membership consists of interagency employees representing all NWCG agencies, including federal, state, local, and tribal, agencies.
- B. No team member shall be supervised, either directly or at a higher level, by a relative or member of their household.
- C. Federal agency employees should be used whenever a permanent IMT vacancy occurs. Priority for positions/vacancies:
 - 1. Federal agency
 - 2. Full time State/Local agency
 - 3. Administratively Determined employees
 - 4. Supplemental or local government part-time employee
 - 5. Contract
- a. ADs or Supplemental Fire Department Resources should have an Agency/Fire Department trainee assigned to the position.
- b. Deviations from the above priorities require a written justification that addresses why a federal applicant was not selected (e.g. on-going succession planning).

VIII. Tenure

- A. Commitment to all California Incident Management Teams is three years. However, trainees, ADs, and out of GACC resources have a one-year tenure (see section IV. H).
- B. Federal IMT members, including ICs, who change jobs or retire, who then become employees of state/local agencies or move to an AD position are required to reapply to incident management teams.
- C. When an Incident Commander vacates the position outside of the normal selection period, changes their employment status from one Federal agency to another Federal agency, or becomes employed by a state/local agency or moves to an AD position, the team will be kept intact. The Deputy Incident Commander can become the new Incident Commander until a formal selection process can be initiated asap. See section IV.K for additional information regarding mid-year IC selections.
- D. Vacancies for IMT members (not including the IMT IC, Deputy IC, and other C&G Staff) that occur after the application period may be filled temporarily for the remainder of the year with qualified personnel. The employee will be required to officially apply during the next IMT application period.

IX. Trainees

There is no longer an official designation for mentees on the California IMTs. All individuals who are pursuing qualifications will be considered trainees only. Trainees are individuals that have met all agency/department requirements.

- A. Once the Trainee has completed their agency/department requirements and gained certification, they must apply the following year through the normal IMT application process.
- B. Trainees may be assigned or reassigned to other IMTs as team needs or conditions require. This will occur in consultation with Incident Commanders and CWCG.
- C. Every opportunity should be made to provide for quality assignments; IC's should work towards a 1:1 ratio on Trainers to Trainees.
- D. Type 2 Trainees may be evaluated on elements within their position task book while assigned to Type 1 Incidents.
- E. Trainees have a one year commitment.
- F. Trainees selected for IMT positions are not necessarily affixed to the position. Trainees for Command and General Staff positions will be managed by CWCG.
- G. CWCG will manage a trainee pool, which allows the IMT to pull trainees from the pool if the designated IMT trainees are not available. This list will be provided to the GACCs, who will then manage the pool throughout the season.

X. Mobilization / Replacement

- A. If a team is mobilized as a short team, the remaining members of the team configuration will be kept on-call for twenty-four hours. After that time, the additional members will be released from call and be available for other assignments.
- B. Incident Commanders may initiate recommendations for removal of team members through a draft letter to CWCG. The Incident Commander will draft the letter (with supporting justification) for review by the CWCG Operations Committee chair and the employee's agency/department representative to the Operations Committee. CWCG Chair will finalize and forward the decision to the employee's organizational representatives (for example; Forest Supervisor, Fire Chief and or Board Member).
- C. Once the official IMT roster has been approved by the CWCG Operations Committee, it will be sent to the GACCs. The mobilization ROSS roster is up to the IC to manage, in conjunction with the GACC management. The IC has the flexibility to utilize alternates for the ROSS roster if primary members are not available.

XI. Team Rotations

See GACC websites (Intelligence page) and or chapter 60 of the CA Mobilization Guide.

XII. Team Support

The federal agencies will provide financial support for miscellaneous team needs at \$2,000 per year. Financial support is not for personnel clothing, hats, pins, and briefcases. ICs shall submit items for purchase to the agency contact. Agency support will be provided by an identified point of contact:

NPS: Nor Cal 2/So Cal 3

FWS: CIIMT 4

USFS: CIIMT1/CIIMT 3/Central Coast

BIA: Nor Cal 1/So Cal 1

BLM: CIIMT 5/Central Sierra/So Cal 2

XIII. Team Insignia

- A. Teams may establish an insignia for identification. The insignia will not include the names of vendors, or products. Team members may not be forced to purchase or wear such insignia, and agency procurement regulations must be followed.
- B. All team members will wear agency provided insignia necessary to identify their position while on duty at an incident.

XIV. Incident Close Out

At the minimum, each incident will have a close out. The team will provide an agenda and time frames for the close out to all agencies/departments that have been involved with the incident as decided by the IC and host agency/department including the GACC/Dispatch center. The hosting unit or IC should provide a closeout package for the GACC representative, or ensure that a copy makes it to the GACC Coordinator. Close out packages shall be made available to all agencies/departments as determined by the IC/host agency/department.

XV. Annual IMT Management Cycle

Scheduled Event	Date
IC Nomination Announcement	Early October
IC Nominations Due	Early November
IC Selection	Mid-November
IC/Operations Committee After Action Review	November
IMT Nomination	Mid-November

Announcement	
IMT Nominations Due	Late January
IMT Selection	Late February
Selection Notifications	Early March
IMT Workshop	After selection notifications

XVI. CA Annual Incident Management Team Workshop

Host Team Rotation:

Host Team	Shadow Team	Year
SoCal-2	CIIMT-5	2013
CIIMT-5	So Central Sierra	2014
So Central Sierra	CIIMT-1	2015
CIIMT-1	NorCal 2	2016
NorCal 2	CIIMT-3	2017
CIIMT-3	SoCal-3	2018
SoCal-3	CIIMT-4	2019
CIIMT-4	NorCal 1	2020

Appendix A - CA IMT DELEGATION OF AUTHORITY

Date: MM/DD/YYYY
To: XXX, Incident Commander
From: Agency Administrator
Subject: CA XXX Incident Delegation of Authority

Effective at XXX hours on MM DD, YYYY, you are delegated authority as the Incident Commander for the overall management of the CA XXX Incident on the XXX UNIT. This delegation carries with it the full responsibility for managing the incident. You have full authority and responsibility for managing incident operations within the framework of legal statute, current policy, and the broad direction provided in your oral and written briefing materials. You are expected to do a complete and efficient job, while providing for Safety First. Safety will be the number one priority throughout the incident.

I expect open communication during all phases of management under this delegation. Please ensure the immediate notification of any significant concerns, issues or events as they as they arise.

Incident Commander

Agency Administrator

Attachment to Delegation of Authority:

Provide your intent and expectations as a part and parcel of the performance elements and review those with the IC after the initial in-brief is concluded. Take the time to review the performance elements and establish communication expectations during the in-briefing, as the incident develops, and in conjunction with the final performance evaluation process.

How well did the Team accomplish the objectives described in the Wildland Fire Decision Support System (WFDSS) the Delegation of Authority, and the Agency Administrator Briefing?

How well did the Team manage the cost of the incident? Did the team follow agency incident operating guidelines? Were follow-up issues identified and documented for the Agency Administrator i.e.; invoices, OWCP and vendor issues?

How did the Team demonstrate sensitivity to resource limits/constraints and environmental concerns?

How well did the Team deal with sensitive political and social concerns?

Was the Team professional in the manner in which they assumed management of the incident and how they managed the total incident? How did the Team handle transition either to another IMT or in returning the incident the hosting agency?

How well did the Team anticipate and respond to changing conditions, was the response timely and effective?

How well did the Team place the proper emphasis on safety?

Did the Team activate and manage the mobilization/demobilization in a timely and cost effective manner?

How well did the Team use local resources, trainees, and closest available forces?

How did the Team notify the incident agencies regarding triggers for initiating a cost share agreement or large fire cost review? How were those recommendations implemented?

Was the IC engaged and in charge of the Team and the Incident? How well did the IC function and operate as a leader?

How timely was the IC in assuming responsibility for the incident and initiating action?

How did the IC show sincere concern and empathy for the hosting unit and local conditions?

Was the agency administrator or designee made aware that the Time Unit closed out/transitioned per unit operating guidelines? Example: AD time complete per payment center and agency requirements, cooperators given appropriate documents per agreements, OF 288's complete and returned.

Other needs as determined by the Agency Administrator/host unit.
