Swede fire

The 2014 fire season turned out to be slightly below average year for fires and well below average for acres burned. The first fire of the season occurred on April 25th and the last fire on November 4th. Total number of fires, all agencies this

season was 186, of those 152 were human caused and 34 lightning. Total acres all agencies was 3325. The 5 year average for number of fires and acres is 206 fires for 27123 acres for all agencies with in the Cody Interagency Dispatch Center area.

The dispatch center supported several extended attack fires, including 1 Type 3 incident (Roane) and a long term fire (Swede). The Swede fire burned 1529 acres and was managed as a long term resource benefit fire.

The Cody Interagency Dispatch center began mobilizing resources in early May. The dispatch center mobilized equipment, crews, aircraft, overhead and supplies totaling 997 resource orders processed in support of local incidents as well as incidents in Wyoming, California, Colorado, Montana, New Mexico, Idaho, South Dakota, Alaska, Washington, Nevada, Oregon, Utah, Texas, Arkansas and Arizona.

Expanded Dispatch was in place for less than a week for the Roane Fire.

The Dispatch Center was not fully staffed, the BIA position continues to remain vacant.

Two FS seasonal dispatchers were hired and there were "broken" firefighters in dispatch for most of the season which proved to be very advantageous to both the center and the employee. 504 Incident Actions were processed this past year which included wildfire appropriate management responses, prescribed fire support, public assists, all risk incidents, flight requests/following for: the USFS Regional Forest Health

Flight, USFWS Grizzly Bear Survey, USFWS Elk & Sheep Survey, USGS Stream Gauge Inventory, Wind River Grizzly Survey, BHF Beaver Survey, WSFD Forest Health Survey, several Wildhorse flights, Wilderness, Radio Repeater Maintenance, and Sage Grouse program flights.

On the Horizon, the dispatch center staff continues to represent and support the dispatch community at the area and national level with personnel involved in training, ROSS Reports Management Board, WildCAD, National Dispatch Training Steering committee, and assisting centers across the board with reports, web pages, and computer programs.
