

## Rocky Basin Rate Database for ISuite 2010

### Instructions for loading RM/GB Master Rate Database for ISuite application Ver. 9.01.02 containing 2010 AD rates

The Isuite master blank database version 9.01.08 contains default standard rates for county and State resources out of range for the RM/GB area. IMT's and users operating within the RM/GB areas for 2010 are asked to use RMGB-2010-AD-Ver9! blank database. This database does not contain any resources or incidents and can be used by ISuite when establishing a new DB and incident. Updates to Isuite version changes will be posted as needed.

Download the RM/GB database .mdf file from EGBCC web site to your Isuite [Program Files\Isuite\Database] database directory.

Search for and select the [RMGB-2010-AD-Ver9!] database file. This will create a file path to the RM/GB blank database file (**pictured below**).

The screenshot shows a dialog box titled "Copy Database" with a blue title bar and standard Windows window controls. The main area is light beige and contains two sections: "Database to Copy" and "New Database". In the "Database to Copy" section, there is a dropdown menu for "Name of Database to Copy", a "Create New Database" button, a text field for "\*Database File:" containing "C:\Program Files\Isuite\Database\RMGB-2010-AD-Ver9!.mdf" with a browse button "...", and a text field for "\*Database Password:" filled with asterisks. The "New Database" section has a text field for "\*Database Name:", a text field for "File Path of New Database:" containing "C:\Program Files\Isuite\Database\", a text field for "\*Database Password:", and a text field for "\*Verify Password:". At the bottom right are "OK" and "Cancel" buttons.

The **password** to the database is the same character sting as the file name.  
( RMGB-2010-AD-Ver9! )

In "New Database" type the database name you want to create for your incident. Use your own unique password for the new database. Click OK. Your new database and incident will now be using the RM/GB blank database with local GACC rates based on ASC State and County invoices for R2 and R4. Document your new database name and password for your incident.
